

NEXTA™ SECURE

NEXTA™ SECURE is a microbial biostimulant that can help unlock the full potential of phosphorus fertilizer applications. The active ingredient is a plant growth-promoting bacterium that helps release soil-bound phosphorus for plant uptake.

PRODUCT FEATURES/BENEFITS

MAXIMIZE

Unlocks soil bound phosphorous to help crops reach their full potential

PLANT HEALTH

Increased root stimulation allows crops to reach more water and nutrients for overall improved crop vigor

FLEXIBLE

Versatile formulation allows for a low use rate, tank-mix flexibility, and extended shelf life

ACTIVE INGREDIENTS

Bacillus amyloliquefaciens
Strain FZB45

RECOMMENDED FIELD APPLICATIONS

Soil

RECOMMENDED RATE & TIMING

- **Corn:** 3.5 oz/A at Planting
- **Soybeans:** 3.5 oz/A at Planting

CONTAINER SIZE

- 2 x 2.5 gal jug
