MSRP:	\$12	\$4	\$12	\$7	\$3	\$6

RCA Platinum

Fungicide + Insecticide Seed Treatment – \$12

Foundational seed protection that helps defend seedlings from early-season pests and disease during establishment.

L-120+

Consistent Early Nutrient Availability – \$4

A premium inoculant that supports nodulation and nitrogen fixation with extended on-seed stability.

NEXTA™ >> SHIELD

Built for Tough Early Conditions – \$3

A nutritional seed treatment that helps soybeans manage early-season stress and maintain growth momentum.

ILEVO®

Half – \$7

A reduced-rate treatment designed for soybean cyst nematode control in fields with variable or lower disease pressure.

Full – \$12

Provides maximum root protection in fields with known soybean cyst nematodes and Sudden Death Syndrome.

Verone®

Biological Root Support – \$6

A biological seed treatment that supports plant health through plant growth promotion, bio-nutrition, fungicidal properties, and nematode control. Helps enhance early root development and complements other seed treatment programs.
