ABOUT US

Bayer Interior Woods has been providing exceptional interior solutions for the cabinetry and home building industries since 1994. From our 100,000 sq. ft. facility in the heart of central Minnesota, our team of skilled craftsmen creates distinctive, custom wood products designed to elevate your business and set you apart in the marketplace.

Our products are available through our elite partner dealers. By utilizing our exclusive multi-tier partnership program which includes customized training, design services, custom product offerings, large scale project assistance, marketing and sales support, our partner dealers are ensured continued success. When you partner with Bayer Interior Woods, you gain more than products; you gain a competitive edge.

Our continued success comes from our unique ability to develop working partnerships with the artisans and craftsmen of the cabinet industry. By providing our partners with non-traditional business assistance, unparalleled product offerings and a support team of talented experts, we have redefined the manufacturer-to-dealer relationship.

PRODUCT OFFERING

Bayer Interior Woods provides premium custom cabinetry in both framed and frameless construction, giving dealers the versatility to meet a full range of customer preferences. Our framed cabinetry delivers the timeless appeal of traditional American craftsmanship, featuring durable face-frame construction, classic proportions, and exceptional structural integrity. With a wide selection of door styles, materials, finishes, and custom options, our framed line offers the warm, handcrafted look homeowners love paired with the consistent quality and reliability dealers depend on.

For clients seeking a more contemporary aesthetic, our frameless cabinetry offers clean lines, full-access interior capacity, and sleek European-inspired design. Engineered for precision and modern functionality, our frameless line maximizes space efficiency while maintaining the same high standards of craftsmanship found across all Bayer Interior Woods products.

With robust customization, on-trend materials, and coordinated interior solutions, our cabinetry lines empower dealers to deliver beautifully tailored designs for any style, project scale, or price point.
