ABOUT US

COMPANY PROFILE

Established in 1995, Brown Steel is a trusted Queensland steel company with **over 30 years of experience** delivering structural steel for commercial and industrial projects across Queensland and Northern New South Wales. For our clients, this means you're partnering with a team that has completed hundreds of projects, understands the challenges of construction, and has the experience to keep your project moving safely, efficiently, and with fewer risks.

Brown Steel has maintained **AS/NZS 5131 CC3 certification for more than 7 consecutive years**, demonstrating that our systems, processes, workmanship, and quality controls are independently audited to some of the highest standards in the industry. All welding personnel are trained and qualified to **AS/NZS 1554** and **ISO 9606.1** standards.

We proudly work with leading builders including **John Holland, Watpac, Icon, Mainbrace, ADCO, Lipman, FKG, and Hutchinson Builders**, delivering steel structures for hospitals, schools, stadiums, community facilities, transport infrastructure, and large-scale commercial developments.

QUALITY ASSURANCE, HEALTH SAFETY & ENVIRONMENT

Brown Steel's independently certified Quality Management System gives clients confidence that every project is delivered to the highest standards of quality, compliance, and traceability. **Certified to ISO 9001 and AS/NZS 5131 CC1, CC2 & CC3**, our systems help minimise defects, reduce rework, and ensure compliance with Australian Standards. Our audited systems help protect our clients, projects, and reputation. With comprehensive procedures covering **risk management, SWMS, incident reporting, environmental compliance, sustainability, and modern slavery obligations**.

Brown Steel actively reduces project risk while supporting safe, compliant, and responsible project delivery, enabling us to back up our clients with complete large-scale compliance requirements.

SERVICES

DRAFTING

Brown Steel offers a full Steel Detailing Drafting service.

FABRICATION

Capacity

Yearly output – 3000t plus

Range of sizes – Various Sizes from Flat Bar, SHS, Plate to 1200WB Welded Beams

Production Equipment

2 x 5t Overhead Cranes	Bandsaw x 1	19 x WIA Welding Machines
1 x Hydraulic Press	1 x 80t Gekka Punch	Cold Saw
2 x Linishers	2 x Shears	

Logistics

2 x prime movers	2 x medium rigid trucks	2 x 7 tonne forklift
3 x extendable trailers	1 x drop deck trailer	2 x flat top trailers
4x Utility Site Vehicles		

ON-SITE INSTALLATION

On-site installation and erection are carried out by reputable, long-term contracted riggers with extensive industry experience, enabling Brown Steel to ensure that all steelwork is erected safely, efficiently, and in accordance with project specifications and timelines.

Brown Steel's qualified Site Supervisors provide hands-on oversight throughout each stage of the erection process, coordinating closely with client representatives, suppliers, subcontractors, and site personnel to ensure smooth project delivery. Their responsibilities include monitoring safety compliance, managing site logistics and scheduling, resolving technical and operational issues, and ensuring that all installation activities are completed in accordance with engineering requirements, quality standards, and applicable regulations.
