

## Sustainability Policy

Brown Steel, a member of the Australian Steel Institute and part of the Structural Steel Fabrication Australian Community understands that due to its structural efficiencies, durability and recyclable capabilities steel is a viable sustainable material of choice, and its demand is on the rise.

Brown Steel is committed to being part of the sustainable solution through the following initiative compliance and KPIs:

- Environmental Sustainability Charter Signatory – ASI
- Greenstar Environmental Rating Certified – ASI
- Source majority of Steel from (WSA) World Steel Association Climate Action Members
- Source majority of Steel & Fasteners from ISO 14001 Certified Suppliers
- Support Local Material and service providers to minimize carbon footprint in Logistics.
- Recycle 80% - 90% of Quarantine Steel wastage.
- Implement Recycling of other consumable waste and purchase recycled products where possible.
- Monitor Energy Consumption and implement strategies infrastructure improvements where possible to reduce usage.
