Introduction

Gautruss is a leading roof truss design and manufacturing business owned and run by a dynamic team of experts in their field.

Collectively, they have more than 80 years' experience in roof truss design and manufacture, and were some of the first pioneers in the pre-fabricated truss industry.

About

Gautruss is a company that excels in the innovative design and manufacture of roof trusses. We strive to be the leading supplier to the building industry; we also ensure that we are ahead of our competitors in product offering and design. We pride ourselves in exceeding our customer's requirements and expectations first time, every time.

Vision

Our vision is to maintain a work environment where all employees can live and grow through open communication channels with management and skills education. This will in turn flow through to our customers through friendly, prompt and efficient service providing an indefinite, sustainable business foundation.

Mission

Our mission is to be the number one truss design and manufacturing company in the country and to be seen as the company that offers superior service and satisfies our customer's every requirement in time, every time and as economical as possible.

Values

Service: All customers receive superior service from our staff no matter the value or size of the contract. Manufacturing: Each and every roof will be manufactured to SABS. Design: Every quote will be designed in accordance with Unilam standards and regulations. Staff: All employees will always act with honesty and integrity.

SERVICES & PRODUCTS

Our team of designers are fully **qualified** by Unilam. And we fully **guarantee** our designs and roofs providing all instructions regarding erection and bracing have been followed

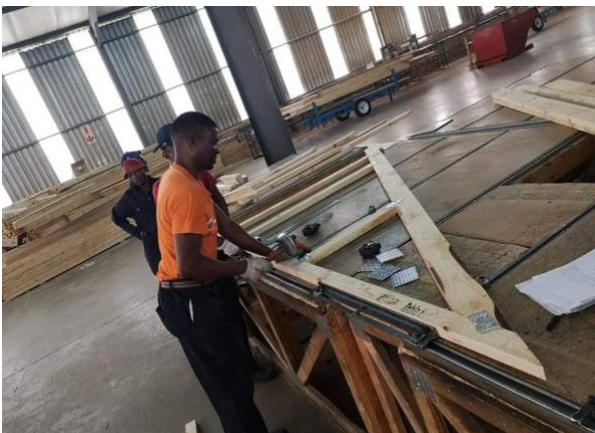

Comprehensive quotes, meticulously designed to ensure affordability and the highest level of safety (SABC Approved manufacturing process).

Complete roof structure delivered to site at no extra charge in the Gauteng area.

Detailed working drawings accompany the roof setting out exact procedures for the erection and bracing of your roof structure.

After sales service with regards to any queries or on-site inspections.

Featured Projects
