

Video-Enhanced Study Guides

These Video-Enhanced Study Guides are Small Group studies that incorporate video teaching alongside guided discussion. The videos help introduce topics, provide teaching moments, and engage group members visually, while leader and participant guides support meaningful conversation.

These studies are especially helpful for:

- Groups that enjoy structured guidance
- Groups with mixed levels of Bible familiarity
- Groups looking for teaching support alongside discussion

Because these studies often include multiple components (DVDs, leader guides, participant materials), groups should contact Wesley for help selecting, scheduling, and using these resources effectively.

Available Video Studies
