

REJUVENATION TREATMENT PACKAGE

ADD **6-18** YEARS
TO YOUR ROOF

- Reactivates and seals the shingles down
- Helps protect against the sun, wind, rain, and hail!
- All natural solution hold granulars in place
- Helps you avoid the cost of a roof replacement

SIGNS YOUR ROOF IS AGING...

When you notice any of these 4 signs, your shingles are drying out, losing natural oils, and becoming brittle.

- **Granule Loss – You'll see this in your gutters; it's a sign your shingles are drying out and losing protection.**
- **Cracking & Brittleness – This leads to leaks and wind damage.**
- **Curling or Lifting Shingles – Can allow water intrusion and shorten lifespan.**
- **Exposed Fibreglass – An early sign of material degradation.**

EXAMPLES...

Loss of flexibility and strength.

Cracking or Splitting

Exposed Fibreglass

Granular loss

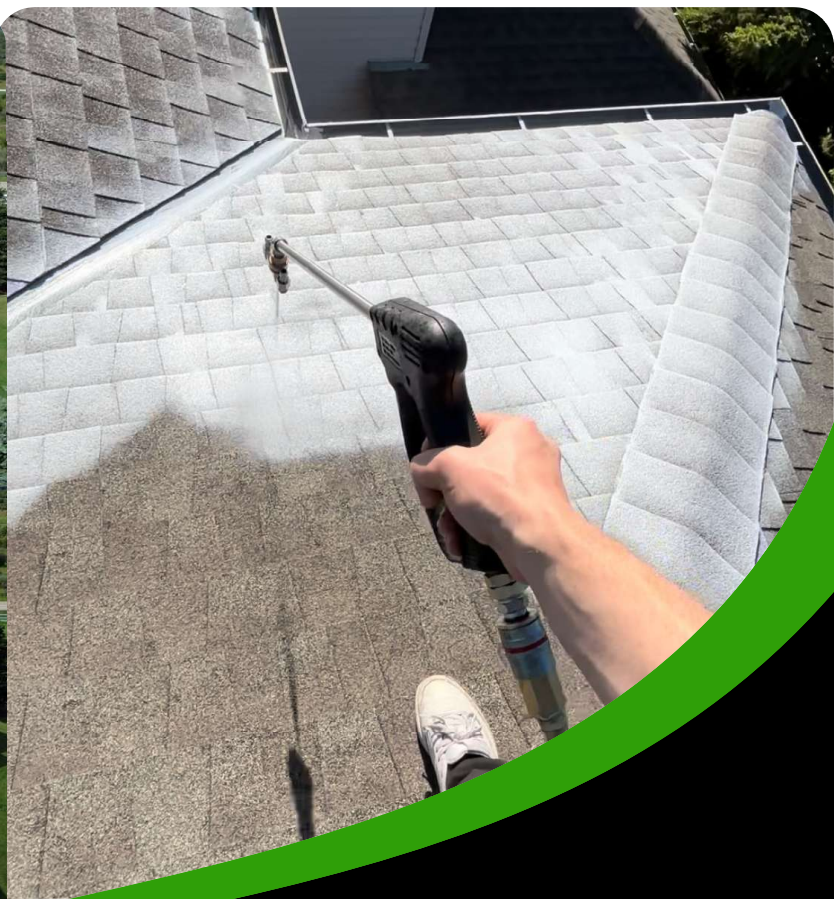

Granular loss in gutters

THE SOLUTION...

**Avoid replacing and add the oils back into your roof!
The best part? Every treatment comes with a 6-year
guarantee!**

- ✓ **Restores Flexibility – Replenishes lost oils to keep shingles strong.**
- ✓ **Seals & Strengthens – Prevents cracking, lifting, and water damage.**
- ✓ **Reduces Granule Loss – Protects your roof's coating for years.**
- ✓ **Protects against natural elements –**
- ✓ **Enhances Curb Appeal – Restores colour for a like-new look.**
- ✓ **6-Year Guarantee – Proven to extend your roof's life.**

About Rejuvenation

Maintain it, Don't Replace it!

The Problem

**Asphalt shingles naturally lose essential oils as they age
This makes them brittle, cracked, and vulnerable to:**

- **Wind**
- **Rain**
- **Hail**
- **Sun damage**

The Solution: Roof Rejuvenation

- Non-toxic, soy-based formula that penetrates deep into shingles
- Restores flexibility and re-bonds protective granules
- Shields your roof against leaks, storms, and further deterioration
- Adds up to 18 years of life without replacement

Why Homeowners Choose Rejuvenation

- Saves thousands compared to replacement
- Completed in just one day — no mess, no noise, no disruption
- Environmentally responsible: keeps shingles out of landfills and reduces demand for new materials

**Protect your investment. Protect your home.
Protect the future.**

TESTIMONIALS

★★★★★ See what our customers have to say

Dora Pena

★★★★★ 2 months ago

The young men who came to my home were early, friendly, informative, and very professional. They took the time to explain the product and process, and showed me drone footage of the work. I would highly recommend them, and am glad I was able to add years of life to my roof.

Kaeden and Ryan from Green Roof Revival did an excellent job on my roof. I was very impressed with the care and attention they put into their work, and result look great. I highly recommend them and their product.

★★★★★ 8 months ago

Good experience with the team at GRR.

We are getting solar for our home and our roof is not of an age where we want to do a full replacement beforehand. Rejuvenation was a great alternative.

★★★★★ 11 months ago

Excellent customer service, very professional. My husband and I were looking for ways to put off replacing our shingles and didn't even know this option existed. Great work, 10 out of 10 Recommend.

★★★★★ 9 months ago

Great service from Ryan and his crew very polite and a great job done very happy with the end result. Five stars from us. Thanks Ryan

★★★★★ 2 weeks ago

Green Roof Revival came out and did an amazing job for us very professionally, friendly, cleaned up the yard. So impressed with them I recommend them to my neighbours which lead them to have additional work in the area. We would highly recommend them

Green Roof provides a service that makes sense from economic and ecological perspectives. They communicate well, are conscientious in recognizing and repairing roof defects and are respectful of property. It was a pleasure doing business with Green Roof Revival.

★★★★★ 2 months ago

What a fantastic product! The foot stood out was the customer service. Took time to explain in detail what their product did and why it could help me. No high pressure sales tactics. Just honest information?. This is something I think everyone should have. Thanks for saving me tens of thousands of dollars!

Excellent Service

I recently had the pleasure of working with a Green Roof Revival, I couldn't be happier with the results. The team was professional, knowledgeable, and patient in answering all my questions. They explained the roof rejuvenation treatment process thoroughly, which put my mind at ease.

★★★★★ 9 months ago

Just had my house and garage treated. Very professional and did a couple repairs on roof for me as well. Love the look and would highly recommend Green Roof Revival!

Mark's Success Story: Protecting His Roof Before Going Solar

Mark had an 18-year-old roof and was ready to invest in solar panels. But before making the switch, he faced a major concern—would his roof last as long as his solar panels?

Replacing the roof would have cost him thousands, but ignoring the problem could mean ripping off new solar panels in a few years for a costly re-roof. That's where roof rejuvenation came in.

Mark got his roof treated & sealed, restoring its flexibility, sealing cracks, and adding years of life—giving him the solid foundation he needed for solar. Now, his roof will last as long as his panels, and he avoided a massive replacement bill.

That's exactly why we're partnered with solar companies across Ottawa —roof rejuvenation just makes sense before solar.

FAQ

How long does it last?

- Each treatment extends your roof's life by at least 6 years. If the roof is in good shape when applied one treatment could be all you need. The treatment can be reapplied every 6 years for continued protection.

Is it safe for my plants and pets?

- Yes. The product Fresh Roof uses is ECO-Friendly and 100% safe for people,

What are the weather requirements?

- **Temperature:** It must be above +5 degrees for application.
- **Rain:** Quickly penetrates the shingle's top layer and begins soaking in typically 1 hour. There is no need for concern about it being washed away by the rain once it has been absorbed by the shingles.

How do I know my roof qualifies?

If your roof is 3-24 years old and shows signs of aging (granule loss, minor cracking, or drying out), it's likely a great candidate. We provide a free inspection to confirm.

Has this product been tested?

Yes! It's scientifically tested and proven to restore flexibility, reduce granule loss, and improve durability. Thousands of homeowners have used it to avoid early roof replacement.
