

SCUBAPRO

RETAIL PRICE LIST

2023

1963 The MK2 is introduced, considered the most reliable 1st stage in diving.

1965 The Jet Fin is introduced, bringing in a new approach to efficient underwater propulsion.

1971 The dive industry's first Stabilizing Jacket, known as the "Stab" Jacket, revolutionises the BCD market.

1972 SCUBAPRO's Quick Disconnect Inflator enables divers to use the air from their tanks to fill their BCDs.

1979 The AIR2, the first alternate inflator regulator, integrates the BCD inflator with the octo reg.

1981 The Super Cinch Tank Band cam action buckle system redefines tank security.

1985 SCUBAPRO introduces the first 2nd stage to the diving industry to feature an adjustable balanced valve.

1986 The G250 enters the diving scene, and quickly becomes the most imitated 2nd stage in diving.

1987 SCUBAPRO/Uwatec's first dive computer, the Aladin Pro, quickly becomes a diver favorite due to its convenient wrist-mount design and easy-read screen.

1990 Diving's first frameless mask becomes a favorite with professional divers the world over.

1996 The Seahawk becomes SCUBAPRO's first weight-integrated BCD.

1998 With the Venus SCUBAPRO introduces its first back-inflation BCD designed specifically for women.

2007 The Galileo line of technologically advanced wrist-mount dive computers is introduced.

2009 The A700 2nd stage is introduced, offering effortless inhalation and easy exhalation in a precision-handcrafted, full-metal package.

2010 The award-winning Seawing Nova fin quickly becomes the industry standard for fin performance.

2015 Patented Extended Thermal Insulating System (XTIS), along with other freeze-inhibiting internal components and coatings, transform the MK25 EVO into diving's premier high-performance cold-water regulator.

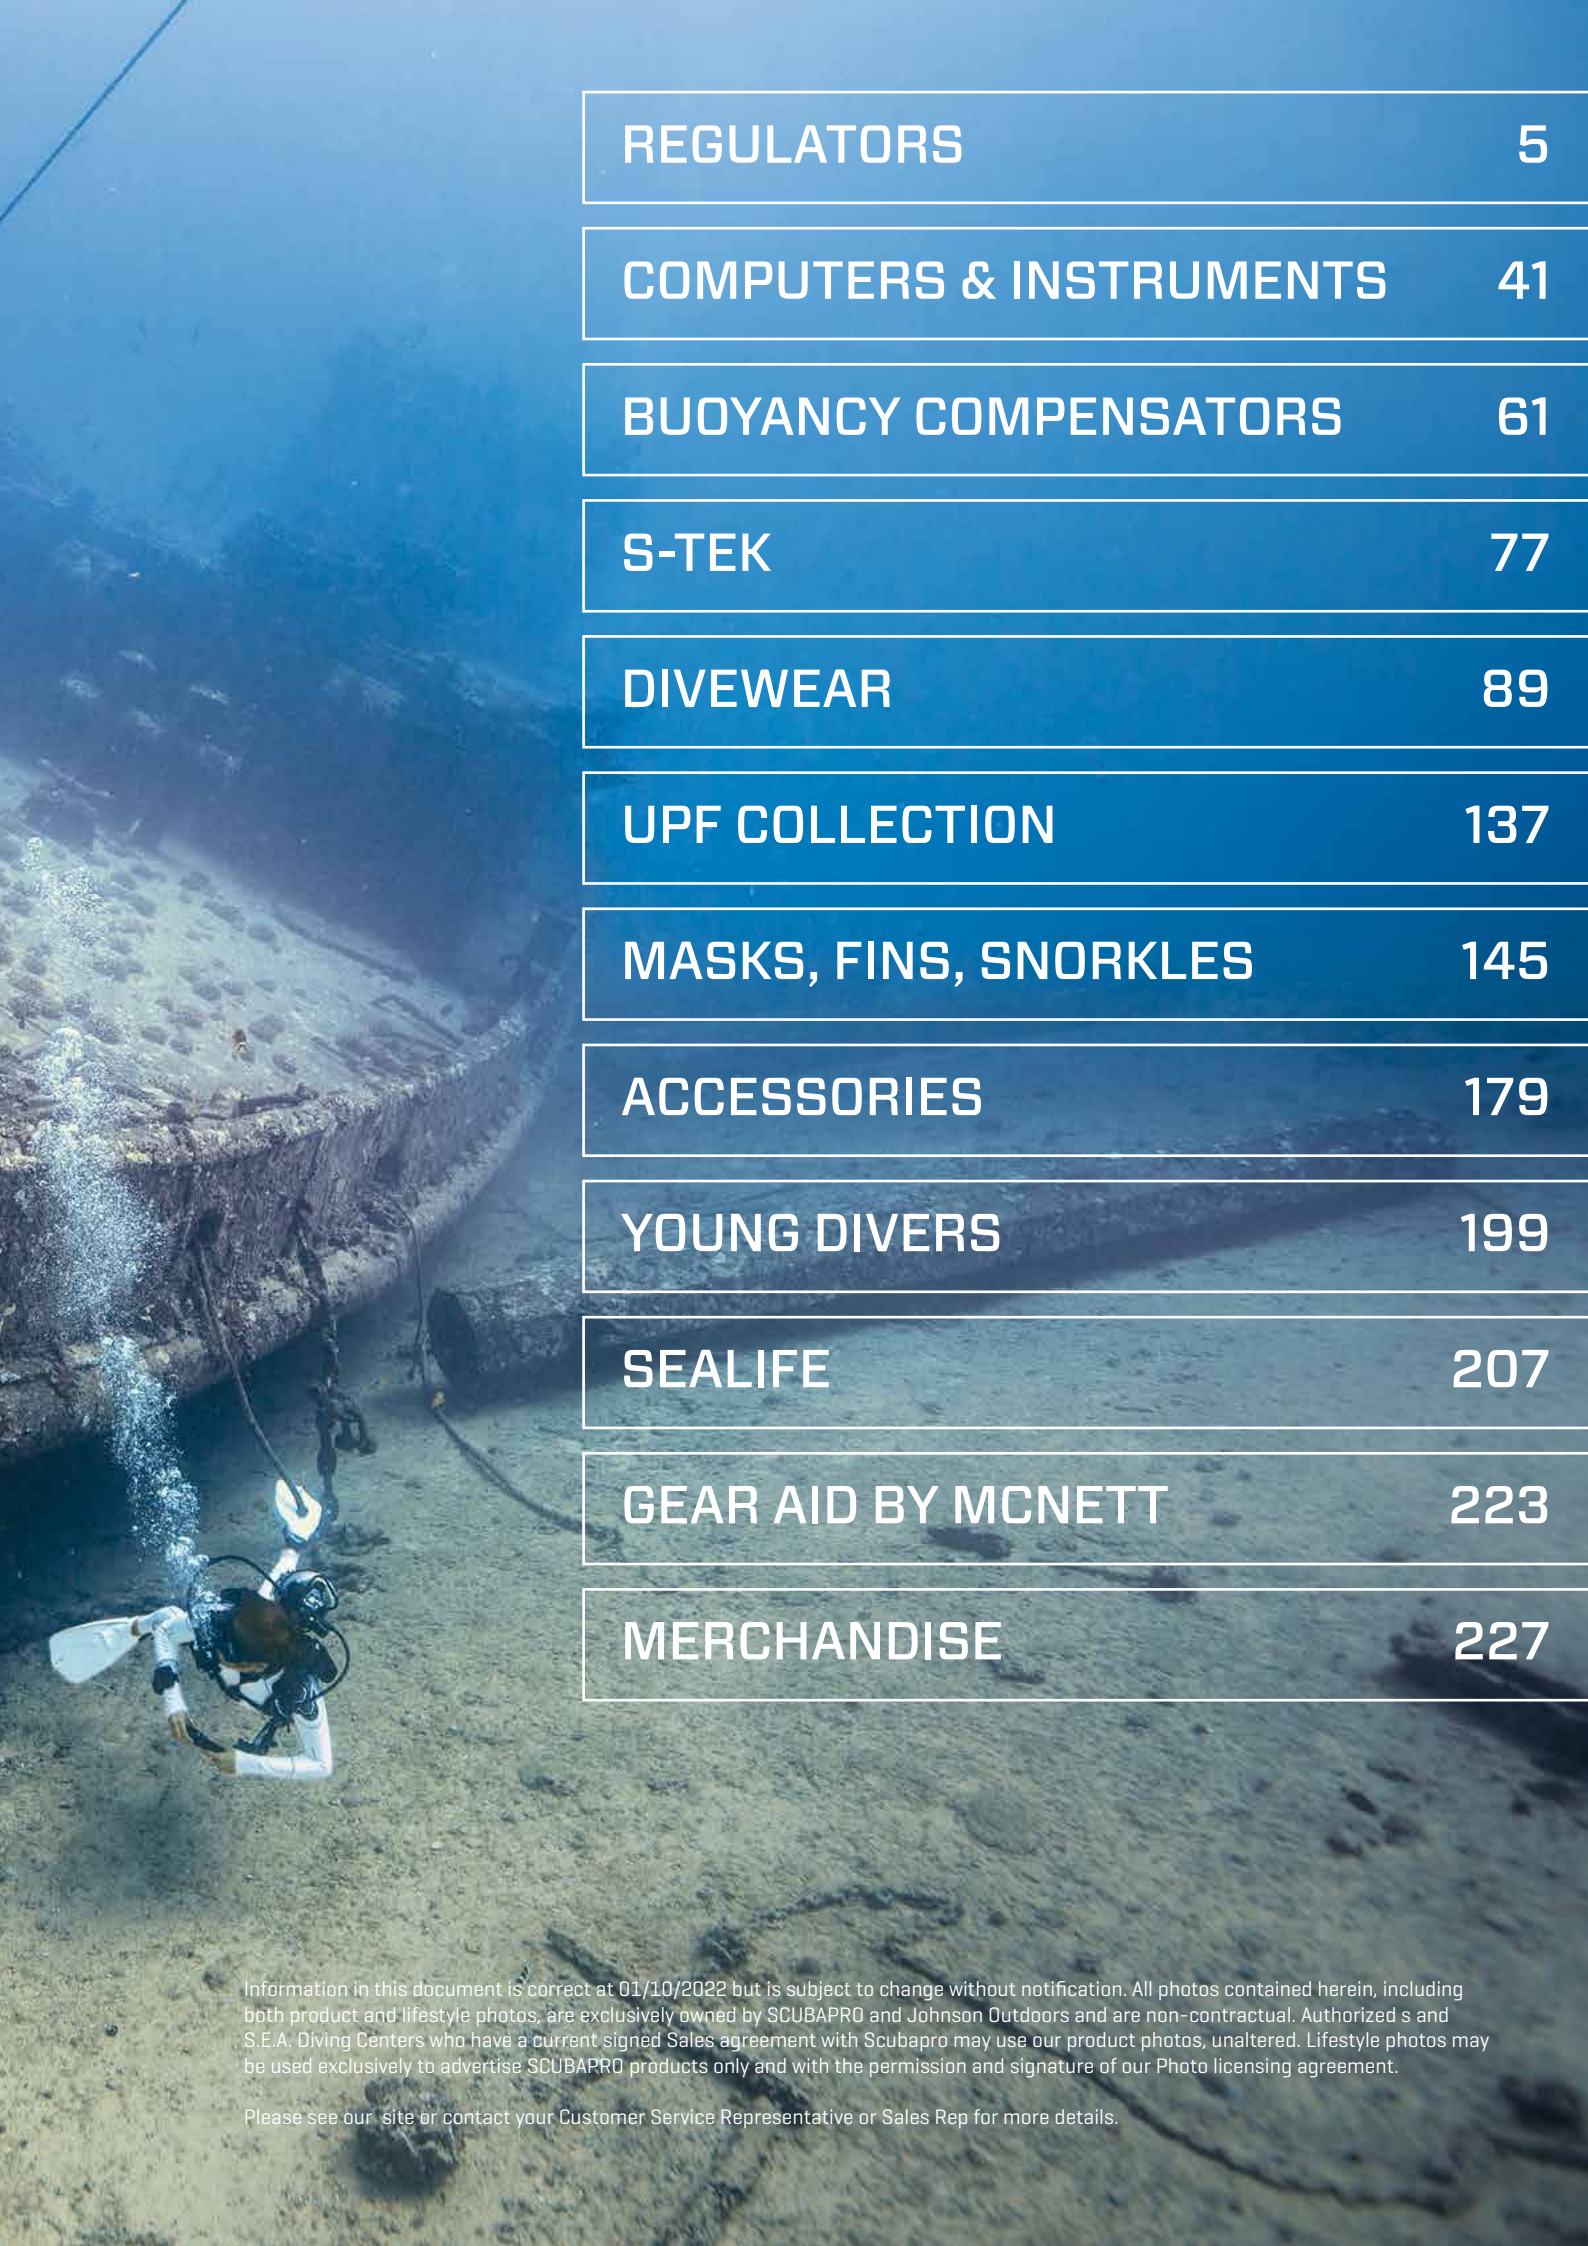

2017 The HYDROS PRO, diving's most modern, innovative BCD, is introduced. The full-colour Galileo G2 wrist-mount computer marks the birth of a new generation of advanced dive computer technology.

2018 The G2 Console is introduced, offering advanced G2 technology in a streamlined console design.

2019 The revolutionary mask-mounted, hands-free Galileo HUD, with its virtual floating heads-up display, delivers a dive computer experience unlike anything else in diving. The "boot-fit" concept of the Go Sport fin ushers in a new wave of innovation in scuba fin design.

2022 The next-generation Seawing Supernova fin is introduced as a powerful and innovative step up from the popular Seawing Nova in design, performance, fit and versatility.

A FEW INNOVATIONS THAT HAVE CHANGED THE WAY DIVERS GO DIVING.

MK25 EVO/A700 CARBON BLACK TECH

All the features and breathing performance of the MK25 EVO/A700 with the addition of a Black Tech coating that protects both stages against the ravages of salt water and corrosion. This rugged coating includes an inner layer of nickel (FDA approved) and an outer glossy DLC (Diamond Like Carbon) coated body. It lends a technical look while maintaining a sleek scratch-resistance appearance that lasts. The second stage's handmade full carbon fiber front cover provides excellent shock resistance along with 32 grams of weight savings compared to the standard metal cover.

SCUBALAB TESTER'S CHOICE 2016

XTIS EXTENDED THERMAL INSULATING SYSTEM

FIRST STAGE

- Air-balanced flow-through piston in a nickel plated brass body coated with DLC process, provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximise hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- Available in either 232bar INT or 300bar DIN configurations
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Airflow at 200bar: >8500 l/min
- Intermediate pressure: 9.2-9.8 bar

SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- DLC Black Tech coating on the metal body offers anti-scratch resistance and a glossy black look
- Handmade full carbon fiber front cover provides excellent shock resistance, plus the 32-gram weight savings (compared to the standard metal cover) increases comfort and reduces jaw stress
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Airflow at 200bar: 2000 l/min

MK25 EVO/A700

SCUBAPRO's flagship regulator system is designed for divers who want the best. The MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The A700 offers effortless inhalation and an ease of exhalation that is unmatched in a precision-handcrafted, full-metal package. Together they provide unparalleled breathing performance in all water temperatures.

XTIS EXTENDED THERMAL INSULATING SYSTEM

FIRST STAGE

- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximise hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- Available in either 232bar INT or 300bar DIN configurations
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Airflow at 200bar: >8500 l/min
- Intermediate pressure: 9.2-9.8 bar

SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Rugged full-metal case, front cover and valve housing (barrel) are able to withstand years of aggressive diving
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Airflow at 200bar: 2000 l/min
- Weight (without mouthpiece) 9.2oz/261g.

MK19 EVO/A700

The MK19 EVO / A700 takes our extraordinary breathing A700 and pairs it with an environmentally sealed MK19 EVO first stage that's extremely resistant to freezing and fouling of its inner mechanism. The MK19 EVO offers a dry ambient pressure chamber that is equipped with a double spring for optimum reliability, and a LP port swivel turret to maximise hose routing options. The muscular A700, with its precision handcrafted full-metal casing, front cover and valve housing, offers best-in-class breathing performance, including effortless inhalation and an ease of exhalation that is unmatched.

PRICES	€
MSRP	995,00

PART NUMBER	DESCRIPTION
12.719.010	INT 232
12.719.030	DIN 300

FIRST STAGE

- Designed to be the ultimate first stage for cold water or contaminated diving conditions.
- Its design makes it substantially smaller and lighter than the original MK19.
- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Its dry chamber is equipped with a double spring, making it more compact and reliable.
- Two opposing high-pressure ports allow the first stage to be positioned either up or down, plus provide for an optimum hose/transmitter layout.
- Swivel turret comes with four High-Flow LP ports plus one axial Super High-Flow LP port to maximise hose routing options.
- Compact size, light weight and superb breathing performance continue in the best SCUBAPRO regulator tradition.
- Ideal first stage for recreational, technical, professional and military divers.
- Weight: INT 232, 885g; DIN 300, 665g
- Airflow at 2900psi/200bar: (l/min/SCFM): >6,900/244
- Intermediate pressure (psi/bar): 133-142/9.2-9.8

SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Rugged full-metal case, front cover and valve housing (barrel) are able to withstand years of aggressive diving
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Airflow at 200bar: 2000 l/min
- Weight (without mouthpiece) 9.2oz/261g.

MK25 EVO/D420

Combining the iconic design of the original D-Series regulators with the latest advances in breathing performance technology, SCUBAPRO engineers have created a 21st century regulator in terms of quality, reliability, performance and style. The D420 features a balanced valve inside a housing supported by a full metal structure. Called the Progressive Flow Control Valve, it is able to deliver abundant airflow for the best breathing performance, with a natural smoothness comparable to what you might experience breathing on the surface. The uniquely shaped fiberglass-reinforced nylon casing is ultra-durable and allows the LP hose to be connected on either the right or left side for maximum rigging flexibility. A dive/pre-dive system includes a switch on the top of the casing with a thumb tab for adjusting the direction of airflow right out of the valve. The highly efficient purge button is a technical jewel based on a concept that gives the D420 its unique face. Teamed with the venerable MK25 EVO balanced piston first stage, this is a regulator system purpose-designed for today's avid divers and SCUBAPRO brand enthusiasts everywhere.

XTIS
EXTENDED THERMAL INSULATING SYSTEM

FIRST STAGE

- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high-pressure ports allow the first stage to be positioned either up or down.
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximise hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Weight: INT 232, 790g; DIN 300, 572g.
- Airflow at 2900psi/200bar: (l/min/SCFM): >8500/301.
- Intermediate pressure (psi/bar): 133-142/9.2-9.8.

SECOND STAGE

- Uniquely shaped fiberglass-reinforced nylon casing carries on the D-Series heritage with the latest advances in breathing performance technology.
- Air-balanced Progressive Flow Control Valve is able to deliver abundant airflow with a natural smoothness comparable to breathing on the surface.
- Dive/pre-dive system includes a switch on the top of the case with a thumb tab for adjusting the direction of airflow right out of the valve.
- Casing design features inner winglets that direct airflow towards the exhaust valve, creating a dramatic improvement in exhalation effort.
- Diaphragm is located in the lower section of the casing to take advantage of the pressure gradient in the upright position, making breathing even easier.
- Reversible hose attachment allows for either left- or right-side LP hose connections for maximum rigging flexibility.
- Large purge button is easy to reach and press, with or without gloves.
- Exhaust tee is compact and efficiently deflects bubbles from the diver's view while enhancing ease of exhalation.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest.
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Weight (without mouthpiece): 216g.
- Airflow at 200bar: 1800 l/min - 64 SCFM.

MK19 EVO/D420

With the introduction of the D420, SCUBAPRO engineers have combined the iconic design of the original D-Series second stages with the latest advances in breathing performance technology. They then teamed it with the MK19 EVO balanced diaphragm first stage to create a 21st century regulator in terms of quality, reliability, performance and style. The D420 features a balanced valve inside a housing supported by a full metal structure. Called the Progressive Flow Control Valve, it is able to deliver abundant airflow for the best breathing performance with a natural smoothness comparable to what you might experience breathing on the surface. The uniquely shaped fiberglass-reinforced nylon casing is ultra-durable and allows the LP hose to be connected on either the right or left side for maximum rigging flexibility. A dive/pre-dive system includes a switch on the top of the casing with a thumb tab for adjusting the direction of airflow right out of the valve. The highly efficient purge button is a technical jewel based on a concept that gives the D420 its unique face. Teamed with the compact, lightweight MK19 EVO offers an environmentally sealed system and a dry ambient pressure chamber plus a user-friendly LP port swivel turret, this regulator system is uniquely well-suited to handling cold water and the harsh diving conditions often encountered by technical divers. This makes the MK19 EVO/D420 more tech-driven than the MK25 EVO/D420, while serving avid divers and SCUBAPRO brand enthusiasts everywhere

MK25 EVO T/S620 X-Ti

SCUBAPRO teams its high performance titanium first stage with an air-balanced second stage. The MK25 EVO T is machined from a solid block of titanium which will not corrode, even in concentrated saltwater conditions. It offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand.

The S620 X-Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. Smaller and lighter than the S600 but using the same-sized diaphragm, the S620 X-Ti delivers excellent performance; work of breathing has been reduced by 37% over the S600, providing effortless airflow under all dive conditions. The full titanium inlet tube is ultra-light, the large purge button improves water circulation, and the exhaust tee increases performance while directing bubbles out of the field of view. In all water temperatures, in all dive conditions, this reg system is a winner.

XTIS EXTENDED THERMAL INSULATING SYSTEM

FIRST STAGE

- Air-balanced flow-through piston in a full titanium body provides effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximise hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Airflow at 200bar: >8500 l/min
- Weight: DIN 300: 350g
- Intermediate pressure: 9.2-9.8 bar

SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Rugged reinforced technopolymer case and front cover are able to withstand years of aggressive diving
- Titanium barrel is rugged, anti-corrosion and lightweight for long-term reliability
- Uses the S600's large diaphragm inside a compact casing for maximum breathing sensitivity
- Diaphragm fits inside a more compact casing for maximum breathing sensitivity
- User controls include an easy-grip diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) lever
- The exhaust tee increases performance while directing bubbles out of the field of view
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable compact orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Airflow at 200bar: 1850 l/min
- Weight (without mouthpiece): 168g

- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximise hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- Available in either 232bar INT or 300bar DIN configurations
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Airflow at 200bar: >8500 l/min
- Intermediate pressure: 9.2-9.8 bar

SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged reinforced technopolymer case and front cover are able to withstand years of aggressive diving.
- Titanium barrel is rugged, anti-corrosion and lightweight for long-term reliability.
- Uses the S600's large diaphragm inside a compact casing for maximum breathing sensitivity.
- Diaphragm fits inside a more compact casing for maximum breathing sensitivity.
- User controls include an easy-grip diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) lever.
- The exhaust tee increases performance while directing bubbles out of the field of view.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Airflow at 200bar: 1850 l/min
- Weight (without mouthpiece): 179g

MK19 EVO/S620 Ti

The compact, lightweight MK19 EVO, with its environmentally sealed system, dry ambient pressure chamber and user-friendly LP port swivel turret, is the ideal first stage for cold water and harsh diving conditions. The smooth-breathing S620 Ti, embracing the best features of SCUBAPRO's renowned S600 in an upgraded design that delivers 37% lower work of breathing, is a proven performer when it comes to providing effortless airflow. Put them together and you have a versatile regulator system that can be counted on to deliver top-line performance in all dive conditions.

PRICES	€
MSRP	925,00

PART NUMBER	DESCRIPTION
12.625.000	INT 232
12.625.300	DIN 300

FIRST STAGE

- Designed to be the ultimate first stage for cold water or contaminated diving conditions.
- Its design makes it substantially smaller and lighter than the original MK19.
- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Its dry chamber is equipped with a double spring, making it more compact and reliable.
- Two opposing high-pressure ports allow the first stage to be positioned either up or down, plus provide for an optimum hose/transmitter layout.
- Swivel turret comes with four High-Flow LP ports plus one axial Super High-Flow LP port to maximise hose routing options.
- Compact size, light weight and superb breathing performance continue in the best SCUBAPRO regulator tradition.
- Ideal first stage for recreational, technical, professional and military divers.
- Weight: INT 232, 885g; DIN 300, 665g
- Airflow at 2900psi/200bar: (l/min/SCFM): >6,900/244
- Intermediate pressure (psi/bar): 133-142/9.2-9.8

SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged reinforced technopolymer case and front cover are able to withstand years of aggressive diving.
- Titanium barrel is rugged, anti-corrosion and lightweight for long-term reliability.
- Uses the S600's large diaphragm inside a compact casing for maximum breathing sensitivity.
- Diaphragm fits inside a more compact casing for maximum breathing sensitivity.
- User controls include an easy-grip diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) lever.
- The exhaust tee increases performance while directing bubbles out of the field of view.
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort, fitting all mouth sizes, from largest to smallest.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Airflow at 200bar: 1850 l/min
- Weight (without mouthpiece): 179g

MK17 EVO/S600

Teaming SCUBAPRO's best-selling second stage with its environmentally sealed first stage creates a reliable air delivery system for all diving conditions. The MK17 EVO is completely sealed off from the elements, ensuring trouble-free operation no matter how cold or murky the water gets. It is more compact yet delivers better breathing performance than its predecessor. Its improved internal design allows more airflow from the LP ports which have been reconfigured for better hose routing. The S600, with its rugged fiberglass rugged fiberglass reinforced nylon casing and stainless steel front face front face, provides a steady, effortless flow of air, regardless of depth.

FIRST STAGE

- Air balanced flow-through piston in a chrome-plated marine-grade brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Dry ambient pressure chamber increases freezing resistance, ensuring consistent airflow in the coldest conditions.
- Substantial increase in airflow -- 6900 l/min versus 6500 l/min -- includes improved balance of air supply pressure.
- Two high pressure and four high-flow low pressure ports maximise air delivery.
- High-flow performance is available from all four LP ports which are configured for optimum hose routing.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Weigh : INT 232: 860g; DIN 300: 640g
- Airflow at 200bar: (l/min): 242.
- Intermediate pressure: 9.2-9.8 bar

SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths
  and supply pressures
- Metal valve housing (barrel) is able to withstand years of aggressive diving
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Airflow at 200bar: 1850 l/min
- Weight (without mouthpiece): 7.1oz/200g.

MK25 EVO BLACK TECH/G260 CARBON BLACK TECH

An upgrade to our popular G260 technical diving system, the MK25 EVO BT/G260 Carbon BT regulator system delivers superior durability with a carbon fiber cover and Black Tech finish. The balanced piston MK25 EVO BT offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The G260 Carbon BT, with its large diaphragm, internal metal components and high-flow exhaust valve for excellent breathing sensitivity and resistance to freezing, ratchets up its ruggedness with the addition of a carbon fiber front cover. Lightweight and extremely durable, carbon fiber can resist substantial shocks without damage. Both first and second stages feature a Black Tech scratch-resistant coating on metal parts that protects against the ravages of salt water and corrosion. Also included is a zippered fabric bag complete with specially fitted padding to protect the regulator during storage and transport.

XTIS
EXTENDED THERMAL INSULATING SYSTEM

FIRST STAGE

- Air-balanced flow-through piston in a nickel plated brass body coated with DLC process, provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate
- Patented XTIS (Extended Thermal Insulating System) thermally insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue
- Spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Four high-flow and one axial super high-flow low pressure ports on a swivel turret maximise hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- Available in either 232bar INT or 300bar DIN configurations
- DIN version comes with a dual-compound wheel that features an ergo shape and soft grip on a rugged black nylon frame
- Airflow at 200bar: >8500 l/min
- Intermediate pressure: 9.2-9.8 bar

SECOND STAGE

- Stylish and durable carbon fiber front cover and reinforced technopolymer casing are able to withstand years of aggressive diving.
- Lightweight carbon fiber design is 24 grams lighter than the standard G260, making it more comfortable for those long diving days.
- Durable Black Tech DLC coating on metal parts protects against the ravages of salt water and corrosion as well as minor scratches.
- Internal metal components, including air barrel and valve inlet tube, increase resistance to freezing when diving in extreme conditions.
- Air-balanced valve evens out the inhalation effort at varying depths and supply pressures.
- Water circulation holes in the front cover enhance underwater breathing smoothness.
- High-flow exhaust valve reduces exhalation effort for better overall breathing comfort.
- A diver-adjustable inhalation effort knob fine-tunes air delivery to suit changing depths, water conditions and personal tastes.
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch prevents free flows in cold water or when used as an octopus.
- Large spring-based purge button is easy to use, even when wearing thick gloves.
- Reversible LP hose attachment makes it easy to adjust hose routing for any diving configuration.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Includes a zippered fabric bag
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water below 4°C
- Weight (without mouthpiece): 244g.

MK19 EVO BLACK TECH/G260 CARBON BLACK TECH

This premium system features SCUBAPRO's MK19 EVO, finished in a special ultra-durable Black Tech coating, along with an upgraded version of SCUBAPRO's most popular tech diving second stage, the G260. While retaining its large diaphragm, internal metal components and high-flow exhaust valve for excellent breathing sensitivity and resistance to freezing, the G260 Carbon BT ratchets up its ruggedness and durability with the addition of a carbon fiber front cover. Lightweight and extremely durable, if dropped or struck against a hard object, carbon fiber can resist substantial shocks without damage. Both first and second stages feature the Black Tech DLC (Diamond-Like Carbon) coating on their metal parts. The MK19 EVO BT/G260 Carbon BT is a rugged, reliable, and sharp-looking regulator system that delivers solid breathing performance in all diving conditions and water temperatures.

MK11/C370

The MK11/C370 is a great choice for dive-trekkers. The balanced diaphragm MK11, with its chrome-plated marine-grade brass body specially designed to reduce size and weight, is an ideal travel companion. Its system features internal parts that are sealed from the elements. The C370 brings forth the best features of its predecessor, while adding a balanced valve to its design. Its exhaust tee, based on the S620 Ti's design, contributes to an improvement in work of breathing. With this reg system in your dive bag you'll be ready to hit the road.

FIRST STAGE

- Air balanced diaphragm design delivers constant and effortless airflow unaffected by depth, tank pressure or breathing rate
- Chrome-plated marine-grade brass body has sealed internal parts to prevent water and pollutants from fouling the inner mechanism while enhancing cold-water performance
- Two high pressure, two low pressure and two high-flow LP ports maximise hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- Available in either 232bar INT or 300bar DIN configurations
- Airflow at 200bar: 5500 l/min
- Weight: INT 232: 710g; DIN 300: 490g
- Intermediate pressure: 9.2-9.8 bar

SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures
- Compact rugged fiberglass reinforced nylon casing and exhaust tee take up little space in a dive bag
- Stainless steel frame on the front cover adds the SCUBAPRO C-Series signature
- A poppet and lever allows the design to maintain the same overall size as the C350.
- An exhaust tee based on the S620 Ti's design contributes to better work of breathing.
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA)
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation
- Large purge button is easy to activate, even wearing thick gloves
- Compact Hi-Flow mouthpiece improves airflow as well as mouth comfort
- CE certified according the latest EN250A European Standards for all diving conditions, including extreme cold water.

MK11/S270

The S270 is available with a MK11 first stage for divers seeking an air-balanced diaphragm design delivering effortless airflow unaffected by depth, tank pressure or breathing rate. The MK11's chrome-plated marine-grade brass body has sealed internal parts to prevent water and pollutants from fouling the inner mechanism while enhancing cold water performance. The air-balanced S270 provides smooth breathing performance in a bulletproof anti-scratch design that's able to handle years of hard use. It comes with a dive/predive switch, an effective purge, and a compact exhaust tee that minimises exhalation effort.

PRICES	€
MSRP	330,00

PART NUMBER	DESCRIPTION
12.177.000	INT 232
12.177.300	DIN 300

FIRST STAGE

- Air balanced diaphragm design delivers constant and effortless airflow unaffected by depth, tank pressure or breathing rate
- Chrome-plated marine-grade brass body has sealed internal parts to prevent water and pollutants from fouling the inner mechanism while enhancing cold-water performance
- Two high pressure, two low pressure and two high-flow LP ports maximise hose routing options
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily
- Available in either 232bar INT or 300bar DIN configurations
- Airflow at 200bar: 5500 l/min
- Weight: INT 232: 710g; DIN 300: 490g
- Intermediate pressure: 9.2-9.8 bar

S270 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme cold water.
- Dive/predive switch is easy to use even wearing thick gloves.
- More compact, lighter weight and better breathing performance than its S560 predecessor.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort.
- The exhaust tee is compact and very efficient in minimising exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved (food grade) silicone, and features a large cross-section to maximise airflow.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Well-suited for diving classes, rental and professional accounts due to its bulletproof construction and solid breathing performance.
- Weight (without mouthpiece): 5.1oz/145g.
- Airflow at 2900psi/200bar: 1850 l/min – 66 SCFM.

MK2 EVO/S270

Recreational divers looking for solid performance in a regulator system and ready to step up from their entry-level systems are going to love the MK2 EVO/S270. The S270 second stage features an air-balanced design that's patterned after the popular S620 Ti, whose compact casing and internal aerodynamics produce extremely low work of breathing. Designed to last in tough conditions, a fiberglass-reinforced nylon core combined with a PU outer layer result in a bulletproof anti-scratch casing. In addition to breathing performance, the S270 offers an effective purge and a dive/predive switch that's easy to use even wearing thick gloves. The exhaust tee is compact and efficient in minimising exhalation effort. Teamed with SCUBAPRO's classic MK2 EVO, the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions, this regulator combo is affordable and durable while delivering smooth and reliable breathing performance. In addition to recreational divers, the MK2 EVO/S270 is a great choice for rental, training and professional divers seeking solid performance from a durable regulator system.

XTIS EXTENDED THERMAL INSULATING SYSTEM

MK2 EVO FIRST STAGE

- Classic downstream piston design features a chrome-plated marine-grade brass body with one high pressure and four low pressure ports.
- Patented XTIS (Extended Thermal Insulating System) fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.
- Additional internal technical improvements include a spring insulating bushing and coating, an insulating piston bushing, an insulating sleeve and an antifreeze cap, all of which contribute to freezing resistance.
- Chrome-plated marine-grade brass body is smaller than its predecessor but houses an oversized piston that provides better breathing performance by increasing airflow.
- Stainless steel removable orifice allows for easier maintenance while extending regulator life.
- Meets new EN250-2014 standards for cold-water breathing performance.
- Weight (oz/g): INT 232, 23.6/670; DIN 300, 15.9/450.
- Airflow at 2900psi/200bar: (l/min/SCFM): >3000/106.
- Intermediate pressure (psi/bar): 138-145/9.5-10.

S270 SECOND STAGE

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme cold water.
- Dive/predive switch is easy to use even wearing thick gloves.
- More compact, lighter weight and better breathing performance than its S560 predecessor.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort.
- The exhaust tee is compact and very efficient in minimising exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved (food grade) silicone, and features a large cross-section to maximise airflow.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.
- Well-suited for diving classes, rental and professional accounts due to its bulletproof construction and solid breathing performance.

MK2 EVO/R105 OCTOBER 2022 new

Simple and reliable, the **NEW** MK2 EVO/R105 is the regulator system of choice for diving schools, rental centres and new divers, as well as avid recreational divers looking for a basic backup breathing system. It offers smooth dependable air delivery and is built to last. The compact casing is based on the S620 Ti with an anti-scratch front cover and a metal classic downstream valve design. Included is a dive/pre-dive VIVA switch plus a soft, co-molded purge button for easy purging, and left or right hose routing for use on stage or pony bottles. Teamed with SCUBAPRO's classic MK2 EVO, the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions, this new regulator combo is durable, reliable and affordable.

MK2 EVO/R095

Thanks to its bullet-proof design, it is the system of choice for training centers as well as new divers.

A totally evolved classic downstream piston first stage, now more of a workhorse than ever. With increased breathing sensitivity and better airflow, freezing resistance is dramatically increased.

MK2 EVO FIRST STAGE
- Classic downstream piston design features a chrome-plated marine-grade brass body with one high pressure and four low pressure ports.
- Patented XTIS (Extended Thermal Insulating System) fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.

S270 OCTOPUS

The S270 Octopus is tough, reliable, and easy to use. Its air-balanced design can be counted on to deliver top-notch breathing performance when you need it most.

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Lightweight casing, made of a fiberglass-reinforced nylon core and a special PU outer layer, is extremely durable plus helps reduce jaw fatigue and improve diving comfort.
- Technopolymer plastic barrel with a metal thread and a balanced valve helps save weight and provides a surface that ice crystals can't grab onto when diving in extreme cold water.
- Dive/predive switch prevents free flows when not being used.
- Exhaust tee is compact and very efficient in minimising exhalation effort.
- Compact Hi-Flow mouthpiece is comfortable, made with FDA-approved silicone and features a large cross-section to maximise airflow.
- High-viz yellow front cover stands out, making it easy to spot when needed.
- High-viz yellow super-flow hose is 39in/1m long with an oversized bore that allows more air to flow on each inhalation.
- CE certified to the latest EN250A European Standards for all diving conditions, including extreme cold water.

MK25 EVO/S270 NITROX

For technical divers who need a dedicated nitrox delivery system that is certified for air mixes up to 100% oxygen, there's the MK25 EVO/S270 Nitrox. The air-balanced S270, with its PU green cover devoted specifically to this nitrox version, provides smooth and consistent airflow in a bulletproof anti-scratch design that's able to stand up to years of rugged use. Features include a dive/predive switch, an effective purge and a compact exhaust tee minimises exhalation effort. And there's no better example of solid first stage performance than the time-tested MK25 EVO, with its excellent resistance to freezing, superb inhalation sensitivity and instant delivery of nitrox mixes. Complying with the most stringent safety norms, you simply won't find a more reliable nitrox breathing system for all diving conditions and water temperatures than this regulator combo.

All Nitrox certified SCUBAPRO regulators are suitable for use with air mixes up to 100% oxygen.

MK19 EVO

SCUBAPRO engineers have taken some of the best features from our past air-balanced first stages and created the MK19 EVO. With its chrome-plated marine-grade brass body, it is environmentally sealed, preventing water and pollutants from entering the inner mechanism. The MK19 EVO adopts a new dry ambient pressure chamber that enhances freezing resistance while ensuring consistent airflow and maximum durability in the coldest conditions. With a swivel turret and five LP ports which maximise hose routing options, this first stage is built not only for professional, military and technical divers, but also for recreational divers who need superb cold water performance in a lightweight, small, compact size.

D420

Combining the classic design of the original D-Series regulators with the latest advances in breathing performance technology, SCUBAPRO engineers have created a 21st century smooth natural breathing regulator. The D420, with its chrome-plated marine-grade brass body, features a brand new balanced valve inside a housing supported by a full metal structure. Called the Progressive Flow Control Valve, it is able to deliver abundant airflow for the best breathing performance with a natural smoothness comparable to what you might experience breathing on the surface. The uniquely shaped fiberglass-reinforced nylon casing is ultra-durable and allows the LP hose to be connected on either the right or left side for maximum rigging flexibility. A new dive/pre-dive system includes a switch on the top of the casing with a thumb tab for adjusting the direction of airflow right out of the valve. The highly efficient purge button is a technical jewel based on a new concept that gives the D420 its unique face. The D420's long list of features is sure to enhance any diver's under water experience.

This excellent BC inflator/reg is in its 5th generation with dramatically improved work of breathing. Sleek ergonomic inflate/deflate controls allow for pinpoint buoyancy control.

- Test-proven breathing performance and cracking effort surpasses many traditional downstream second stages when it comes to ease of breathing
- Dive/pre-dive switch lets you detune the unit when not in use, eliminating free flows.
- Flexible purge cover is easy to locate and depress for quick clearing
- Power inflate and deflate buttons are positioned on top of the housing for easy buoyancy control
- Power inflate button features a lighter lever for easy inflation
- Power inflate and deflate buttons can be differentiated by colour and touch due to their different shapes and sizes, improving ascent control and safety when inflating or deflating the BC
- CE certified (EN250A>10°C/50°F warm water test) as a second stage regulator

DIN TO YOKE ADAPTER

SCUBAPRO's Italian-made DIN to Yoke Adapter offers design improvements to make it more compatible with the shape and styling of newer regs. The yoke has no plastic cover and the nickel chrome plating is the highest quality, similar to what's found on SCUBAPRO's EVO Series regs. The dual-material molded knob is high-grip while providing a soft touch, and on top features a stylish metallic sticker with the big "S" logo.

DECALCON – EQUIPMENT CLEANER

- For ultrasonic and traditional cleaning
- Suitable for ultrasonic and traditional cleaning methods in a dipping bath.
- For cleaning metallic components (except PU coated springs and 1st stages made of UL alloy).
- Compatible and tested up to 100% O2.
- Compatibility of the cleaning agent showed no negative influence on the materials used in tests carried out by the SCUBAPRO R&D laboratory.

CORE FEATURES

FOR SCUBAPRO DIVE COMPUTERS

Microbubble levels:
A range of microbubble levels allows your body to either take up less nitrogen or off-gas more before returning to the surface. Both work toward reducing the amount of micro-bubbles present in the body at the end of the dive.

Predictive Multi-Gas (PMG):
Lets you enjoy the full benefits of carrying high-oxygen-concentration mixes in addition to your main breathing gas. The computer calculates the decompression schedule for all possible gas combinations and adapts the calculation accordingly.

Continuous average depth reading:
Available in gauge mode and can be reset by the user anytime.

Profile-Dependent Intermediate Stops (PDIS): Calculates an intermediate decompression stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives, and breathing mixes.

Enriched air (Nitrox): 21%-100%. The ppO2 is adjustable between 1 and 1.6 bar.

Gauge mode: Turns off all warnings and alarms (except low- battery alerts) and monitors depth, time, and temperature without decompression calculations.

Logbook: Records depth, temperature, and heart rate profiles with a 4-second sampling rate, which can be downloaded to a phone, handheld device or PC/Mac.

Freediving mode: A collection of features developed for freedivers, including a faster sampling rate, manual start, specialised alarms and warnings, adjustable water density, and specific logbook.

(Not available on the G2 Console or Aladin H.)

Altimeter: Measures altitude and alerts you when approaching an altitude incompatible with saturation status after a recent dive.

Bookmark: Allows you to highlight specific moments with a simple button press.

Active back light: With push-on and push-off function.

Replaceable battery: By user or .

GALILEO HUD IS A "HANDS-FREE COMPUTER"
Galileo HUD, the revolutionary mask-mounted, hands-free dive computer with a virtual floating heads-up display, giving you more freedom to experience your dive.

- Delivers constant, easily viewable, critical dive information without taking your eyes off the dive
- All the important dive information you expect from the Galileo 2 Dive Computer in a convenient heads-up display
- Quickly find information and personalise settings for any dive, using the intuitive, single-knob input menu
- A flip-up hinge allows you to easily tilt the computer up and out of view
- Predictive algorithms and decompression calculations can be customised for all skill levels, from beginner to advanced

The Galileo HUD is an innovative and thoroughly unique air-integrated dive computer. This technologically-advanced computer offers a heads-up display mounted on a dual-lens mask. It delivers excellent readability along with hands-free data monitoring, creating a user experience unlike anything previously seen in diving.

Hands-free data monitoring is a boon to photographers or anyone engaged in underwater activities that require both hands, including military and public safety divers.
Micro OLED display uses near-eye optics to create a screen image that appears at a virtual distance of approximately 1m, making it easy to monitor your dive data without losing eye contact with your dive surroundings.
Intuitive push-wheel allows you to access and control HUD functions with one hand. Simply rotate and press – couldn't be easier.
Convenient flip-up feature, reminiscent of military night vision goggles, enables you to tilt the HUD display up and out of the way. When it's time to resume data monitoring, flip the display back into position and you're ready to track your dive.
Compatible with a variety of SCUBAPRO masks, including the Spectra, Spectra Mini, D-Mask (special mount - part number 24.257.001), Zoom (special mount - part number 25.157.200), Frameless (HUD - part number 24.343.100), Synergy Twin, Ecco Mask, Vibe 2

- Lightweight (neutrally buoyant) and easily mountable to a dual-lens mask.
- Hinge mechanism allows you to easily flip up the HUD when not in use.
- Intuitive menu structure and push-wheel interface make for effortless navigation through the system.
- Full-Colour OLED 96x64p display
- Choice of 2 algorithms: Predictive Multi-Gas Bühlmann ZH-L16 ADT MB PMG, or ZH-L16 GF.
- PMG algorithm offers Microbubble levels and Profile Dependent Intermediate Stops (PDIS).
- Selectable dive modes: SCUBA, Gauge, Apnea and CCR.
- Trimix and Nitrox compatible, with advanced CCR functionality.
- Up to 8 selectable gases in SCUBA mode, plus oxygen and diluent in CCR mode and 2 changeable set points for CCR diving.
- Compatible with SCUBAPRO SMART+, SMART+LED & SMART+PRO transmitters for hoseless tank pressure monitoring.
- Provides true remaining bottom time (RBT) based on the workload from breathing.
- 3D full-tilt digital compass allows you to store 3 pre-programmed headings.
- Includes built-in GPS for surface navigation.
- Maximum operating depth: 120m.
- Rechargeable battery provides up to 20 hours of dive time per charge in normal dive mode and 27 hours of dive time in Power Save mode.
- 2GB memory stores 10,000 hours of diving.
- USB Cable or Bluetooth: Easily download dive data wirelessly to your phone or handheld device.
- Compatible with Windows, MAC, Apple and Android devices using LogTRAK.

With all of its features, its ease of use, its screen options, plus the ability to use as much or little of the technology as you want, the G2 is poised to become the favourite computer for divers of all skill levels, from beginner to tech diver. The G2 is designed go anywhere – open water to freediving to CCR to sidemount. And the G2 will grow with the new diver – wherever their passion for diving takes them.

- Same intuitive menu structure, simple 3-button control system, and diver-friendly functions that make the Galileo so easy to use. Enables a seamless transition from the Galileo to the G2.
- Full-Colour LCD TFT (Thin-Film Transistor) 5.6cm LCD display screen (320x240p). Produces vibrant colours for maximum readability to quickly direct your attention to what you need to know.
- LCD TFT screens use less energy. More efficient than other screen types to help extend battery life.
- See as much or as little as you like. Choice of screen display configurations. Customise your data presentation with Light, Classic, Full or Graphical screen options to suit your individual diving style.
- Customise menu listings. Use as much or as little of the G2 technology as you need – your choice.
- Multiple Language Choices. Select from more than 19 languages for receiving dive data.
- Microbubble levels let you adjust the algorithm's conservativeness, allowing you to either take up less nitrogen or off-gas more quickly.
- Predictive Multi-Gas ZHL-16 ADT MB algorithm. Advanced Uwatec algorithm programs up to 8 nitrox/trimix mixes to handle any recreational or technical diving scenario.
- Integrated heart rate monitor measures heartbeat and skin temperature and incorporates both into the workload calculations. Integration with the HRM Is exclusive to SCUBAPRO.
- Heart rate monitor also lets you visually track your heart rate "real time" to ensure you stay in your individual target zone to maximise your fun and safety at depth.
- Hoseless air integration. Monitors tank pressure plus provides true remaining bottom time (RBT) and allows air consumption to be factored into the decompression calculation. Provides support for up to 11 transmitters when all features are activated.
- Full tilt digital compass offers a choice of 2 screens with bearing memory. Use the version you like, or use both!
- Rechargeable battery. Provides up to 50 hours of dive time per charge. Battery must be changed by the .
- Huge 485MB memory. Stores pictures, tables, tissue loading status, and 1,000 hours of dive profiles.
- USB cable or Bluetooth Low Energy interface. Easily download dive data wirelessly to your phone or handheld device. Download dive data to a PC/Mac using LogTRAK software.

GALILEO 2 (G2)

PLUS:

- Fiberglass-reinforced thermoplastic slim-line casing. Ultra-durable & UV resistant.
- Curved ergonomic low-profile shape. Sits comfortably on the arm and resists rotating (integrated bungee mounts are provided for tech divers). Can also be used on a retractor.
- Rugged TR 55 transparent thermoplastic lens protects the full colour dot matrix TFT display. Features a backlight to enhance low-light readability.
- Sleek, Swiss design. The best elements of the Galileo in an upscale design.
- Stainless steel control buttons (3). Accessible, intuitive, easy to use, even when wearing gloves.
- Multiple dive modes. Scuba, Freediving, Gauge, CCR and Sidemount for total in-water versatility. (Freediving, Trimix, CCR and Sidemount modes are disabled from the factory. Activation is easy – no downloading or upgrading is required.)
- Special apnea logbook. Stores repetitive dives sequentially under the same apnea session.
- Maximum operating depth 120m for reliable data computing regardless of diving situation.

G2 COLOUR BEZELS

Now you can personalise your SCUBAPRO G2 wrist-mount dive computer with a dash of colour. These special bezels are available in yellow and turquoise. Installing the colour bezels must be done by an authorised SCUBAPRO technician. Divers will be billed for the bezel and shipment, but changing out the bezels will be free of charge.

G2 TEK

The **NEW** G2 TEK is designed specifically for technical divers. While offering all of the easy-to-use features of the highly versatile G2 wrist computer, including wireless air integration, heart rate and skin temperature monitors, a full-tilt digital compass and full-colour display, the G2 TEK replaces the Predictive Multi-Gas ZHL-16 ADT MB algorithm of the G2 with the GF PURE algorithm. The Algorithm includes the ability to set Gradient Factors for increased conservatism. The technical diving community, in particular, finds that the Gradient Factors approach best suits their diving needs. In addition, the G2 TEK comes with bungee straps, also preferred by many tech divers in place of the traditional wrist strap, and a blue bezel to differentiate it from the standard G2.

GALILEO 2 (G2) CONSOLE

PART NUMBER	DESCRIPTION	MSRP
05.081.111	G2 CONSOLE (WITH QR AND WITHOUT HRM)	**1 185,00**
05.005.001	COMPACT QUICK RELEASE WITHOUT HOSE	**117,00**
06.205.262	G2 CONSOLE PROTECTION FILM	**12,00**

For divers who prefer a console-style dive computer, the G2 Console joins the Galileo family, offering yet another option for handling important dive data. Featuring a cell phone-style portrait-shaped screen, the G2 Console is easy to use, easy to read, and offers a compass with two screen styles. The rugged casing boot protects against bumps and includes hoseguard to safeguard the quick disconnect fitting. Data downloading and analysis is easy with full Android/iPhone/PC/Mac compatibility. The G2 Console is designed to go anywhere, and will grow with the new diver – wherever their passion for diving takes them.

PLUS:

- Cell phone-style screen is familiar and very easy to read at depth.
- Ultra-durable casing boot protects against bumps and includes hoseguard to safeguard the quick disconnect fitting.
- Scuba and trimix modes: (the trimix mode is disabled from the factory. Activation is easy – no downloading or upgrading is required.)
- G2 Console is compatible with HRM (05.060.020)

Convenient quick-disconnect fitting. Allows you to detach the computer from your regulator system for easy data downloading, travel and storage.

LUNA 2.0 WINTER 2022/23 new

PART NUMBER	DESCRIPTION	MSRP
05.200.100	LUNA 2.0	460,00
05.200.101	LUNA 2.0 AIR INTEGRATED	535,00
05.200.102	LUNA 2.0 AIR INTEGRATED WITH SMART+ PRO	779,00

The **NEW** SCUBAPRO Luna 2.0 is a sleek, intuitive all-purpose dive computer loaded with easy-to-use features. Designed to be one of the thinnest dive computers, the Luna 2.0 offers an oil-filled thermoplastic housing for reliable performance and comfort. Its large modern widescreen features a high contrast black/white LCD display and large characters for easy reading at depth. A simple two-button interface lets you navigate the system with ease, aided by clearly marked screen prompts. You get a choice of ADT and GF algorithms, plus 100% nitrox compatibility and three selectable gasses for open circuit diving. Three dive modes are available – Scuba, Apnea and Gauge, along with selectable PDIS and six Microbubble levels.

- Easy-to-use design.
- Oil-filled thermoplastic housing is super thin and sits comfortably on the arm.
- Wide, high-contrast black and white LCD display screen and large characters for easy reading at depth.
- Intuitive menu and two button controls make it easy to navigate through the system.
- Choice of 2 algorithms: Predictive Multi-Gas Bühlmann ZH-L16 ADT MB PMG, or ZH-L16 + GF (Gradient Factor).
- Nitrox compatible (100%) with 3 selectable gasses.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives, and breathing mixes for safer diving.
- Six Microbubble levels (L0-L5) let you personalise and adjust the level of conservatism in the ADT algorithm to match your experience level, age and physical conditioning.
- 3 Dive modes: Scuba, Gauge, and Apnea.
- **NEW** soft silicone arm strap is comfortable against your wrist
- Durable silicone housing case cover & pre-installed screen protector
- Max Operating Depth: 394ft/120m.
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated by going to scubapro.eu or the SCUBAPRO LogTRAK 2.0 app.
- CR2450 battery is user-changeable and rated for up to two years/300 dives.
- Bungee mounts on the corners of the housing allow for alternate securing methods.

LUNA 2.0 AIR INTEGRATED new

The **NEW** SCUBAPRO Luna 2.0 AI is a sleek, intuitive air-integrated dive computer loaded with easy-to-use features. Its wireless air integration feature enables you to monitor tank pressure easily, plus provides true remaining bottom time (RBT) and allows your air consumption to be factored into the decompression calculation. Designed to be one of the thinnest dive computers, the Luna 2.0 AI offers an oil-filled plastic housing for reliable performance and comfort. Its large modern widescreen features a high contrast black/white LCD display and large characters for easy reading at depth. A simple two-button interface lets you navigate the system with ease, aided by clearly marked screen prompts. You get a choice of ADT and GF algorithms, plus 100% nitrox compatibility and three selectable gasses for open circuit diving. Three dive modes are available – Scuba, Apnea and Gauge, along with selectable PDIS and six Microbubble levels. The Luna 2.0 AI also offers an optional integrated heart rate monitor that lets you visually track your heart rate and skin temperature to ensure you stay in your individual target zone to maximise fun and safety at depth.

PLUS

- Air-integration monitors tank pressure and provides true remaining bottom time (RBT) calculations based on the workload from breathing.
- Optional heart rate monitor (**05.060.020**) records heartbeat and skin temperature that can be factored into the decompression calculation along with workload.

05.064.007	A1/A2 SILICONE STRAP TURQUOISE	66,00
05.064.010	A1/A2 RUBBER STRAP BLACK	43,00
05.064.015*	A1/A2 METAL STRAP PVD GREY	235,00
05.064.020	A1/A2 NYLON STRAP BLACK	66,00

The A2 is designed for advanced divers and technical divers who appreciate the compactness and convenience of a wristwatch-style dive computer, but demand the kind of features and functions that enable them to excel in their sport. For daily topside use the A2 offers full timekeeping functions and a Sport mode. When it's time to go diving, the A2 offers everything an advanced recreational diver wants, and everything a technical diver needs. It starts with wireless air integration that monitors tank pressure and provides true remaining bottom time. The digital tilt-compensated compass provides easy navigation under water or on the surface. The A2 lets you choose from six Dive modes, including Trimix and CCR, and because it's designed with Human Factor Diving™, it incorporates cutting edge biometrics that enable you to live your life in dive mode. Whatever type of diving you do, the A2 is ready to go there with you.

- Targeted to advanced recreational divers and technical divers as well as CCR divers and freedivers.
- Smart technology wireless air-integration can handle multiple transmitters.
- Air-integration monitors tank pressure and provides true remaining bottom time (RBT) calculations based on the workload from breathing.
- Heart rate monitor records heartbeat and skin temperature (with SCUBAPRO HRM Belt only 05.060.020) that can be factored into the decompression calculation along with workload.
- Digital tilt-compensated 3D compass allows for easy navigation.
- Predictive Multi-Gas ZH-L16 ADT MB algorithm accommodates eight gases (21-100% O2) & 2 in CCR mode.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Multiple Dive modes: Scuba, Gauge, Apnea, Trimix, Sidemount, CCR.
- Sport mode offers sport-related functions like a swim stroke counter, activity counter (pedometer) and stopwatch.

PLUS:

- Modern design with full watch functions is perfect for topside time-keeping as well as underwater data tracking.
- High-resolution hybrid matrix display with large numbers is easy to read under water, even in adverse conditions.
- Lightweight design is so comfortable on the wrist you won't want to take it off.
- Intuitive menu and four button controls make it easy to navigate through the system.
- Max Operating Depth: 120m.
- Bluetooth Low Energy interface lets you download dives to any iOS or Android device or PC/Mac.
- Firmware can be user-updated by going to scubapro.eu.
- CR2450 battery is rated for up to two years/300 dives.
- Included: Protection foil, Quick Card, Arm Strap Extension, Read First (user manual is available online). Optional equipment: transmitter, heart rate belt.

The A1 is a basic entry-level dive computer designed for new divers and casual recreational divers looking for a simple yet versatile wristwatch-style computer that can be worn on the surface as well as under water. The A1 offers full time-keeping functions, and three Dive modes plus a Sport mode. An intuitive menu system and clearly marked button controls make it easy to access and understand all functions. Offering just the right balance of topside features, underwater functions and ease of use, the A1 will quickly become an integral part of not just your diving life, but of your everyday life as well.

- Targeted to new divers and casual recreational divers.
- Modern design is functional and stylish for topside time-keeping as well as underwater data tracking.
- High-resolution matrix display with large numbers is easy to read under water, even in adverse conditions.
- Lightweight design is so comfortable on the wrist you won't want to take it off.
- Intuitive menu and four button controls make it easy to navigate through the system.
- ZH-L16 algorithm accommodates single-gas Nitrox capability from 21% to 100% O2.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.

PLUS:
- Full watch functions for topside time-keeping.
- 3 Dive modes: Scuba, Gauge, and Apnea.
- In Sport mode sport-related functions like a swim stroke counter and a stopwatch can be activated.
- Max Operating Depth: 120m.

ALADIN H (MATRIX)

PART NUMBER	DESCRIPTION	MSRP
05.047.100	ALADIN H (MATRIX) WITH HP-HOSE	**410,00**
05.005.001	QR-RELEASE	**117,00**

With its compact size and intuitive data display, the Aladin H (Matrix) is a sharp-looking and full-featured dive computer targeted to avid recreational divers looking for a convenient air-integrated dive computer. Featuring a metallic faceplate and easy-to-read segmented display on top and middle rows, and a matrix display on the bottom row, the Aladin H (Matrix)'s full air integration eliminates the need to carry a separate submersible pressure gauge. With the on-board digital compass and you have an ultra-compact, full-function, hose-attached dive computer.

- Predictive Multi-Gas ZHL16 ADT MB algorithm accommodates three gases (21-100% O2)
- Fully air-integrated, the algorithm calculates remaining bottom time (RBT) and workload based on breathing rate
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning
- Features a protector boot covering the metal connection between HP hose and dive computer's HP sensor

PLUS:
- Two Dive modes: Scuba, Gauge
- Maximum operating depth: 120m
- Altimeter
- Digital compass, displayed on matrix bottom row
- Active back light
- Full watch functions
- Bookmark function
- Lens protection cap
- CR2450 user-replaceable battery rated up two years/300 dives

ALADIN ONE MATRIX

PART NUMBER	DESCRIPTION	MSRP
05.045.110	ALADIN ONE MATRIX WRIST	**249,00**
05.045.010	ALADIN ONE MX CAPSULE	**244,00**

An ideal dive computer for diving schools and rental stations, the compact, single mode Aladin ONE Matrix is simple to use, easy to understand, and delivers reliable dive data for enjoyable recreational diving. The essence of simplicity, this is an ideal computer for new divers, and a great backup once you're ready to move up to more advanced dive computing.

- Screen features an updated LCD segmented display on the top and middle rows, plus an eye-pleasing matrix display on the bottom row (the same as Aladin SPORT Matrix)
- A Bluetooth Low Energy interface replaces IrDA communication
- 16 tissue compartments algorithm ZH-L16 replaces the ZH-L8 algorithm
- Automatic safety stop activation replaces the old manual activation system
- Improved structure and navigation through the menus
- Same external design as the Aladin ONE
- Nitrox compatible 21-50% in 1% increments
- Reset function is ideal for dive rentals
- 12 and 24-hour mode
- Safety stop with timer
- Adjustable ppO2 between 1.0 and 1.6bar
- Saltwater or freshwater modes
- Dive planner with deco
- Visual and audible alarms
- Back light function
- Maximum operating depth: 120m
- CR2450 user replaceable battery rated for two years/300 dives

05.045.110

Bluetooth® logtrak SCUBAPRO

DIGITAL HEART RATE BELT

PART NUMBER	DESCRIPTION	MSRP
05.060.020	DIGITAL HEART RATE BELT	**125,00**
05.060.025	SOFT STRAP FOR HEART RATE BELT	**38,00**

Factoring your heart rate into your decompression calculations helps make diving safer and a lot more fun. A lightweight waterproof ECG (electrocardiogram) transmitter is clipped onto the elastic belt that straps around the chest, directly against the skin. This belt wirelessly transmits your heart rate data to your SCUBAPRO personal dive computer. Data is displayed on the screen, plus is factored into your decompression calculations to create a more personalised dive plan and improve the quality of your diving.

- More comfortable to wear with soft strap
- Easy to use, just strap it on and enjoy the benefits of biometrics
- More reliable ECG transmitter provides a patented skin temperature measurement. Both skin temperature data and heart rate data are factored into your decompression algorithm, making diving safer and more enjoyable
- Compact design saves space in your dive bag
- Convenient clip can be added and removed from the elastic belt so it can be rinsed and dried fully post-diving
- Powered by a user replaceable CR2032 type battery, that lasts for around 50 dive hours or 1 year.
- Heart Rate Belt has an operation depth of 120 meters / 394 feet
- **Compatible with SCUBAPRO HUD, G2 and A2 personal dive computers**

CONFIDENTIAL, NOT FOR DISCLOSURE TO UNAUTHORISED ENTITIES OR PERSONNEL. DOCUMENT VALID FROM 01/10/2022

SMART + PRO TRANSMITTER

Enjoy the convenience of air integration without the hassle of a dangling hose. This new low-profile Smart transmitter greatly improves communication reliability and works with SCUBAPRO's most advanced dive computers. It screws into a high pressure port on your first stage and relays tank pressure and true remaining bottom time (RBT) to the computer screen. The latest version features a built-in LED located at the top of the cap that gives you an estimate of tank pressure when the first stage is attached to a tank. This lets you know if the tank has gas without needing to activate the computer.

- Easy to use, you only need to pair it to your computer once – the first time you use it.
- Coded transmission technology prevents interference between different dive computers.
- Compact size
- Better HP hose routing
- Powered by a user-replaceable CR 2PE/BN 0 lithium battery that's good for three years or 250 to 300 hours of diving, whichever comes first.
- More visible LED Indicator Status:
  - 1,450 psi/100 bar and over = Slow Short Blinking Green light
  - Between 1,450 psi/100 bar and 725 psi/50 bar = Short Double Blinking Yellow Light
  - Below 725 psi/50 bar = Long Single Blink Red Light
- **Compatible with the SCUBAPRO HUD, G2 & A2 personal dive computers, as well as with Galileo Sol, Galileo Luna, M2, SMART Z & Tec.**

SMART+ TRANSMITTER

Enjoy the convenience of air integration without the hassle of a dangling hose. This low-profile Smart transmitter works with SCUBAPRO's most advanced dive computers. It screws into a high pressure port on your first stage and relays tank pressure and true remaining bottom time (RBT) to the computer screen.

- Easy to use, you only need to pair it to your dive computer once - the first time you use it.
- Coded transmission technology prevents interference between different dive computers.
- Powered by a 3V CR 2/3 AA lithium-manganese battery that's good for two years or 400 to 450 dives.
- Operating temperature: -10°C to + 50°C
- Maximum operating pressure: 300 bar
- Maximum operating depth: 300 m
- Battery life: 2 years / 450 dives
- Weight: 120g
- Length: 8.5 cm
- **Compatible with SCUBAPRO Galileo Sol, Galileo Luna, M2, G2, Galileo HUD and A2 personal dive computers.**

Although targeted primarily to technical divers, the Digital 330M is an ideal initial data delivery system for beginning divers, and a useful backup instrument for any diver. Whatever your skill level, the Digital 330M can be counted on to provide outstanding electronic accuracy in all diving conditions.

- Incorporating state-of-the-art microchip technology, a bevy of information is provided in a compact information center
- Data includes actual and maximum depth, ascent speed, dive time in minutes and temperature
- Auto on/off feature means it's always ready to dive after a quick self-test
- Variable ascent rates are displayed in a percentage and with a fast ascent warning
- Depth-rated to 330m to suit all technical deep-diving scenarios
- Surface interval is displayed for 24 hours for safety and convenience
- Logbook provides data for the last 20 dives to allow for post-dive review and analysis
- Provides automatic altitude compensation when changing dive locations
- Available as a wrist-mount instrument or in a console with a pressure gauge and compass

05.014.110

STANDARD DEPTH GAUGE

PART Nº	DESCRIPTION	MSRP
05.011.111	DEPTH GAUGE	127,00
05.011.011	CAPSULE	109,00

This handy depth gauge features a fluorescent scale, a built-in temperature gauge and fits nicely on a comfortable wrist strap.

- Oil-filled gauge housed in an impact-resistant nylon case
- 60m linear scale features maximum depth indicator for the easy logging of maximum depth
- Bourdon tube design provides precise readings at all depths

PART NUMBER	DESCRIPTION	MSRP
05.023.353	3 GAUGE INLINE CONSOLE	299,00
06.204.408	BOOT ONLY	45,00

This sleek, three-gauge console combines a SCUBAPRO metal pressure gauge, depth gauge (Standard Depth Gauge 60m) and FS-2 compass, creating an easy-to-use, at-a-glance information center.

- Compact pressure gauge (0-400bar) with brass case.
- Oil-filled analog depth gauge with linear Bourdon tube design.
- 35-degree tilt, oil-filled compass.

05.023.353

SCUBAPRO PG DUAL BAR/PSI

Compact, all-metal analog pressure gauge. The dual bar/psi model is ideal for travelling divers and resorts with an international clientele.

- Compact pressure gauge (0-400bar) and (0-6000) psi.
- Dual gauge displays imperial and metric units simultaneously.
- Red zone displays at (0-50 bar) and (0-800 psi).
- Ø 48mm with brass case.

FS 2 COMPASS

PART NUMBER	DESCRIPTION	MSRP
05.017.101	FS 2 COMPASS - WRIST	107,00
05.017.121	FS 2 COMPASS W/RETRACTOR	142,00
05.017.001	FS 2 CAPSULE ONLY	92,00
05.017.111	FS 2 WITH BOOT (NO RETRACTOR)	103,00
06.204.469	ARMSTRAP	23,50

The FS-2 compass provides a unique tilt angle of up to 35 degrees, making it easier to read and operate in almost any position. With a floating magnet separate from the compass rose, the FS-2 has greater operating freedom than conventional compasses. This means you can use the same compass for both Northern and Southern hemispheres, making it the perfect navigation instrument for travelling divers.

- Scratch-resistant and durable oil-filled polycarbonate case
- Highly luminous dial for easy reference in low light conditions
- Side view window for easy and accurate navigation
- Available in a wrist model or in a retractor model

HYDROS X

The Hydros X is the world's first front-adjustable BCD to offer a fully injection molded Monprene® thermoplastic shoulders and back pad. This unique feature allows the shoulders to conform to your body like a tailored fit, creating superior comfort. Add the full-sized backpack and stainless steel Super Cinch tank band and you also get excellent stability both on the surface and at depth. The bladder, made out of EndurTex high-tenacity nylon fabric, is extremely lightweight and durable while offering generous lift capacity, aided by lower back bellows. In the event of damage, several components on the Hydros X are detachable and easily replaceable. Its flat-buckled quick-release integrated weight system and rear trim weight pockets work together to offer a more comfortable and balanced ride during your dive. The two big zippered cargo pockets offer great gear-carrying capacity and are easily accessible even when the weight pouches are fully loaded. Two stainless steel D-rings provide clip-on points for additional gear. In addition, the Hydros X features a Multi-Mount Accessory Matrix with multiple D-Ring and mounting points that easily attach various dive accessories.

- Hydros X is based on the same modular Monprene® shoulders and back pad design made popular by the Hydros Pro back-inflation BCD.
- EndurTex high-tenacity 420 nylon fabric bladder is lightweight yet extremely durable.
- Monprene® thermoplastic shoulders and back pad are extremely resistant to UV, chemicals and abrasion, plus don't absorb water to Minimise drying time.
- Rotating quick-release shoulder buckles allow you to route your shoulder straps to optimise fit.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Integrated front weight system is based on the same Monprene® pockets found on the Hydros Pro.
- Two rear trim pouches help create a comfortable swimming position.
- Two big zippered cargo pockets offer great gear-carrying capacity and are easily accessible even when the weight pouches are fully loaded.
- Two stainless steel D-rings provide clip-on points for additional gear.
- Includes Multi-Mount Accessory Matrix with multiple D-rings and mounting points that easily attach various dive accessories.
- With Balanced Power Inflator.

HYDROS PRO

THE ABILITY TO CHANGE ANYTHING, CHANGES EVERYTHING.

The HYDROS PRO is a true breakthrough in dive comfort and convenience. The moldable Monprene®, adjustable fit and multi-attachment points combine to make this the most customisable and comfortable BCD ever. Winner of the 2016 Red Dot award for product design, the HYDROS PRO is an incredible feat of SCUBAPRO engineering, built for anyone who loves to dive.

Interchangeable straps, a packable design and an included backpack with room for your entire dive kit make the HYDROS PRO perfect for any destination and any dive.

TECHNICAL INFORMATION

- Ultra Durable: Patented Injection Molded Monprene® Gel Harness is extremely resistant to UV, chemicals and abrasion. The fabric-free harness uses no Hook & Loop or zippers
- Instant Dry: Ideal for travel due to less water retention and lower post-dive weight
- "BCD-4-Life" Modular Design: Customisable to add/remove weight systems, straps and pouches. Extended lifespan due to simplified repairs. Virtually every component, including buckles, can be replaced without stitching
- 3D Ergonomic Design: Conforms to your body shape for maximum comfort
- Lightweight: Advanced materials keep weight low
- Neutrally Buoyant: Near-Zero inherent buoyancy requires less lead, resulting in better buoyancy control and much more enjoyable diving
- Body Grip Gel: Prevents BCD from shifting and riding up
- Dual-Compound Backplate: Provides the ultimate in stability and comfort. Single tank band system allows for easier assembly
- Torso Flex Zone: Auto-adjusts to your torso length for excellent comfort and freedom of movement
- Articulated Shoulder Straps: Allow straps to adjust to your body shape to achieve a snug fit
- Kit-Up Assist: Holds shoulder straps open for easy donning
- Cross-Flow Channel: Unrestricted internal airflow reduces air trapping for enhanced maneuverability and easy deflation at any angle
- 2-Stage Inflation: Tri-bungee system controls air distribution to maintain a compact shape under water and high lift capacity at the surface
- Dorsal Weight-Wing: Anti-abrasion and instant dry. Optimal "Outboard" trim pockets
- Buckle Weight System: Simple, safe and reliable quick-release buckles offer a fixed location for easy one-hand operation
- Multi-Mount Accessory Matrix: Multiple D-Rings and mounting points for a knife + light + SMB + hoses + crotch strap and much more
- Smart-Pack Design: Folding shoulder and waist straps pack into the wing, creating an unbelievably compact package for easy transport and storage
- Bladder constructed of 420 denier nylon for light weight and long-lasting durability
- Not suitable for use with twin cylinders.
- With BPI & corrugated hose

X-BLACK

The front-adjustable X-Black features SCUBAPRO's exclusive AirFlex system (highlighted by the red bungees threaded throughout the BCD) that simplifies buoyancy control and guarantees an extremely stable ride at depth. Loaded with convenience and performance features, the X-Black is also one of the most comfortable BCDs available, thanks to its ergonomic cut, and it offers a huge lift capacity.

- Constructed of a combination of durable 1000 denier and 420 denier nylon for long-term wear
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths
- 50mm non-rotating shoulder buckles optimise strap routing to maximise fit
- Air-net backpack is water-draining and comfortable during long dives
- AirFlex system with special bladder delivers enormous buoyant lift capacity
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth
- Two rear trim pouches allow you to achieve a well-balanced swimming position
- Quick-release integrated weight pouches ditch quickly and easily and secure with buckles
- Built-in grommets provide attachment points for a knife
- Two large zippered pockets and one smaller pocket, plus a zippered cummerbund pouch provide lots of cargo-carrying capability
- Eight aluminum D-rings, four large and pre-bent, provide convenient clip-on points for additional gear
- Equipped with Balanced Power Inflator (BPI)

SEAHAWK 2

Seahawk 2 is a popular all-purpose BCD features an ergonomic shoulder design with rotating buckles and a soft, reinforced backpack – this makes it much lighter than its predecessor, and extremely easy to fold and pack. The stainless steel Super Cinch tank band is positioned a bit lower than before, and an additional Hook & Loop strap has been added to secure the tank when diving. Other features include a 50mm waist strap with lightweight cam buckle, redesigned cargo pockets and a range of airway and valve fittings. Offering a streamlined shape yet substantial buoyant lift when needed, the Seahawk 2 is the perfect choice for divers looking for freedom of movement, comfort and stability when cruising the depths.

- Constructed of 1000 denier nylon and 420 denier nylon for maximum durability.
- High-quality air cell offers a streamlined shape when deflated and substantial buoyant lift when inflated.
- Soft neoprene neck roll and padded back pad enhance comfort during long dives.
- Quick-release integrated weight pouches secure with low-profile buckles.
- Two rear trim pouches help create a comfortable swimming position.
- Six stainless steel 40mm D-rings, plus two additional 25mm D-rings on the pockets, provide lots of clip-on points for additional gear and instrumentation.
- Ergonomic shoulder design with rotating buckles improves fit, helps distribute the load and enhances stability.
- Reinforced soft backpack with high-grip tank patch and inner padding add to comfort, reduce overall weight, and make it easy to fold and pack.
- Super Cinch stainless steel tank band system is positioned lower and teamed with a second Hook & Loop™ strap to secure the tank for transport and diving.
- 50mm waist strap with lightweight plastic buckle lets you fine-tune adjustments for a perfect fit.
- Two large zippered pockets have been redesigned, providing lots of cargo-carrying capability.
- With BPI & corrugated hose

BELLA & GLIDE

BELLA

The Bella was specifically designed, tailored and sized for female divers who prefer the comfort and security of a front-adjustable BC. This BC is loaded with convenience and performance features, including SCUBAPRO's exclusive wraparound bladder which retains its cradle-like shape even when fully inflated, providing a comfortable fit and stable position both at depth and on the surface. It also sports a Y-Fit shoulder design that fits the body better, allowing for excellent control and range of motion for the arms. The stainless steel triangular ring manages the forces in the Y's center, balancing pressure over the body and keeping the harness under control, regardless of your position in the water. This makes for a comfortable and secure ride while cruising the depths.

- Designed and sized for women divers.
- Constructed of 420 denier nylon for light weight and long-lasting durability
- Wraparound air bladder retains its cradle-like shape even when fully inflated.
- Y-Fit shoulders with a triangular stainless steel ring balance the pressure on the body to maximise fit and comfort.
- Soft neoprene neck and padded backpack optimise comfort.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Quick-release integrated weight pouches feature a high-security flat-buckle system.
- Two rear trim pouches allow you to achieve a well-balanced swimming position.
- Two large zippered pockets provide lots of cargo-carrying capability, plus are fitted with metal grommets for attaching a knife.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide lots of clip-on points for additional gear.
- With BPI & corrugated hose

GLIDE

The Glide is a front-adjustable BC with special design features to maximise comfort, fit and performance. The Glide comes with a Y-Fit shoulder design that adapts to the body better, allowing for excellent control and range of motion for arms. The stainless steel triangular ring manages the forces in the Y's center, balancing pressure over the body and keeping the harness under control, regardless of dive conditions or your position in the water. The lower strap is connected to the backpack where it meets the cummerbund, creating a safe and comfortable link. The dump system includes three valves that allow you to deflate the wraparound bladder in any swimming position.

- Constructed of 420 denier nylon for light weight and long-lasting durability.
- Wraparound air bladder retains its cradle-like shape even when fully inflated.
- Y-Fit shoulders with a triangular stainless steel ring balance the pressure on the body to maximise fit and comfort.
- Soft neoprene neck and padded backpack optimises comfort.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Quick-release integrated weight pouches feature a high-security flat-buckle system.
- Two rear trim pouches allow you to achieve a well-balanced swimming position.
- Two large zippered pockets provide lots of cargo-carrying capability, plus are fitted with metal grommets for attaching a knife.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide lots of clip-on points for additional gear.

GO QUICK CINCH

If you like to bring your own gear with you when you go dive-trekking, the SCUBAPRO GO is the BCD for you. A true travel BCD, the GO is lightweight and foldable yet is loaded with features like integrated front weight pockets, two huge quick-draining cargo pockets, two octo pockets and SCUBAPRO's user-friendly Quick Cinch tank buckle system. This innovative, patented tank strap assembly adjusts easily and will fit any tank size in case you find yourself renting different tanks at different dive destinations. Compact rotating shoulder buckles make it easy to don the BCD as well as dial in the perfect fit. The air-net ergonomic backpack is lightweight and soft, so it can be easily folded in your travel bag, ready for your next dive adventure.

- Lightweight design (only 5.7lbs/2.6kg in size Large) folds easily and compactly into your included dive travel bag (included).
- Wraparound bladder is made of durable Nylon 210 denier fabric and features a polyurethane layer and RF soldering for maximum wear resistance.
- Patented Quick Cinch tank buckle requires minimal effort to buckle and easily adjusts to fit any tank size.
- Additional upper band helps secure the tank for maximum stability at depth.
- Two large low profile zippered pockets, one fitted with stainless steel knife attachment grommets, provide lots of cargo-carrying capability.
- Rotating quick-release shoulder buckles allow you to optimise the routing of your shoulder straps to maximise comfort and fit.
- Coated mesh cummerbund is lightweight and fast-drying.
- Air-net padded backpack is water-draining, easy to fold, and enhances comfort during long dives.
- Quick-release integrated weight pouches ditch easily and secure with low-profile squeeze buckles. Each weight pouch can hold up to 10lbs/4.5kg of ballast weight.
- Five aluminum D-rings, including two large, pre-bent D-rings on the shoulder pads, provide convenient clip-on points for additional gear.
- Two octopus pockets are provided for storing octopus and console hoses.
- Optional trim weight pockets provide better trim in the water.
- Available with SCUBAPRO's Balanced Power Inflator (BPI)

LITEHAWK

The Litehawk is the ultimate back-flotation travel BCD. Its lightweight, ultra-slimmed-down design and soft, flexible backpack allows it to lay flat and compact for packing. The adjustable belt-style waist strap with nylon buckle can be cinched up snug, hugging your body like it was custom made for you while delivering a comfortable, stable ride at depth.

- Constructed of 420 denier nylon for lightweight and long-lasting durability
- Low-profile, progressively-shaped rear air cell increases range of motion while decreasing drag
- Elastic cords rein in the air cell when partially inflated and help control deflation
- Clutter-free ergonomic harness eliminates bulk and enhances freedom of movement
- Rotating quick-release buckles allow you to optimise the routing of the padded shoulder straps to maximise fit
- Multiple tank band and strap system keeps tank secure and increases stability at depth
- Three-dump deflation system lets you to dump air from a variety of underwater positions
- Two accessory pockets are included
- Two rear trim pouches allow you to achieve a well-balanced swimming position
- Four aluminum D-rings provide convenient clip-on points for additional gear
- With BPI & corrugated hose

LEVEL

A fresh design incorporating eye-catching silver, blue and white graphics and a bold SCUBAPRO logo make 2022's Level stand out in any diving crowd. But beyond good looks, this front-adjustable BCD brings together all of the performance and comfort features you'll need for any recreational diving scenario. The bladder, made of EndurTex high-tenacity 420 nylon fabric, is lightweight yet extremely rugged, and it's designed to comfortably wrap around your body without squeeze. rotating quick-release shoulder buckles allow you to optimise the routing of your shoulder straps for comfort, and a sternum strap and adjustable cummerbund with double-pull over-strap make for the perfect fit. The full-sized backpack, working together with SCUBAPRO's Super Cinch tank band, holds the tank rock solid for maximum stability. The integrated weight system loads easy and ditches even easier with its low-profile 40mm flat buckles. Built-in trim weight pockets help distribute ballast weight and help ensure a comfortable swimming attitude while at depth. Also included are two large cargo pockets, one with metal grommets for attaching a knife, four D-rings for clipping on additional gear, and two octo pockets for storing safe second and console hoses.

- Graphics, colour accents and texturing on cargo pockets combine for an eye-catching look.
- Built-in trim weight pockets can each hold up to 4.4lbs/2kg of weight to help maintain a well-balanced dive position.
- Rotating quick-release shoulder buckles allow you to optimise the routing of shoulder straps to maximise comfort and fit.
- EndurTex high-tenacity 420 nylon fabric bladder is lightweight, extremely durable, and dries fast.
- Wraparound bladder comfortably hugs your body without squeeze.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Quick-release integrated weight pouches each hold up to 11lbs/5kg of ballast and feature high-security 40mm flat buckles.
- Sternum strap and cummerbund with over-strap provide plenty of adjustment to achieve that perfect fit.
- Two large pockets with hook-and-loop closures provide lots of cargo-carrying capacity, plus one is fitted with metal grommets for attaching a knife.
- Four stainless steel D-rings, three pre-bent, provide lots of clip-on points for additional gear.
- A pair of octo pockets are perfect for storing safe second and console hoses.
- Available with SCUBAPRO's Balanced Power Inflator (BPI)

T-ONE

The T-One front-adjustable BCD is targeted to the global rental market. It is simple in design, easy to use, and provides substantial lift capacity, making it the ideal choice for beginners during their dive classes, as well as for avid recreational divers who prefer to rent their dive gear when travelling to prime dive destinations. The T-One is also built rugged, able to stand up to intensive use under extreme conditions. It retains the same reliable bladder design as the current T-One but features an EndurTex high-tenacity nylon fabric. The BCD comes with backpack padding, generous cargo pockets with Hook & Loop closures, two octo pockets and the familiar standard plastic buckle tank cinch. Offering a wide range of sizes and reliable comfort, the T-One is built to deliver solid performance, for every diver and every dive, for years to come.

- EndurTex high-tenacity nylon fabric bladder, polyurethane-coated and high-frequency welded, is lightweight yet extremely durable. This makes for a lighter, more versatile BCD.
- Built to stand up to intensive use under extreme conditions while maintaining its looks with colour-fast materials and attractive graphics.
- Back padding is covered with a specific hi-grip material to maximise comfort.
- Two large pockets with Hook & Loop closures provide lots of cargo-carrying capability.
- A pair of octo pockets are perfect for storing a safe second and console hose.
- Colour-coded tags make it easy to identify the various sizes.
- With BPI (Balanced Power Inflator).

MASTER JACKET

The Master Jacket is designed with internal passageways that allow air to flow unrestricted and accumulate at the BCD's highest point. It also offers impressive lift capacity in all sizes, and provides a "face-up" body position on the surface. Because of this, the Master Jacket has been certified as a Combined Buoyancy and Rescue Device (CBRD). It is the stabilising jacket of choice among commercial and military divers, dive instructors, and advanced divers.

- Constructed of a combination of polyester and soltane for strength and durability
- Padded back pad enhances comfort during long dives
- Cummerbund with overstrap and sternum strap work together to dial in a snug fit
- Deflation system with removable dump valves enables you to dump air from a variety of underwater positions
- Super Cinch tank buckle system locks the tank in rock-solid for maximum stability at depth
- Two large Hook & Loop-closure provide lots of cargo-carrying capability
- Four large stainless steel D-rings provide convenient clip-on points for additional gear

AIR 2

PART NUMBER	DESCRIPTION	MSRP
21.090.000	Air 2	255,00
21.089.998	AIR2 assembled on new BCD instead of BPI	-
21.090.045	Service Kit 5th generation	-
21.085.045	Service Kit 3rd + 4th generation	-

This excellent BCD inflator/reg is in its 5th generation with dramatically improved work of breathing. Sleek ergonomic inflate/deflate controls allow for pinpoint buoyancy control.

- Test-proven breathing performance and cracking effort surpasses many traditional downstream second stages when it comes to ease of breathing
- Dive/pre-dive switch lets you de-tune the unit when not in use, eliminating free flows
- Flexible purge cover is easy to locate and depress for quick clearing.
- Power inflate and deflate buttons are positioned on top of the housing for easy buoyancy control
- Power inflate button features a lighter lever for easy inflation
- Power inflate and deflate buttons can be differentiated by colour and touch due to their different shapes and sizes, improving ascent control and safety when inflating or deflating the BCD
- CE certified (EN250A > 10°C/50°F warm water test controls) as a second stage regulator

Shown with corrugated hose - sold seperately (P.N. 01.030.121)

TRIM WEIGHT POCKET KIT

Now any SCUBAPRO BCD, including entry-level BCDs and those with full-sized backpacks, can be retrofitted with a high-quality trim weight system to aid in improving a diver's swimming position. These innovative trim weight pockets include low-profile, lightweight buckles to secure the weights, special plastic clips to keep the pockets in place on the BCD, plus double rails stitched to the pockets themselves that are designed to slide between the backpack plate and the bladder. When properly installed, the trim weight pockets do not prevent the bladder from inflating properly, and they do not interfere with the tank or tank strap. Each pocket can carry up to 2.2lb/1kg of weight.

- Rear trim weights allow you to achieve a well-balanced swimming position.
- Trim weight pockets are imprinted with the SCUBAPRO logo along with maximum load.
- Low-profile buckles keep weights secure while diving.
- Each pocket can carry up to 2.2lb/1kg of weight.
- Mounting trim weight pockets on a BCD is extremely easy; however, the kit should be installed by an authorised SCUBAPRO /Tech Service only, to prevent any potential issues.

- Compatible with T-One 2020, Level 2019, Equilizer, X-One, Go > 2021

S-TEK PRO SYSTEM

PART NUMBER	DESCRIPTION	MSRP
22.249.030	30lbs/13kg - includes a single tank adapter	**1 068,00**
22.249.040	40lbs/18kg	**959,00**
22.249.060	60lbs/27kg	**959,00**

The S-Tek Pro's revolutionary design combines premium-plus materials and construction with purist features and technology to create the ultimate adjustable BPW system for technical diving. Designed for both utility and comfort, this system features 3D formed back plate with harness that includes individually adjustable TEK LOC shoulders to ensure a snug fit as well as make donning and doffing easy. Shoulder buckles & D-rings can be adjusted up or down to conform to different torso lengths. To enhance comfort, shoulder and waist straps are fitted with molded Monprene® pads that provide excellent cushioning without creating bulk or inherent buoyancy. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, two D-rings on the waist, and two D-rings on the crotch strap. The stainless steel backplate comes with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for drysuit divers, a Monprene® pad for comfort, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. The system is available with a 30lbs/13kg, 40lbs/18kg or 60/27kg lift donut wing, with the 30lbs/13kg and 40lbs/18kg wings being suitable for single tank diving and the 40lbs/18kg and 60lbs/27kg wings for twin tank diving. The 30lbs/13kg system includes a single tank adapter. The S-Tek Pro is built tough and is loaded with features, making your time at depth safer, more comfortable, and more enjoyable.

- Adjustable TEK LOC shoulders contribute to a snug, individualised fit.
- Shoulder buckle & D-ring heights can be adjusted to suit different torso lengths.
- Molded Monprene® pads cushion shoulders, waist and back to optimise comfort.
- Two pre-bent D-rings on the shoulders, two straight D-rings on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder keeps the inflator hose in place.
- Donut wing is constructed of a 1000D Cordura outer shell and 500D Cordura inner bladder.
- Padded stainless steel back plate offers Evo-Angle webbing slots plus mounting points for trim weights and an argon tank for drysuit divers.
- Back plate includes a Monprene® pad for comfort, plus a convenient built-in carry handle.
- 2 x S-Tek Ergo Nuts – ergonomically designed, easier to tighten and loosen, and flushed mounted to prevent abrasion.
- Single tank adapter is included with the 30lb/13kg system.
- Back plate features fully radiused edges and a softened organic shape, along with the back plate's recessed wingnut socket, rationalised hole count and positioning, and webbing bolt hole alignment, make for a well-thought-out system.
- Each wing features an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-Style BPI (21.615.000).

S-TEK PURE SYSTEM

PART NUMBER	DESCRIPTION	MSRP
22.248.030	30lbs/13kg - includes a single tank adapter	**959,00**
22.248.040	40lbs/18kg	**851,00**
22.248.060	60lbs/27kg	**851,00**

BPW divers who subscribe to the DIR (Doing It Right) approach to streamlined and minimalistic equipment configurations will appreciate SCUBAPRO's S-Tek Pure back plate/wing system. This simple yet rugged system consists of a continuous-web harness teamed with a revolutionary designed 3D formed stainless steel back plate and a donut wing. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap. The stainless steel backplate comes with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for drysuit divers, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. The system is available with a 30lbs/13kg, 40lbs/18kg or 60lbs/27kg lift donut wing, with the 30lbs/13kg and 40lbs/18kg wings being suitable for single tank diving and the 40lbs/18kg and 60lbs/27kg wings for twin tank diving. The 30lbs/13kg system includes a single tank adapter. The S-Tek Pure is a rugged and reliable tech diving system designed for those extended trips into the depths.

- Continuous webbing harness provides a custom, individualised fit.
- Can be configured as a fixed-shoulder length harness for ultimate simplicity or in Extender mode that allows the shoulder straps to extend for easier doffing & donning.
- Stainless steel waist buckle allows for a full range of adjustment.
- Two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder and branded silicone guide bands keep inflator hose and straps in place.
- Stainless steel back plate offers Evo-Angle webbing slots plus mounting points for trim weights, an argon tank for drysuit divers, plus a convenient built-in carry handle.
- 2 x S-Tek Ergo Nuts – ergonomically designed, easier to tighten and loosen, and flushed mounted to prevent abrasion.
- Donut wing (30lbs/13kg, 40lbs/18kg or 60lbs/27kg) is constructed of a 1000D Cordura outer shell and 500D Cordura inner bladder.
- Single tank adapter is included with 30lb/13kg system.
- Back plate features fully radiused edges and a softened organic shape, along with the back plate's recessed wingnut socket, rationalised hole count and positioning, and webbing bolt hole alignment, make for a well-thought-out system.
- Each wing features an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-Style BPI (21.615.000).

S-TEK PRO HARNESS W/BACK PLATE

SCUBAPRO's S-Tek Pro Harness combines premium-plus materials and construction with purist technology and features in a revolutionary designed Back Plate that's sure to excite the technical diving community. Designed for both utility and comfort, the harness includes individually adjustable stainless steel TEK LOC shoulder buckles to ensure a snug fit as well as easy donning and doffing. Shoulder buckles and D-rings can be adjusted up or down to conform to different torso lengths. To enhance comfort, shoulder and waist straps are fitted with molded Monprene® pads that provide excellent cushioning without creating bulk or inherent buoyancy. Stainless steel hardware includes a waist buckle, two pre-bent D-rings on the shoulders, two D-rings on the waist, plus two D-rings on the crotch strap. The harness comes with a revolutionary 3D formed back plate - either a corrosion-resistant stainless steel or lightweight aluminium back plate, both with Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for dry suit divers, a Monprene® pad for comfort, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle. These premium plates feature a softened organic shape with fully radiused edges and recessed Wing-Nut Sockets that are compatible with standard Wing Nuts or the included S-Tek ERGO Nuts.

- Adjustable TEK LOC shoulders contribute to a snug, individualised fit.
- Shoulder buckle and D-ring heights can be adjusted to suit different torso lengths.
- Molded Monprene® pads cushion shoulders, waist and back to optimise comfort.
- Two pre-bent D-rings on the shoulders, two D-rings on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder keeps the inflator hose in place.
- Electro-polished Stainless steel or Anodised aluminium back plate offers Evo-Angle webbing slots plus mounting points for both trim weights and an argon tank for dry suit divers.
- Back plates include a convenient built-in carry handle.
- Fully radiused edges and a softened organic harness shape.
- Recessed Wing Nut Socket – 3D formed sockets that accept standard Wing Nuts or the S-Tek Ergo Nuts. Ergo Nuts are flushed mounted to prevent suit abrasion, are easier to tighten and loosen and are ergonomically designed for use with cold, wet or gloved hands.
- Rationalised hole count and positioning and webbing bolt hole alignment make for a well thought out system.

S-TEK PURE HARNESS W/BACK PLATE

SCUBAPRO's S-Tek Pure Harness with Back Plate follows the DIR (Doing It Right) approach to BPW diving with its streamlined, minimalist design. It features a continuous-web harness with lots of stainless-steel hardware, including a waist buckle, two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap. The harness comes with a choice of a revolutionary 3D formed back plate – a corrosion-resistant electro-polished stainless steel or lightweight anodised aluminium. These premium plates feature a softened organic shape with fully radiused edges, recessed Wing-Nut Sockets that are compatible with standard Wing Nuts or the included S-Tek ERGO NUTS, as well as Evo-Angle webbing slots for a more natural webbing routing that increases comfort and reduces webbing abrasion. The backplate also provides trim weight system mounting holes, an argon tank mounting point for dry suit divers, 2 x S-Tek Ergo Nuts, plus a convenient built-in carry handle.

- Continuous webbing harness with provides a custom, individualised fit.
- Can be configured as a fixed-shoulder length harness for ultimate simplicity or in Extender mode that allows the shoulder straps to extend for easier doffing & donning.
- Stainless steel waist buckle allows a full range of adjustment.
- Two pre-bent D-rings on the shoulders, one D-ring on the waist, and two D-rings on the crotch strap are provided for clipping on extra gear.
- Branded silicone epaulet on the left shoulder and branded silicone guide bands keep inflator hose and straps in place.
- Back plates offer Evo-Angle webbing slots plus mounting points for trim weights, an Argon tank for dry suit divers, plus a convenient built-in carry handle.
- Fully radiused edges and a softened organic shape.
- Recessed Wing Nut Socket – 3D formed sockets that accept standard Wing Nuts or the S-Tek Ergo Nuts. Ergo Nuts are flushed mounted to prevent suit abrasion, are easier to tighten and loosen and are ergonomically designed for use with cold, wet or gloved hands.
- Rationalised hole count and positioning and webbing bolt hole alignment make for a well thought out system.

22.240.060	27kg	**546,00**

BPW divers can depend on reliable buoyancy control regardless of their diving position with SCUBAPRO's line of S-Tek donut wings. S-Tek donut wings offer rounded profiles to allow for smooth, controlled air migration. Built to last, the 500D Cordura inner bladder is protected by an outer shell made of dope-dyed, colourfast 1000D Cordura that delivers industry-leading abrasion resistance. Each wing comes with an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-style BPI.

- Eco-friendly and colourfast, the Dope-Dyed, 1000D Cordura outer shell and 500D Cordura inner bladder deliver industry leading abrasion resistance and are built to last.
- Durable YKK zipper can stand up to years of use.
- Rounded profiles ensure smooth, controlled air migration.
- Improved profile reduces air trapping.
- Embroidered logos highlight both S-Tek and SCUBAPRO brands.
- Each wing features an elliptical EPDM corrugated inflator hose and SCUBAPRO's K-Style BPI (21.615.000).

S-TEK SINGLE TANK ADAPTER

The S-Tek Single Tank Adapter is a convenient way to switch from double tank to single tank diving. Made from marine-grade aluminium, the design of this adapter makes it much easier to attach the tank using a single cinch band. It offers more vertical adjustability, fixed bolts for easy attachment and removal, and a rubber grip pad to help hold the tank securely in place. A tank height adjustment strap with quick-release buckle is included.

- Made of lightweight marine-grade aluminium.
- Single cinch band makes for easier tank attachment.
- Design offers more vertical adjustability for fine-tuning tank positioning.
- Rubber grip pad helps keep tank securely in place.
- Fixed bolts allow for easy attachment and removal.
- Includes tank height adjustment strap with quick-release buckle.

S-TEK EXPEDITION REELS

PART NUMBER	DESCRIPTION	MSRP
40.201.330	330ft/100m	224,00
40.201.660	660ft/200m	251,00

When serious tech divers need a serious reel, SCUBAPRO'S S-Tek Expedition Reel delivers. Evoking the distinctive design of SCUBAPRO's classic G250 second stage, this reel is rugged throughout, featuring a marine-grade anodised aluminium frame with a durable injection-molded fiberglass reinforced Nylon drum plus stainless steel axle and screws. The anti-snag stainless steel lock-down screw is located at the opposite end of the handle from the line exit; this makes for better ergonomics while reducing the risk of line snags. A handy line capacity gauge lets you know how much line has played out, and an ergonomic anti-snag winder makes line retrieval easy.

- Durable construction includes a marine-grade anodised aluminium frame, injection-molded fiberglass reinforced Nylon drum and stainless steel axle and screws.
- Anti-snag stainless steel lock-down screw located at the opposite end of the handle from the line exit improves ergonomics while reducing the risk of line snags.
- Anti-release eyelet for the bolt snap ensures security.
- Ergonomic anti-snag winder allows for problem-free line retrieval.
- Integrated stealth line cleat and removable Torben-Loc line anchor provide two options for securing the line-end to avoid losing it through the line guide exit.
- Included: a line capacity gauge and stainless steel bolt snap.

40.201.660

S-TEK SPINNER SPOOLS

PART NUMBER	DESCRIPTION	MSRP
40.202.050	50ft/15m	62,00
40.202.100	100ft/30m	67,00
40.202.150	150ft/45m	77,00

Evoking the distinctive design of SCUBAPRO's classic G250 second stage, these premium spinner spools come in three line lengths and are super easy to use. The key to each spool's user-friendliness can be found in the exclusive SCUBAPRO-branded spinner discs located at the center point of the spool; the discs remain static while the spool spins and the line plays out. Consequently, the spool will not try to rotate out of your hand like normal spools do, allowing for a more secure grip while playing out line. You can adjust the tension on the line by squeezing the spinner discs together, forming a disc brake effect. Made of durable injection-molded fiberglass reinforced Nylon with a stainless steel axle and screws, the body of the spool is designed so that it can be easily clipped off to a bolt snap.

- Spinner discs remain static while the spool spins, so the spool will not rotate out of your hand like normal spools can.
- Design allows for a secure, comfortable grip while playing out line.
- Made of durable injection-molded fiberglass reinforced Nylon with stainless steel axle and screws.
- Body of the spool is designed so that it can be easily clipped off to a bolt snap.
- Includes a stainless steel bolt snap.
- See p81 for the Spinner Spool Colour Kits

S-TEK EXPEDITION THIGH POCKET

Expand your equipment carrying capability by adding an S-Tek Expedition Thigh Pocket to your diving rig. Made of heavy-duty 1000D Cordura, a large protective overlap secures contents with an easy-open buckle that can be opened and closed with one hand. A stainless-steel bolt snap mounted on top clips onto a waist harness D-ring, while the adjustable strap on the back secures the pocket to your thigh. An internal bungee loop is provided for securing items and the pocket's proportions are generous, providing space for equipment like dive lights, marker buoys, spare masks or compact cameras.

EVERTECH DRY BREATHABLE

The Evertech Dry Breathable is a premium trilaminate drysuit designed for avid divers and loaded with features. Built with a breathable fabric nylon/PU/nylon trilaminate blend, stitched and double waterproof taped seams, a diagonal front waterproof zipper, a Si-Tech ring system for wrist and neck seals and Si-Tech valves, this fabric suit is top quality throughout. A pair of large cargo pockets, an updated pair of lightweight attached boots and blue suspenders are just a few of the standard features included with a suit designed to keep you dry and comfortable in all water conditions. The Evertech Dry Breathable is also super lightweight: A medium size suit weighs only 3.340kg (without hood, bag & hose).

- Breathable nylon/PU/nylon trilaminate design allows body perspiration evacuation
- Seams are stitched then waterproofed taped twice for maximum reliability
- Front diagonal BDM metal dry zipper keeps water out and makes self-donning easy and is protected by an extra fabric flap with YKK Vislon zipper.
- Si-Tech ring system for latex wrist and neck seals provides quick replacement of damaged latex seals or the use of optional silicone seals
- Neoprene neck collar keeps the hood in place, makes it easier to position the hood when wearing gloves, and helps preserve the latex neck seal
- Quality Si-Tech valves mounted on stitched and glued pads ensure efficient and trouble-free airflow control.
- Attached semi-rigid dive boots feature soft soles that improve their anti-slip capabilities while enabling you to comfortably walk on rough ground
- Boots include hook & loop straps to improve fit while preventing air from travelling to feet. Also included: Heel cap with fins strap retainer
- Two large cargo pockets equipped with D-rings, easy-to-see blue bungee, high-security over-flaps and Hook & Loop closures
- A hook is provided on the right-thigh utility pocket for attaching a hood
- I-Safe straps on both arms offer a secure mounting spot for a wrist computer
- Suspender system enhances fit and provides convenient lower suit support between dives
- Hood features an air vent system, smooth-skin collar, Diamond Span interior and hook
- Includes hood, carry bag, low pressure hose, repair kit, zipper wax and owners manual

DEFINITION DRY

Targeted to advanced divers looking for a quality mid-range fabric drysuit, the Definition Dry HD is a serious drysuit that's built to last. It is made with a heavy-duty poly/butyl/poly trilaminate blend plus a stitch-glue-double waterproof taped seam assembly that's able to withstand the rigors of diving. The Definition Dry's trilaminate fabric blend has also been certified as being fungous and bacteria resistant by an independent laboratory specialising in textile testing. This will help to extend the working life of the suit plus will radically reduce odours that occur from repeated use. Though built tough, the Definition Dry HD offers a number of design features that enable you to achieve a comfortable, streamlined fit.

- Heavy-duty poly/butyl/poly trilaminate design stands up to years of aggressive diving
- Seams are stitched, glued, and then double waterproof taped for maximum reliability
- Front diagonal BDM metal dry zipper keeps water out and makes self-donning easy
- Latex wrist and neck seals are durable, comfortable and efficient at blocking water entry
- Neoprene neck collar keeps the hood in place, makes it easier to position the hood when wearing gloves, and helps preserve the latex neck seal
- Quality Si-Tech valves mounted on stitched and glued pads ensure efficient and trouble-free airflow control.
- Attached semi-rigid dive boots feature soft soles that improve their anti-slip capabilities while enabling you to comfortably walk on rough grounds
- Boots include hook & loop straps to improve fit while preventing air from travelling to feet. Also included: Heel cap with fins strap retainer
- Two large cargo pockets equipped with D-rings, easy-to-see blue bungee, high-security over-flaps and hook & loop closures
- I-Safe straps on both arms offer a secure mounting spot for wrist instruments
- Trilaminate fabric blend has been independent laboratory tested and certified as fungous and bacterial resistant.
- Suspender system enhances fit and provides convenient lower suit support between dives
- Hood features an air vent system and a hook for securing to the cargo pocket
- Includes hood, carry bag, low pressure hose, repair kit, zipper wax and owners manual
- Officially certified as fungus and bacteria resistant since 2018

EVERDRY 4.0

This premium-plus compressed neoprene drysuit offers the streamlined fit, comfort and flexibility of a wetsuit with the thermal properties and water-tightness of a drysuit. But this version comes with upgraded shoulder and knee panels, a plush interior, smoother wrist seals, blue suspenders, and much more. The dense 4mm neoprene resists compression at depth so the drysuit can be worn with a thin undergarment or no undergarment at all. Built for comfort and extended wear, the Everdry 4 fits like a glove, offers excellent range of motion, and most importantly, keeps body heat in and cold water out.

- 4mm high-density neoprene weighs 50% less and is significantly softer than traditional drysuit neoprene.
- Seams are triple-glued and double-thread blind-stitched on the outside; inside they are coated with liquid polymer to create a long-lasting waterproof seam.
- Plush interior is comfortable and enhances insulation against cold water.
- Smooth-skin fold-under neoprene neck seal and ultra-smooth wrist seals provide comfortable, watertight sealing surfaces.
- Heavy-duty rear shoulder-to-shoulder BDM metal drysuit zipper is covered by a neoprene overflap.
- Si-Tech balanced side-activated inlet and adjustable outlet valves allow for pinpoint buoyancy control, increasing stability and control at depth.
- Shoulder and knee panels cover a lot of area for maximum anti-abrasion resistance.
- Attached neoprene soft socks enable the suit to be turned completely inside-out for cleaning and drying.
- Neoprene soft socks can be worn inside heavy-duty drysuit boots or standard neoprene dive boots.
- Blue suspender system enhances fit and provides convenient lower suit support between dives.
- I-Safe straps on both arms offer secure mounting spots for wrist instruments.
- Handy right-thigh utility pocket with D-ring, bungee and zippered closure provides a secure spot for carrying accessories.
- A hook is provided on the cargo pocket for attaching a hood.
- Includes an anatomically shaped hood, carry bag, low pressure hose, suspenders, repair kit, zipper wax and owner's manual.

EXODRY 4.0

The Exodry 4.0 offers a unique approach to drysuit design by fusing 4mm high-density neoprene with latex wrist and neck seals. This hybrid design is extremely effective, delivering minimal inherent buoyancy, maximum range of motion and an excellent sealing system. The Exodry 4.0 comes with shoulder and knee panels, a plush interior lining, suspenders and a attached semi-rigid dive boot with fin strap retainer that includes a hook & loop strap that improves fit while preventing air from travelling to the boot when diving in the heads-down position. Exodry 4.0 is a smart choice for all types of diving and can be used with or without an undersuit.

- 4mm high-density neoprene resists compression so buoyancy variations are reduced at depth
- Latex wrist and neck seals are thin yet durable and provide comfortable, watertight seals
- Plush interior is comfortable and enhances cold water insulation
- Neoprene warm collar covers the latex neck seal to eliminate cold spots and increase comfort
- Shoulder and knee panels cover a lot of area for maximum anti-abrasion resistance
- Attached semi-rigid dive boot includes a hook & loop strap to improves fit while preventing air shifting
- BDM metal dry zipper keeps water out is extra strong for years of use
- Si-Tech valves move lots of air, enabling you to maintain total buoyancy control
- I-Safe straps on both arms offer secure mounting spots for wrist instruments
- Blue suspender system enhances fit and provides convenient lower suit support between dives
- Handy right-thigh utility pocket with D-ring, bungee and zippered closure provides a secure spot for carrying accessories
- A hook is provided on the cargo pocket for attaching a hood
- Includes an anatomically shaped hood, carry bag, low pressure hose, suspenders, repair kit, zipper wax and owner's manual

K2 EXTREME

The undergarments of choice for drysuit diving, the K2 line keeps you warm while diving dry. Sporting a modern eye-catching design, these undergarments are available in three levels of thickness to suit a variety of thermal warmth requirements. They are compatible with trilaminate drysuits.

- Dual Fleece material 629 g/m2 (+/-10%) with 919 g/m2 on shoulders, chest & knees.
- Breathable, warm and stretchy.
- Maximum thermal insulation
- Compatible with trilaminate drysuits
- Steamer design with anti-compression padding on shoulders, chest & knees
- Storage pockets with zippers
- Elastic wrist loops and heel straps
- Men's model features a front double slider zipper
- Holes on legs can be adapted to Pee-valves
- Women's model features a front single slider zipper plus a U-zipper in the seat area.

NOVASCOTIA 7.5

This design incorporates 7.5mm neoprene in the chest, torso and upper thigh regions to maximise thermal insulation, and 6.5mm neoprene in the arms and lower legs to enhance comfort and range of motion. A plush interior liner is featured in the arms, legs and shoulder areas to increase warmth and stretch, and the YKK Aquaseal Vislon waterproof rear zipper is super flexible while totally blocking water entry.

Otherwise, all the great features that have made the novaScotia the premier semi-dry dive suit remain. Glued and blind-stitched seams block water entry, and internal stress discs installed at stitch intersections reinforce seams and extend the suit's working life. A fold-under neck seal and double zippered wrist and ankle seals work together to keep water seepage to a minimum. Shoulders and kneepads feature both anti-abrasion patterns and extra rubber prints add a stylish look. A spine pad offers additional comfort where the tank meets the diver's back. There's also an I-Safe strap on each arm for securing wrist instruments and a handy 3D cargo pocket located on the right thigh for carrying accessories.

- Semi-dry concept offers many of the advantages of both wetsuits and drysuits in a sleek, comfortable package.
- CE certified a Class A dive suit - rated for water temperatures ranging from 7°C to 12°C.
- 7.5/6.5mm version is made of 100 percent neoprene, an X-Foam formulation for better health, and is assembled using eco-friendly solvent-free Aqua glue.
- 7.5mm neoprene is used in the chest, torso and upper thigh regions for maximum thermal insulation; 6.5mm neoprene is used in the arms and lower legs for increased range of motion.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Blind-stitched seams block water entry.
- Internal stress discs installed at stitch intersections reinforce seams, extending the suit's working life.
- Rear shoulder-to-shoulder YKK Aquaseal Vislon waterproof main zipper with heavy-duty plastic slider is flexible yet provides an excellent seal against water entry.
- Plush interior liner in the arms, legs and shoulder areas increases warmth and stretch.
- Double zippered seals on ankles and wrists feature brass sliders for durability and ease of use.
- Fold-under neck seal is ultra-comfortable and keeps water seepage to a minimum.
- Right thigh 3D pocket with hood attachment hook offers lots of room for carrying extra gear.
- Shoulders and kneepads feature both anti-abrasion patterns and extra rubber prints add a stylish look.
- Enhanced spine pad provides a welcomed cushion where the tank hits the diver's back.
- I-Safe straps on both arms offer non-slip mounting spots for securing wrist instruments.

EVERFLEX YULEX DIVE SUITS

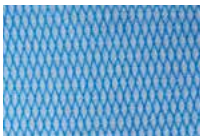

new

THE NATURAL CHOICE

More than 20 years after the introduction of limestone-based neoprene to replace petroleum-based neoprene, SCUBAPRO launches a new line of premium Everflex dive suits made from an innovative new material. Originally introduced in 2006, **SCUBAPRO's 2022 Everflex dive suits, now in their 8th generation, are made from a revolutionary, eco-friendly foam called Yulex.** This is a plant-based material made from pure natural rubber extracted from Forest Stewardship Council (FSC) certified renewable rubber tree farms.

The FSC is an international organisation that was established as a response to global deforestation. FSC certification ensures that the natural rubber for Everflex Yulex dive suits comes from responsibly managed forests that provide environmental, social and economic benefits.

With its superb resistance to water compression, Yulex Dive is specifically formulated to be used while diving. SCUBAPRO is the first brand to offer this particular Yulex material in its dive suits. The Everflex dive suits made with Yulex Dive foam are designed and built to maximise the diving experience while delivering on SCUBAPRO's long-standing commitment to help protect our planet.

UPDATED BLUE DIAMOND SPAN inner fleece lining's warm and water-draining material enhances cold-water protection. It is combined with a second Black lining for improved stretch, also making donning and doffing much easier.

ENVIRONMENTALLY FRIENDLY FEATURES

YULEX DIVE - 100% PLANT-BASED NATURAL RUBBER Made from pure natural rubber extracted from FSC Certified rubber tree farms

REDUCED CO2 FOOTPRINT from plant-based natural rubber foam vs standard limestone neoprene

Wetsuit interior & exterior lining made from **45 RECYCLED PLASTIC BOTTLES**

DOPE-DYED YARN TECHNOLOGY uses less water and reduces energy consumption during the dying and colouring process

Divewear assembly using **SOLVENT-FREE AQUA GLUE**

RECYCLABLE PAPER BAG PACKAGING

EVERFLEX YULEX 7,5/5MM, 5/4MM & 3/2MM

new

A real milestone for 2022 – SCUBAPRO's premium Everflex steamers, while offering the same award-winning comfort features and thermal protection that have made them the wetsuits of choice among divers the world over, are now built with a revolutionary new plant-based foam called Yulex Dive, made from pure natural rubber.

Everflex Yulex Dive steamers are of course designed with SCUBAPRO's exclusive Pure Design Concept, with just enough multi-thickness panels to guarantee maximum stretch and comfort. They fit comfortably snug and deliver unparalleled freedom of movement. They also provide superb resistance to water compression to keep divers warmer, deeper, for longer. The rubber is layered inside and out with a polyester lining made from recycled plastic bottles, and an updated Diamond Span inner fleece lining in the torso area enhances warmth while making donning and doffing so much easier. Everflex Yulex Dive steamers are offered in three thicknesses to cover virtually every diving scenario and are loaded with features that maximise comfort, warmth and ease of use.

- Made from eco-friendly Everflex Yulex plant-based foam for comfort, durability and sustainability.
- The Yulex Dive foam variety chosen by SCUBAPRO offers superb water compression resistance, providing years of use at all depths.
- Suits are assembled using a solvent-free glue, a better process for people, the environment and the ocean.
- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Multi-thickness panels deliver a superior combination of warmth and flexibility.
- Innovative preformed design delivers an excellent fit for most body shapes.
- Double blind-stitched outer seams are durable and watertight, and single blind-stitched inner seams are comfortable against bare skin.
- Yulex Dive rubber is layered inside and out with a black polyester lining made from recycled plastic bottles, an additional step toward environmental sustainability.
- Updated Blue Diamond Span inner fleece lining's warm and water-draining material enhances cold-water protection. It is combined with a second black lining for improved stretch, also making donning and doffing much easier.
- Vertical rear YKK zipper with brass slider offers increased long-term durability, and the long webbing puller makes it easy to use.
- Compression-molded zipper flap/spine pad increases back protection.
- Small neck zipper enhances comfort when on the surface.
- Seat and shoulder areas are protected by an abrasion-resistant outside lining to increase durability and extend the life of the suit.
- Printed pads on knees and shoulders provide additional abrasion protection.

EVERFLEX YULEX 7,5/5MM

new

PLUS

- CE certified a Class A dive suit -- rated for water temperatures ranging from 45°F (7°C) to 54°F (12°C).
- Internal cuff seals with zippered cuffs on ankles and wrists feature YKK brass sliders for durability, watertightness and easy donning
- I-Safe straps on both arms offer non-slip mounting spots for securing wrist instruments

LONG SLEEVE TOP & PANT

This functional 2-piece ensemble made from plant-based Yulex material is offered as an alternative to the Everflex Yulex 3/2 steamer. Designed with the Pure Design Concept where fewer seams and panels are employed to maximise comfort and range of motion, both top and pant feature blind-stitched seams and come with a black stretch polyester outside/inside lining. Super flexible, the top is fitted with a vertical front zipper and wrists and ankles feature fuse-cut finished cuffs that are super stretchy for easy donning. The abrasion-resistant fabric on the seat and the printed pads on the knees protect the pant, while the top provides abrasion-resistant fabric with additional printed pads on the shoulders to prevent abrasion from BCDs.

- Made from eco-friendly Everflex Yulex plant-based foam for comfort, durability and sustainability.
- The Yulex Dive foam variety chosen by SCUBAPRO offers superb water compression resistance, providing years of use at all depths.
- Top and pant are assembled using a solvent-free glue, a better process for people, the environment and the ocean, and blind-stitched seams.
- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Black stretch polyester outside/inside lining made from recycled plastic bottles enhances comfort.
- Top includes a convenient vertical front zipper.
- Fuse-cut finished cuffs on wrists and ankles are super-stretchy for easy donning and doffing.
- Abrasion-resistant fabric on the seat and shoulders, with additional printed pads on shoulders and knees, increase durability and extend the life of the suit.
- CE certified a Class D ensemble (top & pant worn together) – rated for water temperatures ranging from 72°F (22°C). (Certification pending)

EVERFLEX YULEX 5/3MM HOODED VEST

new

Designed with SCUBAPRO's exclusive Pure Design Concept, this new hooded vest is made with high-stretch Yulex all-natural rubber. When worn with a SCUBAPRO steamer or shorty it substantially increases thermal protection in the body's core area. The vest provides 5mm of additional thermal protection front and back in the torso area, with 3mm side panels to increase range of motion. To warm the head, the attached hood offers 3mm of thermal protection and features a 2mm face seal to help seal off water entry and minimise heat loss. Assembled with solvent-free glue and blind-stitched seams, the inside of the vest is lined with a combination of blue Diamond Span fleece and black stretch polyester. The hood also has a black stretch polyester inner lining.

- Made from eco-friendly Everflex Yulex plant-based foam for comfort, durability and sustainability.
- The Yulex Dive foam variety chosen by SCUBAPRO offers superb water compression resistance, providing years of use at all depths.
- Suit is assembled using a solvent-free glue, a better process for people, the environment and the ocean, and blind-stitched seams.
- Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Vest offers 5mm thermal protection in the torso area, front and back, with 3mm side panels for added flexibility.
- Inside of vest is lined with a combination of blue Diamond Span fleece and black stretch polyester, the latter of which is made from recycled plastic bottles.
- Hood provides a thickness of 3mm laminated with an outside/inside black polyester lining. Also included is a 2mm face seal & 3 vent holes to allow for a better fit.

EVERFLEX YULEX 2MM HOODED VEST

new

This is a lighter-weight version of the 5/3mm hooded vest that can be worn either by itself or for layering in warm-water dive scenarios. Offering lots of stretch to maximise range of motion, this comfortable 2mm vest is made from Yulex all-natural rubber from renewable resources. Both vest and hood offer a black stretch polyester outside/inside lining, and the hood also comes with a face seal.

- Made from eco-friendly Everflex Yulex plant-based rubber for comfort, durability and sustainability.
- The Yulex Dive foam variety chosen by SCUBAPRO offers superb water compression resistance, providing years of use at all depths.
- Suit is assembled using a solvent-free glue, a better process for people, the environment and the ocean, and flat-lock seams.
- Both hood and vest offer 2mm of thermal protection and a black stretch polyester outside/inside lining made from recycled plastic bottles.
- Hood includes a face seal to cut down on water intrusion and increase warmth & features 3 vent holes to allow for a better fit.

SCUBAPRO | YULEX. DIVE

CONFIDENTIAL, NOT FOR DISCLOSURE TO UNAUTHORISED ENTITIES OR PERSONNEL. DOCUMENT VALID FROM 01/10/2022

DEFINITION 7 HOODED WITH FRONT ZIP

Filling the niche between traditional steamers and semi-dry suits, the Definition 7mm hooded steamer is a thoroughly modern cold water dive suit loaded with features. The design, while influenced by the popular Definition 6.5mm steamer, uses a thicker, higher stretch neoprene for more thermal insulation and increased range of motion. An attached hood warms the head and neck, and a YKK horizontal front shoulder-to-shoulder zipper makes it easy to get in and out of the suit without help from a dive buddy. The ultra-comfortable plush interior has a aluminum foil lamination for maintaining warmth. Internal cuff seals in both wrists and ankles keep water entry to a minimum, and a built-in spine/ lumber pad cushions the tank, providing additional comfort during extended dives. This suit fits like a glove, provides extra stretch where it's needed most, and offers a level of warmth, comfort and durability well-suited to active cold-water divers.

- CE certified Class A dive suit – rated for water temperatures ranging from 7°C to 12°C.
- Flexible neoprene increases range of motion and makes the suit easier to don and doff.
- Suit is assembled using solvent-free Aqua glue, a 100% green process.
- YKK front shoulder-to-shoulder zipper includes an over-flap panel.
- Interior plush with aluminum foil lamination keeps warmth next to the body.
- Arms and legs are made of single panels for enhanced donning/doffing.
- Internal cuff seals on wrists and ankles inhibit water entry.
- Large prints on shoulder, knees and elbows provide abrasion resistance.
- Abrasion-resistant fabric on the high-wear seat area.
- Built-in spine/ lumber pad cushions the tank, providing additional comfort during extended dives.
- Equestrian-style stitching on the seat-area creates a slimmer silhouette.
- Made from X-Foam neoprene, the only "green" neoprene that complies with P.A.H.regulations.

Infrared (IR) interior lining on front and back torso reflects body heat for extra thermal insulation and is extremely soft against the skin

CONFIDENTIAL, NOT FOR DISCLOSURE TO UNAUTHORISED ENTITIES OR PERSONNEL. DOCUMENT VALID FROM 01/10/2022

DEFINITION 7 BACK ZIP

The Definition 7mm steamer replaces the former 6.5mm version of this popular cold-water wetsuit while providing even more stretch, warmth, comfort and features. Special tailoring and strategically placed panels in the chest area, sides, arms and legs, and behind the knees, create a suit that fits like a glove and provides extra stretch where's it's needed most. Bigger shoulder, knee and elbow pads provide maximum abrasion resistance.

- CE certified as a Class A dive suit – rated for water temperatures ranging from 7°C to 12°C.
- Suit is assembled using a solvent-free glue, a 100% green process.
- Ultraspan chest panel and Stretchtec fabric on body, sides, arms and legs work together to produce a highly flexible and snug fit.
- Infrared (IR) interior lining on front & back torso reflects body heat for extra thermal insulation and is extremely soft against the skin, in combination with silver plush throughout for comfort and warmth
- Diagonal rear YKK zipper with brass slider offers increased long-term durability and ease of use.
- An innovative seamless single arm and leg stretch panels, with double zippered seals, make donning and doffing the suit even easier.
- Wrist and ankle zippers on women's suits are extra-long for added convenience.
- Spine pad cushions the tank, providing additional comfort during extended dives.
- Abrasion-resistant fabric on shoulders and seat, along with bigger abrasion-resistant printed shoulder, elbow and knee pads, cover more exposed areas and increase long-term durability.
- Small neck zipper enhances topside comfort, eliminating the need to remove the suit between dives.
- I-Safe straps on both arms offer non-slip mounting spots for securing wrist instruments.
- Made from X-Foam, a petroleum-free, limestone neoprene.
- Embossed and colour printed 'S' logo on chest for better stretch and cleaner profile.
- Size indications printed on wrist seal, including height, weight & clothes size.

DEFINITION 3

The Definition 3mm takes all of the premium exterior design elements found on the Definition 5mm and includes special tailoring to create a suit that fits the body like no other. Proven N2S (Nylon 2 Sides) construction offers the perfect level of warmth and comfort for warm water diving. It's the perfect 3mm suit for any diver.

- CE certified as a Class D dive suit – rated for water temperatures >22°C
- Suit is assembled using a solvent-free glue, a 100% green process.
- Built with the Body Map System, an exclusive manufacturing method that uses special tailoring and material inserts to compensate for the stresses of the human body.
- N2S (Nylon 2 Sides) construction delivers the perfect level of warmth and comfort.
- Diagonal rear YKK zipper with brass slider offers increased long-term durability and ease of use.
- Single zippered seals on ankles and wrists feature YKK brass sliders for durability, water-tightness and ease of use.
- Wrist and ankle zippers on women's suits are extra-long for added convenience.
- Abrasion-resistant fabric on shoulders and seat, along with bigger abrasion-resistant printed shoulder, elbow and knee pads, cover more exposed areas and increase long-term durability.
- Small neck zipper enhances topside comfort, eliminating the need to remove the suit between dives.
- I-Safe straps on both arms offer non-slip mounting spots for securing wrist instruments.
- Made from X-Foam, a petroleum-free, limestone neoprene.

DEFINITION 1 NOVEMBER 2022 new

Delivering optimal comfort and flexibility, this lightweight steamer is made with 1mm X-Foam neoprene with an outside super-stretch nylon lining and an inside mix of plush on the front and back of the torso and super-stretch nylon on all other panels. It comes with a diagonal rear zipper with brass slider and abrasion-resistant fabric on the seat and elbows. Shoulders and knees also offer abrasion-resistant fabric reinforced with printed pads. Foot loops prevent ride-up when used as a base layer beneath a thicker wetsuit. This steamer offers the perfect level of full-body protection for pool training, warm-water diving or layering for any watersport activity.

- Can be worn for pool training, as a warm-water wetsuit, or as a base layer for thicker wetsuits.
- Made from 1mm neoprene with an outside super-stretch nylon lining and an inside mix of plush on the front and back of the torso and super-stretch nylon on all other panels.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Body Map System features special tailoring and material inserts to compensate for the stresses of the human body.
- Rear diagonal zipper with brass slider makes easy work of donning and doffing the suit.
- Foot loops prevent ride-up when worn beneath a wetsuit.
- Flat-lock seam construction is comfortable against bare skin.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.

SPORT 5 - GEN. 2

The Sport 5mm (Generation 2) offers must-have thermal insulation for first-time suit buyers or occasional divers. Sport is easy to don and doff, fits like a second skin and looks good in the process. Made from super-soft neoprene, the suit is assembled using solvent-free Aqua glue – a 100% green process. A triathlon cut increases the range of motion in the shoulder and under arm areas for maximum freedom of movement on the boat and in the water. The Sport 5mm comes with exterior styling and colours, a vertical-cut rear zipper and a hood hook on the right hip.

- CE certified as a Class B dive suit - rated for water temperatures ranging from 10°C to 18°C.
- Softer and more flexible neoprene makes it easy to put on and take off, maximises range of motion and improves overall comfort.
- Suit is assembled using solvent-free Aqua glue, a 100% green process.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas which allows unrestricted arm and shoulder movement.
- Main vertical-cut YKK rear zipper brass slider offers increased long-term durability and ease of use.
- Single zippered cuffs on ankles and wrists with YKK brass sliders offer durability and comfort plus are easy to use.
- The interior is lined with two plush materials that enhance comfort and warmth, dry quickly and provide cushioning beneath wrist and ankle zippers.
- Glued and blind-stitched seams keep warmth in and water out.
- Abrasion-resistant fabric on shoulders, seat and knees shield against shifting gear or when sitting or kneeling.
- High-stretch neoprene is great for hard-to-fit divers who can now enjoy a suit that molds comfortably to the body.
- Made from X-Foam neoprene, the only "green" neoprene that complies with P.A.H.regulations.

SPORT 2.0 - SHORTY

This incredibly soft shorty offers lots of warmth, comfort and stretch for casual tropical divers who enjoy diving in moderate to shallow depths. Made from super-soft 2mm neoprene with an inside/outside polyester lining, the shorty features the triathlon cut from Sport steamers that allows for lots of range of motion in the shoulder and underarm areas. Design enhancements include smart exterior styling and colours and a vertical-cut rear zipper. This shorty is easy to put on and take off, is stretchy and comfortable, fits like a second skin and looks good in the process.

- Designed to keep new and casual tropical divers warm and comfortable while diving in moderate to shallow depths.
- Also provides good thermal insulation for pool training.
- Softer and more flexible neoprene makes it easy to put on and take off, maximises range of motion and improves overall comfort.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted shoulder movement.
- Vertical YKK rear zipper with brass slider offers increased long- term durability and ease of use.
- Flat-lock seam construction is comfortable against bare skin.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Assembled using a solvent-free glue, a 100% green process.
- Product logo on the arm includes neoprene thickness for easy identification.

SPORT STEAMER 0.5MM

new

This versatile ultra-thin neoprene steamer can be used for thermal protection while pool training, as a warm-water wetsuit, or as a base layer beneath a thicker wetsuit for cold-water diving. Made from extremely soft 0.5mm neoprene with a stretchy Nylon 2 Sides lining, this lightweight steamer comes with a vertical YKK zipper with brass slider for easy donning and doffing, and foot straps to prevent ride-up when used as a base layer. Printed kneepads increase durability while maintaining comfortable flexibility in the leg areas.

- Ideal for pool training, as a warm-water wetsuit, or as a base layer for thicker wetsuits.
- Nylon 2 Sides lining is soft, stretchy and extremely comfortable.
- Vertical YKK rear zipper with brass slider offers long-term durability and ease of use.
- Foot straps prevent ride-up when used as a base layer.
- Flat-lock seam construction is comfortable against bare skin.
- Printed kneepads protect lower legs while maintaining softness.
- Made with X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.

ONEFLEX 6MM FRONT ZIP

The Oneflex 6mm steamer is built for cold water or for making multiple dives in temperate water. The attached hood maximises heat retention and minimises water entry. The suit is designed with a triathlon cut that allows for lots of range of motion in the shoulder and arm areas. The addition of outside stretch fabric on arms and armpits contribute to making the suit much easier to don and doff while increasing comfort and freedom of movement in the water – extremely important to beginning divers. The suit is built with the Pure Design Concept using fewer seams and panels for maximum flexibility, and the quality X-Foam neoprene is stretchy and comfortable but also durable, thanks to its 2-sided polyester lining. This makes the Oneflex 6mm steamer an ideal wetsuit for repeated use at training centers and rental locations.

- CE certified as a Class B dive suit - rated for water temperatures ranging from 10°C to 18°C.
- Constructed of high-stretch eco-friendly X-Foam 6mm neoprene with 5mm neoprene in the arm/armpit area for increased comfort and range of motion.
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted arm and shoulder movement.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Ultra-durable 2-sided polyester lining provides excellent resistance to heat, UV rays and chlorine, substantially extending the life of the suit, even after repeated use.
- Attached 5/3mm hood maximises heat retention and minimises water entry.
- Diagonal front zipper with brass slider is durable, easy to use and makes easy work of donning and doffing
- Single YKK zippers on ankles and wrists feature durable brass sliders and pull tabs, and the built-in cuff seals are comfortable and easy to use.
- Heavy-duty kneepads and anti-abrasion material on shoulders and seat cushion the diver while protecting the suit from scrapes and scuffs.
- Round logos on both arms/shoulders with size colour coding and lettering allow for easy identification.
- Made from X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Suit is assembled using a solvent-free glue, a 100% green process.

ONEFLEX 3MM BACK ZIP

The Oneflex 3mm is all about form and function. Made of strong, stretchable X-Foam neoprene, this warm-water steamer is designed with a triathlon cut that allows for lots of range of motion in the shoulder and arm areas, plus it is built using the Pure Design Concept which uses fewer seams and panels for maximum flexibility. The addition of outside stretch fabric on arms and armpits contribute to making the suit much easier to don and doff while increasing comfort and freedom of movement in the water – a huge plus among beginning divers. The diagonal rear YKK zipper design is familiar to most divers and easy to use. The suit's 2-sided polyester lining is ultra-durable yet stretchy, offering comfort and long life, even when subjected to intensive use. This makes it an ideal wetsuit for repeated use at training centers and rental locations.

- CE certified as a Class D dive suit - rated for water temperatures superieur to 22°C.
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted arm and shoulder movement.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Round logos on both arms/shoulders with size colour coding and lettering allow for easy identification.
- Constructed of high-stretch eco-friendly X-Foam 3mm neoprene for comfort and range of motion.
- Ultra-durable 2-sided polyester lining provides excellent resistance to heat, UV rays and chlorine, substantially extending the life of the suit, even after repeated use.
- Diagonal rear YKK zipper with brass slider offers increased long-term durability and ease of use.
- Single cuffs on ankles and wrists are comfortable and super-stretchy to aid in donning and doffing.
- Heavy-duty kneepads and anti-abrasion material on shoulders and seat cushion the diver while protecting the suit from scrapes and scuffs.
- Made from X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Suit is assembled using a solvent-free glue, a 100% green process.

ONEFLEX 4MM REVERSIBLE SHORTY FRONT ZIP

This new shorty offers 4mm of neoprene for additional thermal protection when diving warm-water locales. Offering lots of comfort, its triathlon cut maximises range of motion in the shoulder and arm areas. The addition of outside stretch fabric on arms and armpits contribute to making the suit much easier to don and doff while increasing comfort and freedom of movement, design elements much appreciated by beginning divers. And because it is built with the Pure Design Concept, fewer seams and panels are used, increasing the suit's overall flexibility. Made of X-Foam neoprene with a tough UV-resistant and chlorine-resistant polyester 2-sided lining, this shorty is durable as well as comfortable. Plus, it is reversible, so it can be turned inside out after a dive, rinsed, disinfected and ready to use right away, making it an ideal shorty for repeated use at training centers and rental locations.

- Constructed of high-stretch eco-friendly X-Foam 4mm neoprene with 3mm in the short sleeves and armpits for comfort and range of motion.
- Ultra-durable 2-sided polyester lining provides excellent resistance to heat, UV rays and chlorine, substantially extending the life of the shorty, even after repeated use.
- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted arm and shoulder movement.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Reversibility enables shorty to be rinsed, disinfected and ready to use right away.
- Diagonal front YKK zipper with brass slider is durable, easy to use and makes easy work of donning and doffing.
- Anti-abrasion material on shoulders and seat cushion the diver while protecting the shorty from scrapes and scuffs.
- Made from X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Shorty is assembled using a solvent-free glue, a 100% green process.
- New round logo on the right arm/shoulder with size colour coding and lettering allows for easy identification.

ONEFLEX 2.5MM SHORTY FRONT ZIP

Made of strong yet stretchable X-Foam neoprene with a tough UV-resistant and chlorine-resistant polyester 2-sided lining, this 2.5mm shorty is perfect for tropical diving or pool sessions. It is designed with a triathlon cut that allows for lots of range of motion in the shoulder and arm areas, and is built with the Pure Design Concept method using fewer seams and panels for maximum flexibility. Anti-abrasion material on the shoulders and seat protect against chafing BCD straps and non-skid boat seats, greatly extending the life of the shorty. This is an ideal dive suit for diving classes or resort use.

- Triathlon cut employs wider panels covering the underarm and back areas that allow unrestricted arm and shoulder movement.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Round logos on both arms/shoulders with size colour coding and lettering allow for easy identification.
- Constructed of high-stretch eco-friendly X-Foam neoprene for comfort and range of motion.
- Ultra-durable 2-sided polyester lining provides excellent resistance to heat, UV rays and chlorine, substantially extending the life of the shorty, even after repeated use.
- Diagonal front YKK zipper with brass slider is durable, easy to use and makes easy work of donning and doffing.
- Anti-abrasion material on shoulders and seat cushion the diver while protecting the shorty from scrapes and scuffs.
- Made from X-Foam neoprene, a very specific limestone-based neoprene complying with strict PAH and REACH regulations.
- Shorty is assembled using a solvent-free glue, a 100% green process.

HYBRID CARGO SHORT

Comfortable and stretchy, Hybrid Cargo Shorts form-fit to your body like you were born wearing a pair. Made from a mix of quality 1mm neoprene and nylon, on the inside a micro-plush lining makes the shorts warm and cozy. This plush lining absorbs less water, increasing overall warmth, plus dries quickly. The updated design features a new adjustable waist belt that replaces the prior drawstring. The belt threads through a series of belt loops and includes an easy-to-use male/female squeeze buckle closure. A new anti-abrasion fabric on the seat panel enhances durability, and the two large cargo pockets are handy for carrying money, sunglasses or other accessories when enjoying a day on the beach or dive boat. Hybrid Cargo Shorts are designed to be worn either by themselves or over a dive suit,

- Adjustable waist belt with an easy-to-use male/female squeeze buckle closure.
- Abrasion-resistant fabric on the seat panel provides additional protection.
- Made with 1mm X-Foam neoprene for warmth and durable nylon for stretch and comfort.
- Form-fitting for that sleek hydrodynamic look and feel.
- Convenient cargo pockets are included for carrying valuables
- Highly versatile – ideal for divers, snorkelers, paddle boarders, swimmers and other water enthusiasts too.

HOW SHOULD YOU MEASURE?

SIZE NOTE: Everflex YULEX suits are built with high-stretch Yulex Dive Foam and numerous high-stretch panels that provide a tighter fit initially, but stretch after a few dives.

If you plan to wear a swimsuit or other items under your divewear, you should measure yourself while wearing those garments, keeping the tape measure parallel to the floor. We recommend if you are between sizes to choose the larger size. Sizes may vary: +/- 2cm

CHEST: Measure around the fullest part of your chest.
WAIST: Measure at the narrowest point of your waist.
HIPS: Stand with your heels together and measure around the fullest part of your hips.

SCUBAPRO NEOPRENE IS X-FOAM

X-Foam made from limestone neoprene, petroleum-free and complies with strict PAH requirements. SCUBAPRO was the first to offer this special neoprene blend; divers and our oceans are our concern.

SOLVENT FREE GLUE:

SCUBAPRO is the first in the industry to offer this environmentally and diver friendly adhesive material.

BLUE DIAMOND SPAN INNER LINING

with water-draining material enhances cold-water insulation.

AQUASEAL

Rear shoulder-to-shoulder YKK Aquaseal Vislon waterproof main zipper with heavy-duty plastic slider is flexible yet provides an excellent seal against water entry.

DRYSUIT BOOT

A must-have boot for any drysuit diver who walks, hikes or climbs to a dive site. This sturdy boot can handle the most rugged shoreline terrain, and is designed to fit comfortably over the sock of any drysuit.

- Lace-up design lets you quickly and easily achieve a snug, secure fit.
- Heavy-duty ultra-grip sole supports the foot when traversing rocky shorelines.
- Neoprene upper is ultra-flexible, enhancing overall comfortable.
- Toe and heel are reinforced with durable rubber caps to protect both boot and foot.
- Heel cap features a fin strap keeper to eliminate slippage when engaged in aggressive kicking.
- Boot comes with a water-draining mesh storage bag.

This boot is designed to be worn with a 2.5mm sock and the above size includes this additional thickness. To ensure a perfect fit, please choose your usual shoe size and a 2.5mm sock.

K2 SOCK

When diving cold water it's important to keep your extremities warm, particularly hands and feet. The K2 sock is designed to be worn inside drysuit boots to keep feet toasty warm during those extended bottom times. Made from the same K2 fleece that you find in SCUBAPRO's K2 drysuit undergarments, the K2 sock is breathable and stretchy for maximum comfort as well as warmth, and the high-cut design covers a lot of ankle area. They are compatible with all kinds of drysuits.

EVERFLEX ARCH 5.0

upgraded

The Everflex Arch Boot just might be the most comfortable dive boot you've ever slipped your foot into. Featuring an innovative arch design that closely matches the foot's natural anatomy, the boot's foot pocket is cut wide, creating a cramp-free fit, even for wide-shaped feet. While the boot offers 5mm of thermal protection throughout most of the boot, in the upper-ankle area the neoprene is a bit thinner to prevent bulkiness where it overlaps the wetsuit leg. The Diamond Span inner lining is super comfortable and dries fast. For 2022, the Everflex Arch Boot features a **new** Black/Gray "boat-style" colour and a new logo.

X-FOAM

- **NEW** Black/Gray colour and logo. "Boat-style" boot.
- Innovative arch design provides a level of support and comfort not often found in dive boots.
- Neoprene is thinner (3.5mm) in the ankle area to prevent bulkiness where it overlaps the wetsuit leg.
- Boot's neoprene is so pliable that donning and doffing is easy without the need of a zipper.
- No-zip design includes webbing puller loops in front and back to aid in donning.
- Diamond Span interior improves warmth and comfort and dries fast.
- The outside of the toe box is cushioned and protected against abrasion.
- Sole with heel helps prevent the foot from slipping on boat ladders.
- Heel cap includes a molded fin strap keeper to eliminate strap slippage.
- Made from X-Foam, a petroleum-free, limestone neoprene.

DELTA BOOT 6.5

The classic Delta boot has been redesigned with impressive arch support, a wider foot pocket plus a sole incorporating a special heel, designed to prevent slipping on boat ladders. The built-in arch provides extra support and comfort, and the full-cut foot pocket delivers a cramp-free fit, even for wide-shaped feet. Inside, our quick-drying Diamond Span lining improves warmth. The boot's rubberised armor on the toe and heel cap offers additional flexibility and resistance without adding bulk to the boot. Offering both comfort and insulation, the Delta boot is a great choice for virtually any cold-water diving scenario.

X-FOAM

- Provides full-featured foot insulation for cold-water diving.
- Arch provides a level of support and comfort.
- An extra wide foot pocket creates a cramp-free fit, even for wide-shaped feet.
- Diamond Span interior is quick-drying, comfortable and enhances warmth.
- Sole with heel prevents slipping on boat ladders.
- Toe cap provides cushioning while preventing abrasion from the edge of the fin pocket.
- Heel cap includes a fin strap keeper to eliminate slippage.
- Long zipper makes it easy to put on. Secured with a Hook & Loop tab.

DELTA 5.0

The Delta Boot 5 is sturdy with a flexible outsole and rubberised armor, yet still feels very light on the foot. The boot maintains its sturdy but flexible outsole and rubberised armor, yet still feels very light on the foot. A revised ankle diameter and contoured top improve fit and make sliding the YKK zipper up and down even easier. A full cut creates a comfortable, cramp-free fit.

X-FOAM

- 5mm N2S (Nylon 2 Sides) construction delivers comfort and durability
- Sturdy outsole and rubberised armor provide excellent resistance on top and bottom and increase comfort when traversing rocky shorelines
- Reinforced toe and heel caps extend boot life. Heel cap includes a fin strap keeper
- YKK zipper is fitted with a gusset to cut down on water seepage, and secures with a hook & loop tab
- High-quality anti-slip tread is non-marking, a feature boat owners always appreciate
- Improved fit and easier wear with revised ankle and contoured top
- Made from X-Foam, a petroleum-free, limestone neoprene

BASE BOOT 4

The 4mm Base boot is an economical and durable boot built for temperate water diving and the rental market. The lightweight rubber sole is durable yet flexible while providing an effective anti-slip tread. Rubberised armor on the toe and heel cap offer lots of resistance without sacrificing comfort. A logo design colour-coded for size differentiation is ideal for diving operations and rental applications.

X-FOAM

- Lightweight rubber sole provides durability and comfort along with an effective anti-slip tread.
- Logo design is colour-coded for size differentiation.
- The toe cap prevents abrasion from the edge of the fin pocket.
- Heel cap includes a molded fin strap keeper.
- The long zipper makes it easy to put the boot on and secures with a Hook & Loop tab.
- Made from X-Foam, a petroleum-free, very specific limestone-based neoprene complying with strict PAH and REACH regulations.

HYBRID SOCKS 2.5

The Hybrid Sock is made of soft 2.5mm neoprene with a textured sole that provides light non-slip feature for walking on wet boat decks. Featuring 100% high-stretch Everflex Nylon outside and a plush interior lining for warmth and comfort, you can wear the Hybrid sock inside your dive boot for added warmth, as a liner inside a full foot fin, or by itself to walk around on a chilly boat deck. Whichever you choose, your feet will love you for it. Easy to don and doff, this sock is great footwear for freedivers too, and also for small divers (the three smallest sizes are designed to fit the smallest of divers). Included: a reusable fabric boot bag for transport and storage

The Släggö Flex Ring is a modular quick-change solution designed to make it easy to replace a broken or torn wrist seal on a drysuit. And now, with the Oberon Dry Glove system, there's a convenient and reliable method for attaching virtually any model of dry glove to a Släggö Flex Ring. Developed and manufactured by Si Tech, the Oberon Dry Glove System consists of 13 components per arm, connects to large and medium Släggö Flex Rings, and fits most common dry glove models. Dry gloves not included.

- Easy to mount and easy to use.
- For each arm, the system includes:
  - > Oberon Ring (with Lock and Release Ring, Rubber Ring and O-ring).
  - > Glove Ring.
  - > O-Rings (4 pcs).
  - > Red, green, blue and yellow Spanner Rings.
- Fits most common dry glove models.
- Suit Ring requires no alignment – 360° swiveling connection.
- Lock & Release Ring is made of rubber for maximum grip plus protects the O-ring from dust.

EASYDRY PRO GLOVE - DRY, SEMI-DRY AND WET SUITS

These gloves are designed for use with drysuits, semi-dry suits and wetsuits. The elastic latex cuff seal ensures the glove is waterproof. The gloves are manufactured from high quality vulcanised latex, which gives them a high elasticity and makes them very resistant to puncturing and tearing. The rough surface allows perfect grip with instruments, valves, regulator etc. The anatomic shape of the gloves allows prolonged use without causing increased fatigue.

SEAMLESS 1.5

Using heat taping instead of traditional stitching transforms this lightweight glove into an extremely soft, flexible and tactile hand-warmer. By eliminating the stitching you gain in dexterity in the fingers, making it much easier to push buttons and handle gear at depth.

- Printed palm provides a non-slip surface for maintaining a secure grip
- Palm material is not coarse so will not scratch your facial skin when brushing hair away to make a mask seal
- Ultra-flexible neoprene makes easy work of donning and doffing

TROPIC 1.5

The ever-popular Tropic glove features a material pattern and now comes in colours that match SCUBAPRO's UPF Collection of rash guards. Stylish looks aside, this soft tropical glove still features a 1.5mm neoprene back for comfort and warmth, plus an Amara palm to prevent finger cuts when grasping barnacle-encrusted dive ladders in tropical waters.

- Reinforced fingertips and palm increase durability while ensuring a non-slip grip.
- Amara fabric layer on palm is resistant to punctures and remains soft when dry.
- Hook & Loop wrist seal is adjustable to ensure a snug fit.
- Available in colours to match SCUBPARO's UPF Collection.

SCUBAPRO

T-FLEX - MAN

UPF 80 is the best UV protection rating the industry has to offer. Under the UV Standard 801, fabrics are tested in their "worst-case" scenario - wet and stretched – two stress factors that adversely affect a fabric's protective qualities. So divers benefit from the ultimate UV protection, wet or dry.

SCUBAPRO's top-of-the-line UPF performance gear. Featuring a quality nylon/spandex blend – considered the best material combination for warm water or tropical use. The T-Flex earned a UPF 80 certification by UV Standard 801, the only UV certifying standard that tests fabric in real conditions of use – wet and stressed. This is the highest protection available in the industry.

- Made from a blend of 86% super-soft nylon and 14% high-stretch spandex
- Maximum comfort – maximum stretch
- Form-fitting for that sleek hydrodynamic look and feel

RASH GUARDS

Super-soft nylon and high-stretch spandex equal comfort and freedom above and below the surface. Vibrant colour and sleeve options make it hard to pick a favorite.

RASH GUARDS - MAN

A garment with a rating of UPF 50 blocks 98% of UV radiation. UPF ratings of 50 and above are considered to be in the "Excellent" Protection Category. All models in SCUBAPRO's UPF collection are rated 50 or above.
Look sharp while enjoying solid sun protection. The UPF 50 Rash Guard is comfortable, soft and dries quickly. Designed for diving – but perfect for all water sports, wear one under a wetsuit or by itself for both comfort and dependable protection from the sun's rays.

- Stylish skin protection increases comfort during diving.
- Made from high quality polyester fabric.
- Form-fitting.
- Dries quickly.

CHANNEL FLOW

Loose fit and flattering, the channel flow material makes these tops the ideal attire for all outdoor sports. UPF 50, quick drying and moisture wicking, our Channel Flow pieces are perfect before and after diving.
The unique channel construction features a one-way wicking design that pushes moisture away from the body and toward the surface layer where it can evaporate faster. This also allows the fabric itself to dry quickly.

- Made of high quality polyester fabric.
- Loose-fitting.
- Comfortable.
- Dries quickly.

SCUBAPRO

SEAWING SUPERNOVA

new

SCUBAPRO's Seawing Supernova represents the next generation of powerful SCUBAPRO fins. Winner of the prestigious, internationally-recognised Red Dot Award for product design, the **NEW** Seawing Supernova is a step up from the Seawing Nova in performance, construction, fit and versatility. The proven Pivot Control Technology (PCT) works in tandem with the unique Auto-Adjust central panel to always provide the optimal angle of attack for the blade. The PCT hinges pre-set the blade in the 40° to 50° range that is ideal for converting kicks into forward motion. The flexible Auto-Adjust central panel then fine-tunes the angle of attack according to the strength of kick by counter-pivoting, providing a milder angle of attack for comfort when kicking gently, a more aggressive angle of attack when kicking at full strength, and anything in between. When it comes to frog and alternate kicks, the **NEW** twin-tip winglets increase control and markedly improve maneuverability. The Seawing Supernova's innovative two-piece design, with blade and foot pocket molded separately, makes transport easy, and with the optional full foot pocket the fin can be modified to handle any warm-water dive scenario. The new Seawing Supernova is the essential high-performance fin for avid recreational and professional divers seeking maximum speed, power and control in all diving conditions.

- Innovative blade shape produces more power, more speed and better maneuverability.
- Blade's central panel membrane auto-adjusts the angle of attack based on kicking strength, providing easier kicking when cruising and maximum power when needed.
- Central panel Hydra Loop channels water flow rearwards for increased efficiency and thrust.
- Pivot Control Technology ensures that the most efficient 40° to 50° range of angle of attack is maintained.
- Twin-tip winglets improve control and maneuverability for excellent frog and alternate kicks.
- Two-piece design makes transport easy and increases versatility to handle any dive scenario.
- Blade and foot pocket are molded separately with a durable Socket-Lock Connecting System that allows for easy assembly and disassembly.
- Key fob-style multi-purpose tool is included (25.550.001) for assembly and disassembly of the foot pocket and blade, along with a travel-friendly storage bag.
- Made of premium Monprene® for long-lasting durability.
- Sold as an open heel set with open heel foot pocket and blade pre-assembled.
- Open heel foot pocket features an upgraded heavy-duty bungee strap that allows for micro-adjustments to accommodate different boot types.
- Full foot pocket (sold separately) is available for warm-water conditions that don't require the wearing of a boot.
- Full foot pocket's re-profiled heel-retention cup prevents slipping and chafing.
- Extended grip pads on open heel foot pockets provide an improved non-skid grip on wet surfaces.
- Compatible with coloured Scuba Skegs - 25.328.x00 - see page 154

Want to take your new Seawing Supernova to the tropics for some warm-water diving? No problem.

SCUBAPRO's Seawing Supernova's innovative two-piece design, with blade and foot pocket molded separately, makes it possible to replace the standard open heel foot pocket with an optional full foot pocket for barefoot diving. Simply disassemble the fin's Socket-Lock Connecting System, switch out the open heel foot pocket with a full foot pocket, reassemble and you're ready to hit the water. The full foot pocket is made of premium Monprene and features a re-profiled heel-retention cup to prevent slipping and chafing.

SEAWING SUPERNOVA - PREMIUM PLUS HIGH PERFORMANCE FIN

A NEW LEVEL OF PERFORMANCE:

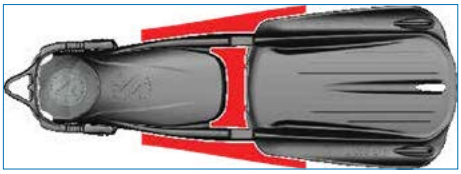

- Outstanding Speed, Power & Acceleration.
- Outstanding Comfort.
- Excellent frog kick & manoeuvrability.
- Evolution of the successful SEAWING concept.

SEAWING SUPERNOVA

PIVOT CONTROL TECHNOLOGY:

- Comfortable & Efficient Hinged blade design.
- Made famous by the SEAWING NOVA.
- Aims to pre-set Angle of Attack (AOA) to 45°.
- Blade is effective at all kick strengths.

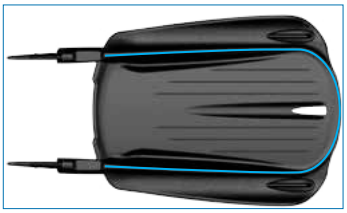

CLEAN WATER BLADE:

- Areas of blade with bad AOA are eliminated.
- Reduces drag and increases thrust.

AUTO-ADJUST-THRUST:

CENTRAL PANEL has a membrane around the sides and front: Allows it to react to water pressure and change angle independently of the rest of the fin.
COUNTER PIVOTS – Opposite to normal fin blades! Normal fins reduce AOA as you kick harder. SUPERNOVA increases AOA as you kick harder!
AUTO-ADJUSTS the AOA based on kick strength. Provides easier kicking when cruising. Maximum power when you need it.

HYDRA-LOOP REINFORCED CENTRAL PANEL:

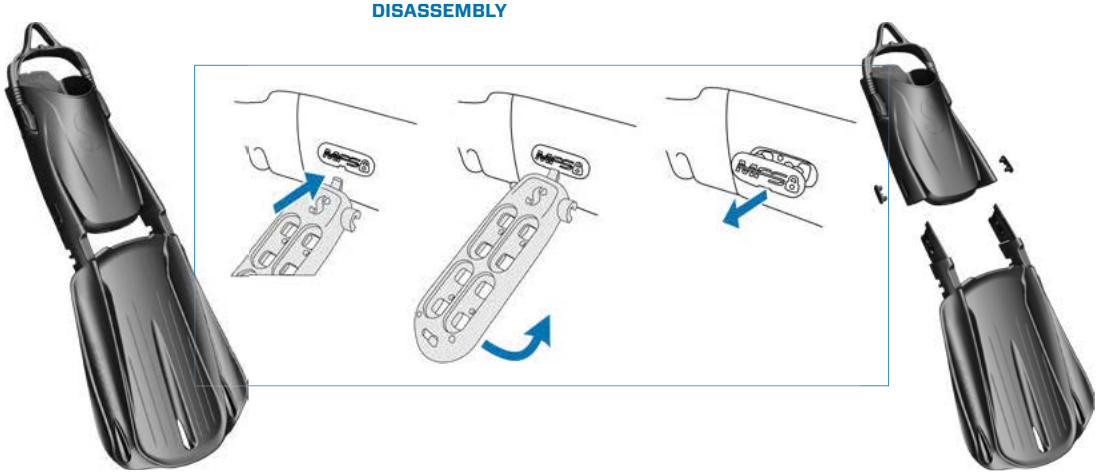

- Improves lateral rigidity for vastly improved alternate kicks.
- Creates a hydrofoil profile for better thrust.
- Channels water flow rearwards for increased efficiency & thrust

TWIN-TIP WINGLETS

improve control and maneuverability for excellent frog and alternate kicks.

DISASSEMBLY

SEAWING NOVA

Setting the bar in dive fin design, the multiple-award-winning Nova Seawing delivers the power, acceleration and maneuverability of a blade fin, with the kicking comfort and efficiency of a split fin. Combining classic SCUBAPRO fin technology with the latest innovations in hydrodynamic design, divers will be hard-pressed to find a fin that's more comfortable to wear or fun to kick when cruising the underwater world.

SCUBALAB TESTER'S CHOICE 2015

- Built with a spaceage Monprene® elastomer that is virtually indestructible.
- Proprietary G4 articulated joint allows the entire blade to pivot and generate thrust.
- Wing-shaped blade creates a near-perfect balance of stiffness and flex.
- Variable Blade Geometry wing tips arc upwards, providing more power and increasing stability.
- Pivot Control technology ensures that the most efficient 45-degree angle of attack is maintained no matter how easy or hard you kick.
- Marine-grade bungee strap is self-adjusting, comfortable, extremely durable, and makes easy work of donning and doffing the fin.
- Re-engineered footplate with co-molded Grip Pads provides improved non-skid grip on wet surfaces.

JET FIN

SCUBAPRO Jet Fins have a long and celebrated history of performance. They set the standard for power and durability in 1965, and continue to be immensely popular today.

- Proven vented design
- Spring heel strap

A small hole at the end of the blade has been added, which allows the diver to clip the fins to his suit or BC with a click strap or hook.

TWIN JET MAX - SPRING STRAPS

Max out on propulsion with the Twin Jet Max. This high performance split fin delivers "propeller technology" with a slightly stiffer blade than what you might expect in a flexible split fin. Designed for divers who want more from their kicks, with this fin you will enjoy solid propulsion and excellent maneuverability in a pleasing kicking motion with minimum leg and ankle stress.

- Dual-compound design results in a stiffer blade that increases propulsion and maneuverability
- Patented split fin propeller technology produces more propulsion with considerably less effort
- Drag-reducing vents where foot pocket and blade meet radically decrease drag on both up and down strokes
- Semi-rigid side rails improve stability through the kicking cycle
- The foot pocket's extended soleplate allows you to maximise the amount of energy you expend on each kick without wasting energy
- Steel spring straps never need adjusting, making it even easier to don and doff the fin

GO SPORT

The GO SPORT fin features a "Boot-Fit" design and offers the same functions and features as the original GO fin. This version features a revised Ergo3 foot pocket that has been re-profiled to accommodate boots. The blade has also been slightly revised; it now provides mounting points to attach skegs that minimise sideslip and maximise stability. Like the original GO fin, the GO SPORT is designed to fit easily in IATA carry-on compliant luggage.

- Lightweight design increases convenience when travelling and comfort in the water
- Open heel "Boot-Fit" design features a replaceable self-adjusting bungee heel strap that allows for a versatile fit and makes the fin easy to don and doff
- Revised Ergo3 foot pocket is re-profiled for maximum comfort and power transfer
- Ultra-strong 100% Monprene® construction avoids problems of delamination, broken blades and torn foot pockets, making it ideal for long-term, heavy-duty use
- 25° pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channeling effect
- Power Bars on the underside prevent overflex to maintain the optimum angle of attack under high-load conditions
- In-water performance delivers speed, power, stability and maneuverability with a minimum of effort
- Mounting points for skegs that minimise sideslip and maximise stability
- Skegs come in a variety of colours for customisation and to colour-code sizing in rental operations - see page 131
- Fins fit easily in IATA carry-on compliant luggage
- Sizing profile is the same as the Seawing Nova

GO FIN

GO travelling, GO Diving, GO Snorkeling – with the GO fin. This travel fin combines the benefits of an open heel fin, with the comfort and barefoot freedom of a full foot fin. The GO is lightweight yet virtually indestructible, plus it's a fast and nimble performer in the water. It's also designed to fit easily in IATA carry-on compliant luggage, making it the ideal fin everybody who enjoys travelling the world.

- Lightweight design increases convenience when travelling and comfort and ease of use in the water (Size M-L weighs 1 kg a pair)
- Barefoot Design features a replaceable self-adjusting bungee heel strap that allows for a versatile fit and makes the fin easy to don and doff – it can also be used when wearing neo socks.
- Ultra-strong 100 percent Monprene® construction avoids problems of de-lamination, broken blades and torn foot pockets, making it ideal for long-term, heavy-duty use
- 25-degree pre-angled blade with a Central Power Panel provides longitudinal rigidity and creates a channeling effect
- Power Bars on the underside of the rails prevent overflex to maintain the optimum angle of attack under high load conditions
- In-water performance delivers speed, power, stability and maneuverability with a minimum of effort
- Fins fit easily in IATA carry-on compliant luggage
- Innovative Piggy Back Stack system interlocks one fin blade into the other, creating a snug pairing
- Coloured bungee straps are available optionally

JET SPORT ADJUSTABLE

Lightweight and comfortable, fans of traditional blade fins will be impressed with the performance of the Jet Sport. With a big, slightly stiff blade and a soft rubber foot pocket, this fin generates propulsive kicking power, provides good stability and makes efficient work of frog and dolphin kicks. The fin is easy to maneuver too - responsive in turns and able to back you out of tight spots. It's the perfect blend of performance, kicking comfort and price.

- Three-material blade construction optimises flex to maximise kicking performance
- Drag reducing vents substantially decrease resistance on both up and down strokes
- Big blade generates a powerful response in the water and improves stability and maneuverability
- Ergonomic foot pocket molds to your foot for total comfort during long dives
- Quick release buckles simplify strap adjustment and make donning and doffing easy
- Effective non-skid pattern protects against slips on wet surfaces

JET SPORT FULL FOOT

A full foot version of the powerful Jet Sport adjustable, this is a lightweight fin that delivers lots of propulsion, excellent maneuverability and feels comfortable on bare feet.

- Three-material blade construction optimises flex to maximise kicking performance
- Drag reducing vents substantially decrease resistance on both up and down strokes
- Big blade generates a powerful response and improves stability and maneuverability
- Ergonomic full foot pocket molds to your entire foot for total comfort during long dives
- Effective non-skid pattern protects against slips on wet surfaces
- It's an ideal choice for finning in the tropics.

JET CLUB FULL FOOT

The Jet Cub full foot fin comes with an ergonomic foot pocket that lets you enjoy remarkable foot comfort while benefiting from impressive kicking performance. The fin's big blade generates lots of power, while its vented design and three-material construction help maximise thrust and maneuverability and minimise leg strain.

- Big blade generates a powerful response
- Three material blade construction optimises flex to achieve a high kicking performance
- Drag reducing vents substantially decrease resistance on both the up and down stroke
- Ergonomic foot pocket increases comfort and contributes to the fin's overall efficiency

DOLPHIN

The Dolphin features an open heel design that's perfect for snorkellers who like to wear neoprene booties. However, the foot pocket is so soft and supportive you can just as easily use the fin barefoot.

- The silicone-over-bungee strap allows for a versatile fit and makes the fin easy to don and doff.
- Colour matches SCUBAPRO masks and snorkels

D-MASK TWIN LENS MASKS

Sharing the design scheme of the D-Series D420 regulator, the D-Mask is a sleek, premium mask well-suited for all types of diving. The mask features true colour UV protective lenses that deliver the best balance of surface protection and underwater clarity. It also features an interchangeable lens system for optional optical lenses. Offering a comfortable fit and a wide field of view, the D-Mask is available in black with blue accents to match the D420 regulator's colour scheme. It comes with a choice of black or clear skirts in two sizes: Medium and Small, and there's also a Wide skirt available in black only.

The D-Mask's skirt is made with SCUBAPRO's revolutionary **Trufit Technology**, utilizing a unique ribbing pattern and not one but two thicknesses of high-quality silicone. The silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity. The silicone contouring the face is thinner, providing a pliable and extremely comfortable watertight seal.

- Sleek design matches the D420 regulator.
- True colour UV protective lenses offer protection from UV light on the surface without affecting colours under water.
- Interchangeable lens system makes it easy to install optional optical lenses.
- Available with a choice of skirts to suit a variety of face shapes.
- Trufit Technology can be identified by its unique ribbing texture on the mask skirt.
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal
- Rotating buckles work with a new black-on-black Comfort Strap to optimize range of motion and achieve a comfortable, watertight fit.
- Included in the durable molded fabric box: mask delivered with blue mask frames, all black coloured frames, a HUD hands-free dive computer mount and an all-black Comfort Strap.
- Optional lenses available: Optical lenses (6x positive +1.5 to +4.0/8x negative -1.5 to -5.0); Bi-Focus lenses (3x positive +1.0 to +3.0).
- Optional Colour kits available - see p152
- Mask delivered as standard with a black-black Comfort Strap, a black colour kit and a D-Mask HUD Mount.

SYNERGY MINI

The Synergy Mini is the little brother/sister of the Synergy Twin mask. With its downsized design, it features a smaller frame and a smaller skirt to accommodate smaller faces. The Synergy Mini's Trufit skirt is both extremely comfortable and ensures a watertight seal on men and women who have had issues getting the full-sized Synergy Twin to seal on their faces. The dual lens design is low volume and offers a wide field of view, and the mask comes standard with a colour-coordinated Comfort Strap.

- Downsized, with a smaller frame and a smaller skirt to fit smaller faces
- Trufit Technology can be identified by its unique ribbing texture on the mask skirt
- Silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal
- Rotating buckles work with a colour-coordinated Comfort Strap to optimise range of motion and achieve a comfortable, watertight fit
- Ultra Clear lenses provide optimal clarity under water

The Synergy Twin benefits from SCUBAPRO's second-generation Trufit Technology, a skirt made of two thicknesses of silicone – thin and pliable where it touches the face for comfort and to ensure a watertight seal, and thicker near the mask frame for support and rigidity. It's an effective combination that delivers a comfortable fit for a wide range of face shapes as well as a reliable seal against water intrusion. The dual-lens design is low volume and offers a wide field of view.

All-black version for military use or for divers who don't want coloured equipment.

- Trufit Technology can be identified by its unique ribbing texture on the mask skirt.
- Silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity.
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal.
- Rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.
- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.
- Mirrored lens option delivers a glare-free view of the underwater world.
- Ultra Clear no-tint glass provides optimal clarity under water.

24.713.100

- Note: This model includes a black-on-black Comfort Strap.

The stellar dual lens Spectra offers a wide view and a comfortable water-blocking seal, plus it features an exclusive paint process that transforms your mask into stylish eyewear.

- All-black version for military use or for divers who don't want coloured equipment.

- Dual-lens design is low volume for easy clearing plus offers maximum field of view.
- Ultra Clear lenses are made from tempered glass for safety and long-term durability.
- Universal skirt design is super comfortable and fits a variety of face shapes.
- Mirrored lens option delivers a glare-free view of the underwater world.
- Special nose pocket design makes easy work of equalizing.
- Swivel buckles adjust easily to achieve a perfect fit.
- Bold frame colours include stylish duotones.
- Note: Painted finish may be damaged if cleaned with abrasive products.
- Equipped with a standard silicone strap.
- Compatible with optional Comfort Straps.

ZOOM

The Zoom is a low volume dual-lens mask that is ideal for all divers, but is especially well-suited to divers who use optical lenses. The mask has a lens-change system that enables you to switch lenses yourself, without tools, in less than a minute. Featuring spray-painted sub-frames in colours matching Seawing Nova fins, HYDROS BCD colour kits and the UPF Collection of rash guards, steamers and leggings, the Zoom offers a universal fit and includes an integrated buckle design that is compatible with the Comfort Strap.

All-black version for military use or for divers who don't want coloured equipment.

- Convenient lens-change system for divers who use optical lenses.
- Lens-change system lets you change the lenses yourself, without tools, in less than a minute.
- Ultra Clear no-tint glass provides optimal clarity under water.
- Low volume design makes clearing easy.
- Universal fit ensures a comfortable, watertight fit.
- Integrated buckles make adjustments easy.
- Colourful spray painted sub-frames come with black or clear skirts.
- Equipped with a standard silicon strap.
- Compatible with optional Comfort Straps.
- Optional accessories like a HUD hands-free dive computer mount adapter, colour kits and optical/bifocal lenses are also available.

REPLACEABLE OPTICAL LENSES RANGE FROM -1.0 TO -8.0 (IN .5 DIOPTER INCREMENTS). LENSES ARE INTERCHANGEABLE AND WILL FIT EITHER THE LEFT OR THE RIGHT SIDE. SEE P163

- Add-on Bi-Focus lenses are magnifiers that are bonded to plain lenses and range from +1.0 to +3.0. These have a left and right side.

APNEA - STEEL COMP

The ultimate freediving mask, the frameless, dual-lens Steel Comp is particularly well-suited to deep divers. It has the lowest possible internal volume so equalising is easy. Plus, on descent the mask itself compresses, so equalisation is not required as often.

- Dual-lens frameless design offers the lowest possible internal volume, plus it compresses on descent, an advantage on deep freediving descents
- Flat, Ultra Clear, scratch-resistant glass guarantees an undistorted view
- Premium supple silicone comfortably fits a range of faces
- Rotating buckles work with a micro-adjustable strap to achieve a great fit

Note: with the Steel Comp, as water pressure increases the bridge between the lenses bends slightly and squeezes the mask tighter to the face. The only noticeable indication of this is a brief change in vision as the eyes need a split second to adjust. However, because of this the Steel Comp is not recommended for scuba diving.

FRAMELESS GORILLA SINGLE LENS MASKS

The FRAMELESS GORILLA has a slightly larger and wider lens than the original Frameless mask, and a slightly larger skirt in a matte finish. Otherwise, it shares the same classic single lens design and long list of comfort and performance features. Like on the original Frameless, the soft silicone skirt on the FRAMELESS GORILLA is comfortable yet durable, and the double-edge seal feels good against the skin. The buckle system is easy to use and allows for quick adjustments. Buckles attach to flexible tabs on the skirt; this optimizes strap angle when dialing in fit. The wide headband spreads the load on the back of the head, greatly enhancing comfort. For divers with larger or wider faces the FRAMELESS GORILLA is an excellent choice.

- Extra-large single-lens provides an expansive field of view while reducing volume
- Slightly larger double-seal matte skirt creates a comfortable, watertight seal on larger faces
- Push-button buckles attach to tabs on the skirt to optimise range of motion when dialing in fit
- Buckle tabs are flexible, enabling the mask to be folded flat for travelling
- Wide headband allows for a comfortable fit against the back of the head

SCUBAPRO's classic Frameless is diving's original frameless mask, and it continues to be the mask of choice among professional divers throughout the world. Its single lens design features a distinctive rectangular shape that provides an excellent field of view on the periphery as well as straight ahead. The soft silicone skirt is comfortable yet durable, and the double-edge seal feels good against the skin.

- Frameless single-lens design provides an expansive field of view while reducing volume
- Soft silicone skirt uses a double-seal system for a comfortable, leak-proof fit
- Push-button buckles attach to tabs on the skirt to optimise range of motion when dialing in fit
- Buckle tabs are flexible, enabling the mask to be folded flat for travelling
- Wide headband allows for a comfortable fit against the back of the head

CRYSTAL VU

A large single lens plus seamless side windows equals an expansive view under water. The double-sealed silicone skirt offers a seal that is both comfortable and watertight. Swivel buckles allow for the perfect fit and an exclusive paint process lets you dive with style.

- Patented tempered glass single-lens design with side windows creates a panoramic field of vision.
- Double-sealing skirt is comfortable against the skin and keeps water out.
- Convenient swivel buckles allow for a snug fit and ease of clearing.

SYNERGY 2 TRUFIT

Called the most comfortable dive mask on the market, you have only to try on a Synergy 2 to feel the difference. Made with SCUBAPRO's Trufit Technology, its double-skirt system has proven to be ultra comfortable during extended periods under water while providing a watertight seal on virtually all face shapes. The single lens provides excellent field of view, and the buckle system is easy to use. The mask frame is spray painted for that premium look.

- Trufit Technology design uses two skirts for creating a comfortable, watertight seal.
- Main skirt offers a thin and soft silicone material for the best possible fit, seal and comfort against the skin.
- Outer skirt, made with firmer silicone, provides support and rigidity where needed.
- Trufit Technology can be identified by its unique ribbing texture.
- Rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.
- Push-button buckles attach to tabs on the skirt to optimise range of motion when dialing in fit.
- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.

SOLO

The Solo is a modern single lens mask that offers a panoramic, low volume field of view in the streamlined design. The double-sealed silicone skirt molds to the face to create a comfortable, watertight seal. Buckles with flexible mounts on the skirt allow you to easily route the non-slip strap to achieve the perfect fit. This mask is a favourite among recreational divers.

- Dual colored frameless single lens design delivers a panoramic field of view.
- Low volume design increases field of view plus makes clearing easy.
- Non-slip strap with easy-adjust buckles let you find that perfect fit.
- Tempered glass lens.

ULTRA CLEAR LENS
Standard glass has a slight green tint, resulting from impurities that do not have a big influence on vision but can distort true colours and reduce light transmission through the glass under low light conditions. SCUBAPRO ultra clear lenses offer exceptional clarity together with brighter vision underwater.

SYNERGY TWIN TRUFIT COMBO

This premium mask/snorkel set includes the Synergy Twin Trufit mask and Spectra Dry snorkel. The Synergy Twin features a skirt made of two thicknesses of silicone – thin and pliable where it touches the face, and thicker near the mask frame for support and rigidity. Its low volume, dual lens design offers a wide field of view. The Spectra Dry is an easy breather. Its large-bore upper tube allows plenty of airflow, and its dry top keeps water out so no clearing is needed upon resurfacing. The combo comes packed in a convenient carry bag.

• Carry bag is made of 600D Polyester with a PU coating and includes a carry handle.

SPECTRA DRY

Offered as the perfect companion to SCUBAPRO's Spectra mask, the Spectra Dry's large-bore upper tube allows plenty of airflow, and its dry top keeps splashing surface water from entering the airway. An efficient purge valve expels any water that might seep in. The flexible lower tube hangs down and out of the way when not being used.

- Large-bore upper tube with dry top is designed for dry and easy breathing
- Corrugated silicone lower tube allows the mouthpiece to hang out of the way when breathing off a regulator
- Purge valve, positioned at the lowest point, takes care of any water that might enter the airway
- Regulator-style mouthpiece offers good bite tabs for a comfortable fit, ideal for extended snorkelling adventures
- Offered in five metallic colours to coordinate with Spectra masks.

SPECTRA

This snorkel is tops when it comes to breathing comfort and ease of clearing. The large-bore upper tube is rigid for stability and allows plenty of airflow, while the corrugated lower tube can be easily positioned when being used, and hangs out of the way when not being used. The semi-dry top helps prevent water from entering, the purge valve positioned at the lowest point makes quick work of any water that does sneak in.

- Large-bore upper tube is fitted with a semi-dry top to deflect surface splash
- Corrugated silicone lower tube allows the mouthpiece to hang out of the way when breathing off a regulator
- Purge valve, positioned at the lowest point, takes care of any water that enters the airway
- Regulator-style mouthpiece offers good bite tabs for a comfortable fit, ideal for extended snorkeling adventures
- Exclusive paint process includes stylish duotone colours

ESCAPE

The semi-dry barrel-top design of the helps keep water from entering the large-bore barrel while allowing abundant airflow. Included is a very efficient purge valve located down low, a ultra-comfortable regulator-style mouthpiece and a convenient cell phone-style clip for easy removal.

- Semi-dry top design prevents water from entering the large-bore barrel
- Flexible, corrugated section is easy to use and drops away from face when not needed
- Ergonomic mouthpiece enhances comfort during extended swims
- Purge valve positioned at the lowest point requires only a quick breath to clear any errant water
- Quick-connect clip makes it easy to attach or remove snorkel from mask strap

53.399.180

XP PACK DUO

Lightweight yet durable, this rolling dive bag is an ideal gear carrier for world travellers. It has been improved and now offers two main compartments instead of just one. We also added internal mesh pockets for organising smaller items. A zippered sleeve on the front cover provides easy-access storage for items you might need while en route to your dive destination.

- Made from a durable combination of 420D nylon NT and 450D Ripstop fabric with a saltwater-resistant YKK Vislon zipper
- Inside lining is made of 150D polyester PU fabric
- Main zippers are YKK Vislon saltwater-resistant and feature double sliders for easy access
- Telescopic tow handle and reliable wheels allow for the near-effortless rolling transport of gear
- Padded carry handle lets you conveniently pull the bag over uneven terrain
- Size complies with IATA rules
- Dimensions (approximate): 80x42x35cm
- Weight: 5.10kg. Volume: 118L

SCUBALAB TESTERS CHOICE 2021

CONFIDENTIAL, NOT FOR DISCLOSURE TO UNAUTHORISED ENTITIES OR PERSONNEL. DOCUMENT VALID FROM 01/10/2022

PORTER BAG

This gear carrier offers lots of volume to handle your gear. It comes with reinforced skate-style roller wheels plus a backpack system, so you'll be able to easily roll or carry the bag wherever you want it to go. But what's really great about the Porter Bag is its easy-fold feature that allows it to stow easily as it awaits your next dive adventure.

- Bag's exterior is made from a combination of 420D Nylon NT and 450D Ripstop for strength and durability. The interior lining is 150D Polyester
- The bag enjoys a 20% lighter overall weight thanks to the PU material
- Offering lots of gear carrying capacity, the bag folds into a compact package for storage
- Large main compartment, one front pocket and two inside pockets provide a variety of packing and stowage options
- YKK saltwater-resistant double-slider zipper is durable and makes accessing the large main compartment that much easier
- Backpack system plus top handle with reinforced «off-road» skate-style wheels provide multiple transport options
- Adjustable top handle makes rolling phase easy and comfortable
- Dimensions: 80x45x35 cm (Folded dimensions: 52x41x17 cm)
- Weight: 2.55kg. Volume: 125L

PRICES	€
MSRP	200,00

PART NUMBER	DESCRIPTION

REPORTER BAG

This versatile backpack provides lots of storage space yet is 15% smaller than its predecessor to increase its compact convenience. Offering more inside padding, the bag features three roomy compartments: the rear compartment is ideal for clothes; the middle compartment is designed for a laptop, e-tablet, documents and magazines (with a special pocket for passport and boarding passes); and the front compartment is designed to stow items like digital cameras. You also get a small mesh pouch on one side to hold a water bottle, and a small zippered pocket on the opposite side for keys or other important small items.

- More inside padding, more convenience features
- Offering 3 main compartments plus additional smaller pockets to stow a variety of important gear, work papers and writing tools
- Computer compartment is sized perfectly for laptops up to 15 inches
- Double slider zippers are easy to use and help keep contents secure
- Padded shoulder straps and top handle make this an easy bag to carry
- Dimensions (approximate): 35x23x45cm
- Weight: 0.9kg. Volume: 36L

DUFFLE BAG

This heavy-duty traditional duffel-style bag is built tough. While weighing not even one kilo when empty, the Duffle Bag provides enough volume to accommodate a full set of dive gear. It is also easy to load and unload thanks to its U-shaped double slider zipper. Double duffel handles and a sturdy shoulder strap offer convenient ways to carry the bag to and from the dive site.

- Made of a durable yet lightweight combination of 420D nylon NT, 450D Ripstop and 600D polyester with polyester thread stitching
- Inside lining is made of 150D polyester/PU
- Ultra-soft construction makes it super easy to fold and store when not being used
- Main zippers are YKK saltwater resistant and feature double sliders for easy access
- Padded carry handle lets you conveniently tote or lift the bag over uneven terrain
- Dimensions: 80x40x35cm
- Weight: 0.90kg. Volume: 112L

OCEAN CLEAN UP BAG

Divers can do their part to keep the oceans clean by carrying a SCUBAPRO Cares Ocean Clean-Up Bag folded away in a BCD pocket. While out on a dive, if you come across a rusty can, a bit of plastic, or other underwater litter, simply unfold the bag and load the trash. The fabric and mesh construction allows water to flow through, minimising drag, plus makes for easy cleaning after returning to the surface and emptying the bag into a trash receptacle. A Hook & Loop closure keeps the contents secure, and large double D-rings can be used as handles and provide clip-off points for attaching to a BCD or belt equipped with a carabiner (not included). A blue bungee keeps the bag neatly rolled up when not in use.

- Dimensions: 55x37x10cm
- Weight: 135g. Volume: 20L

LIFELINE JAWZ TI MULTI-PURPOSE RESCUE TOOL

PART NUMBER	DESCRIPTION	MSRP
32.225.001	JAWZ Ti Black & Yellow	295,00
32.225.002	JAWZ Ti MILITARY Black & Black	315,00

More than a dive knife, the new JAWZ Ti™ is a versatile, all-in-one multi-purpose rescue tool for dive professionals. It is designed to be worn on the upper chest area of a BCD using a TacWare™ J-clip (included) that allows instant access to the tool. Easy one-handed operation is ideal for cutting jobs in low visibility or restricted movement environments. The JAWZ Ti™ effectively cuts rope, monofilament line, netting, webbing and other materials commonly encountered under water. Each tool is made from Grade 38 ATI 425 ballistic titanium with 316 stainless steel hardware. Handles and sheaths are made from either heat-injected molded polypropylene thermoplastic, or polypropylene thermoplastic with glow-in-the-dark phosphorescent strontium aluminate to increase functionality in low-light conditions.

The JAWZ Ti™ features two main cutting surfaces with three distinct cutting areas: a cutting blade on the spine for cutting above or behind the head, an aggressive full length serrated blade, and a curved hooked blade for pull cuts or slashing. On the end of the handle a pointed breaker is provided for breaking glass or creating starter holes prior to cutting. Put them together and you have a high-performance specialty tool for a wide range of surface and underwater operations.

- An essential tool for search and rescue, military and survival applications.
- ATI 425 titanium alloy exceeds the corrosion resistance, ballistic and strength requirements of MIL-DTL-46077 titanium armour plate.
- Metal is PVD-BLACKCAT™ coated for corrosion resistance and durability. PVD-BLACKCAT™ is a "green" coating that uses no harsh chemicals in its production and offers a durable, attractive, performance-enhancing finish.
- Glow-in-the-dark handles and sheaths can be recharged by any form of UV light, including sunlight.
- Index finger grip and thumb grip on the spine make for easy one-handed operation.
- Highly aggressive serrations can cut through a variety of materials found under water.
- Cutting surface on spine is effective at slicing through monofilament line and netting.
- Serrated hook is good for cuts that require pulling or slashing rather than a sawing motion.
- Blunted nose protects against puncturing BCD bladders or hoses.
- Pointed breaker on the handle is highly effective against laminated glass and for creating starter holes before cutting.
- TacWare™ J-Clip, made of high-strength polymer, is designed to hold up to heavy, long-term EDC (Every Day Carry) use. It can be attached to 1.5" – 1.75" belt widths and up to triple-layer nylon webbing. A built-in finger-grab allows for easy removal.
- A sheath is included.

LIFELINE Tactical Rescue Tools

Manufactured by LIFELINE Tactical Rescue Tools

CONFIDENTIAL, NOT FOR DISCLOSURE TO UNAUTHORISED ENTITIES OR PERSONNEL. DOCUMENT VALID FROM 01/10/2022

TK15

The TK15 is the first of a "Tactical" series of dive knives. It is built around a single piece of marine-grade stainless steel that's b+een machined to achieve the ideal balance of strength and weight. Its surface is specifically polished to let the water drain easily and prevent oxidation. The thickness of the stainless steel is consistent from one end to the other, creating a high level of stiffness. The blade is 15cm long and features a lower smooth-edge and an upper serrated edge close to the handle to maximise control of the cut. There's also a line cutter. The knife comes with a heavy-duty handle and a fiberglass-reinforced polyamide sheath with nylon straps. Also included is a SCUBAPRO branded hand cover with bungee for securing the knife to the hand in critical dive conditions.

- Built with marine-grade stainless steel, the best material for maintaining cutting edge reliability and resisting corrosion
- Substantial 15cm blade offers plenty of heft and cutting power
- Both smooth and serrated blade edges are designed to meet any cutting situation
- Heavy-duty handle with stainless steel screws provides a reliable hand-hold when wearing gloves
- Fiberglass reinforced polyamide sheath with nylon straps delivers reliable knife protection
- Recesses in the handle matched to teeth in the sheath enable the knife to securely stay in place
- Red tab on the underside of the Hook & Loop leg strap keeps the sheath secured on the leg when pulling the knife out for use

The Mako knife has a 8,5cm multifunctional blade providing a conventional edge, line-cutting notch, serrated edge and bottle opener. Comes with a locking sheath with a one-hand release mechanism.

X-CUT

The lightweight, multi-function, X-Cut is made from alpha (hardened) titanium. Its blade is specially designed and shaped to maintain a sharp cutting edge for a long life of corrosion-free performance.

- Measures just over 12.7cm in overall length
- Its 6.3cm blade offers both serrated and smooth cutting edges, along with a line cutter
- No-nonsense handle is contoured and offers both indents and a finger guard to enable you to maintain a firm, non-slip grip
- A lanyard eyelet is provided for running a wrist lanyard
- Low profile, protective sheath features a Hook & Loop closure and is designed to fit on a tech harness waistband.

NOVA 850

The Nova 850 delivers intense illumination, ideal for lighting up the dark spaces and bringing out the vibrant colours on night dives as well as day dives. It is machined from heavy-duty aluminum so is both lightweight and built to last. It's also easy to use. A 50% mode allows you to increase burn time if you don't need the full power. For divers looking to brighten their dives, the Nova 850 is the perfect choice. Available in rechargeable and non-rechargeable versions, with a light body to hold a single 18650 li-ion rechargeable battery or 3 C-cell disposable/rechargeable batteries.

850

- Measurements: 253x45 mm. Weight (w/battery): 522 g
- Rugged aluminum body offers a stealthy "tech" look while providing lightweight long-term durability
- Equipped with a Cree XPL LED.
- 850 lumen illumination.
- 17,000 lux @1m.
- CCT (correlated colour temperature): 4200°K
- Beam angle: 8°
- Double O-ring seals ensure watertight integrity.
- Push-button switch on the end of the light is easy to activate, even when wearing gloves.
- Safety-lock mode using push-button switch
- Extended light head shroud prevents the light beam from blinding other divers.
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights at this price point
- A depth rating of 150m ensures worry-free lighting in virtually all diving conditions.
- 3 x C-cell disposable/rechargeable batteries (not included)
- Burn time: up to 7 hours on full power.

850R

NOVA 850R

- Measurements: 161x45 mm. Weight (w/battery): 275g
- 18650 li-ion rechargeable battery
- Burn time: up to 2 hours on full power.

NOVA 850 WIDE

The Nova 850 Wide delivers the same illumination and offers the same features as the Nova 850, but is equipped with a wider 80° beam, making it the perfect primary night diving light. For illuminating large expanses of underwater terrain, you can't beat the Nova 850 Wide. Available in rechargeable and non-rechargeable versions, with a light body to hold a single 18650 li-ion rechargeable battery or 3 C-cell disposable/rechargeable batteries.

Delivered with lanyard & EVA carry case with foam insert

- Measures 246x45 mm. Weight (w/battery): 528g
- Rugged aluminum body offers a stealthy "tech" look while providing lightweight long-term durability.
- Equipped with a Cree XML LED.
- 850 lumen illumination.
- 300 lux @1m.
- CCT (correlated colour temperature): 6000°K
- Beam angle: 80°
- Double O-ring seals ensure watertight integrity.
- Push-button switch on the end of the light is easy to activate, even when wearing gloves.
- Safety-lock mode using push-button switch
- Extended light head shroud prevents the light beam from blinding other divers.
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights at this price point
- A depth rating of 150m ensures worry-free lighting in virtually all diving conditions.

NOVA 850 TEC

In underwater lighting where performance, reliability and simplicity are the keys to success, nothing beats the no-nonsense Nova 850 Tec. This rugged single-mode dive light delivers intense 850 lumen illumination with a focused beam, ideal for lighting up those dark compartments in wrecks and hidden crevices in deep-water reefs. The light is machined from heavy-duty aluminum so is both lightweight and built to last. It is also easy to use, with simple twist-on/twist-off activation. The light comes with a convenient attachment point for attaching a bolt snap – usually with a short length of cave line – so it can be securely clipped to a D-ring when not being used. Divers looking for simple yet serious underwater illumination for night dives as well as day dives will find the Nova 850 Tec a smart choice.

PRICES	€
MSRP	170,00

PART NUMBER	DESCRIPTION
30.226.100	

- Rugged matte black aluminum body with blue accents offers a stealthy tech look while providing lightweight, long-term durability.
- 850 lumen illumination.
- Equipped with a Cree XPL LED.
- 17,000 lux @1m.
- CCT (correlated colour temperature): 4200°K.
- Beam angle: 8°.
- Double O-ring seals ensure watertight integrity.
- Easy twist-on/twist-off activation allows for trouble-free operation, even when wearing thick gloves.
- Extended light head shroud prevents the light beam from blinding other divers.
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights at this price point.
- A depth rating of 300m ensures worry-free lighting in virtually all diving conditions.

ADDITIONAL SPECS:
- Measurements: 243x45mm.
- Weight (w/o batteries): 288g.

- Burn time: up to 7 hours on full power.

NOVA 250

PART NUMBER	DESCRIPTION	MSRP
30.224.000	Nova 250 Light	90,00
06.205.063	Panasonic Battery CR123A	5,10

The Nova 250 is versatile dive light that can be stored in the smallest BCD pocket. It offers three modes: 100% power, 50% power and Flash, plus is equipped with an over-pressure valve to release battery off-gassing, making it the safest small light on the market. Delivering 250 lumens of illumination, the Nova 250 is powered by one CR123A battery (rechargeable or disposable). The CR123A disposable battery features a shelf life of up to 10 years so you don't have to worry about it if it stays in your BCD pocket over the winter.

- Rugged aluminum body features a rugged matte black finish with blue accents, providing lightweight long-term durability and a high-quality look
- Equipped with a Cree XPG LED
- CCT (correlated colour temperature): 4500°K
- 250 or 300 lumen illumination (rechargeable or disposable); 2700 lux @1m; CCT (correlated colour temperature): 4500°K.
- 2700 lux @1m
- Burn time: up to 1 hour
- Three modes: 100% power, 50% power and Flash
- Push-button switch on the end of the light is easy to activate when wearing gloves
- Extended light head shroud prevents the light beam from blinding other divers
- Double O-ring seals ensure watertight integrity
- Powered by a CR123 battery (rechargeable or disposable – not included) with a burn time of up to 1 hour on full power
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights of this size
- A depth rating of 150m ensures worry-free lighting in virtually all diving conditions
- Measures 100mm x 26mm

REEF HOOK

A reef hook is a handy accessory to have if you're drifting diving and you want to stop to enjoy the sights or take a photo.

It comes with a stainless steel bolt snap you can clip to a BC D-ring, a length of line and a hook to snag on a rock to keep you from getting swept away in the current.

A great tool for photographers.

SCUBAPRO

MK2EVO/R095 REGULATOR FOR YOUNG DIVERS

Young diver's version with shorter LP hose and a smaller mouthpiece.

PRICES	€
MSRP	298,00

PART NUMBER	DESCRIPTION
12.096.010	INT 232
12.096.310	DIN 300

XTIS EXTENDED THERMAL INSULATING SYSTEM

MK2 EVO FIRST STAGE

- Classic downstream piston design features a chrome-plated brass body with one high pressure and four low pressure ports.
- Patented XTIS (Extended Thermal Insulating System) fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.
- Additional internal technical improvements include a spring insulating bushing and coating, an insulating piston bushing, an insulating sleeve and an antifreeze cap, all of which contribute to freezing resistance.
- Chrome-plated brass body is smaller than its predecessor but houses an oversized piston that provides better breathing performance by increasing airflow.
- Stainless steel removable orifice allows for easier maintenance while extending regulator life.
- Meets new EN250-2014 standards for cold-water breathing performance.
- Weight (oz/g): INT 232, 23.6/670; DIN 300, 15.9/450.
- Airflow at 2900psi/200bar: (l/min/SCFM): >3000/106.
- Intermediate pressure (psi/bar): 138-145/9.5-10.

SECOND STAGE

- Classic downstream valve
- VIVA pre-set
- Super-flow hose
- High comfort orthodontic mouthpiece
- Full metal valve housing
- Left/right hose attachment
- Air flow at 200 bar: 1400 l/min
- Maximum low pressure: 14 bar
- Weight: 165g
- Short LP-hose and small mouthpiece

***While stocks last**

Specially designed for young divers, the front-adjustable Rebel is built tough to last. Its wraparound bladder provides a stable and secure ride at depth, and the padded backpack provides a lot of additional comfort. A flexible, one-size-fits-all design, coupled with a choice of two sizes of comfortable cummerbunds, enables divers of various sizes to maintain a snug fit. The front integrated gravity weight pocket system loads easily through zippered top openings. Weights are held in place by lower-hook and-loop flaps backed by heavy-duty buckles. They release easily, especially when using SCUBAPRO's optional Rebel weight pouches with easy-grab handles.

- Front integrated gravity release weight pocket system loads and releases weights quickly and easily.
- Constructed of 420 denier nylon for lightweight durability.
- Padded backpack provides extra cushion when strapped to a tank.
- Adjustable sternum strap and cummerbund contribute to a comfortable fit.
- Small and large cummerbunds are included so all young divers can achieve the best fit.
- Buckles on shoulder straps adjust the size range to optimise diver fit and provide additional comfort.
- Standard web strap with lightweight buckle holds the tank securely.
- Two zippered cargo pockets and four plastic D-rings – two large and two small – are provided for carrying extra gear.
- SCUBAPRO's Balanced Power Inflator (BPI) and two dump valves provide pinpoint buoyancy control.
- Optional weight pouches (21.572.000) with easy-grab handles make quick work of handling ballast weight.

REBEL WEIGHT POCKET KIT (21.572.000)

The Rebel Weight Pocket Kit is designed to fit into the Rebel's front integrated gravity weight pocket system. The kit includes two weight pouches that you insert into the Rebel's gravity weight pockets. Each weight pouch can hold up to 5.5lbs/2.5kg of ballast weight and features a convenient plastic handle so divers can quickly and easily remove the weight pouches when needed.

REBEL STEAMER 6/5 & 2.5

- Rebel streamer are made with X-Foam, a non-toxic neoprene formula that complies with the very strict P.A.H. requirements
- Diagonal back zipper and long ankle zippers make the suit extremely easy to don and doff
- Short zipper at the neck enhances comfort during surface intervals
- Stretch neoprene side panels increase range of motion
- Reinforced kneepads avoid abrasion on the legs of both suit and diver when kneeling on the bottom

STEAMER 6/5.0
This hoodless Rebel steamer is made for young divers with two thicknesses of neoprene to deliver thermal insulation in the body's core area where it is needed most, and flexibility in the legs and arms where mobility is key

STEAMER 2.5
This soft neoprene, well-cut steamer is offered in a 2.5mm thickness for maximum comfort when diving in warm waters. Thinner-skin neoprene on wrists can be rolled up or down depending on arm length

REBEL RASH GUARD & SHORT

On land the Wizard & Harmony rash guard sets deliver highly effective protection from the sun's rays (SPF 80) and offer better wind protection than a conventional T-shirt. In the water, they protect from jellyfish stings plus can provide additional environmental protection when worn underneath a wetsuit. Breathable, quick-drying and lightweight, these are comfortable garments for active young divers having fun in the sun.

SPORTDIVER UNDERWATER HOUSING FOR SMARTPHONE

The new SeaLife SportDiver housing allows divers to take photos and video with their smartphone down to 40 meters. The heavy-duty housing is constructed of Polycarbonate, stainless steel, aluminum and optical grade glass. And while the SportDiver housing is "heavy duty", weighing less than 641 grams, it is lightweight for travelling and offers almost neutral buoyancy in water depending on which smartphone model is used.

The SportDiver is easy to hold and use and offers a large shutter lever and rear control buttons for easy operation, even with dive gloves. Snorkelers and Divers can get more creative with their photos or video shot by using advanced camera settings. Adjust Zoom, Exposure (EV), Auto/Manual Focus, White Balance, Tint, Lens selection, RAW+JPEG mode, Live Photo and Background Blur (on available models).

- Easy control – Large shutter lever and rear control buttons for easy operation, even with dive gloves
- Shoot photos or record video – Easily switch between photo and video mode
- Dual Leak Alarms – Includes internal moisture alarm and internal vacuum pressure alarm
- Removable underwater colour-correction filter (included) for bright, colorful underwater photos & videos
- Includes SeaLife SportDiver camera app for iOS and Android
- Bluetooth® wireless technology – Housing automatically connects to your smartphone
- Expandable with Sea Dragon underwater photo-video lights
- Triple 1/4-20 tripod mounts – Mounts to Flex-Connect or any tray with standard tripod threads
- Cam-lock sealing mechanism easily and securely locks waterproof door
- Powered by two AAA batteries that give over 50 hours of continuous use
- Anti-fog design when SL911 Moisture Muncher capsule is used
- Depth rated to 40m – Each housing is individually depth tested

SportDiver™
Bluetooth®

- Works with iPhone® & Android. Check model compatibility with the "Fit-guide" on the SeaLife website https://www.sealife-cameras.com/sportdiver-compatibility/ or using the QR code.

- Holding spring and rubber grip tabs securely hold the Smartphone in place and add shock-protection

Vacuum Check Port

Colour-correction filter (included)

Cam-lock sealing mechanism

SEALIFE SPORTDIVER CAMERA APP FOR ANDROID & IOS

The SportDiver housing includes the free SeaLife SportDiver camera app for Androis & iOS and up and unlike other smartphone housing apps, there are no annoying in-app purchases or ads. You can easily switch between photo and video mode. The SportDiver App uses the iPhone camera technology native to each smartphone model.

The App Playback mode shows full size photos and videos with vertical thumbnail strip to easily locate your images. Videos start playing automatically when selected. All files are also saved to iPhone camera roll. The SportDiver housing automatically connects to your smartphone and the SportDiver app using Bluetooth® Low Energy (LE) 5 wireless technology. No cables or buttons touch the phone. SportDiver is powered by two AAA batteries which give over 50 hours of continuous use and assure ultra-low power consumption for both the phone and the housing.

MICRO 3.0 UNDERWATER CAMERA - Item SL550

The Micro 3.0 Underwater Camera is the third generation of the popular, permanently-sealed, Micro camera series. The camera is leak-proof with no O-rings to lube or maintain, so there is never a worry about flooding the camera. Like its forerunners, the Micro 3.0 features an ergonomic, compact design with easy-to-use controls and menus. The camera has a 16-megapixel Sony® CMOS image sensor and offers 4K ultra-high definition video. Since it's permanently sealed, the Micro 3.0 has a large 3-plus hour battery good for a full day of diving and built in 64gb of memory to store thousands of photos and hours of video.

The camera's ease of use starts with the three wide Piano key type buttons that are easy to locate and control, even with dive gloves on. The intuitive camera's Easy Setup feature quickly guides you through the correct settings based on the shooting environment, depth and lighting accessories being used. The Micro 3.0 offers WiFi sharing ability, so you can wirelessly preview, download and share pictures & videos to a smart phone or tablet with the free Micro 3+ app available at Google Play or Apple App stores.

ULTRA WIDE ANGLE DOME LENS - MICRO SERIES & RM-4K (SL052)

The Ultra Wide Angle Lens for the Micro-series and ReefMaster 4K underwater cameras that increases the camera's field-of view by almost 50% and allowing photographers to get three times closer to the subject.

The wide angle dome lens design uses high grade optical glass components arranged in a 4-element/4- group array that delivers crisp edge-to-edge sharpness. All optical elements are fully, multi-coated to prevent internal glare and maximize light transmission. The lens has a 13.3mm film-equivalent effective focal length when used with the SeaLife Micro 3.0 and is waterproof to 200ft/60m.

The lens fits all SeaLife Micro-series cameras (Micro HD, HD+, Micro 2.0, Micro 3.0) and also works with the SeaLife ReefMaster RM-4K increasing the tiny camera's shooting angle to a massive 196°. The new lens is a "wet lens" and easily attaches and removes underwater. A locking ring prevents the lens from accidently detaching when bumped or in rougher water conditions. The SeaLife Dome Lens weighs 11.7 ounces (331 grams) and is negatively buoyant. A lanyard is included to prevent loss underwater.

The inner airspace is back-filled with nitrogen to prevent fogging in extreme temperature conditions. The rotatable light shade prevents unwanted glare from external lighting or sunlight, as well as protect the dome lens from bumps and abrasion.

SEA DRAGON PHOTO-VIDEO DIVE LIGHTS

- One button control for easy operation - one button to power light on/off, select brightness and switch beam angle
- Easy to expand with Flex-Connect™ trays, grips and Flex Arms, handle, Y-S, ball joint, cold shoe and other accessories
- Universal mounting screw fits SeaLife and other brands of underwater cameras w/ standard ¼-20 tripod mount
- Quick-release button to detach light and aim in crevices and hard to reach areas
- Corrosion-proof metal light head for heat dispersion and durability
- Waterproof battery compartment - even if the O-ring seal fails, the battery compartment is isolated so water cannot reach the internal electronics

SEA DRAGON 3000SF PRO DUAL BEAM SL679

PART NUMBER	DESCRIPTION	MSRP
35.300.005	SEA DRAGON 3000SF PRO DUAL BEAM LIGHT W/TRAY & GRIP (SL679)	**690,00**
35.300.006	SEA DRAGON 3000SF PRO DUAL BEAM LIGHT HEAD (SL6791)	**680,00**

The compact Sea Dragon 3000SF Pro Dual Beam Photo-Video light. The larger COB LED delivers 3000 lumens in an even 120° wide beam. The light offers an impressive 90 CRI (color rendering index) with a proprietary COB LED array that replicates natural sunlight (A CRI of 100 would be just like natural sunlight). With a simple one-button push, the underwater photographer can switch from the wide 120° beam to a narrow 1500 lumen 15° spot beam. For imaging, the spot beam offers many creative opportunities such as to create a narrowly focused snoot or stage spotlight effect.

The narrow beam feature has a long effective range making it useful to see in dark areas and discover hiding fish. The Sea Dragon Pro Dual Beam also offers two 180 lumen 88° red LEDs. Red light won't affect your own eyes' night vision or scare-off light-sensitive sea creatures, a simple push on the feature button shifts the light from red to the wide beam at 3000 lumens. The diver is ready in an instant to capture still or video images.

The feature control button easily switches to the most popular functions: 3000 (Lumen) Flood > 1500 Flood > 750 Flood > 1500 Spot > 750 Spot > 180 RED Flood > Repeat

The Pro Dual Beam includes a Flex-Connect® Single camera tray, Flex-Connect® Grip, Sea Dragon EVA Travel case, adapter for GoPro® cameras, Li-ion battery, AC Charger, and international plug adapters. Light Head only: 35.300.006 Item SL6791; without case, grip & tray.

Part of the Sea Dragon's impressive performance is its powerful 25Wh 3400mAh Li-ion rechargeable battery pack, that runs the light for 60 minutes at full (3000 lumen) power.

POWERFUL 3000 LUMENS WITH AUTO BRIGHTNESS, FLASH DETECT AND NIGHT MODE
COB design delivers 3000 lumens over 120° smooth, even beam angle without a hot spot. Two red LED's emit a 88° wide beam that won't scare away nighttime sea creatures and preserves your eye's natural night vision. Brightness can be adjusted manually or automatically with its built-in photocell light sensor. The Auto Bright mode automatically adjusts from 300 to 3000 lumens to preserve your eye's natural night vision and extends battery life. Aim the light at your dive computer or other close-up objects and the light will automatically dim. Aim the light at far away objects for maximum brightness. When nearby flash fires, the Flash Detect feature turns the light off for 1 second for optimal image exposure control.

Includes powerful 3400 mAh Li-ion battery with protected circuitry for 60 minute run time at full power. One button operation for easy operation. Includes Flex-Connect grip and tray for mounting to any camera with standard ¼-20 tripod threads. Easy to expand with Flex-Connect™ system of trays, grip and Flex Arm.

35.300.002

- **Body material:** Anodised aluminum light head with fiber-reinforced polycarbonate body
- **Powerful 3000 lumens** featuring BridgeLux Gen 7 Vero COB LED Array
- **Auto Bright mode** adjusts from 300 to 3000 lumens.
- **Auto Flash Detect mode**. Light turns off for 1 second when detecting external flash. Flash detect can be turned on or off. Flash detect works in all 5 light modes
- **One button control for easy operation.** One button to power light on/off and select brightness
- **Five Light modes:** 3 white modes (Manually adjust to 100%, 50% or 25%), 1 white Auto (Automatically adjusts from 10% to 100%) and 1 Red light mode
- **60 minute burn time at full power** (120 min at half power or Auto, 240 min at quarter power
- **Constant brightness** - Regulated circuitry so light won't dim with battery power.
- **80 colour Rendering Index (CRI)** that mimics natural daylight.
- **Quick-release button** to detach light and aim in crevices and hard to reach areas

35.202.001	SEA DRAGON 2000F PHOTO-VIDEO DIVE LIGHT W/TRAY & GRIP (SL 677)	**405,00**
35.202.002	SEA DRAGON 2000F PHOTO-VIDEO DIVE LIGHT HEAD (SL6770)	**395,00**

The Sea Dragon 2000F UW photo-video-dive light delivers 2000 true lumens and a smooth, even 120° wide beam angle. This revolutionary COB LED array technology produces an 80 CRI (colour rendering index) that mimics natural daylight. Most other LED's have 70 CRI, missing wavelengths of the visible light spectrum. Uncover colourful reefs and hidden sea creatures with this 3-in-1 photo-video-dive light.

- Body material: Anodised aluminum light head with fiber-reinforced polycarbonate body
- Powerful 2000 lumen LED light. Latest COB LED array technology. True, lab-tested lumens and not "theoretical" lumens specified by most other manufacturers.
- One button control for easy operation. One button to power light on/off and select brightness
- Three brightness levels 100%, 50% and 25%
- Run time: 60 minutes at full power/120 min at half power/240 min at quarter power
- Hidden emergency signal mode. 1 sec blink interval and SOS Morse code (4 seconds to activate)
- Constant brightness - Regulated circuitry so light won't dim with battery power

SEA DRAGON MINI 1300S POWER KIT (SLKIT08)

Featuring 1300 lumens, the compact Sea Dragon Mini 1300S dive light offers users tremendous brightness and a narrow long-range beam. All light functions are easily accessible with one handed operation to cycle through five light modes.

The compact Sea Dragon Mini 1300S Dive Light will easily slip into your BCD pocket. A wrist lanyard with a BCD-clip is also included allowing divers to secure the light to their wrist or clipped on to their BCD D-ring. **The Sea Dragon Mini 1300S Power Kit includes an 18650 2600mAh battery and USB battery charger.**

The Mini 1300S light is constructed of an anodised aluminum machined body for maximum durability and corrosion resistance. The dual O-ring design ensures reliable waterproof seal down to depths of 330ft/100m. The light's power and mode button also features a battery charge level indicator, which illuminates from green, to amber, to red when batteries charge is depleted.

- 1300 lumens Using latest Luxeon V LED
- 8° ultra-narrow spot beam (6° underwater) for long range viewing and pointing out sea life
- One button operation: Long push (1 sec) to power on/off; Short push to cycle through 5 light modes
- Five light modes: Full power 1300 lumen, Half power 650 lumen, Quarter power 325 lu-men, Blinking (once per second at full power), SOS (blinking signal at full power)
- Depth tested to 330ft (100m)
- Battery options: Two CR123 lithium single-use batteries or one 18650 Li-Ion rechargeable battery (runtime up to 3.67 hours with a 18650 rechargeable Li-ion 2600mAh battery at quarter power)
- Coloured Battery indicator. Green = full, yellow = medium and red = low battery strength.
- Safety pressure release valve relieves internal pressure built-up caused by damaged battery.
- Depth tested to 100m

'Flex-Connect' is a range of Sealife Accessories. The trays, mounts and flex arms allow you to easily expand your camera set. Modular for travel and they quickly and easily lock into place.

Flex Arms extend lights with 100° of silent bending motion. Cold Shoe Mount and Micro Tray provide an incredibly compact set-up. Dual Tray enables you to connect multiple lights to your camera.

- Fiber-reinforced polycarbonate and marine grade stainless steel
- Clicks into place underwater or topside
- Disassembles with the push of a button

SCUBAPRO SWEATSHIRTS

new

MADE WITH RECYCLED POLYESTER.

Recycled polyester makes use of existing plastic.In many cases, those existing plastics are your old water bottles, which are then processed and transformed into products. By purchasing this product you have helped turn the tide - Over 8 million tons of plastic are dumped in our oceans every year – you have helped reclaim it and put our planet first.

SCUBAPRO has partnered with OCEANR.CO Designs for these Sweat Shirt creations.

SCUBAPRO NECK GAITER

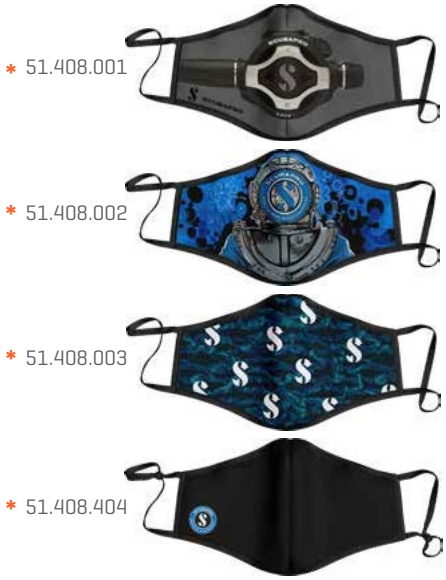

SCUBAPRO's custom **neck gaiter** not only looks great, it also provides UPF 50+ to help shield your skin from the sun's rays when on the beach or dive boat. And in keeping with SCUBAPRO's commitment to our oceans, this neck gaiter is made from 100% recycled polyester from reclaimed ocean waste. Soft and breathable and comfortable to wear, it is available in one size to fit most faces.

- Custom SCUBAPRO design
- UPF 50+ UV fabric blocks 98 percent of the sun's rays, significantly reducing potential skin damage.
- Made from 100% recycled polyester from reclaimed ocean waste to help save our oceans.
- One size fits almost all faces.
- Hand-washable and quick-drying.
- For hygiene reasons, this product cannot be returned once purchased.

SCUBAPRO 3-LAYER FACE COVERING

Cover yourself with this reusable **face covering** featuring a custom SCUBAPRO design. And in keeping with SCUBAPRO's commitment to our oceans, each face covering is made with recycled polyester from reclaimed ocean waste. Incorporating a three-layer design to maximize comfort and breathability, the outer layer is 100% recycled polyester which provides UPF 50+ and is water-repellent. The middle layer is made of 100% single jersey polyester, which is antibacterial and also water-repellent, and the inner layer is made of antibacterial 100% cotton. Adjustable ear bands keep it comfortably in place for both indoor and outdoor activities.

- Three-layer composition is made from recycled polyester from ocean waste.
- Custom SCUBAPRO design
- Hyper-resistant yet soft and breathable fabric
- Outer layer provides UPF 50+ plus is water-repellant.
- Middle polyester layer is both antibacterial and water-repellent.
- Antibacterial inner layer is made of 100% cotton.
- Adjustable ear bands enable a comfortable one-size-fit for most faces.
- Hand-washable and quick-drying.
- Not intended for medical use.
- For hygiene reasons, this product cannot be returned once purchased.
- Read product and usage information before use.

Can't be in the water every day? Follow @SCUBAPRO on social media for your daily dose of incredible underwater images.

For 60 years, SCUBAPRO has been committed to protecting the oceans. From manufacturing processes & materials to reusable packaging to sponsoring conservation efforts of our Deep Elite ambassadors, we at SCUBAPRO believe we have a strong responsibility to the very environments we love to explore.

We encourage new and seasoned divers to not just dive in, but to experience, discover and protect the oceans. And we lead by example.

SCUBAPRO cares
