

03/10/26

Notice of Immediate Price Adjustment Effective April 1st, 2026

Dear Valued Customer,

Due to recent market conditions, we are forced to implement a price increase for two reasons.

The **50% tariffs on copper**, combined with a **copper price increase of more than 30%**, have significantly impacted our material costs.

The price increase is for the following products, effective April 1, 2026:

- 18% on Bronze fittings
- 20% on Red brass nipple
- 20% on Brass gate valve and Check valve
- 7% on all other Brass Valve
- 15% on Copper Fittings

Orders placed for delivery before Wednesday, **April 1, 2026**, will be shipped at current pricing.

Charman reserves the right to cancel and/or adjust pricing on backorders to reflect the new list prices.

We are not increasing our prices related to the steel tariff for your territory.

Therefore, there is no increase in malleable fittings, pipe nipples, and related steel products at this time.

Charman remains committed to providing you with the highest quality products, reliable service, and competitive pricing.

Thank you for your continued support of Charman.

Sincerely,
Charman Sales Team
