CRANES & LIFTS

SCISSOR LIFTS

GENIE GS1930

The Genie® GS™-1930 slab scissor lifts are easy to maneuver in tight spaces, boast quiet electric operation and are ideal for indoor and outdoor applications on firm, level surfaces. Available with Genie® AC E-Drive or hydraulicdrive configuration.

Specification	Value
Max Working Height	25 ft 7.79 m
Capacity	500 lb 227 kg
Machine Width	2 ft 6 in 0.76 m
Machine Length	6 ft 1.83 m
Weight	3,209 lb 1,456 kg

SCISSOR LIFTS

JLG 1932SR

The 1932R is one the lightest 19-ft indoor-only scissor lifts. Featuring active pothole protection providing increased ground clearance, fewer parts and an improved battery charger for greater serviceability. All-steel platform, component doors and thicker rubber tires for added durability.

Specification	Value
Platform Height	19 ft
Machine Width	2.7 ft
Working Height	25.6 ft

CRANES & LIFTS

GENIE GS2632

SCISSOR LIFTS

The quiet, electrically-powered Genie® GS™-2632 slab scissor lifts are excellent for indoor and outdoor construction, maintenance and installation applications on firm, level surfaces. Available with Genie® AC E-Drive or hydraulic drive configuration.

Specification	Value
Max Working Height	32 ft 1 in 9.80 m
Capacity	500 lb 227 kg
Machine Width	2 ft 8 in 0.81 m
Machine Length	8 ft 2.44 m
Weight	4,413 lb 2,002 kg

GENIE GS2669RT

SCISSOR LIFTS

The Genie® GS™-2669 RT rough terrain scissor lift is a tough, construction-oriented four-wheel drive machine with positive traction control, which can increase operator productivity on demanding outdoor worksites.

Specification	Value
Max Working Height	32 ft
Capacity	1,500 lb
Machine Width	5 ft 9 in
Machine Length	10 ft 3 in
Weight	7,295 lb

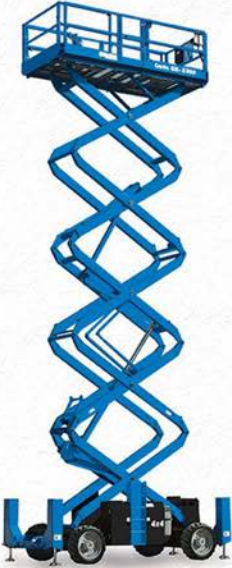

CRANES & LIFTS

SCISSOR LIFTS

GENIE GS3390

Genie® GS™-3390 rough terrain scissor lifts offer tough, construction-oriented four-wheel drive capability with positive traction control — ideal for increasing productivity in narrow, rough terrain applications.

Specification	Value
Max Working Height	39 ft
Capacity	2,500 lb
Machine Width	7 ft 8 in
Machine Length	12 ft 11.25 in
Weight	11,977 lb

BOOM LIFTS

GENIE S40

Able to perform a wider range of heavier lift tasks on construction and industrial jobsites with Genie® S®-40 XC™ telescopic booms — offering a dual lift capacity of 660-lb (300 kg) unrestricted and 1,000-lb (454 kg) restricted and up to three people on board.

Specification	Value
Max Working Height	46 ft
Max Horizontal Reach	31 ft 8 in
Below Ground Reach	1 ft
Platform Capacity Unrestricted	660 lb
Platform Capacity Restricted	1,000 lb
Machine Width and Length	8 ft 2 in, 31 ft 1 in

CRANES & LIFTS

GENIE S45

BOOM LIFTS

Perform a wider range of heavier lift tasks on construction and industrial jobsites with Genie® S-45 XC telescopic booms — offering a dual lift capacity of 660-lb unrestricted and 1,000-lb restricted and up to three people on board.

Specification	Value
Max Working Height	51 ft
Max Horizontal Reach	36 ft 2 in
Below Ground Reach	4 ft 2 in
Platform Capacity Unrestricted	660 lb Unrestricted
Platform Capacity Restricted	1,000 lb
Machine Width and Length	8 ft 2 in, 31 ft 1 in

GENIE Z45

BOOM LIFTS

The Genie® Z®-45 XC™ articulating boom is the redesigned Xtra Capacity™ version of the popular rough-terrain Genie Z-45/25 J RT diesel powered articulating boom. It's the first Genie XC articulating boom model, boasting the benefits of a dual-envelope design to provide an unrestricted platform capacity of 660 lb and a restricted capacity of 1,000 lb.

Specification	Value
Max Working Height	51 ft 6 in
Max Horizontal Reach	24 ft 9 in
Max Up and Over Clearance	24 ft 5 in
Platform Capacity Unrestricted	660 lb Unrestricted
Platform Capacity Restricted	1,000 lb Restricted

CRANES & LIFTS

BOOM LIFTS

GENIE S60

Able to perform a wider range of heavier lift tasks on construction and industrial jobsites with Genie® S®-60 XC™ telescopic booms — offering a dual lift capacity of 660-lb unrestricted and 1,000-lb restricted and up to three people on board.

Specification	Value
Max Working Height	66 ft
Max Horizontal Reach	50 ft 10 in
Below Ground Reach	5 ft 7 in
Platform Capacity Unrestricted	660 lb Unrestricted
Platform Capacity Restricted	1,000 lb Restricted
Machine Width and Length	8 ft 2 in, 31 ft 11 in

BOOM LIFTS

GENIE S65

Able to perform a wider range of heavier lift tasks on construction and industrial jobsites with Genie® S®-65 XC™ telescopic booms — offering a dual lift capacity of 660-lb unrestricted and 1,000-lb restricted and up to three people on board.

Specification	Value
Max Working Height	71 ft
Max Horizontal Reach	54 ft 2 in
Below Ground Reach	5 ft 7 in
Platform Capacity Unrestricted	660 lb Unrestricted
Platform Capacity Restricted	1,000 lb Restricted
Machine Width and Length	8 ft 2 in, 31 ft 11 in

CRANES & LIFTS

GENIE S80

BOOM LIFTS

Genie® S®-80 XC™ and S®-85 XC telescopic booms offer a dual lift capacity of 660-lb unrestricted and 1,000-lb restricted to perform a wider range of heavier lift tasks on construction and industrial job-sites.

Specification	Value
Max Working Height	86 ft
Max Horizontal Reach	68 ft 6 in
Below Ground Reach	5 ft 6 in
Platform Capacity Unrestricted	660 lb
Platform Capacity Restricted	1,000 lb
Machine Width and Length	8ft 2 in, 37 ft 7 in

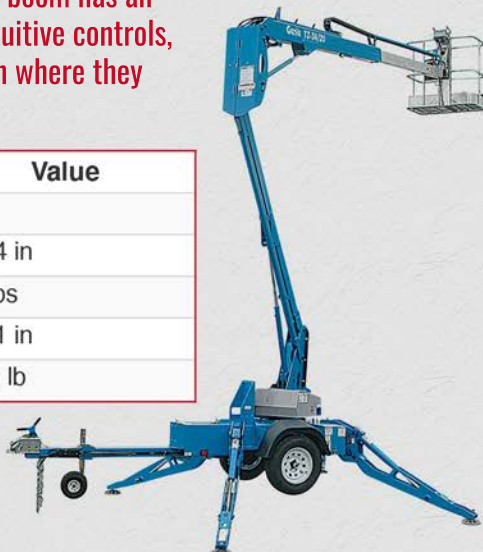

GENIE TZ-34

BOOM LIFTS

The Genie® TZ™-34 trailer-mounted boom has an outstanding working envelope and intuitive controls, allowing operators to efficiently reach where they need to be.

Specification	Value
Max Working Height	40 ft
Horizontal Reach	18 ft 4 in
Platform Capacity	500 lbs
Up and Over Clearance	16 ft 1 in
Weight	3,155 lb

CRANES & LIFTS

BOOM LIFTS

GENIE TZ-55

For the ultimate in reach and range, the Genie® TZ™-55 trailer mounted boom offers outstanding up, out and over capabilities in a compact, lightweight package that is easy to maneuver in congested work areas.

Specification	Value
Max Working Height	55 ft 6 in 17.09 m
Horizontal Reach	29 ft 2 in 8.89 m
Platform Capacity	500 lbs 227 kg
Up and Over Clearance	22 ft 6.71 m
Weight	4,400 lb 1,996 kg

BOOM LIFTS

NIFTYLIFT SD50

The SD50 allows the user to maneuver, set up and operate the work platform without leaving the platform, especially on uneven surfaces. Rough terrain tires and 4WD as standard allow the SD50 work platform to maneuver easily over a wide range of site conditions.

Specification	Value
Max Working Height	56 ft
Horizontal Reach	28 ft 6 in
Platform Capacity	500 lbs
Weight	5,950 lb

Articulated & Telescopic Lift with a Working Height of 62 Ft (19 m)

Platform Height 56 Ft, Side outreach (ft / lb)

32' / 176 -- 28' / 310 -- 23' / 510

The IM R Series is an easy to operate, compact and light-weight solution for maximum clearance and versatility. The reduced size of the units and portable remote controls ensure maneuverability in tight spaces while providing added operator safety. In addition, track-driven capabilities offer maximum versatility for both outdoor and indoor applications.

Standard Equipment:

- Automatic outrigger leveling system
- 360° rotation (not continuous)
- Emergency hand pump
- Cylinder holding valve
- Hour meter
- Load and tip detection sensor
- Load cell
- Hydraulic jib
- Rubber tracks
- Electric motor for indoor use
- Air / Water outlet in the platform basket
- AC power to platform
- Removable wired control box
- Three travel speeds
- Wired control
- Remote battery charger
- Removable basket with 1 pin detach
- Overload sensor
- 120V battery charger
- Proportional controls with diagnostics
- GX390 Honda Engine
- Hydraulically adjustable track width
- 12 V emergency pump
- Oversized 14" outrigger pads
- Wireless radio remote control box

MINI DUMPERS

WACKER NEUSON DT08

Wacker Neuson's DT08 track dumper with its compact dimension and precision control can be maneuvered with pin-point accuracy along any surface. Its 1,764 lb. payload and width of only 31 in. make the DT08 ideal for rental applications. Powered by a Honda gasoline engine and comes with a front tip skip.

Specification	Value
Operating Data	
Payload max.	1,764 lb
Skip capacity level	88 US gal
Skip capacity heaped*	102 US gal
L x W x H *	65 x 31 x 47 in
Engine / Motor	
Engine / Motor type	Honda Gasoline
Engine performance	9 hp
at rpm	3,600 rpm
Gradeability	36%

MINI DUMPERS

KATO IC37 CRAWLER CARRIER

Easy to Operate, Maintain, Safe & Rugged. Class-leading payload of 8,185 lbs. Dynamic spin-turn capability with independent travel system. Instrument panel concentrated on right side of seat. Fully opening engine cover. Ample maintenance around pump. Battery positioned for easy access. Sturdy box-type frame and durable rollers. Low center of gravity construction for outstanding durability. Inclination indicator for added safety. Thick Rubber Crawler

Transport Weight	6,415 lbs.
Payload	8,185 lbs.
Ground Pressure (Empty/Loaded)	3.7 psi/ 8.64 psi
Travel Speed (Low/High)	3.9/6.2
Gradeability Dimensions (L x W x H)	12'6" x 6'2" x 7'9"

EXCAVATION

KUBOTA K008-3

EXCAVATORS

The K008-3 is sure to impress with it's impressive maneuverability, surprising performance and unbelievable efficiency. Whether you're digging out a pool or loading and moving material, the K008-3 will make sure you have the tools to get your job done efficiently and safely.

Specification	Value
Gross Power	10.3 hp
Operating Weight	2,200 lbs
Overall Length	9 ft
Overall Height	7 ft 4 in
Crawler Length	4 in

KUBOTA KX71-3

EXCAVATORS

An optional spacious, comfortable cab and 24.4 HP are just the tip of the iceberg on what the KX71-3 does well. You'll never struggle to break ground again and you can't beat the responsive controls and maneuverability of the KX71-3 compact excavator.

Specification	Value
Gross Power	24.4
Operating Weight	6,305 - 6,550 lbs
Overall Length	14 ft 11 in
Overall Height	8 ft
Crawler Length	6 ft 6 in

KUBOTA KX033-4

EXCAVATORS

Dig comfortably, with a spacious cab, and make sure that you can get the job done the right way, every time. Once you sit down behind the control of the KX033-4, you'll never want to step away.

Specification	Value
Gross Power	24.8 hp
Overall Length	15 ft 6 in
Overall Height	8 ft 1 in
Crawler Length	6 ft 10.6 in

EXCAVATION

EXCAVATORS

HYUNDAI R35Z-9A

Hyundai 9A series compact excavators bring big power to small spaces. Each model features a Tier 4 Final engine that provides impressive performance and reduced fuel consumption. You'll appreciate the hefty power, durability and reliability of these compact machines, along with their ability to work productively in confined spaces.

NET POWER	23.7 hp (17.7 kW) at 2,200 rpm
OPERATING WEIGHT	3,840 kg (8,470 lbs)
BUCKET RANGE	0.11 m3 (0.14 yd3)
SWING SPEED	9.5 rpm
TRAVEL SPEED (MPH)	4.2 km/hr (2.6 mph)
MAX. DIGGING DEPTH (FT/IN)	3,135 mm (10 ft 3 in)
MAX. DIGGING REACH	5,315 mm (17 ft 5 in)
TAIL SWING RADIUS (FT/IN)	870 mm (2 ft 10 in)

EXCAVATORS

HITACHI ZX60-5

We've taken the ZX60USB-5 to a whole new level by adding real-world practical improvements. You get a more spacious cab with wider, easier entry and better visibility; a fuel-efficient and reliable engine that meets emission standards; and maintenance that's easier than ever thanks to enhancements such as improved access to coolers. The ZX60USB-5 delivers efficiency, reliability and durability to your operation.

Specification	Value
Net Power	53 hp
Operating Weight	13,547 lb
Max Dig Reach	20 ft 5 in
Max Dig Depth	12 ft 4 in

EXCAVATION

VOLVO EC60E

EXCAVATORS

Work in comfort all day, every day and get more done. The new and improved EC60E Excavator features a larger cab design for a comfortable and more productive operator environment.

Specification	Value
Engine	Volvo D2.6H
Gross Power	59 hp
Net Power	57 hp
Operating Weight	12,700-15,440 lbs
Bucket Capacity	0.09 - 0.35 yd³
Boom Swing Angle	70 / 60 degree

SANY SY75C

EXCAVATORS

Built tough with reinforced boom, arm, swing platform and undercarriage, the SY75C boasts an efficient and reliable Isuzu T4F engine. Featuring joystick controls and a bi-directional auxiliary hydraulic system, this compact excavator proves you don't have to trade size for performance. The comfortable cockpit features heating and AC for all-day operation in any climate.

Specification	Value
Engine Power	Isuzu 57.7 hp
Operating Weight	16,050 lbs
Dig Depth	14ft 7in
Transport Length	20ft 1in

EXCAVATION

EXCAVATORS

VOLVO ECR88D

Whether you're working in road construction, utilities, landscaping or any other application, the ECR88D mini digger from Volvo will give you access to more jobsites, allowing you to work closer to obstacles, safely. With a heavy counterweight and strong undercarriage, this machine delivers superior stability.

Specification	Value
Engine	Volvo D2.6H
Gross Power	55 hp
Net Power	58 hp
Operating Weight	18,959 -20,944 lbs
Bucket Capacity	0.1 - 0.44 yd ³

EXCAVATORS

HYUNDAI HX130LCRD

Hyundai construction equipment is precision designed with trusted and proven components and systems from leading OEM's. The HX130LCR is designed to be rugged and reliable for longer up time, reduced operating cost and improved productivity.

Specification	Value
Engine Power	Perkins 71 hp
Operating Weight	29,750 lbs
Dig Depth	18ft 4in
Transport Length	22ft 6in

EXCAVATION

VOLVO EC140EL

EXCAVATORS

The Volvo EC140EL Excavator has been designed to deliver every function with superior efficiency. This machine maximizes uptime and incorporates the latest fuel efficiency technology to reduce emissions and consumption, while increasing productivity.

Specification	Value
Gross Power	121 hp
Operating Weight	28,880 - 35,620 lbs
Bucket Capacity	0.33 - 1.01 yd ³
Lifting Capacity	8,200 lbs
Max Digging Reach	27 ft 5 in
Max Digging Depth	18 ft 3 in
Tail Swing Radius	7 ft 3 in

HYUNDAI HX140A L

EXCAVATORS

Powered by a Cummins F3.8 Stage 5/Tier 4 Final diesel engine, the HX140A L complies with the international Stage 5 emissions control standard. New features like visibility and handle improvement, automatic engine shutdown, auto safety lock, enhanced cabin visibility, and eco gauge lifting mode can help improve productivity on hard to handle jobs.

Net Power	131 HP
Operating Weight	33,580 lbs
Bucket Range	36"
Swing Speed	11.4 rpm
Travel Speed	2mph / 3.4 mph
Max Digging Depth	19 ft 9 in
Max Digging Reach	28 ft 10 in
Tail Swing Radius	7 ft 8 in

EXCAVATION

EXCAVATORS

HYUNDAI 160AL

The HX160A L is designed to be economically rugged and reliable for longer up time, reduced operating cost and improved productivity. Through a combination of innovative hydraulic system enhancements, Hyundai A-Series HX excavators achieve faster cycle speeds than previous models, which increases productivity.

Net Power	152 HP
Operating Weight	39,010 lbs
Bucket Range	36"
Swing Speed	10.3 rpm
Travel Speed	1.9mph / 3.4mph
Max Digging Depth	19 ft 9 in
Max Digging Reach	29ft 7in
Tail Swing Radius	8ft 2in

EXCAVATORS

HYUNDAI 210AL

The HX210AL - part of Hyundai's A-series - is powered by a robust Stage V-certified Cummins engine with an innovative integrated after-treatment system that reduces both emissions and maintenance requirements. It delivers all the power you need to handle demanding jobs, along with low maintenance and excellent fuel economy.

Net Power	170 HP
Operating Weight	50,460lbs
Bucket Range	42"
Swing Speed	12 rpm
Travel Speed	3.41mph / 2.23mph
Max Digging Depth	21ft 9in
Max Digging Reach	32ft 2in
Tail Swing Radius	9ft 4in

EXCAVATION

SANY SY215C

EXCAVATORS

Find the power and durability you need in your excavator when you choose SANY's SY215C. Powered by a Cummins Diesel engine, the SY215C features fuel-efficient technology that can save as much as 10% on your fuel costs. SANY's optimized positive flow hydraulic system improves operating efficiency by as much as 5%.

Specification	Value
Engine Power	Cummins 163.6 hp
Operating Weight	51,919 lbs
Dig Depth	21ft 8in
Transport Length	31ft 11in

JOHN DEERE 650-J LGP

DOZERS

Reliable controls command the full-featured hydrostatic drivetrain and six-way blade, ensuring predictable response at all times, in all conditions. Fully modulated drivetrain ensures smooth starts and direction changes — virtually eliminating jerky and abrupt movements. With optional Integrated Grade Control (IGC), your 650J Dozer arrives from the factory completely ready.

Specification	Value
Net Power	99 hp
Track On Ground	87 - 92 in
Operating Weight	18,560 - 19,750 lbs
Blade Width Range	105 - 124 in

EXCAVATION

DOZERS

JOHN DEERE 550-J LT

Reliable controls command the full-featured hydrostatic drivetrain and six-way blade, ensuring predictable response at all times, in all conditions. Fully modulated drivetrain ensures smooth starts and direction changes — virtually eliminating jerky and abrupt movements. Blade ratio and center of gravity are optimized, giving this dozer the balance needed for superior grade work.

Specification	Value
Net Power	80 hp
Track On Ground	7.17 ft
Operating Weight	17,013.1 lbs
Cutting Depth	21 in

EXCAVATION

CASE SV280

SKID STEERS

The SV280 is one of our strongest, medium-frame skid steers rentals. With best-in-class torque, bucket breakout and hydraulic flow, and CASE Power-Stance, it has the strength you need. But it also offers the user-friendly features you want. Best-in-class visibility makes it easy to see. A vertical lifting path provides maximum reach at full height. A maintenance-free Tier 4 Final emissions solution makes it easy to meet regulations. EZ-EH controls, Ride Control™ and other functions make it easy to quickly adapt to any task.

Operating Load Rating	2,800 lbs
Operating Width	69.6 in
Ground Clearance	7.9 in
Length w/ Bucket	11.9 ft
Gross Power	68 hp

KUBOTA SVL65

SKID STEERS

Don't just finish the job. Dominate it behind the controls of the Kubota SVL65-2. Whether hardscaping or landscaping, you'll experience nimble maneuverability, power and comfort in the orange track loader. Advanced hydraulics and 68.3 horsepower ensure you won't have to back down from a challenge and the SVL65-2 loves a good challenge.

Engine HP	68.3 HP
Breakout Force Bucket/Lift Arm	2,100lbs / 3,000lbs
Traction Force	8,408lbs
Reach	34.9in
Hinge Pin Height	118.5in

EXCAVATION

SKID STEERS

VERMEER S725TX

Compact size and choice of track widths make the S725TX mini skid steer loaders ideal for earth-moving contractors, landscapers and tree care professionals. A conveniently placed auxiliary lever by the loader arm controls, allows operators to multitask. Single joystick ground drive control offers a smooth range of motion with minimal operator effort. The handgrip enables the operator to maintain a secure grip while providing good joystick control.

Specification	Value
Gross Power	24.8 hp
Max Inclination Angle	30 deg
Tipping Capacity (with 175 lb operator)	2,145 lbs

SKID STEERS

TORO DINGO TX1000 WIDE TRACK

Designed with vertical lift loader arms, its 1,000-lb. rated operating capacity delivers category-crushing performance that's an industry game-changer. The Dingo TX 1000 also offers increased reach at full height for maximum jobsite productivity. And speaking of productivity, an 81" (206 cm) hinge pin height allows the arms to clear the side of a 30-yard dumpster or one-ton truck. This lightweight, maneuverable machine packs unmatched strength and reach in a compact package for the ultimate working advantage.

Dump Angle	40°
Dump Height	61 in
Max Operating Height	105 in
Overall Width	41 in
Reach Fully Raised	24.5 in
Tip Capacity	3,071lbs
Weight	2,790lbs

EXCAVATION

CASE TR310

SKID STEERS

The TR310 is the most powerful and efficient medium-frame compact track loader in our lineup. The TR310 offers best-in-class power thanks to larger lift cylinders as well as a maintenance-free Tier 4 Final emissions solution. It's also designed with wider tracks to improve stability and lower ground pressure down to an impressive 5.0 psi . More strength and stability – just what operators have been asking for.

Specification	Value
Gross Power	74 hp
Tipping Load	6,195 lbs
Operating Weight	8,878 lbs

SHERPA 100 ECO

SKID STEERS

The SHERPA 100 Eco has similar strength as the SHERPA mini-loaders with a combustion engine and is particularly suitable for indoor demolition work and work in stables. The 76-cm wide mini compact loader is powered by a surprisingly strong 2-HP front-mounted electric motor. Pressing the accelerator quickly builds up the pressure in the system. The space that normally contains the combustion engine now stores a 360-Ampere battery pack that powers the mini skid-steer for up to 7 hours.

Specification	Value
Capacity	2 hp
Tipping Load: Pallet Forks with Weight Low	771 lbs
Tipping Load: Pallet Forks with Weight High	486 lbs
Tipping Load: Bucket With Weight Low	770 lbs
Tipping Load: Bucket With Weight High	484 lbs

EXCAVATION

TRENCHERS

VERMEER RTX250

The RTX250 features a 25-hp electronic fuel-injected (EFI) engine, digging depth capacity of 48 in, maximum digging width of 8 in and a slender profile which allows the unit to move through narrow yard gates. Even when facing varied terrain and unfavorable ground conditions, the RTX250's high-mount track design offers outstanding traction and minimizes ground disturbance. Rubber tracks offer outstanding traction in soft, rocky or muddy conditions with minimal ground disturbance.

Specification	Value
Gross Power	25 hp
Max Operating Angle	25 deg
Weight	1,550 lbs
Fuel Type	Gas

LOADERS & BACKHOES

VOLVO L60G

Handle your workload with Volvo's L60G versatile wheel loaders that get the job done. Volvo's unique TP linkage delivers the benefits of two machines in one thanks to high breakout torque and parallel movement through the entire lifting range. Change attachments quickly with the attachment bracket for unbeatable flexibility on site.

Specification	Value
Gross Power	154 hp
Length with Bucket	24 ft
Wheelbase	9.8 ft
Operating Weight	26,020 lbs
Turning Radius	17.5 ft
Dump Time	2.9 sec

EXCAVATION

VERMEER ATX720

LOADERS & BACKHOES

The Vermeer ATX720 compact articulated loader is designed with a combination of power, speed and agility. With a telescopic boom, heavy lifting capabilities and integrated backweights, this machine was built for a variety of jobs. The telescopic boom on the ATX720 extends 29.1 in for loading materials to a dump height of 114 in. in hinge pin height. The telescopic boom aids in dumping material over the back of a retaining wall or grabbing material over an obstruction.

Specification	Value
Gross Power	25 hp
Ground Clearance	8.3 in
Operating Capacity (Straight)	2,155 lbs
Operating Capacity (Articulated)	1,658 lbs
Tipping Capacity (Straight)	2,694 lbs
Tipping Capacity (Articulated)	2,072 lbs

KUBOTA B26

LOADERS & BACKHOES

From landscaping to construction, experience maximum versatility in Kubota's B26TLB utility tractor. Loaded with a 24.3 HP Kubota diesel engine, standard 4WD and sloped loader arms and hood designed for improved visibility on the work site, the B26 takes productivity to the next level.

Specification	Value
Gross Power	24.3 hp
Loader Lift Capacity	1,301 lbs
PTO	Standard: 19.5 hp, Rear: 540 rpm
3-Point Linkage Type	1,676

LANDSCAPING

VERMEER BC700XL

WOOD CHIPPERS

Vermeer continues to respond to the demands of the landscape and tree care professionals with the BC700XL brush chipper. The smallest machine in the Vermeer brush chipper line, the BC700XL design is based on operator feedback and focuses on productivity advantage and ease of use. The brush chipper features a centrifugal clutch system, 25 hp Kohler EFI engine, bottom feed stop bar and Vermeer-exclusive SmartFeed feed-sensing control system.

Specification	Value
Weight	1,800 lbs
Fuel Type	Gasoline
Gross Power	25 hp
Feed Roller Dimension	10 in
Feed Speed	49.4 ft per min
Material Capacity	6 in

VERMEER BC1000XL

WOOD CHIPPERS

Complete with an 89-hp GM 3.0L gas engine, the chipper is powered by a dependable electronic fuel injection (EFI) system. The BC1000XL also features a direct electronic pressure regulator that allows for greater control of fuel delivery, fuel economy and optimum combustion. This chipper comes standard with the Vermeer patented Ecolde™ engine control system and patented SmartFeed technology and has a 12-in (30.5-cm) cutting capacity.

WOOD CHIPPERS

VERMEER BC1500

The Vermeer BC1500 brush chipper uses a precision-balanced 22.5-in drum with two 5-in x 8-in A8 double-sided knives to chip through material up to 15 in. Powered by a Tier 4 Final Cummins diesel engine and a PSI 5.7L gas engine, the BC1500 can handle the toughest of material with ease. Improve productivity with the SmartFeed system, which monitors engine rpm and senses jams, automatically stopping or reversing the rollers as needed.

ROLL-OFF & DUMP TRUCKS

DUMP TRUCKS

INTERNATIONAL DURASTAR 4400

If you've got a job to do, International® DuraStar® will help you get it done. That's because in the world of medium-duty trucks, DuraStar® is the one truck that has always delivered. It goes beyond efficiency, durability, and driver satisfaction. DuraStar® also has a well-earned reputation for adaptability, an ability to handle just about any task. And now with the addition of the Cummins ISB6.7 engine, the DuraStar® is available with the broadest portfolio of diesel engines in the medium-duty market.

Specification	Value
Engine Power	220 hp Cummins
GVW	32,000 lbs
Brake System	Air Brakes
Transmission	Automatic
Type	CDL Class B
Additional Features	Asphalt Chutes

STAGING

STAGING

The MetalTech Saferstack 5 ft. x 5 ft. Blue Standard Mason Scaffold Frame (1.625 in. O.D. tube size) is ideal for any commercial or residential construction project. Constructed with a textured, anti-slip powder-coat finish, this weather-resistant frame offers lasting durability to withstand tough jobsite conditions.

5" STAGING FRAME

STAGING

Easily access light fixtures and hard-to-reach places on a construction project with the PRO-SERIES 6 ft. Multi-Use Drywall Baker Scaffolding. Featuring steel construction with a powder-coated finish for extra protection and weather resistance, it moves from room to room with four 5 in. swivel locking casters, ideal for painting, patching, wallpapering and hanging drywall

BAKER STYLE STAGING

STAGING

This Metaltech 5ft.W x 7ft.D Scaffold Guardrail System is designed for safety and security on exterior scaffolding structures. It features a convenient wedge clamp on a support that's easy to install by locking onto the attached scaffold frame. Meets OSHA standards.

SAFETY RAILS

STAGING

Werner's 7 ft. Plywood Decked Aluma-Plank is designed for use with steel scaffolds to allow users to work safely from side to side. Built to last, the platform is made for 1-person use and features a duty rating of 250 lbs. A generous 19 in. width provides ample, comfortable standing space for a variety of jobs.

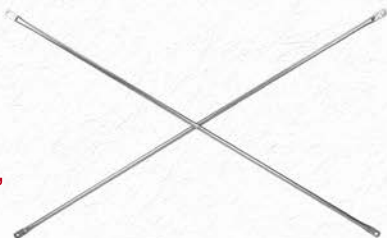

7 FT PLANK

STAGING

CROSS BRACE

STAGING

The Cross Brace is used for both standard and arched (walk-through) scaffolding towers to reach their full load capacity. Designed to help prevent stacked frames from sliding, Saferstack frames interlock for safer storage and transport, creating a secure scaffolding system.

CASTERS

STAGING

A scaffolding can support heavy loads but requires a solid foundation. When the scaffolding is assembled on concrete floor, wheels or base plates are recommended. If the scaffolding is assembled along an external wall, adjustable leveling jacks nailed on beams are advised.

LEVELING JACKS

STAGING

A heavy-duty, welded-on base plate ensures lasting durability, while a super tough wing nut screw enables easy adjustment. The jack offers an adjustment range of over 18 in. with standard or arched frames for versatile use.

SIDE ARMS

STAGING

Side Brackets are ideal for extending the working area on the outside of the scaffolding when used with a 19 in. wide scaffold platform. This is particularly useful for applications when working alongside a building or structure.

COMPACTION

MULTIQUIP MVC82VHW

PLATE COMPACTOR

Reliable engine with Honda GX160 offering easy start-up and low oil shutdown for durability. Cyclonic pre-cleaner captures most airborne contaminants for engine protection and extended service life. Anti-vibration handle dramatically reduces operator fatigue and increases productivity. Solid, high-strength steel base plate for durability. Tubular steel roll bar protects engine components and provides central lifting point. Sealed belt cover keeps dirt and rocks out extending belt life. Open base plate design makes for easier removal of dirt and rock build-up.

Specification	Value
Centrifugal Force	3080 lbf
Exciter Speed	5,600 VPM
Plate Size	17.7 x 22.4 in
Overall Length	36 in
Operating Weight	181 lbs

MULTIQUIP MVC90H

PLATE COMPACTOR

The MVC90 boasts more standard features than any other one-way compactor. Its rugged design ensures years of productive service. Engine oil alarm, strong vibrator assembly. Heavy-duty steel base plate-closed design, ribbed for extra strength. Fitted with a 19.75 x 22 inch plate. Durable steel water distribution system, reversible shock mounted handle. Tubular steel roll bar cage protects engine components and provides a lifting point.

Specification	Value
Centrifugal Force	3,420 lbf
Exciter Speed	5,800 VPM
Plate Size	19.7 x 22 in
Overall Length	23 in
Operating Weight	194 lbs

COMPACTION

PLATE COMPACTOR

MULTIQUIP MVB85H

The machines' hard rubber rollers make it virtually impossible to chip corners, scartch, break or drag pavers. Great for narrow areas and exerting compaction pressure alongside walls. Toolles foldable handle allows for quick and easy loading into vans and trucks. Rollers allow for easy pull back to compact on the spot.

Specification	Value
Centrifugal Force	2,270 lbf
Exciter Speed	5,600 VPM
Plate Size	12.6 x 17.05 in
Overall Length	35.04 in
Operating Weight	198 lbs

PLATE COMPACTOR

WACKER NEUSON BPU4045

High compaction force combined with fast forward and reverse travel achieves great productivity. It is an all around versatile plate for all job sites that place high demands on the machine's performance potential. It is perfectly suited for the compaction of building back-fill, and of frost and sub bases when constructing roads, paths and parking lots. The 69 Hz frequency makes the BPU4045 suitable for all purposes and compacts even medium weight interlocking paving stone reliably.

Specification	Value
Centrifugal Force	8,992 lbf
Frequency	69 Hz
Plate Size	17.7 x 35.4 in
Operating Weight	710 lbs

COMPACTION

HUSQVARNA LG 400

PLATE COMPACTOR

LG 400 is a powerful, reliable reversible plate compactor, developed for efficient compaction of deep and medium-deep granular soil. It makes an effective alternative/ complement to rollers when compacting in confined areas. It is equipped with a Honda GX390 petrol engine and features an ergonomic, service-friendly design.

Output Power	11 HP
Plate Width	25.59 in
Weight	877 lbs
Power Source	Gas
Centrifugal Force	52,000 N

MULTIQUIP MTX60HD

RAMMER COMPACTOR

Honda GX100 Engine, 3,060 lb impact force, 10.4 in shoe. For applications requiring even greater productivity, Multiquip's Mikasa MTX60HD 4-cycle rammer is the answer. Now with a redesigned fuel-tank that meets new EPA standards and features an integrated tachometer/hour meter.

Specification	Value
Impact Force	3,060 dbf
Shoe Size	10.4 x 13.4 in
Overall Length	28.1 in
Operating Weight	141 lbs

COMPACTION

RIDE-ON COMPACTOR

BOMAG BW120

The Bomag BW120 is ideal for asphalt compaction and contains BOMAP: the new, self-explanatory, mobile solution that allows you to document your work results right on site in real time. This compactor features an integrated storage compartment, hydrostatic travel and vibration drive, 2 scrapers per drum, pressure sprinkler system with interval switch, multi function travel lever, multi-function display, emergency STOP, intelligent Vibration Control, vandalism protection, 12V socket, a back up alarm, and a lockable engine hood.

Specification	Value
Engine Power	33 hp
Vibration Frequency	63 Hz
Operating Weight	5,953 lbs
Drum WIDTH	47.2 in

RIDE-ON COMPACTOR

VOLVO SD25D

Volvo SD25 soil compactor is available in smooth drum or padfoot drum configuration. Smooth-drum SD25D has an operating weight of 5,650 pounds, and the drum diameter is 31 inches with a width of 42 inches. Drum weighs 2,850 pounds and delivers centrifugal force of 14,020 pounds with amplitude of 0.062 inches at 2,200 vibrations per minute.

Specification	Value
Vibration Frequency	36.7 Hz
Operating Weight	5,648 lbs
Drum Width	41.3 in

COMPACTION

VOLVO SD45D

← RIDE-ON COMPACTOR

The new turbo charged 4-cylinder engine in the SD45D increased power from 80 hp to 84.5 hp for superior performance. The new engine installations ensured that these compactors continued to be environmentally friendly. Boasting a 54 in rolling width ideal for small applications such as residential and commercial construction. Excellent gradeability and traction are achieved through a full-time traction control system driving both the drum and rear axle.

Specification	Value
Engine	Kubota V2203-M
Vibration Frequency	32 Hz
Operating Weight	10,225 lbs
Drum Width	54 in

BOMAG BW177D-5

← RIDE-ON COMPACTOR

For medium scale compaction tasks. D-version for compacting non-cohesive soils as well as hydraulically bonded materials. The D-series models are suited to compacting non-cohesive soils (sand, gravel, rubble), weakly cohesive soils and hydraulically bound materials. The PD-models are primarily used on strongly cohesive soils with a high water content.

Specification	Value
Engine	Deutz TD 2.9 L04
Vibration Frequency	29/32 Hz
Operating Weight	17,196 lbs
Working Width	66.5 in

COMPACTION

RIDE-ON COMPACTOR

CAT CP-536C

Tandem Propel Pumps for constant, equalized flow to rear wheel and drum drive motors. Patented Eccentric Weight System simplifies changing amplitude and improves vibratory system reliability. Dual Amplitude broadens application range. Variable Frequency is independent of engine rpm so engine works at full power at all times.

Specification	Value
Engine Power	145 hp
Vibration Frequency	23.3 Hz/1400 vpm
Operating Weight	24,500 lbs
Drum Width	84 in

RIDE-ON COMPACTOR

DYNAPAC CC900

The Dynapac CC900 is a member of the small asphalt roller family. With a drum width of 900 mm it's primarily used for small-scale compaction work such as pavements, cycle paths, small roads and small parking areas. The large drum diameter and drive motors connected in series contributes to excellent accessibility and hill-climbing capacity. Propulsion and vibration naturally come as standard on both drums.

Specification	Value
Vibration Frequency	4,200 vpm
Operating Weight	3,500 lbs
Centrifugal Force	3,800 lbs

COMPACTION

HUSQVARNA LP 9505

WALK-BEHIND COMPACTORS

The highly productive Husqvarna LP 9505 articulated trench compactor delivers a smooth, compacted surface, which doesn't dig up soil when turning. Due to the high operating weight and ultimate traction, it is suitable for all kinds of soils (dry or wet) but especially suited for cohesive materials like clay and silt. The fuel-efficient engine provides class-leading power for a whole day of uninterrupted work and the radio remote control offers great flexibility, better ergonomics and safer working conditions.

Specification	Value
Vibration Frequency	42 Hz
Operating Weight	3,704 lbs
Drum Width	33.5 in
Engine Power	24.3 hp

DYNAPAC D. ONE

WALK-BEHIND COMPACTORS

D.ONE is built with a remote control technology that maximizes the uptime and ensures hassle free operation. The radio remote control enables barrier free and long range connectivity. The radio controlled remote technology is not sensitive to weather conditions and can work trouble free in conditions with extreme sunlight. All the machine functions including engine start-stop can be activated from the remote control eliminating the hassle of walking down the trench to re-start the equipment.

Specification	Value
Vibration Frequency	2,520 vpm
Operating Weight	3,516 lbs
Centrifugal Force	16,200 lbs

SURFACE PREP

TILE JACKHAMMERS

MAKINEX TROLLEY & MAKITA 35LB HAMMER

The Makita HM1307CB 35 lb. Demolition Hammer combines hard-hitting power with additional features including soft start and a variable speed control dial for improved performance. The HM1307CB accepts 1-1/8" Hex Bits, and is ideal for both horizontal and vertical demolition and breaking applications. The HM1307CB is engineered with a 14 AMP motor that provides 730-1,450 BPM and 34.9 joules (25.7 ft.lbs.) of impact energy, with constant speed control that automatically applies additional power to the motor to maintain speed under load.

- Easily and quickly removes floor tiles, vinyl and cork
- Great for breaking apart rocks, blocks and concrete
- Large footplate causes forward pressure to improve demolition

FLOOR SCRAPERS

PALMER FLOOR STRIPPER

A single, razor-sharp blade that oscillates 2000 strokes per minute quickly and safely removes virtually any kind of floor covering. This stripper is easy to operate, and can be mastered by a beginner in just minutes. Simply plug it in and turn it on. No strenuous effort is required. "The Stripper does the work." Just raise the wheels slightly off the floor. No hard pushing. The action created by the machine goes to the blade on the floor, not to you!

SURFACE PREP

HUSQVARNA BMS 220ADB

FLOOR SCRAPERS

BMS 220ADB ride-on scraper is ideally suited for medium and large-sized applications with the added benefit of being battery operated for increased versatility. It also provides total freedom of movement. This floor scraper has a 6-8 hour run time thanks to its 12 powerful batteries. The battery charger is IP66 with an easy USB logging system for (dis)charge information. BMS 220ADB is very maneuverable with a zero turn radius, non-marking tires and complete hydraulic control.

Voltage	48V
Power Source	Battery
Type of Operation	Ride-On
Weight	2,518lbs

HELIX FLOOR GRINDER

FLOOR GRINDERS

Designed for small jobs and tough to reach spaces, this 16-inch planetary grinder creates the perfect profile for new coatings. This easy-to-operate machine has a built-in edge grinder, dual-speed operation, an adjustable handle, and floating dust skirt for maximum efficiency.

Width	17.5"
Disk Size	16"
Max Height	47.6"
Min Height	29.4"
Weight	206lb
Grinding Pressure	128lb
Drum RPM	1 7/9

SURFACE PREP

FLOOR BUFFERS

ESSEX SILVERLINE ROTARY POLISHER

A heavy duty aluminum apron. 17" Polisher, 175 RPM, 1.5HP. Triple Planetary Gearbox, Steel gears with Coupler, 50' Cord, Non-Marking Bumper, 66 Frame.

FLOOR BURNISHER

20" FLOOR BURNISHER

The floor polisher is a tough multi-use burnisher that can polish any type of commercially finished hard floor. It excels in bringing your floors to a high shine when used with the proper polishing pad and floor buffing solution. This machine is designed to clean and polish most modern types of floors including composition tile, stone, marble, terrazzo, resilient floor coverings, and some coated wood floors.

SURFACE PREP

80LB & 100LB TILE ROLLERS

TILE ROLLERS

The Roberts Floor Roller is part of the Roberts lineup of rollers for today's professional flooring installer. These heavy duty rollers are ideal for use when installing linoleum, VCT, carpet, sheet vinyl, cork underlayment and other floor coverings. The high quality, segmented, chrome-plated rollers ensure maximum transfer of adhesive. The handle is removable for transport and storage.

MARSHALLTOWN FLOORING CUTTER

VINYL CUTTERS

Marshalltown's 13 flooring shear makes clean and easy work of cutting many types of flooring. Luxury vinyl tile, laminate and engineered wood flooring can all be cut in the same room you are working in, without the dust created from a saw. The FS13 can handle flooring up to 13 in. wide on straight cut and 8 in. wide on a 45° angle.

TOPCON RL-SV2S

← LASER LEVELS

The RL-SV2S is built for multitasking — jobs where you need a laser for horizontal, vertical, single or dual slope applications. This laser is easy to use and will meet all your job site rotating laser needs. The RL-SV2S dual slope laser sets new standards for simplicity. Rugged, lightweight, and compact, it offers twice the laser at an amazingly affordable price. Set up takes little time, and the large, backlit, high-contrast display makes it easy to get started and complete the job professionally even under challenging conditions.

- Horizontal / Vertical / Single / Dual slope applications
- Full-function radio remote
- Long-range operation (800m)
- Tough IP66 construction rating
- Extra-long battery life (120 hours)

TOPCON RLH5A

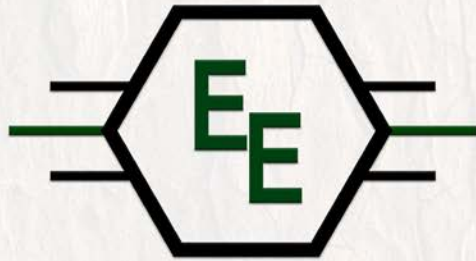

← LASER LEVELS

Looking for a rugged, reliable laser? A laser that will increase quality and efficiency, with maximum impact at a minimal price? You've found it. The RL-H5A laser is the durable, long-range, high-accuracy solution you need. The RL-H5A is a next generation self-leveling construction laser with great distance and high accuracy.

- Long-range operation (800 m)
- Smart long-range receiver
- Simple, intuitive manual slope capability
- ± 10 Arc second horizontal accuracy
- Extralong battery life (100 hours)
- Tough IP66 weatherproof rating

SALES & SERVICE

AMMANN

ATR 60P COMPACTION RAMMER

Among the key features of the Premium models are an optimized multi-function gas lever that is shaped and positioned for easy reach and operation; a low emission engine that fulfills the strictest regulations worldwide, and an additional air filter system that extends the life of the machine. The premium models also feature the vibration-isolated handle concept that limits hand-arm vibrations to protect the operator.

The handle is an important feature to make work more comfortable and to avoid long term health issues. The height of the handle can also be adjusted to adapt to the operator's size.

APR 22/40 REVERSIBLE VIBRATORY PLATE COMPACTOR

The light weight and narrow width of the APR 22/40 make this reversible plate compactor a great fit especially on small or confined worksites. With a working width of 16" and a weight of about 200lbs, this vibratory plate squeezes into tight locations. The ability to overcome steep grades and move quickly on even and uneven surfaces allow a wide range of applications that the APR 22/40 can be used for.

APR 40/60 REVERSIBLE VIBRATORY PLATE COMPACTOR

The APR 40/60 has good capabilities with a working width of 60 cm. It is often the vibratory plate of choice for contractors working with pavement blocks with thicknesses up to 10 cm. An optional available, tool-less mountable rubber mat helps prevent damage during the compaction process. When working on other surfaces and in other applications. The APR 40/60 showcases operator friendly features and performance characteristics of all Ammann Vibratory Plate Compactors.

ARX 16-2 TANDEM ROLLER

The Ammann ARX 16-2 Tandem Roller can work with drums in-line or off-set, enabling homogenous compaction against obstructions – and productivity in more open spaces. Operators of all experience levels find the machine easy to control, in part because of the automated intelligent functions (such as Automatic Vibration Control), integrated parking brake, soft/hard mode). Soft drive enables smooth, steady adjustments to directional changes – particularly important when working on asphalt. Hard drive responds quickly to directional changes.

ARX 26.1-2 TANDEM ROLLER

The Ammann ARX 26.1-2 Tandem Roller is a great fit for contractors looking for a low-maintenance machine with an intuitive dashboard and controls. The roller features a maintenance free articulation joint that enables quick drum adjustment from in-line to off-set configurations, helpful when working close to obstructions. The in-line drum setting is available when it's time for productivity in open spaces. The roller utilizes a Kubota engine that meets EU Stage V and U.S. EPA T4f emission standards.

ARX 36-2 TANDEM ROLLER

The Ammann ARX 36-2 Tandem Roller makes it even easier for operators to work next to obstructions such as curbs. The roller, with a drum width of 51.2", features a new articulating joint that enables quick drum adjustment from in-line to offset configurations. Rollers that are offset are able to work close to obstructions. Operators need watch only one drum, knowing the second will be a safe distance from the obstruction. The in-line setting, which enables equal distribution of compaction forces, is preferred on more open job sites.

ARS 30 SINGLE DRUM ROLLER

The Ammann ARS 30 Single Drum Rollers utilize advanced technology, innovative engineering and robust engines with the latest emission standards. A combination of a well-balanced engine, fully hydrostatic drive system and control deliver exceptional fuel consumption. That efficiency and a large fuel tank means a roller need only be fueled once every three working shifts.

ARS 50 SINGLE DRUM ROLLER

The Ammann ARS 50 Single Drum Rollers utilise advanced technology, innovative engineering and robust engines with the latest emission standards. A combination of a well-balanced engine, fully hydrostatic drive system and control deliver exceptional fuel consumption. That efficiency and a large fuel tank means a roller need only be fuelled once every three working shifts.

ARS 70 SINGLE DRUM ROLLER

The ARS 70 is Ammann's smallest soil compactor and one of the most maneuverable machines on the market. It is 16% shorter than the previous generation and features a tight turning radius of 8.5 feet. The machine is extremely compact because of its innovative design, which efficiently positions the engine, coolers, liquid tanks and hydraulics in the engine compartment. The ARS 70 also is known for its visibility, fuel efficiency and climbing ability. The compactor offers a wide range of variable frequencies for many applications and varied materials. The ARS 70 also features ECOdrop, which reduces ownership costs through an increase in efficiency, a decrease in fuel consumption and a reduction in required fluids for hydraulics and the vibratory drum system.

BIOFUEL USE

Ammann diesel-burning machines are able to utilise hydrotreated vegetable oil (HVO), a biofuel made from waste that reduces CO2 emissions by up to 90%

World's first 3D positioning system designed for construction layout

The LN-150 takes you from paper plans and tape measures into digital layout and construction verification workflows. This tool is easy to learn and easy to use, letting you automate and execute layout and construction verification processes for increased productivity, accuracy, and bottom-line savings.

- Easy one-button, self-leveling setup
- Simple upgrade for machine guidance
- Easy to use with MAGNET or Pocket3D software
- Wi-Fi and long-range Bluetooth® instrument communication options
- Seamless cloud-connected workflows with Autodesk, Bentley, and MAGNET

With more than 80 years of optical technology innovation behind it, Topcon's LN-150 layout navigator was engineered for contractors' specific indoor/outdoor positioning needs.

The layout navigator automatically locks onto the prism for real-time positioning on the go. Built to perform on any project that demands confident, precise 3D positioning at up to a 130m working radius, the LN-150 is a uniquely user-friendly solution for your positioning needs.

The LN-150 is optimized for use with MAGNET field, cloud, and office software and includes seamlessly integrated workflows with popular design software, including:

- Bentley's ProjectWise and OpenRoads
- Autodesk's Revit, Navisworks, AutoCAD Civil3D, and BIM 360

RL-SV2S DUAL SLOPE SELF-LEVELING ROTARY LASER

The RL-SV2S is built for multitasking — Meaning you can use it for both construction and interior jobs ... jobs where you need a laser for horizontal, single slope, dual slope or vertical applications. This laser has all the features and is easy to use.

Vertical function

Full function radio remote

Long-range operation (800m)

Tough IP66 construction rating

Horizontal, single and dual slope

Extra-long battery life (120 hours)

RL-200 SERIES SELF-LEVELING SINGLE OR DUAL SLOPE LASERS

Topcon's RL-200 Series revolutionary encoding system provides the highest grade repeatability, 7 arc seconds, of any other laser! No one even comes close. Setup after setup, time after time, you're always right on grade! Choose from two models, RL-200 1S single slope, or RL-200 2S dual slope. The RL-200 1S provides single slopes from -5% up to +25%. The RL-200 2S provides dual slopes up to +/-10% in the X axis, or up to an industry leading -5 to +25% in the Y axis.

**RLS-200 1S
SINGLE SLOPE**

**RLS-200 2S
DUAL SLOPE**

RL-H5A SELF LEVELING HORIZONTAL ROTARY LASER

With electronic self-leveling, you press the power button and go right to work in seconds. If the RL-H5A gets disturbed on the job it relevels itself automatically. The self-leveling motors are accurate to ± 10 arc seconds. Need to shoot elevations up to 400 m from your laser? No problem — this instrument has the power and range to cover a 800 m diameter job site. The RL-H5A gives you the option of up to 60 hours of continuous usage with the rechargeable battery pack or 100 hours with (4) D cell batteries. With the IP66 rating, the RL-H5A is “job site tough” and can withstand dust, a sudden shower and even torrential rainfall.

RL-H5B SELF LEVELING HORIZONTAL ROTARY LASER

With electronic self-leveling, you press the power button and go right to work in seconds. If the RL-H5B gets disturbed on the job it relevels itself automatically. The self-leveling motors are accurate to ± 20 arc seconds. Need to shoot elevations up to 400 m from your laser? No problem – this instrument has the power and range to cover a 400 m diameter job site. The RL-H5B provides up to 100 hours of continuous usage with 4 (D) cell batteries. With the IP66 rating, the RL-H5B is “job site tough” and can withstand dust, a sudden shower and even torrential rainfall.

TP-L6 SERIES PIPE LASER

The TP-L6 pipe laser's smaller size, long-life battery and mobile app make the unit one of the most flexible on the market. This pipe laser is easier to use, fits into tighter spaces, and increases convenience and safety for workers.

- Additional Android mobile app remote control and display
- -15% to 40% grade setting range
- Compact design adds flexibility
- Bluetooth connection
- Optional plumb beam
- Red/Green laser
- 60-hour battery
- Self-leveling

TP-L6G
TP-L6G
TP-L6GV
TOPCON AT-B SERIES AUTO LEVEL

The compensator of AT-B Series incorporates four suspension wires made of super-high-tensile metal, which features minimal thermal expansion coefficient - providing unmatched durability and accuracy. The finely tuned magnetic damping system quickly levels and stabilizes the line-of-sight despite the fine vibrations present when working near heavy equipment or busy roadways. Three models - 32x, 28x, and 24x magnifications.
