

***MEDICARE PATIENTS* ASK ABOUT GETTING ENROLLED IN THE 100Plus REMOTE MONITORING PROGRAM!!**

WHAT IS THE 100Plus REMOTE MONITORING PROGRAM?

It is a remote patient monitoring platform empowering doctors and nurse practitioners to manage your chronic cardiac conditions remotely & proactively monitor your **Blood Pressures & Weights**** with the hopes of avoiding expensive, episodic care and drive a higher quality of life. When a Medicare patient receives a 100Plus medical device, it is at no cost to them, fully configured, and ready to use out of the box – NO SMARTPHONE, NO APP, NO BLUETOOTH, NO WIFI REQUIRED!

AVAILABLE EQUIPMENT & HOW IT WORKS:

100Plus offers **Blood Pressure Cuffs and Scales**** to help manage chronic cardiac conditions such as congestive heart failure & hypertension. After use of these devices, in approximately 2 minutes, information is transmitted over cellular network to a portal which our HeartCare Staff reviews. If you get a CRITICAL reading, HeartCare gets alerted. Our staff will then follow-up with a call to you to check to see how you are doing, if you are having symptoms, and offer any recommendations.

COST:

MEDICARE PATIENTS ARE ELIGIBLE FOR ENROLLMENT. A secondary insurance is preferred to cover the monthly charge. Medicare patients without a secondary insurance will incur a 20% fee (approximately \$22-\$30) per month & a deductible annual fee at the beginning of each year.
