

Customer Information to REACH

We, Schrauben-Preisinger GmbH, take very seriously the obligations for distributors and/or importers under the REACH Regulation (EC 1907/2006) regarding products in the sense of screws, nuts, small parts, tools and fasteners. In fulfillment of our obligation under Art. 33 of the REACH - Regulation, we request data on articles that contain oder may contain substances of very high concern according to the current SVHC list of more than 0,1 % by weight in the supply chain and pass them on to our customers. SVHCs are – according to the current state of affairs – conceivable with regard to our product range in the following products:

Coating:

Chromium trioxide (chromium (VI) oxide or chromium trioxide): this substance is obtained in various galvanic coatings. However, due to the small layer thickness, the porportion of the product is significantly less than 0,1 % by weight. There is no obligation to provide information under Art. 33.

Alloys: Lead (CAS-Nr. 7492-1, EG-Nr. 231-100-4)

Lead is essential for certain alloys to ensure their functionality. Lead of more than 0,1 % (mass percentage) **CAN** occur in the following materials:

- Steel with strength classes: 4.6, 4,8, 5.8, 6.8, 04, 4, 5, 6, 14H, 17H, 22H, 33H, 45H
- Free-cutting steel e.g. material 1.0718, 1.0715, 1.0736, 1.0737 etc.
- Copper alloys (z.B. CuZn39Pb2, CuZn39Pb3 = MS58)
- Aluminium alloys

The classification of lead as toxic for reproduction does not mean that there is an immediate danger from products containing lead made of alloyed metals. The potentially toxic properties of lead have been known for a long time and must be taken into account by appropriate occupational health and safety and disposal measures.
