

The Day Time Clicked

Written by
Michelle Hardaway

Mrs. Carter walked into her third-grade classroom carrying something unusual. It was a **big, old-fashioned clock** with two giant hands.

The second hand never stopped moving.
“Can anyone stop time?” Mrs. Carter asked.
Tyler whispered, “I can’t even stop my little brother.”
The whole class burst into laughter.

Mrs. Carter held up different pictures.

"Time helps us enjoy every one of these moments," she said.

"If we waste all our time,
we can never get those
minutes back."

Nicole and Clair looked at each other.
Their eyes suddenly became wide.

“It clicked.”

Time wasn't just about reading a clock.
It was about **life**.

Nicole helped her grandmother bake cookies.
Clair helped her little brother build a giant block tower.
Even falling down became a good memory.

The next morning, Nicole and Clair couldn't wait for school. They were excited to learn, excited to see their teachers and classmates. Even math didn't seem quite as scary.

As the weeks passed,
both girls started asking themselves:

“Can I spend my time
helping someone?”

They discovered that small
decisions could make a
big difference.

Help Others

Small Choices.
Big Impact.

During recess, Nicole and Clair played jump rope.

They realized the games didn't last forever.

That made every smile, every laugh,

every memory feel even more special.

Nicole raised her hand.
“I learned that time is a gift.”

Clair smiled.
“And we get to choose
how we use it.”

Mrs. Carter couldn't
have been prouder.

By the end of third grade,
Nicole and Clair had learned
much more than how to tell time.

They planned to make
every day count.

Time had truly

“clicked.”

Time is one of
life's greatest gifts.

You can't stop it
or get it back, so
spend it wisely.

Learn new things,
enjoy your family
and friends, help
others, and make
every day count.

The way you use
your time today helps
shape the person
you become
tomorrow.
