

OVERVIEW

MANTLE Mobile, crafted by NexTech Solutions, directly addresses the pressing challenge of deploying Android devices and their associated applications at scale. Recognizing the pain points in manual processes, this cutting-edge software solution is designed to revolutionize the configuration of Android end-user devices (EUDs). By offering an automated solution, **MANTLE Mobile eliminates the need for human intervention**, ensuring swift, accurate, and scalable deployment across a spectrum of organizations—ranging from military operations and government agencies to private enterprises. With MANTLE Mobile, organizations can now navigate the complexities of device deployment with unparalleled ease and efficiency.

KEY FEATURES

DISCONNECTED CONFIGURATION

MANTLE Mobile operates seamlessly without the need for external connectivity or internet access, ensuring secure and efficient device setup even in isolated environments.

CUSTOM APPLICATION CONFIGURATION

With its ability to handle complex configuration requirements, MANTLE Mobile simplifies the process of setting up specific applications, leveraging a user-friendly JSON file format to automate the entire process.

SCALABILITY

MANTLE Mobile can handle the simultaneous configuration of multiple devices. This enables rapid configuration of a substantial number of devices in a fraction of the time. With the ability to connect up to 25 devices at once it offers vast efficiency improvements over traditional manual processes.

END-TO-END CONFIGURATION

Unlike many solutions that simply load applications onto devices, MANTLE Mobile offers comprehensive configuration options. Going beyond simple Android Package Kit (APK) installation, users can tailor application settings based on user profiles or specific prompts, enabling optimal functionality and enhancing the user experience.

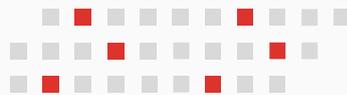

BENEFITS OF MANTLE MOBILE

- ✓ **Significant Time Savings:** Manual configuration can take between 8 to 13 minutes per device. MANTLE Mobile drastically reduces this time, enabling simultaneous configuration of devices, freeing up users to focus on more mission-critical tasks.
- ✓ **Efficiency at Scale:** With its ability to handle multiple devices at once, MANTLE Mobile offers a level of efficiency that traditional manual configuration processes simply cannot match. This makes it an invaluable tool for organizations with large-scale deployments.
- ✓ **Enhanced User Experience:** MANTLE Mobile removes the need for users to navigate through complex setup steps manually. By automating the configuration process, it reduces errors and increases efficiency, providing a more satisfying user experience.
- ✓ **Versatility:** With its wide range of features and scalability, MANTLE Mobile is ideal for any organization deploying Android EUDs. Its functionality is flexible and robust, capable of addressing a diverse set of use cases and deployment sizes.

MANTLE Mobile represents a leap forward in the process of Android device configuration. It addresses key pain points in the process, offering significant time savings, efficiency at scale, and a superior user experience.

By transforming the way Android devices are configured, MANTLE Mobile is paving the way for more efficient, effective, and user-centric deployments across a wide range of organizations. With MANTLE Mobile, NexTech Solutions continues to deliver on its commitment to provide cutting-edge tech solutions that truly add value for its users.

About NexTech Solutions

NexTech Solutions is focused on systems and network engineering to support cloud, hybrid, and edge solutions. We devote our time to truly understanding the unique mission requirements of our federal clientele by building mission-driven solutions that meet today's and tomorrow's demands, offering a diverse and customizable set of classified and unclassified capabilities focused on mission support. We transform IT operations while providing extensive support, allowing our government customers to truly focus on the outcome while NTS does the heavy lifting.
