

# Thinking of working alongside co-researchers with lived experience to enhance your research?

Common Room can help you do this.

## We offer...

- bespoke **focus groups** with children, young people and other stakeholders to inform research bids
- **in-depth consultations** and interviews around sensitive topics
- facilitation of **young people's advisory groups** /expert reference groups
- employment and support of **Young Co-Researchers** to work alongside research teams
- employment and support of **Lived Experience Project Workers** to co-facilitate workshops, interviews and groups
- **consultation and training** on engagement, shared decision-making and co-production

## Why **COMMON ROOM** ?

- We have **years of experience** in overseeing coproduction research projects which explore different aspects of mental health
- We can input into **bidding and planning stages** to ensure the best impact and experience for all parties
- We make sure that the participants come with the **most relevant lived experience** for your project and we can take care of quick incentive payments
- We use tried and tested approaches to promote **ethical and inclusive practices** which we have developed with young people
- We can support participants throughout a whole research project, including **onboarding, consent and safeguarding**
