Brilliance, Engineered

DMF is a modular, architectural lighting manufacturer of industry-leading luminaires known for flexibility, performance, and quality. With more than 150 patents, our team continues to innovate and invest heavily in R&D to provide you with performance lighting solutions that address common challenges to specification, installation, and maintenance.

Our product families are designed to give you recessed, surface mount, pendant, sconce, and signage solutions at varying price points and feature offerings that will meet a multitude of budgets and installation needs across all space types while maintaining aesthetic continuity.

Unique, patented embedded driver technology is built into our modules rather than above the ceiling and equipped with quick connects for plug-and-play capability expediting installation and overall serviceability.

Construction projects are complex, but with DMF your LED lighting solutions should never be.

Designed in California

Founded by an electrical engineer in Southern California, it is only natural that innovation and sustainability are deeply ingrained in the ethos of our brand. Our solutions based modular designs are intended to get product in your hands quickly and address common issues and needs experienced by our customers in a meticulously designed and highly reliable fixture package.

Downlights
Made

Functional.
Flexible.
Fast.

DMF offers you a plug-and-play solution designed for the ever-changing needs of mixed-use spaces.

X Series, M Series, C Series and H Series are our recessed fixture offerings designed with a variety of apertures and features as well as complementing cylinder solutions, the perfect solution for varying budgets and installation needs.

You can outfit a space with multiple DMF families, all with aesthetic continuity across the application.

dmf

X Series

Performance, small aperture collection of modular 2-inch downlights and 3-inch cylinders with field-changeable trims, modules and optics for exceptional versatility. Universal housing allow this series ultimate flexibility but addresses installation and serviceability issues common with small aperture fixtures like driver replacement and over-cutting.

Product Type: Recessed, Cylinders

Aperture: 2"

Price Range: $$$

Lumens: 500 – 1500 lm

Dimming/Controls: 0-10V (1%), TRIAC/ELV (1%), DALI-2 (0.1%)

Voltage: 120V – 277V

Housing Type: New Construction IC, Spray Foam IC, Remodel Non-IC, Chicago Plenum, Millwork

Application: Hospitality, Retail, Commercial Office, Multi-family Residential, Single Family Residential

M Series

Our most versatile 4-inch product family, comprised of Residential IC rated options, Commercial high lumen offerings, Multiples, and complementing Cylinders. This product family ensures you have a solution for every lighting layer throughout your space types while maintaining consistency in light quality.

Product Type: Recessed, Multiples, Cylinders, Surface

Aperture: 4"

Price Range: $$

Lumens: 750 – 3500 lm

Dimming/Controls: 0-10V (1%), TRIAC/ELV (1%), DALI-2 (0.1%), Lutron Athena Wireless Node

Voltage: 120V – 277V

Housing Type: New Construction IC, New Construction Non-IC, Remodel IC, Remodel Non-IC, Fire Rated IC, Spray Foam IC, Chicago Plenum, Millwork, Low Profile, Concrete, Double Housing, J Box, Super Shallow *(Coming Soon)*

Application: Commercial Office, Healthcare, Higher Education, Hospitality, Retail, Multi-family Residential, Single Family Residential

C Series

Designed to be a perfect blend of performance and affordability, the C Series prioritizes efficiency throughout every stage of a construction project. Streamlined options allow for a simplified specification and an error-free ordering process. Contractor-friendly features facilitate easy installation and effortless maintenance.
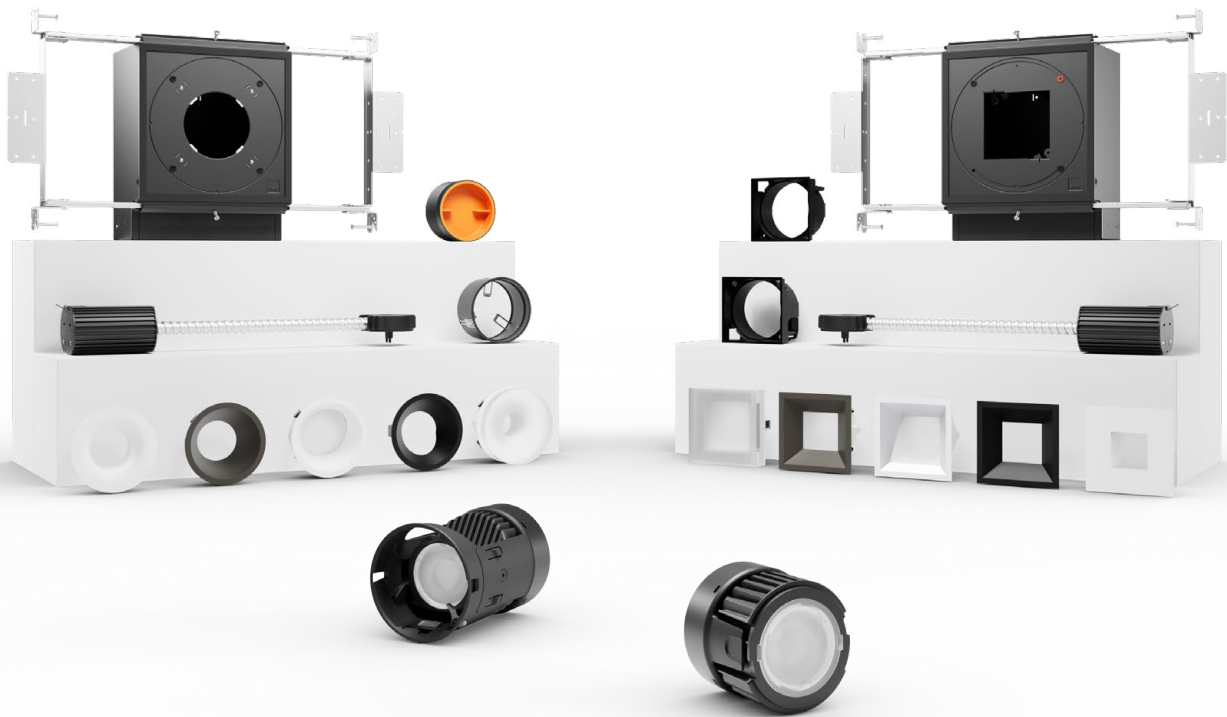

Product Type: Recessed, Cylinders

Aperture: 4", 6"

Price Range: $

Lumens: 1000 – 2000 lm

Dimming/Controls: 0-10V (5%)

Voltage: 120V – 277V

Housing Type: Non-IC

Application: Commercial Office, Healthcare, Higher Education, Retail, Multifamily, Hospitality
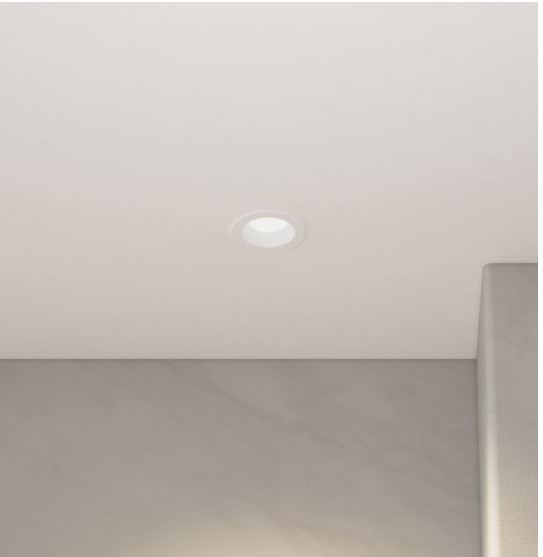

H Series

DMF's high value offering delivers a quality, sustainable and modular design with reliable performance at an affordable price point. A field selectable lumen switch allows for quick changes on the fly while simplicity of the product offering lends itself to a straightforward ordering process.

Product Type: Recessed, Cylinders, Surface

Aperture: 3", 4"

Price Range: $

Lumens: 350 – 950 lm

Dimming/Controls: TRIAC/ELV (5%)

Voltage: 120V

Housing Type: J Box, New Construction IC, Remodel IC

Application: Single Family Residential, Multi-family Residential, Hospitality
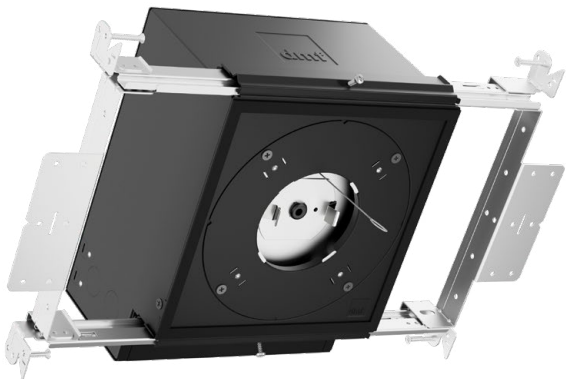

X Series

The Key to Innovation

A true breakthrough in the category, our patent-pending Precision Lock Collar eliminates the need to jump the housing collar and the over-cutting and drywall repair that jumping often creates with other small aperture fixtures. The Precision Lock Collar provides depth adjustment and secure fit, making flush-to-ceiling installation easy to achieve.

Easy Installation & Serviceability

A universal housing designed to adapt for downlight, adjustable, or wall wash solutions, the X Series is designed to allow for quick modification as space needs change. Additional features like a unique trap door that provides post-install access to the splice boxes and dimming drivers integrated within the module rather than housing ensure you always have full serviceability and access of the fixture below the ceiling plane.

2" Aperture Lighting System

The X Series represents the next evolution of the DMF line, bringing you the industry's best small-aperture downlights. The trim, optics, and aiming options provide the highest quality of light possible. The result is 2" aperture downlight or adjustable solutions offering uncompromised performance, finishes, and serviceability.

Lighting Quality in a Small Package

Lumen output from 500 to 1500 lumens and comparable performance to competing 3" and 4" fixtures in ceilings up to 10 feet. Tool-less field changeable optics allow for ultimate flexibility in aiming a project.

X Series Cylinder

Small Aperture Cylinder

X Series Cylinders add pendant, surface mount, and wall mount solutions to your lighting toolkit. Field-changeable trims, decorative diffusers, snoot, and optics deliver uncompromised performance and serviceability with flexible distribution and aesthetics. X Series modules are consistent, so you can count on the same light quality, color, and output from each cylinder.

Features

Options to fit almost any spec or application.

Pendant Options

Cord or stem suspension options, and both are field-cuttable to exact requirements.

ADA Compliant

The overall projection of the wall mount from the surface of the wall is less than 4.0" making it ADA compliant, when installed at the proper height.

Uplight

Shadowless pendant uplight allows for direct and indirect lighting from a single cylinder.

Decorative Trims

Three acrylic forms combine polished and frosted surfaces to produce an eye catching interplay of light.

Wall Wash

Perfect for delivering consistent light across a wall surface.

Decorative Shades *Coming Soon*

Offered in narrow, medium and wide, add a decorative element to your space.

IP65 RATING

Wet Location Rated

Available moisture protection options are IP65 and UL Wet Listed, ideal when specifying product for outdoor use.

M Series Residential

Flexible Housing

M Series 4" Round & Square Housings feature Standard, Fire-Rated, and Chicago Plenum, along with specialty options such as Low-Profile and Double Housing.
The compact, 4" housing installs easily and precisely for optimal fixture placement in crowded plenum space, to accommodate ductwork, framing, and plumbing.

Modular Downlighting System

DMF's upgraded modular downlighting system, is now more versatile than ever – fixed, adjustable or wall wash, round or square, 750 to 1500 lumens. Featuring DMF engineered embedded 0-10V, TRIAC/ELV and DALI-2 drivers for optimal performance and reliability, the M Series can keep up with the fast-paced and ever-changing nature of your projects and can be the solution you go to every day.

A Perfect Match

The materials, heft, and finish of our M Series trims set them apart. The precision-crafted aluminum trims meet the design aesthetic of any project – wall wash, pinhole, round, square, flangeless – all completely interchangeable and available in five standard finishes and a custom color option.

M Series Commercial

Downlight Module

The M Series Commercial downlight module comes in a wide range of lumen packages, appropriate for varying ceiling heights and it's wet listing makes it suitable for both interior and exterior applications. Field changeable, folded optics and reflectors from 15 to 90 degrees help mitigate glare and a wide variety of interchangeable trims offer endless lighting customization allowing you to construct a comforting, design-forward, space that can evolve as space needs change.

Adjustable Module

The M Series Commercial adjustable module aims lighting exactly where you want it with 360° of rotation and up to 40° of tilt. Reflectors from 15 to 40 degrees minimize any distortion to the beam spread and are always field changeable. Never requiring the need for tools after the housing is installed, this module allows you to adapt quickly to design changes in a space.

All-New Higher-Lumen Downlighting System

The M Series Commercial family is a versatile lighting solution with built in universal features which radically simplify configuration in the field. Appropriate for most installation applications, this family delivers 750 lm to 3500 lm of 93 CRI lighting with our unique, patented, integrated and detachable driver solutions that dim to 1% and below and allow for full serviceability beneath the ceiling plane. Within the same housing, you can change modules, optics, and trims and seamlessly integrate with building lighting control systems for flexible dimming options.

M Series Cylinder

Options & Accessories

Shades, trims, specialty options, even the light engine can all be swapped out in the field, giving you control during and after the installation.
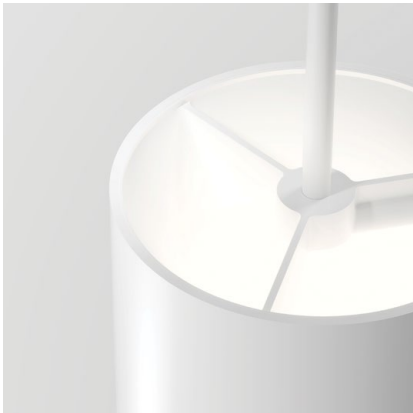

Uplight

Enables light output at elevated levels, while providing glare-free ambiance and the ability to highlight architectural elements.

Snoot

Channels light source and decreases visual cutoff angle to increase focus and mitigate glare.
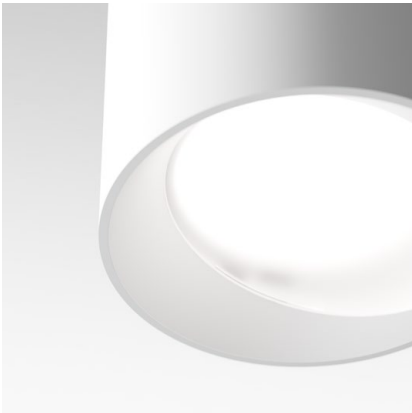

Wall Wash *Coming Soon*

Designed to direct light evenly across a wall, minimizing shadows and highlighting architectural features

Decorative Trims

Finely crafted acrylic subtly fills your space with beautiful ambient light.

Junction Box Cover

Completes the cylinder's look in open ceiling applications.

Decorative Shades *Coming Soon*

Offered in narrow, medium and wide, add a decorative element to your space.

IP65 RATING

Wet Location Rated

Available moisture protection options are IP65 and UL Wet Listed, ideal when specifying product for outdoor use.

Modern Cylinder System

By combining a suite of customizable features with our high performance LED modules, the M Series Cylinder (previously named DCC Cylinder) provides brilliant illumination and a beautiful design versatile enough for whatever your project needs.

C Series

Flexible Output

Our C Series module includes an adjustable integrated brightness switch option, allowing you to customize the light level to suit your needs. Installation and maintenance are a breeze with our embedded 0-10V drivers, all accessible from below the ceiling.
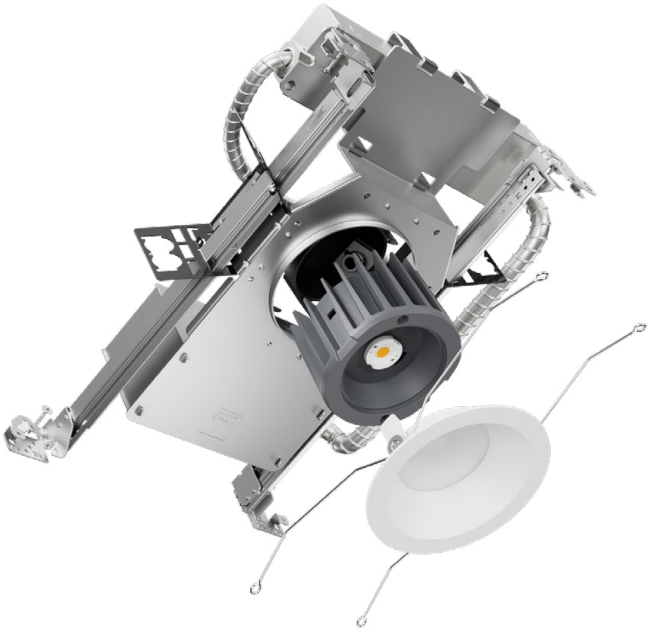

Universal Installation

Designed with contractor needs in mind, our C Series fixtures include pre-installed universal bar hangers and butterfly brackets, allowing for easy and adaptable installation across different ceiling types. This flexibility reduces installation errors and minimizes costly delays.

Commercial Downlighting

Designed to be a perfect blend of performance and affordability, the C Series prioritizes efficiency throughout every stage of a construction project. Streamlined options allow for a simplified specification and error-free ordering process. Contractor-friendly installation features facilitate easy installation and effortless maintenance. Most importantly, the vast majority of C Series products will ship within 72 hours or less, keeping your projects moving forward with speed and reliability.

C Series *Cylinder*

NSF Listed

Commercial Cylinder

C Series Cylinders offer an advantageous option for projects that can't accommodate a fully recessed downlight, such as those with open ceilings or retrofits. DMF's paramount modularity allows for our cylinder families to share the same performance and quality that you find in our downlights, and the C Series is no exception. C Series Cylindersis available as an 8" pendant with Stem and Cord mounting options, and by utilizing the same exact module you can get a consistent quality of light across your entire project when using mixed fixture types.

H Series

Flexible Housing Applications

Strong, lightweight, and stackable to consolidated shelf space, the H Series Housings are designed to simplify installations. The housings feature bar hangers, wood joist mounting screws, or pop out springs to ensure a quick and accurate installation. Made from sustainable materials, the housings are recyclable and 100% manufactured in North America.

Brilliant Illumination

The Integrated Natural Warm Dim seamlessly transitions from comfortable white to warm light without losing color accuracy and the Brightness Switch enables field selectable light output, including ambient, standard, and higher ceiling environments.

DMF Performance at an Attainable Price

The H Series is a modular downlight system that brings the best of our award-winning design to your projects. With several trim options and high-quality finishes, the H Series is simple to select, order, install, and maintain for any new construction or remodel project.

H Series Cylinder

Pendant Mount

The stylish pendant introduces a decorative element to your lighting environment. A built-in brightness control allows you to adjust the lumen output appropriate for the task at hand, while decorative trim allows for a soft diffusion of the light.

Wall Mount

Our ADA compliant Wall Mount pendant effortlessly installs while exposing no visible hardware - maintaining a minimalist appearance. An integrated lumen switch on the module allows you to adjust output based on the desired mounting height. IP65 rated, this cylinder is perfect for both exterior and interior applications including balconies and corridors.

Illuminated Signage

The A Series illuminated signage is a completely customizable, solution perfect for multifamily and hospitality applications simultaneously fulfilling a need for signage and corridor illumination. This ADA compliant fixture mounts 0.5" from the surface onto most standard 4" round or octagonal junction boxes and our integrated driver allows for ease of installation and serviceability.

S Series

Surface Mount Downlighting

The S Series redefines what's possible for a surface mount downlight. Packed with technical breakthroughs, the ultra-thin fixture matches the elegance of a recessed downlight but offers the versatility to fit into more applications, even those with limited plenum space.
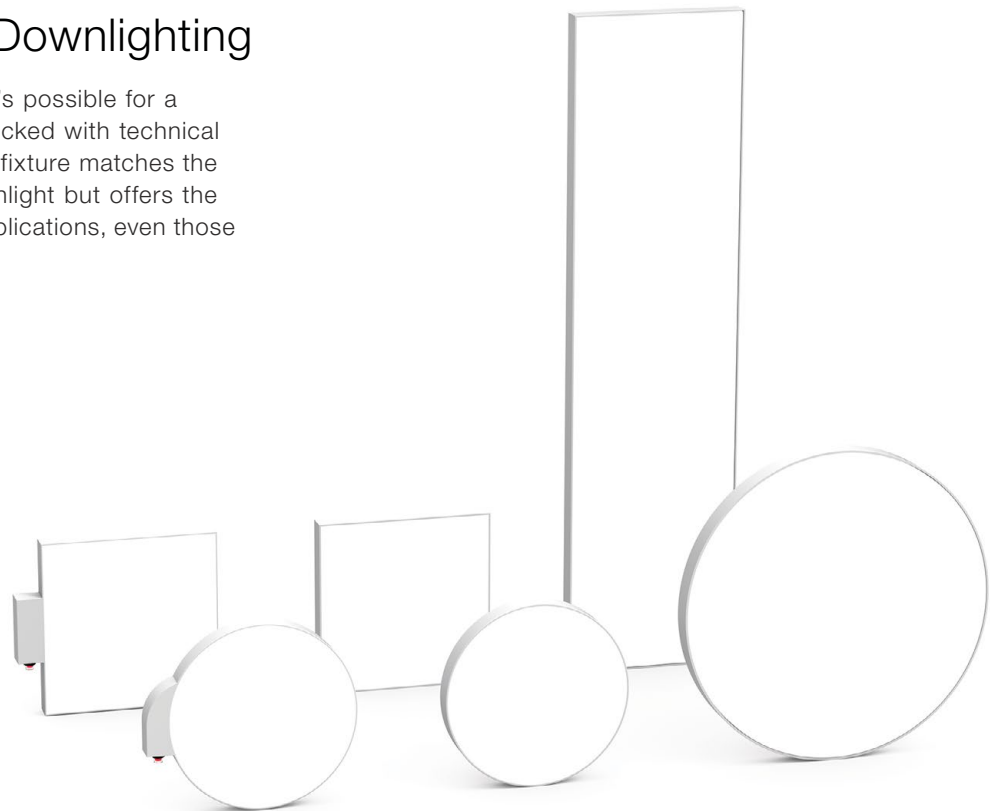

8" Round Surface Mount

This minimalist downlight takes everything that makes the original 4" exceptional, and expands on it. This area light can fill a room with inviting, accurate illumination. In addition, its SurfaceFrame compatibility simplifies installation and makes it interoperable with the rest of the S Series family.

4" Surface Mount

The S Series minimal design is available in multiple form factors, with the 4" Round and Square matching the appearance of recessed lights. These models also include optional Integrated EM Test Switch and Non-Conductive Dead Front variants.
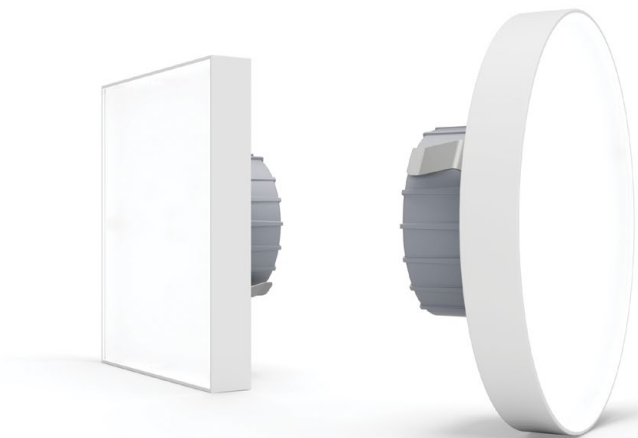

18" Linear Surface Mount

This linear area light delivers 1500 lumens of 90+ CRI light in a unique form factor. Like our other downlights in this series, the linear version features a proprietary integrated driver and small footprint, making it a great choice for new construction or retrofit applications.
