

LOUD. CLEAR. RELENTLESS.

# STAGE-2 AUDIO KIT FOR 24+ HARLEY-DAVIDSON®

*Purpose Built for 2024+ Harley-Davidson® Motorcycles.*

Engineered to be loud, clear, and relentless, the Stage-2 Audio Kit delivers perfectly balanced sound, rich mids, strong bass, and ultra-sharp highs. Built from premium materials and designed for real-world riding conditions, this everything included, easy-to-install system sets a new benchmark for performance, durability, and reliability in the motorcycle environment.

## FEATURES

### 1 PERFORMANCE ENGINEERED

Each component of the Stage-2 kit is meticulously engineered for peak performance. The 6.5" speakers feature a heat-resistant motor structure and radiator ring that efficiently dissipate heat, ensuring consistent, powerful sound even under the most demanding conditions. Complementing the speakers, the 1000-watt digital amplifier delivers robust performance and is future-ready for expanding your system with additional speakers.

### 2 PLUG-AND-PLAY DESIGN

Stage-2 offers a true plug-and-play solution in a single box, complete with direct fit model-specific amplifier mounting plate and grilles. Designed to seamlessly integrate with the Skyline OS Harley-Davidson® infotainment system, it eliminates the need to flash the radio—making installation truly effortless.

### 3 PRECISION-TUNED

Featuring long-throw woofers for high output and deep, extended low-end response, these speakers deliver powerful yet balanced sound. The large voice coil and extended frequency range enhance bass output, ensuring louder, more dynamic, and long-lasting performance.

### 4 TOTAL CONTROL

With the RF Connect app, tuning your system is as easy as tapping your screen. Connect to the amplifier via Bluetooth® to instantly load a DSP tune matched to your exact Rockford Fosgate® motorcycle audio kit.
