

LOUD. CLEAR. RELENTLESS.

STAGE-3 AUDIO KIT FOR 24+ HARLEY-DAVIDSON®

Purpose Built for 2024+ Harley-Davidson® Motorcycles.

Engineered to be loud, clear, and relentless, the Stage-3 Audio Kit delivers perfectly balanced sound—rich mids, strong bass, and ultra-sharp highs. Built from premium materials and designed for real-world riding conditions, this everything included, easy-to-install system sets a new benchmark for performance, durability, and reliability in the motorcycle environment.

FEATURES

1 PERFORMANCE ENGINEERED

Each component of the Stage-3 kit is meticulously engineered for peak performance. The 6.5" and 6x9 speakers feature a heat-resistant motor structure and radiator ring that efficiently dissipate heat, ensuring consistent, powerful sound even under the most demanding conditions. Complementing the speakers, the 1000-watt digital amplifier delivers robust performance and is future-ready for expanding your system with additional speakers.

2 PLUG-AND-PLAY DESIGN

Stage-3 delivers a complete plug-and-play solution in a single box, featuring direct-fit, model-specific 6.5" and 6x9" speakers, amplifier mounting plate, a saddlebag installation kit, and grilles. Engineered for seamless integration with the Skyline OS Harley-Davidson® infotainment system, it requires no radio flashing – making installation straightforward and hassle-free.

3 PRECISION-TUNED

Featuring long-throw woofers for high output and deep, extended low-end response, these speakers deliver powerful yet balanced sound. The large voice coil and extended frequency range enhance bass output, ensuring louder, more dynamic, and long-lasting performance.

4 TOTAL CONTROL

With the RF Connect app, tuning your system is as easy as tapping your screen. Connect to the amplifier via Bluetooth® to instantly load a DSP tune matched to your exact Rockford Fosgate® motorcycle audio kit.

2024+ HARLEY-DAVIDSON STAGE-3 AUDIO KIT
