

Singularity Endpoint

Autonomous, Next-Gen EPP and EDR

As digital landscapes transform, the speed, sophistication, and scale of threats against endpoints have also evolved. User endpoints remain a key attack vector for malicious actors seeking deeper access to your network. Simultaneously, security analysts are overwhelmed with the sheer number of false positives and alerts, which requires time-consuming manual investigation. Security teams need a more efficient and robust solution to secure every endpoint in their environment.

Singularity Endpoint combines next-gen prevention with real-time detection and response in a single platform with a single agent, empowering security teams to easily identify and secure every user endpoint on their network.

Industry-Leading Endpoint Protection

Deliver unparalleled endpoint protection and detection with broad visibility, rapid response times, and minimal incident dwell time. As evidenced in the 2022 MITRE Engenuity™ ATT&CK® Evaluation, SentinelOne delivered 100% protection and detection with zero delays and the highest analytic coverage in real-time.

Quickly Contain Attacks With Built-in Automation

Patented Storyline™ technology provides analysts with real-time actionable correlation and context. Analysts can understand the full story of what happened in the environment with automatic linking of all related events and activities together with a unique identifier.

Automate response to affected endpoints to reduce the mean time to respond. Autonomously resolve threats with our patented one-click remediation to reverse all unauthorized changes.

Streamlined Security

Investigate, triage, and hunt with zero learning curve to bring IR and hunting to a broader pool of security talent. Uplevel SOC resources for proactive threat hunting with automated hunting rules, intel-driven hunting packs, and support for MITRE ATT&CK techniques. Easy-to-use search and pivot lighten analyst load to hunt across large volumes (up to 3+ years) of EDR telemetry.

Key Benefits

Protect

Protect endpoints in real-time

Detect

Detect threats without human intervention

Respond

Remediate threats with 1-click or automated or response actions

- + AI-based malware and ransomware protection
- + Patented 1-click remediation and rollback
- + Industry-leading coverage for Windows, Mac, and Linux, including legacy OSes
- + Mobile endpoint support for iOS, Android, and ChromeOS
- + Autonomous operation. Works on- and off-network
- + Hunt by MITRE ATT&CK® Technique
- + Flexible EDR data retention up to 3+ years
- + Rapid deployment interoperability features ensure a fast, smooth rollout.
- + Single cloud-delivered platform with true multi-tenant capabilities to address the needs of global enterprises and MSSPs
