AVAYA J129 IP PHONE

Cost-effective IP Phone that provides Secure, Reliable, Basic Voice Communications

The Avaya J129 IP Phone packs all the essential call handling features you'd expect in an affordable, yet highly functional SIP phone.

Highlights

- Ease of use
- Exceptional value
- Security

Take a look at this entry-level IP Phone with its fresh industrial design and a sleek, slim form factor. It has a small footprint on the desk for the office or cubicle worker, and is perfect for use in location-based or walk-up scenarios. Place Avaya J129 IP Phones in lobbies, waiting areas, lunch rooms, manufacturing areas, hallways, and retail spaces. The J129 IP Phone supports SIP telephony capabilities, enabling enterprises to replace older analog or digital phones with today's technology.

The J129 IP Phone addresses the need in small, medium, and large enterprises for a cost effective device that delivers basic voice communication with excellent audio performance, productivity-enhancing features, better resiliency through network outages, and enhanced security capabilities when compared to similar phones in the market. The J129 IP Phone is a one line phone that can support two concurrent calls. Easy to use, the J129 has 3 context-sensitive soft keys and shows display prompts that enables the user to quickly access and confidently use features including transferring or forwarding calls, placing or retrieving calls on hold, initiating an ad-hoc conference call, viewing the recent call history, dialing a number from the Directory or Recent Call History, accessing voicemail, using park/unpark functionality and more. Since the J129 IP Phone supports AST-SIP software similar to the Avaya 96x1 IP Phones it supports additional features and capabilities, including support for three simultaneous registrations with Aura for better resiliency during network outages.

The full duplex speakerphone enables for hands-free conversations. The dual 10/100 Ethernet ports enable easier building cabling since a co-located PC gains access to the LAN through the J129 IP Phone. The J129 supports Power over Ethernet as a power efficient Class 1 device, again eliminating cabling, and which also enables the phones to work through power outages if the wiring closet is backed up with a UPS system.

Capabilities

SIP Telephony

J129 IP Phone supports AST-SIP software for enhanced features and integration similar to the 96xx IP Phones including simultaneous registration with Avaya Aura® for better resiliency at an affordable price, while allowing many

other features such as access to call logs and address books, and a visual message waiting indicator.

Basic IP Phone

The J129 IP Phone supports all the key phone features and call handling capabilities needed for use in walk-up scenarios and for users with basic

About Avaya
