

Initial meeting to discuss the project

We don't just quote and pave; we carefully evaluate each project and deliver quality work every time. Our goal is to build long-term partnerships with our clients.

Detailed proposals

We never offer a vague estimate. Our proposals specify materials, quantities and methods of installation. If there are no plans, we can provide drawings showing areas of work and data sheets describing installation procedures. We make sure you are satisfied, not surprised.

We make you look good

Our quality of work not only looks better on day one, but will also last longer, thereby reducing your costs in the long run.

We provide *much more than* an estimate.

We handle the entire job from start to finish.

Consultation and Design

You'll appreciate our attention to detail. We listen to your concerns and priorities, then we determine if any alternative design, material or installation methods will make your paving or concrete perform better, last longer or cost less. Whether we're working on new construction or rehabilitation, our experts often come up with ideas to:

- ▶ Improve drainage
- ▶ Ease traffic flow
- ▶ Increase parking capacity
- ▶ Reduce cost without sacrificing performance
- ▶ Value Engineering

No hassles, low downtime

We work around your schedule during the installation process to maintain access and minimize any inconvenience to you, your customers, tenants and neighbors.

Family owned and operated

Asphalt General has served businesses throughout Maryland, DC and Virginia across two generations.

We pride ourselves in performing superior work at a fair price.

Find out why hundreds of general contractors, property and commercial managers depend on Asphalt General year after year – call for a no-cost consultation.

"Asphalt General stands out in my mind as very prompt and organized. They were able to meet my schedules very well and were very easy to work with. I would rate Asphalt General with a very high level of satisfaction, and would be glad to use them again should any other projects arise."

*Jeremy Bigelow, Project Manager
Clark Construction*

"I would like to commend Asphalt General for the excellent work you performed...The project was completed on schedule and with very minimal inconvenience to the traveling public."

*Harold D. Armentrout, Project Manager
City of Gaithersburg, MD*

"Asphalt General is a quality, professional contractor. They made sure there were no surprises – they helped us manage costs every step of the way."

*Clinton Keck, Project Operations Manager
Marshall Erdman & Associates*
