

From Collaboration to Impact: Systems that Support All Generations

May 12, 2026
9:30 am - 3:00 pm

Resource Training & Solutions
137 23rd Street S
Sartell, MN 56377

Communities are strongest when people of all ages can thrive.

Join us as we explore how the collaboration of **healthcare, public health systems, communities, education, and businesses** can foster an **Age-Friendly environment**. Together, we can **implement meaningful solutions** that enhance the quality of life for aging adults.

We welcome participation from community and workforce leaders, educators, senior services providers, older adults, and key decision-makers.

Objectives:

- **Gain** a clear understanding of age-friendly ecosystem framework.
- **Learn** practical, transferable strategies from regional efforts.
- **Identify** opportunities for collaboration across sectors and systems.
- **Build** relationships that support sustained, community-led action.
- **Acquire** next steps to advance age-friendly and intergenerational priorities.

This free in-person event includes lunch with registration by May 5.
