Call for a quote, also available printed.

Sustainability Key

Oxo-biodegradable is an additive called d2w or epi that is added to polythene during manufacture. For more information regarding these two additives go to www.degradable.net www.epi-global.com

The recycled symbol means this product has the ability to be recycled but best to check with your local authority or waste collection service. It does not mean this product is made from recycled material.

Compostable products are made using natural resources and are able to break down completely in your home compost or industrial composting (food waste bin) not leaving any trace of toxins.

Printed Bags For Life

Branded Packaging

Most of our packaging can be **printed** to include your **garden centre's logo** as well as contact details and any other details you require.

Work with our **in house design team** to create your own unique artwork for all your packaging items creating a great **marketing tool** and helps to **spread the word** of your garden centre.

Brand your own **boot liners, paper carrier bags, polythene bags, plant sleeves, boxes, mailing bags, printed tape** and much more.

Contact kerry@alphapackaging.co.uk for a quote or call 01235 511500.
