 POSITIONING

XPRIA Digital at a glance

An agile structure for topics that require expertise, speed of execution, confidentiality and reliability.

XPRIA supports demanding Swiss environments across IT, data and cybersecurity topics, where execution quality, governance clarity and the ability to decide quickly make the difference. The model is built on rigorous expert selection, simple points of contact and controlled delivery.

Swiss footprint

- On-the-ground proximity
- Business + IT perspective
- Commitment mindset

Expert network

- IT architects and engineers
- Data, cloud and cybersecurity
- PM / PMO, product and governance

Lean engagement model

- Targeted expertise
- Dedicated squad
- Scope leadership

What makes the difference

- › A Swiss consulting model: proximity, discretion, rigour
- › Ability to connect business challenges, architecture and execution
- › Clear governance, strong coordination, controlled delivery
- › Combining IT, data and cyber according to context

Focus sectors

Banking • Insurance • Life
 Sciences • Industry • Luxury •
 Services

— EXPERTISES

Clear coverage of digital expertise

Expertise is structured around the major IT, data and cybersecurity needs, with the ability to combine hybrid delivery models.

IT, cloud & infrastructure

- Enterprise architecture / apps
- Cloud, systems, networks
- Workplace & support
- ERP / CRM / ITSM

Data, analytics & AI

- Data platforms / integration
- BI / reporting / performance management
- Governance / quality / MDM
- Automation / targeted AI

Cybersecurity & compliance

- IAM, endpoint, network, cloud
- GRC, ISO 27001, policies
- Vulnerabilities / remediation
- Awareness / resilience

Project leadership, PMO & transformation

- Programme / project management
- Roadmaps, scoping, options
- Change / adoption / deployment
- KPIs, governance, vendors

XPRIA can support single-discipline needs, dedicated squads or cross-functional combinations: IT + data, cloud + cyber, applications + governance.

PROJECTS

Project types supported

From ad hoc missions to more structured delivery models, depending on criticality, urgency and the maturity of the need.

Information systems modernisation & cloud

Design migration roadmaps, secure the target architecture and organise scale-up.

Data platforms, BI & governance

Structure flows, improve data reliability and strengthen performance management.

Cybersecurity & compliance

Raise security maturity, address gaps and prepare for audit or certification requirements.

Business applications & integration

Deploy, integrate or evolve ERP, CRM, ITSM, MES and specialist tools.

Digital workplace & infrastructure

Secure user environments, networks, endpoints and service continuity.

PMO, vendor selection & transformation

Frame priorities, lead partners and secure the execution of critical programmes.

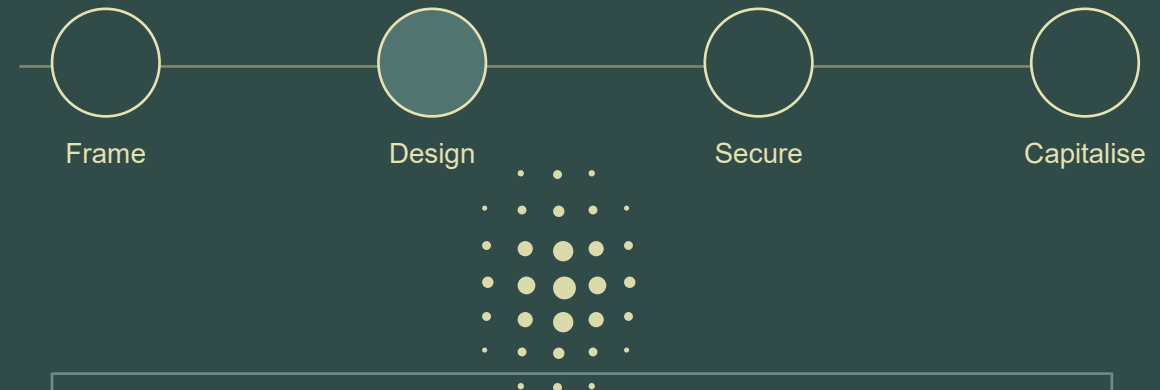

— KNOWLEDGE MANAGEMENT

Knowledge management as a digital execution lever

Beyond individual profiles, XPRIA seeks to capitalise on reference architectures, implementation feedback, security patterns and delivery best practices to accelerate time-to-relevance.

What this changes in practice:

- › Assess needs and technical options faster
- › Reuse proven patterns instead of starting from scratch
- › Secure decision-making on sensitive or regulated topics
- › Create continuity between scoping, delivery and continuous improvement

— ENGAGEMENT MODELS

Formats tailored to your reality

Depending on the nature of the need, XPRIA can operate through targeted expertise, a dedicated setup or more structured delivery leadership.

Targeted expertise

Deploy a specific capability on a technical, sensitive or time-critical topic.

Dedicated team

Build and lead a multidisciplinary capability for a programme, a migration or a roadmap.

Project package / fixed-price scope

Take ownership of a defined scope with a clear framework, readable deliverables and a results-driven approach.

PMO, governance or cybersecurity

Structure decision-making, lead partners and secure the trajectory over time.

A direct point of contact, strong coordination and a constant focus on execution quality.

From Geneva, an agile, rigorous and results-oriented IT consulting model.
