

Oklahoma Mobility Management Program

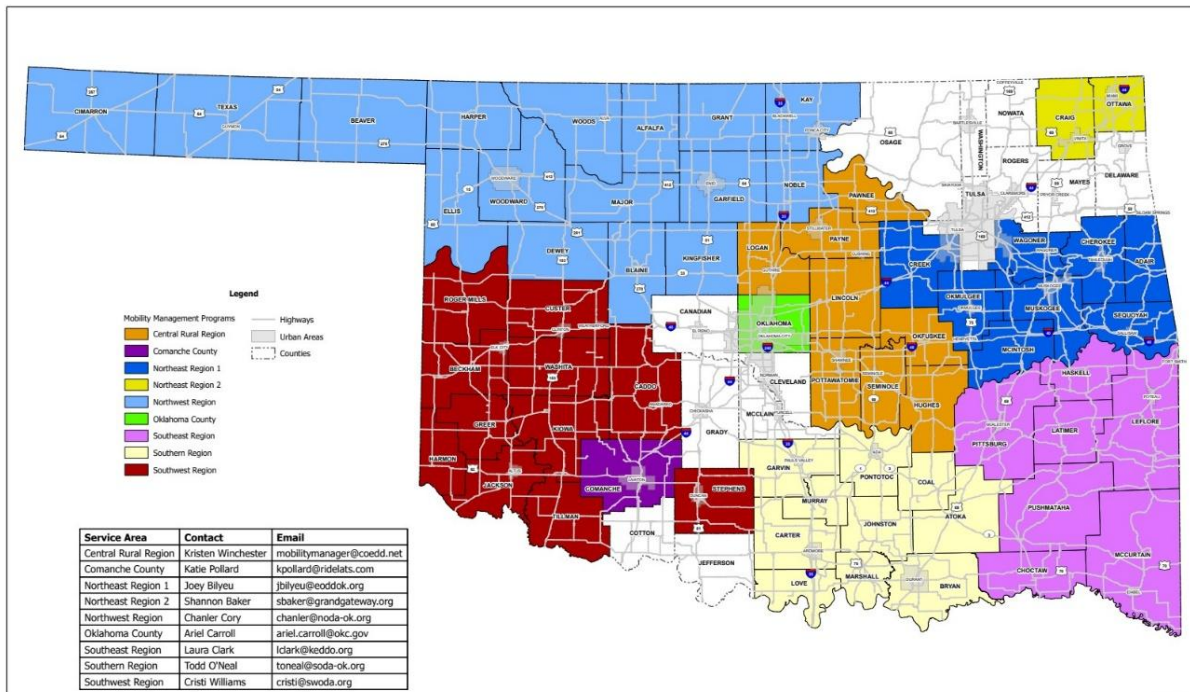

Mobility Management is a Federal Transit Administration (FTA)-funded program that focuses on meeting community transportation needs through the coordinated use of a wide range of transportation providers and services. The program works to improve access to transportation for people who may face mobility challenges.

How to benefit from the mobility management program in your area:

INDIVIDUALS- Connect with your local Mobility Manager or Navigator for personalized assistance in identifying transportation options and overcoming mobility challenges.

AGENCIES/ORGANIZATIONS- Engage with the Mobility Management program by sharing unmet transportation needs, participating in regional coordination meetings, and inviting a Mobility Manager or Navigator to learn more about your services. Collaboration across partners helps develop effective, community-based transportation solutions.

Mobility management networks are designed to improve the overall mobility for individuals, regardless of the rider characteristics, mode, or geography.
