CAPABILITIES

STRUCTURAL STEEL

- On site 3D Scanning & measuring
- Detailed drafting
- Project Management
- Fabrication
- Site erection
- On site Welding
- Equipment hire
- Crane hire
- Remote Site works

TURNKEY PROJECTS

- Energy Power Solutions
- Hybrid – Solar / Battery / Generator
- Pumping & Dewatering Solutions
- Automated Custom Designs
- Piping, Valves and Supports
- Design, Install & Commissioning
- Preventative Maintenance Agreements
- NET Zero Continuous Improvements
- ESG Modelling

MINE SITE – UNDERGROUND & SURFACE

- On site 3D Scanning & measuring
- Detailed drafting
- Project Management
- Fixed Price Projects
- Light & heavy fabrication
- Automatic Underground Ventilation doors
- Coded welders
- Shutdowns
- Fixed Plant Maintenance – Mechanical
- Wear Packages fixed plant & mining machinery

OUR FACILITY & PRODUCTION INCLUDE

- Fabricating facilities combined – 160 tonnes per month
- 6200 m2 Factory floor with 83t overhead gantry crane
- 100 + Team Members
- Capacity 3300 Man hrs per week
- 21 x On Site Utes
- 4 x Isuzu flat bed trucks with tools & consumables
- 2 x Flat bed trucks
- 2 x Project Trailers
- Portable Generators & welders
- Portable Project Containers & offices
- Franna Crane
- Slew Crane
- Forklifts
- CNC Plasma Plate cutting Machines
- 3D Scanner
- Fully equipped fabrication workshops

GENERAL FABRICATION & HIGH PRESSURE WELDING

We have established a reputation for excellence in welding and fabrication, characterized by our commitment to superior quality. Our expertise spans across various materials, including:

- Carbon Steel Fabrication
- Stainless Steel Fabrication
- Aluminium Fabrication
- Hardened Materials
- Protective coating, Rubber Lining & Wear Protection

Our Capabilities:

- Design, shop drawings, and certification
- Fabrication of chutes and hoppers
- Pipe work
- Structural steel fabrication
- Light and heavy fabrication projects

Our team comprises certified welders proficient in:

- AS 1554.1
- AS 4041
- AS 3992

We ensure complete traceability and provide comprehensive MDR (Manufacturer's Data Report) packages for all fabrication and high-pressure works we undertake.

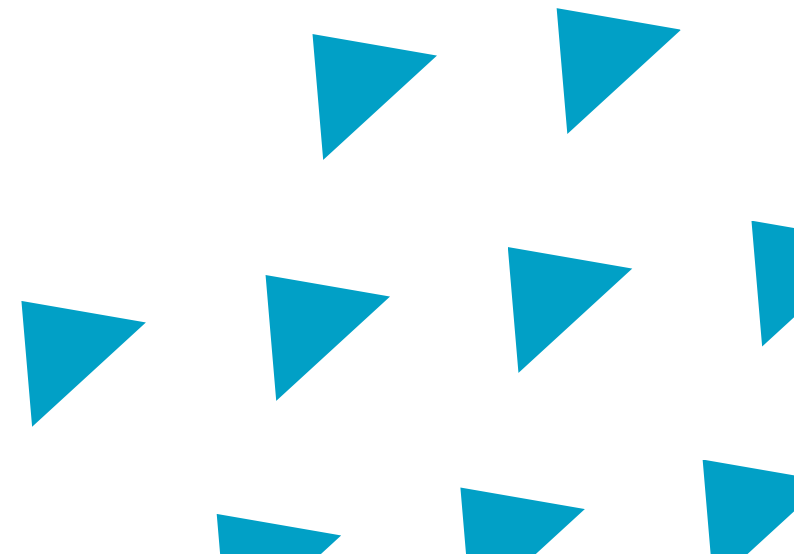

X41 NEW CHANGE HOUSE FACILITY – MOUNT ISA MINES

Custom Steel Fab were engaged to manage the following scope of work: To conduct earth and civil works, concreting, foundations, fabrication, erection of steelwork, and installation and fit- out of shipping container facilities.

Custom Steel Fab successfully completed the X41 Change House Facility within a tight deadline spanning late 2020 into 2021. Despite evolving challenges, our problem-solving skills ensured project success. With a cumulative 15,000 hours devoted to this endeavor, Custom Steel Fab maintained an impeccable safety record, recording zero incidents or injuries.

R62 PIPE BRIDGE STRUCTURE

Custom Steel Fab were engaged to manage the following scope of work: Survey, excavate and supply concrete footings along with fabricating all necessary components for subsequent installation by our site based project management team

Operating within tight deadlines to fulfill client requirements, Custom Steel Fab navigated numerous complexities and high-risk activities. Despite these challenges, the project was executed flawlessly, achieving zero incidents or injuries.

SWITCH YARD PROJECT

Custom Steel Fab successfully delivered a distinctive project, involving the New Switch Room upgrade MIM for Glencore Mine. Collaborating closely with MIM representatives David and Bob, our team ensured a harmonious blend of safety and teamwork throughout the project's duration.

In terms of specifics, the project encompassed civil works, transportation, erection, and installation of the switch rooms. Utilizing over 40 tons of steelworks, we showcased our precision in civil construction, achieving millimeter accuracy in every aspect of the endeavor.

ARDO HOTEL

NorFab was contracted by Prime Construction to supply and install structural steel and aluminium for the Ardo Hotel in Townsville, QLD. Amongst multiple aspects, this project included various components such as a pergola, flooring, the main entry awning and a staff awning.

Spanning over the course of two years, the Project involved the use of 180 tonne of steel. Throughout, NorFab successfully managed several complexities and high-risk tasks, delivering the project to its completion while upholding the highest standards that NorFab prides itself on.

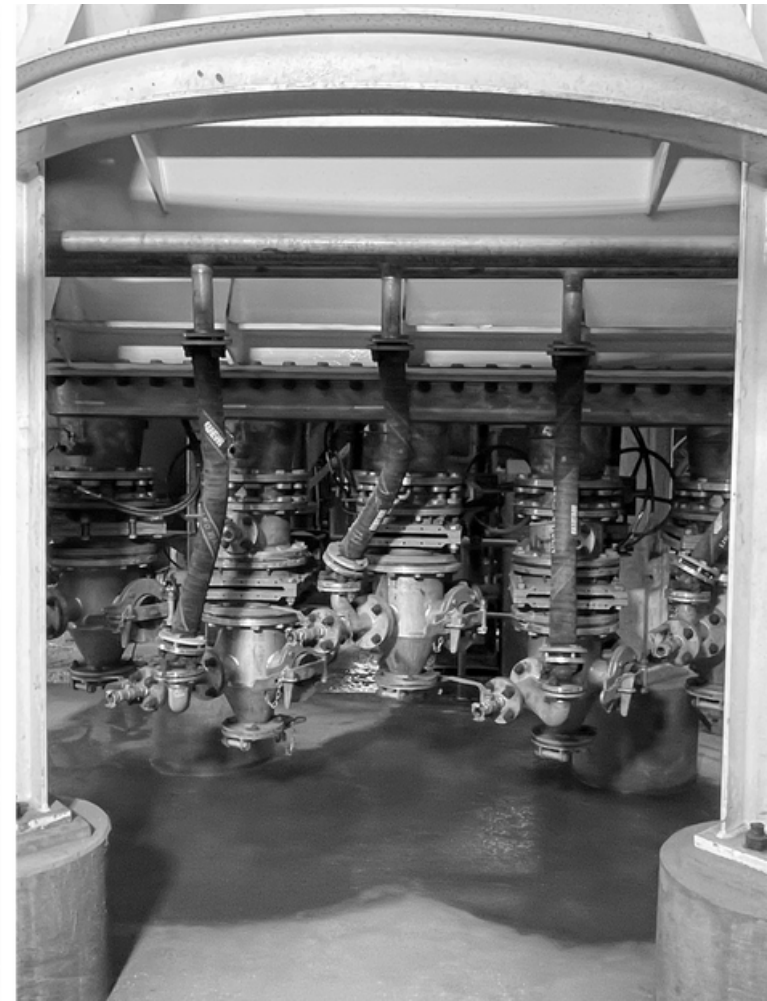

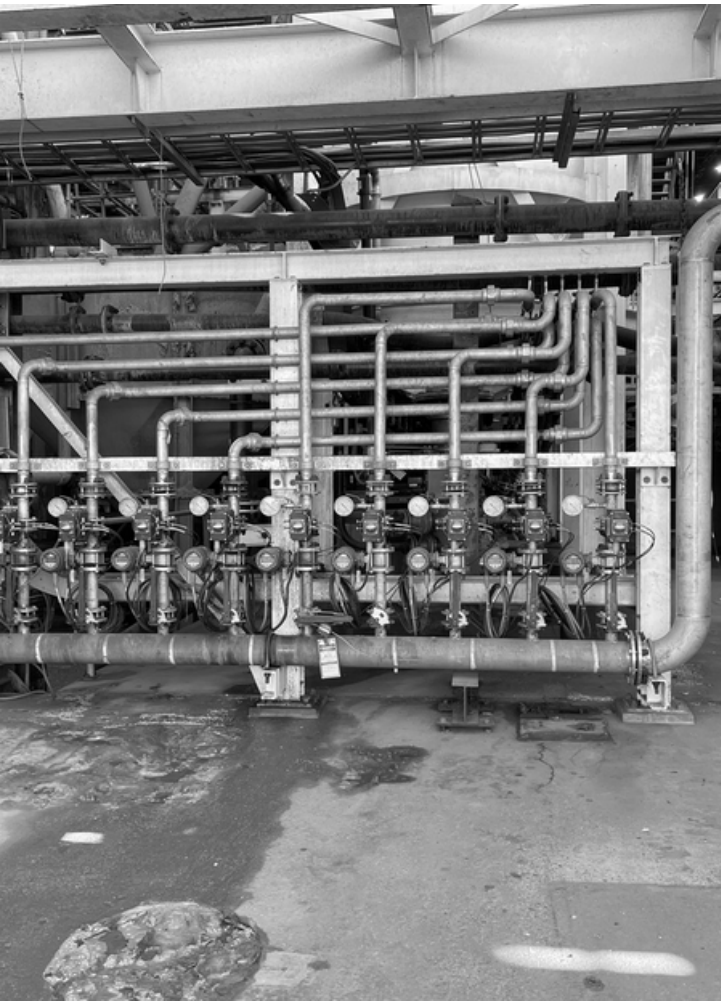

HOSPITAL CAR PARK UPGRADE

The North West Hospital Mount Isa Car Park upgrade was delivered by Custom Steel Fab with very tight lead times. Our team worked efficiently to reach our clients deadline with our usual CSF quality. This was a great project and one we are proud to deliver. Completion of the project was executed in six weeks. Our scope included designing, certifying, fabricating and erecting the structure; Starting with the designs and Certificates, followed by shop drawings, fabrication, then surface protection. Our subcontractor completed pad footing and pedestals while we erected all the steelwork, completed the roof sheets, drainage and flashing.

CERAMIC MEDIA

Custom Steel Fab effectively executed the installation and commissioning of Ceramic Media at the Number 2 Concentrator within Mount Isa Mines. We provided comprehensive project management, methodologies, skilled labor, and equipment, ensuring the seamless completion of both phases of the project, Installation and Commissioning.

STRUCTURAL INTEGRITY MAINTENANCE

Custom Steel Fab has a specialised team who is dedicated on making your structures safe. From Project managers, skilled boilermakers, skilled trades, crane & tower crane operators as well as draft personal, Custom Steel Fab are experts when it comes to steel structure with years of experience in Scoping, detailed methodologies, pricing and execution. Since May 2022 CSF have been successfully awarded the Structural Integrity Maintenance Contract across Mount Isa Mines. Delivering Steel Excellence year after year.
