ANNUAL FINANCIAL REPORT 2024 CHITUNGULU FOUNDATION

EXPLANATORY STATEMENT

1. Balance sheet

In addition to the Triodos current and savings accounts in the Netherlands, the foundation has a ZMW account and a dollar account in Zambia for local project expenses. These balances are valued at the closing exchange rate on 31-12-2024.

Reservations include the unspent portion of earmarked donations. In addition, a general reserve is maintained for future project expenditures.

2. Statement of income and expenditure

Donations are largely earmarked for specific projects. In addition, there are freely spendable donations that can be used for all activities of the foundation.

The project expenditure in Zambia has been converted to the average exchange rate of Zmw/euro that applied in the period of transfer of the project funds from the Netherlands. Exchange rate differences in the course of the year create an exchange rate difference to make the balance of income and expenses equal to the increase or decrease in the assets on the balance sheet.

Donations were in 2024 at a considerably higher level than in 2023. A lot of time has been invested in finding sufficient donations for the conservation centre. Building of the centre started in 2024. In the Netherlands costs have been incurred for the website (to be found under other costs). Many expenses for accommodation and transport have been donated by the board, including expenses for airline tickets.
