

ALWAYS PROTECTING | ALWAYS CONTROLLING

Cruise Control: Automatically throttles engine to maintain desired operating inlet & outlet pressures

Watchdog Protection: Setpoints to prevent cavitation & detect system mishaps, Programmed shutdowns to safely bring the pump to a controlled stop, minimizing spills & protecting the pump engine

Remote Access: Monitor system pressures, engine information, fuel levels, flow rates, set cruise & **watchdog** setpoints, open-close valves, start-stop the engine, engage-disengage clutch, throttle engine up-down all from a connected device in real time

RETRO-FIT YOUR EXISTING SYSTEMS

NO REMOTE CONNECTION REQUIRED
