### Project Overview

Precinct Urban Planning was engaged by K & D Hadenfeldt Pty Ltd to provide town planning assistance for the expansion of an existing gravel pit in Dirranbandi. This combined development application requested approval for an “Extractive Industry (White Rock and Gravel Pit)” and an Environmentally Relevant Activity (ERA) to allow the extraction and screening of predominantly of White Rock and Gravel within the threshold of 100,000 - 1,000,000 tonnes per annum on the subject land. The white rock and gravel will be used for road construction and related maintenance purposes but may also have associated construction applications. There are limited quarries in the region that can supply the required type and mix of materials capable of meeting Austroads specifications for road sub-base and pavement construction.

### Key Tasks

- Provision of Strategic and Statutory Planning Advice
- Development Application Preparation
- Environmentally Relevant Activity Application Preparation
- DA Process Management
- Development Facilitation

*workable planning solutions*
