- COMPETITION RULES
 - Our competition area will be in the shape of a rectangle or circle.
 - The main rule is this: anyone who touches or crosses the boundary line will be immediately eliminated.
 - At random intervals, the competition area will be made smaller, making it more difficult to occupy and to compete within the area.
 - Challenges will occur randomly throughout the week at various times (day or night). When a challenge is issued, anyone not competing in the challenge will be automatically eliminated.
 - There are two types of challenges which will take place throughout the competition
- NONELIMINATION/REWARD CHALLENGES
 - Everyone who completes a challenge in a certain amount of time OR the first person to finish wins a reward, depending on the nature of the challenge
- ii. ELIMINATION CHALLENGES
- These will involve both single eliminations and multiple eliminations, depending on the nature of the challenge
- Once someone is eliminated, they will immediately leave the competition area
