ToysRUs
 toy guide for
 differently-abled
 kids

Nancy O'Dell, Mom, TV Host,
 Best Buddies Board Member
 and Philanthropist,
 with Saskia Vogt, age 8.

Dear Parents and Friends,

It has been nearly two decades since we introduced the *Toys“R”Us Toy Guide for Differently-Abled Kids* as an easy-to-use resource for those who love and care for a child with special needs. As we proudly present the 2012 edition, we hope this publication provides parents and caregivers the information they need to select the perfect toy for the child in their lives.

The broad assortment of everyday playthings featured throughout the *Guide* has been specially selected and evaluated by the National Lekotek Center, a nonprofit organization dedicated to making play accessible to children of all abilities. These toys allow children with differing abilities to share in play moments right alongside siblings and friends. Corresponding symbols help identify the specific benefits of each item.

To further help take the guesswork out of choosing a toy for a differently-abled child, the *Guide* includes valuable information, such as the “Top Ten Tips for Buying Toys” and “Safe Play Tips for Children with Special Needs.”

At Toys“R”Us, producing the *Guide* is a joy for all who work on it throughout the year. We are pleased to share this labor of love with you.

Sincerely,

Gerald L. Storch
Chairman and CEO,
Toys“R”Us, Inc.

Easy-To-Use Toy Selection Guide

Find the right fit between a child’s abilities and stimulating toys that will promote development. Use these symbols to guide your selection.

Auditory
(Hearing, Listening)

Language
(Speaking, Reading, Writing)

Visual

Self Esteem
(Self-Respect, Personal Satisfaction)

Creativity
(Imagination, Arts, Music)

Thinking
(Color Matching, Counting, Cause & Effect)

Skill-Building Toy Finder

Located at the end of the guide on pages 60–63, our Skill-Building Toy Finder places every toy into separate skill-building categories to help you choose toys appropriate for your child’s specific needs and interests.

Dear Parents and Friends,

When I first started out as a journalist in local news, I reported on a story about Best Buddies, a wonderful charity that fosters friendships between volunteers and people with disabilities. Although I wasn’t involved in the organization at the time, I had a best buddy of my own – my Aunt Ellen.

Aunt Ellen was a person with Down syndrome and, while she was older than I, we always had a unique bond. We spent hours, days and years playing, laughing and creating wonderful memories. She remains my inspiration for raising awareness and promoting inclusion for the special needs community. That’s why I’m so honored to lend my wholehearted support to the 2012 *Toys“R”Us Toy Guide for Differently-Abled Kids*.

For almost 20 years, the *Guide* has served as a trusted resource for family, friends and caregivers, providing a carefully selected assortment of toys that can help kids explore new worlds and achieve personal victories.

Playtime is much more than a pastime. The toys featured in the *Guide* can help kids build critical thinking, fine motor, gross motor and other key skills. These everyday playthings allow individuals with special needs to become superheroes, princesses or ninjas.

Whether you are a parent, brother, sister, niece, nephew, peer or educator of someone with special needs, I hope the *Guide* will help create magical play moments – like those I shared with my Aunt Ellen.

Sincerely,

Nancy O’Dell
Mom, TV Host, Best Buddies Board Member and Philanthropist

Top Ten Tips for Buying Toys

Prepared by the National Lekotek Center

Selecting a toy for a child who has a disability? Here are the questions the play experts at the National Lekotek Center ask when choosing developmentally appropriate toys for kids with special needs. Use these questions to guide you in making the right match between the child for whom you're buying and the toys in the *Toys“R”Us Toy Guide for Differently-Abled Kids*.

1. Multi-Sensory Appeal

Does the toy respond with lights, sounds or movement to engage the child?
Are there contrasting colors? Does it have a scent? Is there texture?

2. Method of Activation

Will the toy provide a challenge without frustration? What is the force required to activate?
What are the number and complexity of steps required to activate?

3. Places the Toy Will be Used

Will the toy be easy to store? Is there space in the home?
Can the toy be used in a variety of positions such as side-lying or on a wheelchair tray?

4. Opportunities for Success

Can play be open-ended with no definite right or wrong way?
Is it adaptable to the child's individual style, ability and pace?

5. Current Popularity

Is it a toy that will help the child with special needs feel like “any other kid”?
Does it tie in with other activities, like books and art sets, that promote other forms of play?

6. Self-Expression

Does the toy allow for creativity, uniqueness and making choices?
Will it give the child experience with a variety of media?

7. Adjustability

Does it have adjustable height, sound volume, speed and level of difficulty?

8. Child's Individual Abilities

Does the toy provide activities that reflect both developmental and chronological ages?
Does it reflect the child's interests and age?

9. Safety and Durability

Does the toy fit with the child's size and strength? Does it have moisture resistance?
Are the toy and its parts sized appropriately? Can it be washed and cleaned?

10. Potential for Interaction

Will the child be an active participant during use?
Will the toy encourage social engagement with others?

The toys featured in the *Toys“R”Us Toy Guide for Differently-Abled Kids* have been selected and evaluated by the National Lekotek Center, a nonprofit organization dedicated to making play accessible for children of all abilities.

For assistance in selecting toys or play activities for a child who has disabilities, please visit the Lekotek website at:

www.lekotek.org

Safe Play Tips for Children with Special Needs

These tips were created by Toys“R”Us, Inc. with guidance from leading safety and special needs organizations

Through the magic of play, all children can experience victories, imagine new worlds and share the joy of learning. But accidents can happen and rates of accidental injury are higher among children with special needs. This includes children who have physical and psychological disabilities, and is especially true for children who have cognitive, emotional and social limitations.

While basic safety rules apply to all children, regardless of ability, the delivery of the message should be tailored to ensure that a child who has a disability truly understands and internalizes how to play safely. To make sure playtime is a positive, memorable learning experience for your child, the following is a list of tips to help minimize playtime risks among children with special needs:

- **Never Leave a Child Unsupervised:** It is especially critical that a child with special needs is supervised properly at all times by an adult or trusted caregiver.
- **Read Labels for Ability:** Check toy packages for age grading, but choose toys that correspond with a child’s learning level rather than merely matching a toy with his or her actual age. Toys that are misused or inappropriate for a child’s particular abilities can pose a risk of injury.
- **Survey the Play Area:** Designate a specific area of the home for regular playtime, one void of hazards such as electrical wires across the floor that a child could trip over, hanging cords that could cause strangulation and pools or windows that a child could fall in/through. Safety gates or other barriers can also be helpful in keeping children away from areas unfit for their age or abilities.
- **Establish Concrete Rules:** Before playtime begins, discuss basic guidelines about what areas are off limits (i.e., the street, roof or pool). Make the message clear by saying, “Never go past this line without Mommy” and “Yell, ‘HELP!’ if you are hurt, lost or scared.”
- **Use Visual Warnings:** Post notes with phrases such as, “Don’t Touch!” and “Off Limits!” on toys for older children, as well as power tools, the stove, kitchen drawers or any other potential source of injury; doing so can help a child who has developmental challenges distinguish between an appropriate toy and an object that may be dangerous.
- **Review and Repeat:** After setting playtime rules, create visual reminders to post somewhere in the house or play area to serve as a constant reminder to the child. Also, ensure a child grasps the message by prompting him/her with hypothetical situations such as, “What do you do when a ball rolls into the street?” and “What could happen if you play near the pool?”
- **Prepare for Off-Site Play Dates:** When scheduling a play date out of the home, pack a First-Aid kit for the guardian to carry and a Child ID package to put in the child’s pocket or backpack, inclusive of the child and parent/guardian’s name, and emergency contact information and instructions (i.e. allergies, illnesses/disabilities and medicinal protocol).
- **Safe Storage:** Teach children to put toys away so they do not pose a tripping hazard. Store an older child’s toys in a separate storage bin and regularly check for toys that may become worn, damaged or have missing parts.
- **Avoid Trigger Toys:** For children who are prone to seizures, it’s best to avoid spinning or flashing toys. Opt for toys that have volume control for children who are adversely affected by loud noises. And make sure children have the postural stability to utilize ride-on vehicles and wagons.

“Gianna is the greatest sister in the world. She’s always so full of joy!”

*Sebastian,
Gianna’s big brother*

Bumpy Ball Sassy

Wobbly, bobbly Bumpy Ball bursts with excitement! Bold patterns and bright colors help engage baby’s sense of vision, while the oversized knobs help them practice grasping with both hands. Grasping, gripping and holding the ball helps strengthen muscles in their hands and encourages children to play at, and cross midline, as well as transfer the ball from one hand to the other. The knobs also slow the rolling pace so children can visually track the ball and have time to ready their hands for its return. In addition, the two clear plastic knobs contain beads of varying sizes and colors, providing auditory cues that can help children use their sense of hearing to locate the ball. 107406

Baby's PlayPlace

Bright Starts

This cheerful activity space adapts to your growing baby's needs with fold up/fold down walls, removable prop pillow, eight engaging, detachable toys and a plush ladybug that plays melodies and nature sounds. Secure the toys to the overhead arches to encourage reaching, batting and grasping to help young children learn how their hands and fingers can be used to explore and learn. Turn things around by adding the prop pillow for tummy time and work on strengthening shoulder, neck and back muscles needed for head control, as well as later skills such as rolling and crawling. Plus, the extra-long mat enables older babies who still require simple overhead activity play to have a confined, secure play space.

418795

Play and Go

Captain Calamari

Lamaze

Ahoy, Matey! Come aboard for some sea-faring sensory stimulation. Cuddly Captain Calamari offers a treasure trove of activities with patterns, textures, rings and a rattle to explore, pull and play. Attach to cribs, high chairs and strollers to keep the Captain within reach so even children who are stationary can shake a leg, sound the rattle, create a crinkle sound or play with his peek-a-boo mirror! What's more, the knot at the end of each tentacle is perfect for teething babies or practicing whole-hand grasp, as well as individual and collective finger movements, further enhancing the play and early learning potential.

269217

Illumination Station

Sassy

Spinning, suction-cupped toy secures to any flat surface for a multi-action, multi-sensory experience. And all it takes is a simple bat of baby's hand to get the fun going 'round and 'round! The attached manipulatives can also spin independently and provide different textures, shapes and materials for baby to explore, creating a unique tactile experience and symphony of sound. Plus, baby is rewarded with a special surprise as he spins the polka-dot ball and watches it light up, helping to develop cause and effect learning. The unit detaches from the base and can be used as a rattle. Or, place the toy in the base sideways to encourage wrist rotation.

Mortimer Moose

Lamazé

From his colorful antlers, to his boldly patterned feet and knobby, knotted knees, there's more to Mortimer than meets the eye! This multisensory moose invites little fingers to feel, manipulate and explore his variety of fabrics, from silky, satiny smooth to bumpy and textured. His rubbery antlers are perfect for teething, and his rattle, crinkle and squeaky sounds provide a pleasant auditory stimulation. Best of all, this cuddly, friendly fuzzy moose is machine-washable so he can always be fresh and ready for new play experiences!

507175

“Logan has touched the hearts of many, giving people the opportunity to believe anything is possible.”

*Jennifer and Keith,
Logan's parents*

Having a Ball Get Rollin' Activity Table

Bright Starts

Get the fun rollin'! This portable play table provides plenty of activities that encourage curiosity, invite exploration and provide auditory and visual response for action. The specially designed ball ramp, electronic book with phrases and melodies, press-and-pop numbers, peek-a-boo-gator, caterpillar piano and turtle gears help children learn how to move their fingers and hands to manipulate objects and begin to understand how their actions can have control in the world around them. Kids can also cruise around the table to work on balance skills and weight shifting. Remove the legs and add a new level of fun to customize positioning and increase accessibility for those with differing abilities.

732199

Ocean Wonders Soothe & Glow Seahorse

Fisher-Price

Simply squeeze this seahorse to start the slow, soft music, soothing ocean sounds and glowing, nightlight effect! After five minutes of lullabies and lapping waves, the music slows and the light fades, promoting a deeper level of rest. In addition, this versatile relaxation aid can also be used for daytime fun to motivate children to turn, look and locate their friendly faced, musical plush pal. With eight lullabies and two-level volume control, this easy-to-activate toy adds a sense of calmness, comfort and security to any time of day!

060738 Blue

557229 Pink

Discover Sounds Kitchen

Little Tikes

This compact kitchen comes fully stocked with activities and provides the perfect recipe for skills practice! Common kitchen sounds offer auditory cues that signal successful engagement as little chefs turn the knob for timer sounds, place the pan on the burner for sizzling sounds and hear boiling sounds when they use the pot properly. The in/out play encourages pretend play and expressive language, fosters the understanding of cause and effect action and facilitates choice-making. And as children use the pieces to "cook" a meal, they can strengthen the muscles in their hands and improve coordination. In addition, tiny cooks can practice identifying three-dimensional shapes as they locate the round egg or the triangle-shaped cheese.

Poppin' Park Bounce 'n Ride

Playskool

Bounce! Boing! Bounce! Boing!
Poppin' Park is perfect for children who need a little motivation to get moving. Put the kickstand down for stationary bouncing, or flip it up and bounce and scoot using foot power! Switch on the silly sounds and play music to help kids keep up the pace. The stationary ball beneath the seat and the wide, stable base encourage children to bounce as they ride, providing added stimulation to their joints and helping them to use their whole body in movement. Includes an air pump and instructions for keeping the ball inflated properly.

713629

Discover Sounds Workshop

Little Tikes

Little workbench... big fun! Little carpenters can hammer home lessons on cause and effect, fine motor skills and visual tracking with a variety of engaging activity options. The nails on the bench light up, providing visual cues for more accurate targeting by hand or with the play hammer, and a successful strike is heralded with both music and sounds! Then, place the balls in the top of the drill press, pull the lever and track the balls as they rock, rattle or roll through the funnel. And little minds get put to work on coordinating brains and bodies to strengthen wrists, hands and fingers. Workshop works well on the floor or tabletop. Plus, the easy-open, drop-down door offers storage along with in/out play possibilities.

466463

2-in-1 Snug 'n Secure Swing

Little Tikes

The perfect way to help young children get into the swing of things! This molded-plastic swing provides a fun-filled way for little ones to help improve their vestibular function, while developing visual, spatial, perception and postural control abilities. The swing attaches easily to an existing swing frame with the appropriate hardware. A removable T-bar rotates downward for easy loading/unloading, and the adjustable, stay-put shoulder straps hold the child securely in place. In addition, the high seat back, safety belt, deep seat well and high sides provide an extra boost of confidence to children beginning to explore motion!

150374 Blue

104715 Pink

Having a Ball Swirl & Roll Truck

Bright Starts

This cute, colorful cement mixer provides a whole lot of motion and motivation! Drop the balls into the funnel to activate silly sounds. Push it along the ground and watch through the translucent plastic mixer as the rod spins the balls 'round and 'round, then pops them out! Plus, the three light-up buttons on the top really drive home the cause and effect lesson. The brightly colored balls are a good size for whole-hand grasping. And as children crawl alongside, they are helping to gain the self-confidence and strength needed to walk.

Rainbow Blooms

Melissa & Doug

“Mary, Mary... how does your garden grow?” With blooming gears and delightful squeals and pretty flowers all in a row! Little gardeners use their pincer grasp and other developing manual skills to “plant” each cheerful “bloom” on its corresponding peg to create a row of flowers. Simply spin one and watch as all of the gears are set in motion! Whether activating two gears—or all eight at once—children will enjoy watching the flowers dance in unison. Tend the skills garden by sorting gears by color to practice color recognition, or rearrange them in new patterns to work on cognitive tasks, matching and counting.

248816

Sound Puzzles

Melissa & Doug

Vroom! Zoom! Choo-Choo!

These sound puzzles provide a wealth of skill-building opportunities as problem-solvers see, listen and learn! Children use their pincer grasp to lift each colorful, vehicle-shaped puzzle piece by its knob. When the piece is placed correctly on the board, players are rewarded with realistic transportation sounds. These auditory responses provide positive reinforcement for a job well done and motivate continued play. What's more, the corresponding illustrations on the puzzle board provide visual cues and help place success within reach. Choose from Train or Vehicles.

My Favorite Peg Puzzles

Melissa & Doug

Small, plastic pick-up pegs provide the perfect introduction to puzzles! Novice problem-solvers practice pincer grasp and hone manual dexterity skills as they place the pegged pieces into the corresponding insets on the puzzle board. Placing pieces offers children an entertaining, engaging way to learn directionality and spatial orientation, as well as an opportunity to practice wrist rotation. With the limited number of non-interlocking pieces and the visual cues on the puzzle board, success is within reach, literally, to boost confidence, foster self esteem and motivate kids to increase challenges. What's more, the familiar themes help extend play with verbal identification games and the suggested activities provided on the backs of the puzzles.

170473

Learn to Write Your Letters

Priddy

It's as easy as A, B, C! Each page features a letter and a photograph of an easily identifiable object that begins with that letter. Work on letter recognition and identification skills by tracing the letter right on the book. As children gain proficiency, have them try to write the letters on a separate sheet of paper. The vivid, contrasting colors engage children visually, while the easy-to-turn pages and handle make this book very accessible to children with physical limitations. In addition, the sturdy construction, wipe-clean pages and the different levels of use help keep children entertained and motivated!

025057

Brilliant Basics Activity Puzzle

Fisher-Price

This playful puzzle is packed with sensory and skills potential! Bright colors, recognizable animal shapes and a heart-shaped mirror help keep children engaged, while the molded-in textures on the individual pieces and the puzzle base keep little hands exploring. Fun-filled activities such as the peek-a-boo door and frog with colorful rattle beads add visual and auditory interest, and introduce cause and effect learning. Stand the pieces upright to encourage reaching during tummy time. Or challenge skills by using the pictures on the base as visual cues for matching games, and the individual pieces for pretend play to enhance language development.

325249

Simple First Words:

Let's Talk

Priddy Books

No fuss... No muss. Look at the picture. Locate the matching button on the sound bar. Then, press the button to hear the word. That's it! There are no other sound effects or music to distract youngsters from learning the simple, clearly spoken words. Reinforce finger-pointing skills by having the child use one isolated finger to activate. For those unable to isolate individual fingers, encourage them to use several fingers or a whole hand movement. Tough, sturdy construction stands up to repeated use. Board Book; 22 pages.

A is for Apple

Tiger Tales

Learn the alphabet and build language skills one page—and finger—at a time! Each page features a single upper- and lower-case letter. The upper-case letters have grooved tracks and arrows that show how each letter is formed. Children follow the arrows and run their fingers along the tracks to explore each letter's shape, and receive kinetic and tactile reinforcement in the process. And as children flip the pages' flaps, they'll reveal a corresponding word and picture, creating suspense, interest and interaction. After the book has been read a few times, use it to play memory games. The thick, durable pages stand up to repeated readings, and the solid-blue background provides the right amount of contrast for the letters and pictures to pop!

Spin & Learn Top

VTech

Lights, animals, action! Press down on the colorful plunger to watch the cute characters spin around. Press the easy-to-target number buttons to hear each of the four characters respond with numbers and silly sounds. Engaging activities are easily accessible to children who find it difficult to manipulate, grasp and hold, while the response to their actions helps strengthen cause-and-effect thinking. In addition, the dancing lights and interactive responses provide a fun way to encourage children to learn animal names, numbers, music and sounds!

503528

Peek-A-Shoe Talking Octopus

LeapFrog

Drop a ball... where did it fall?

Place an easy-to-grasp, palm-sized ball into the top of the octopus and watch as it spirals downward.

Anticipation and surprise are the keys to this hide-and-peek game, as children play peek-a-boo with the five brightly colored, numbered shoes to discover where the ball has landed! The octopus recites colors and numbers, and plays music during play to connect cognitive learning with sensory fun. In addition, you can maximize your child's learning experience by using your personal computer to connect to the online LeapFrog Learning Path for customized learning insights and ideas. Includes 5 balls.

My Discovery House

LeapFrog

Real home play in a fun, pretend way!

Five play areas offer over 70 learning responses, plus songs and stories in a familiar home setting. Children open, close, twist, twirl, push and pull as they learn about—and begin to understand—differences, and refine the movements needed for daily living skills. In addition, these lessons in opposites help teach descriptive words that will help enhance language skills as children begin to put words together to verbalize and communicate. Connect to the online LeapFrog Learning Path using your personal computer for customized learning insights and ideas.

689040

Touch & Teach Turtle

VTech

Three modes of play lead the way to learning simple, fundamental skills. In Letter mode, the light-up color buttons help teach letters, shapes and corresponding objects. Flip the switch and, in Story mode, the light-up color buttons tell short stories about the objects, while the number buttons play sound effects. Flip again and the Music mode plays sound effects and melodies! The large, isolated buttons are easy to target and encourage children to make deliberate choices, while playing and answering questions. And, the durable, wipe-clean pages are tabbed for easier flipping! A turtle-riffic way to entice children and help teach them that their actions control and cause responses.

802110

Light n' Sound Busy Giraffe

Babies "R" Us

Where did it go? Drop a ball into the giraffe's mouth and watch it disappear. Or, place a car and listen to the "clickity-clacks" as it travels down the tracks. Young children engage instantly with this musical, light-up toy that encourages cause and effect learning and manipulative play. The cars and balls travel in two ways to introduce exploration, choice making and beginning problem solving. And as they place the items on the giraffe, children are helping to learn how to control their hands, hold objects and intentionally release their grasp. Plus the tactile interest, along with the exciting music and sounds of the balls and cars, can be used to encourage manipulative play for children who have visual impairments.

079481

Laugh & Learn Apptivity Case

Fisher-Price

Now, even the youngest of users can satisfy their "app-etite" for technology! Your Apple® iPhone® or iPod touch® fits snugly in the durable rubber case, and the clear film screen protector helps keep your device safe from both drops and drool. There's no worries about unwanted outgoing calls. Simply disable the home button to keep your child within the apps! Add to the fun with three free Fisher-Price learning apps that are available for download from the iTunes® store. When your child is ready to take a break from learning, just flip the case over and make funny faces in the mirror to encourage social play and eye contact! *Apple® iPhone® and iPod touch® sold separately. iTunes® account required for the free downloads.*

721782

Catch-Me-Kitty

VTech

"Catch me, if you can!" This toy is purr-fect for encouraging children to move, walk or crawl! Kids chase the kitty as it moves and scoots across the floor and changes direction to avoid obstacles. A sensor knows when little cat-catchers are near and the toy reacts with sounds, phrases and songs. And when it's finally caught, the cat declares, "You caught me. Chase me again!," signaling success and providing motivation for continued play. With two speed settings, this fun feline offers an engaging way to assist children with gross motor skills, balance, coordination, visual tracking and language development.

LeapPad Explorer

LeapFrog

Limitless learning and endless play! This lightweight, versatile, transportable tablet features a 5" display screen that's perfect for players to focus on the basics of a touch screen using fingers or the attached stylus. The clear picture and high-quality audio make the over 100 cartridge games, apps*, digital books, videos and flash cards (all sold separately) come "alive" as kids work on their visual, auditory and thinking abilities—without even realizing it! And, the built-in camera, video recorder and microphone allow children to push beyond the basics and explore everything from language skills to individual creativity. Best of all, skill levels automatically adjust challenges to match each child's pace, and remembers progress from game to game and book to book.

**Includes 4 apps: Pet Pad, Story Studio and Art Studio, plus one app of your choice.*

683463

Kid-Tough Digital Camera

Fisher-Price

A rugged, rubber-coated, real digital camera made for kids! Sturdy, dual handgrips and easy-to-target, oversized buttons are just the right size for small hands. The dual viewfinder lets little photographers use both eyes to line up their subjects, making it easier to stabilize the camera and take pictures. Children can also use the 1.4" color LCD screen to view their subjects before taking the picture, as well as the resulting photo afterward. Enhanced low-light performance delivers better quality shots without flash. And the 4X zoom helps kids get close-ups, especially when they may want to keep their distance! Stores over 2,000 photos. Downloadable photo-editing software available.

279800

Smart Tablet

Fisher-Price

Log on and learn! The color-changing LCD screen adds to the excitement and keeps children's visual attention as they problem solve their way through numbers, letters, phonics, typing, music and more. Six learning modes offer a wide range of learning and creative expression opportunities. The touch-screen, Qwerty keyboard provides fine motor and finger isolation practice, as well as reinforces cause and effect learning as users make a direct connection between what they press with their fingers and what happens on the screen. Just flip down the kickstand to convert for tabletop use, making the tablet more accessible for children who need extra stability or who use wheelchair trays.

Bouncy Horse

Imaginarium

Giddy up! Little cowboys and cowgirls will be all smiles as they sidle over to this inflatable horse and saddle up for a fun ride. The low, wide base provides stability as children practice motor planning, weight shifting and weight bearing to climb on/off. Bouncing in place also promotes core control and balance, while providing proprioceptive feedback, making this toy a good choice for children who are in need of extra sensory input and stimulation. In addition, children can practice pretend play skills and enhance language development as they feed and care for their new friend. Horse is 22" head to tail, and sits 10" off the ground.

Air pump included.

917349

Pillow Racers

Little Tikes

Cuddle toy, racer and plush animal pal combine for spin-around, free-wheeling fun! Walls, tables and toys won't be obstacles for long as children cruise on casters and spin to move in any direction for uninterrupted travels. Ride low to the ground with the wide base, handle and bottom stabilizer bar. Or, remove the handle to encourage tummy time exploration! The no-brake, free-wheeling design offers children a lot of movement with little exertion. And when their ride is done, remove the machine-washable pillow top for a cushioned rest!

Wagon for Two Plus

Step2

Whether you're touring the town or just your backyard, this wagon offers opportunities for new experiences, social interaction and skills practice! The easy-latch door opens to two contoured seats with safety belts and a deep leg well that, together, provide reasonable stability for riders. Children help develop their motor planning and gross motor skills as they step in and sit down, then stand up and step back out. The long pull handle lets caregivers do the walking, and lets children who are not ambulatory feel the sensation of movement. Best of all, the facing seat configuration provides social opportunities for two children to sit and enjoy a ride together! Weight capacity: 75 lbs.

484018 Blue

684320 Pink

Disney Mickey's Color Adventure Playland

Moose Mountain

'Round and 'round they go! Whether kids are dropping balls in—or just sitting inside and watching—this Mickey-themed inflatable clubhouse offers totally engaging sensory and social opportunities. Older children will enjoy big-muscle challenges as they grasp and toss the 5" balls into the top, while younger or less-mobile children visually track the bright, primary-colored balls as they swirl down and around, then spill out and fill up the ball-pit floor. The circular base offers enough interior room for three small children to have a great view and share the experience. Reinforce color recognition by asking kids to name the color of each ball as it descends downward. Or, encourage social interaction by having one child pick up a ball using one or both hands, then handing it to another player to throw into the top. In addition, the open sides give caregivers easy accessibility to children who need extra support while sitting.

Wooden Ramp Racer Imaginarium

Racers, start your engines for learning and fun! Cheerful cars come racing down colorful ramps to the delight of little drivers. Choose any one of the four bright roadsters, release it at the top of the ramp, and watch as the racing fun begins! Holding and positioning the cars helps strengthen fine motor skills, while watching them maneuver around the track helps develop the visual tracking skills necessary for reading. Making the cars whiz down the ramps also builds an understanding of cause and effect, as well as event sequencing. Best of all, multiple cars invite family and friends to join in and encourage sharing, turn taking, good sportsmanship and social interaction.

159635

Deluxe Pounding Bench Imaginarium

Pound one peg down... and another peg pops up! Eight colorful pegs are paired on levers, so one comes up as the other goes down. Built to take a pounding, the solid-wood bench and non-removable pegs help little carpenters hammer home eye-hand coordination, arm strength, color identification, cause and effect learning and simple counting skills. In addition, many children will enjoy the rhythmic movement, steady beat and proprioceptive input that simple pounding produces. Includes bench, eight pegs and mallet.

Chuggington Wooden Railway Beginner's Set Learning Curve

Get on the right track to skills practice and development! Little engineers practice problem solving, sequencing, motor planning, bilateral movement and eye-hand coordination skills as they assemble the interlocking track pieces and couple the engines. Next stop, coordination, visual perception, gross and fine motor skills as children help the engines wind their way around the track. This playset is perfect for sparking new Chuggington stories or recreating familiar scenes. What's more, it provides opportunities to enhance language development as children provide the sound effects and train escapades! 13-piece oval set includes Wilson, Koko, traffic signal sign, plus bonus Vee figure.

708226

25

Mega Bloks Play 'n Go Table

Mega Brands

Bright and bold, this 3-in-1 construction activity travels anywhere and unfolds in a snap! The building platform is divided into four sections, and provides a focused play space for children who have attention difficulties and need boundaries for play. From a multi-story house with garage area, to secret passageways and spectacular arches, children's creativity blossoms as they construct an entire town with differently sized blocks, friendly figure and cool car. What's more, the blocks connect to each other easily, providing stability for building fun. And when play is done, just store the pieces in the self-contained unit, fold up the legs and stow away until the next architecturally inspired adventure!

460217

Mega Bloks 80-Piece Sets

Mega Brands

Big blocks for little hands! Oversized, easier-to-handle design enables children to apply a whole hand grasp to manipulate the blocks as they sort, stack and build. Help develop math skills by creating patterns, either by color order or size. Continue math concepts by counting the blocks or counting the connector points on each block. Introduce or reinforce the concept of alike and different, as well as size discrimination (bigger/smaller), by having your child identify by sight or feel the differences in block sizes. Best of all, this activity offers the opportunity for peer socialization and cooperative play as children work together to "construct" a fun time!

942052 Classic

921960 Pink

Duplo Creative Cakes

LEGO

From cupcakes to sheet cakes, slices, pies, muffins, meringues and more, little bakers have the perfect recipe for “whipping” up “yummy” creations with this colorful, 55-piece building set! Children will enjoy putting together dessert combinations as they develop and refine language, fine motor, eye-hand coordination and problem solving skills. In addition the container top doubles as a serving tray, so children can share their culinary creations with family and friends as they reenact the social stories underlying birthday parties, bakeries and so much more! Incorporate general math skills into the mix and have your child sort, pattern and match pieces before giving everyone a “slice.” Or, take pictures and assemble a photo portfolio of past creations!

Builders of Tomorrow Bricks & More Deluxe Set

LEGO

Your child is the architect designing, planning and building structures as big as his or her imagination! This 650-piece basic construction set provides a fun way to unleash and encourage creativity, while helping to develop freedom of thought and problem-solving skills. Bricks come in nine colors and assorted sizes. Begin by building a simple structure and have your child recreate it, or vice versa. You can also heighten spatial awareness and incorporate concepts such as matching, sorting, grouping, patterning and counting as your child builds anything from a house to a sailboat and much more!

“Each day, we celebrate what Chloe can do and not focus on what she can’t do yet. She amazes everyone with her determination to conquer every obstacle she encounters.”

Valerie, Chloe’s mom

Lalaloopsy Silly Hair Doll

MGA Entertainment

“Sew” cute! Little stylists challenge fine motor skills as they create fun hairdos for this adorable doll. The doll’s hair has a wire core that bends and stays the way it’s styled. And unlike traditional limp locks, this feature keeps the hair stiff so it’s easier to add embellishments. Because there are duplicates of each piece, caregivers can model how to twist, style and accessorize on one side and have the child copy on the opposite side—or even out-do that ‘do with a style all her own! “Sew styling”, this doll provides engaging opportunities to encourage decision making and inspire originality.

729798

Calico Critters Family Camper and Cherry Cruiser

International Playthings

Cruise around Cloverleaf Corner, Critters style! Sized right for tabletop or floor-time fun, these toys provide wonderful opportunities for imaginative play, as well as language and vocabulary development, as children tell travel tales about camping adventures. The top hinges on the camper open and a side folds out for easy access to reveal familiar bathroom and kitchen settings. Caregivers can ask questions or comment on the activities in the camper to stimulate additional thought. And when it's time to call it a day, hitch the camper to the Cherry Cruiser and head on home! Critter families sold separately. **353741 Family Camper**
724811 Cherry Cruiser

My First Crayons

Crayola

These triangular-shaped crayons can provide the key to unlocking creative energy! The shape not only makes coloring more accessible to more children, it also helps them position their fingers correctly for the tripod grasp used for handwriting. And as an added bonus, the crayons won't roll out of reach of children who have physical limitations. This set of eight is perfect for beginners to explore simple color identification, while practicing basic fine motor skills. Best of all, the resulting works of creative expression generate artwork worthy of refrigerator-door placement—and self esteem that can be worn with pride!

295512

My First Washable Markers

Crayola

Your child's imagination will grow with each scribble, stroke and wiggle! The special design lets children draw using a whole-hand grasp, while the size and shape are especially helpful for children who have developmental delays and aren't yet using a more refined pincer hold. Too much force? Not enough force? No problem! The rounded marker tips work well regardless. And, success builds self esteem, motivates continued drawing and allows children to express themselves in wonderful, open-ended, creative play! Includes two bright and washable character markers.

295210

Color Wonder Metallic Paper

Crayola

Let your creativity shine! The paper provides the magic... kids provide the inspiration! This metallic paper lets them create steely blues, radiant reds and shimmering greens. Plus, magical metal textures add dimension and detail to the mess-free designs. The immediate shine captures attention, while the gradual color development holds attention and inspires continued play—even for the most reluctant artists and writers! Children also can shine by practicing mature pencil grasp, making strokes and shapes, and writing letters and words!

576399

Travel N' Doodle

Spin Master

The same Aquadoodle fun in an easy-to-carry, compact format! Fill the Doodle pen with water and start drawing on the specially treated cloth surfaces. Water will not drip or spill out for a mess-free creative activity option. The drawings disappear slowly, letting children finish their work of art, enjoy it and show it off before it fades. This three-to-four-minute delay can help budding artists who have attention difficulties work on focus and patience. In addition, the fading phase can be used to count the seconds it takes for the drawing to disappear completely, or recite the alphabet or sing a song during the wait time!

Magnetic Double Easel

Crayola

Two easy-to-clean work surfaces with 4-in-1 fun! Double-sided easel with built-in paper holder is ideal for encouraging little artists to express themselves creatively. Use the letters and numbers for literacy skill development. Get large muscles moving by having children make broad strokes on the board. Or, provide opportunity for fine-motor activities by encouraging a detailed work of art or handwriting practice. The stand-up design also helps children maintain an upright position for play. Includes 4 detachable storage bins, eraser and 77 magnetic letters and numbers. 22.5"W x 27"D x 43"H assembled.

215411

Squishy Baff

Imagine

Just add water to concoct glorious, gloppy, goopy goo! Colorful, odorless, non-irritating Squishy Baff is sure to delight little sensory seekers. Fill the bathtub for whole body emersion. Or, use it in a plastic tub for more focused play or to accommodate individuals who need to remain seated. As the goo oozes between their fingers, ask children to describe the feeling, then watch it plop and grab another handful. This stimulating yet soothing, sensory play introduces children to a new experience of texture, temperature and total fun! Enrich the play experience by tossing in a few cups, spoons and figures. Includes enough powder to make two baths of goo.

MagnaDoodle Deluxe Doodler

Cra-Z-Art

Draw pictures, create fun learning and skill-building games, or write messages. Then, erase and begin all over again! Kids hold the attached stylus pen as they would a pencil or crayon, then draw on the extra-large magnetic surface. They can also use the design stamps to embellish their temporary works of art. And when they're ready to start something new, all little artists need to do is use the easy-slide eraser to magically clear the screen! This self-contained take-along toy with carry handle and snap-in storage provides fun opportunities to practice pincer grasp and eye-hand coordination. Includes 3 design stamps.

738213

Hanging Wild Animal Plush

Toys“R”Us Plush

Everyone wants a best buddy they can hang with! Kids can't help but respond to the soothing sensory appeal, gentle smiles and extra-long arms of these plush jungle pals. Use the touch-fasteners to provide warm embraces—even if the child can't hug back. Or, use the fasteners to help the animals hitch rides on strollers, wheelchairs and backpacks—or just about anywhere! These non-threatening cozy, cuddly creatures are perfect for providing comfort and companionship. Choose from lion, giraffe or tiger, each sold separately.

688947

AniMagic Fluffy Go Walkies

Vivid Imaginations

From side-by-side strolls to playing in the park, this loveable puppy will follow you just about anywhere! When Fluffy gets excited, she makes happy barking sounds, encouraging little pet lovers to respond with vocal sounds and expressive language. The on/off toggle switch controls the walking and barking and lets children naturally transfer their attention to uninterrupted creative thinking and imaginative play, without having to stop and remember how to reactivate the dog. In addition, the leash is attached permanently, keeping Fluffy within physical reach and field of vision for continued play. Colors may vary.

594371

Zibbies

Toys“R”Us Plush

Cute and compact, these comical creatures provide the perfect combination of the comfort of plush and the intrigue of rubber! Perfectly sized for small hands to grasp and carry around, these amusing animals make great fiddle toys that keep flapping or busy hands active and involved. Plus, the stretchy Hyperflex hair expands to ten times its original size and returns back to its original form once released, encouraging fine motor skills practice while adding tactile and visual interest. Kids will be tempted to toss, squish, squeeze and stretch 'em. But no worries! These playtime friends stand up to rough treatment, and are shaped not to roll out of reach! Each sold separately.

John Deere Big Scoop Dump Truck Learning Curve

Built strong—and made to motivate children to get strong, too! Rough and rugged, this 15" plastic dump truck will have little construction workers moving, pushing, lifting and pulling. Children use their hands to fill the bed with everything from blocks to rocks... then raise their arms to lift and dump! Reciprocal leg movement comes into play as kids navigate backyards or living rooms to load and make deliveries. Best of all, imaginations soar as pretend play, language development, thinking, gross and fine motor skills become part of the crew.

239829

Little People Wheelies Zig the Big Rig

Fisher-Price

A friend for the long haul! Simply press any of Zig's four activation points and he rewards little truckers with speech, fun sounds, light effects and animated facial expressions. Use a whole hand movement to depress the large activator button on the roof and watch as his side flips down and the car rolls down the ramp. As children crawl alongside Zig, they'll work on weight shifting, balance and reciprocal leg movements—all skills necessary for walking. The open-top design makes loading fast and easy. And, the quick action, silly sounds and fun phrases will keep kids moving for more! Includes one mini-vehicle with built-in figure.

281694

Big Adventures Raceway Play Set

Little Tikes

Racing reaches new heights! Action and adventure come together with this fast-paced play set. Push the large lever, wait for the lights to change from red to green, then watch as the cars hit the track. The course is quick, and the stunt racers flip as they drop to the finish line. The winner is even heralded with a checkered flag! But, the skills pit crew is the real winner as racers extend their arms to place the cars on the track and visually track the action. Racing with a friend or family member provides opportunities to introduce the concept of competitive play and to practice social skills, as well as the rules of good sportsmanship. Includes 2 stunt flipper cars.

Hungry Hungry Hippos

Hasbro

It's fun to find out who has the hungriest hippo! Use an isolated finger or an entire hand... because one repetitive movement is all that it takes to start the frantic feeding! It's simple. Whoever munches the most marbles wins. Plus, no reading is required. Players are also introduced to the concept of competition using parallel play—instead of turn-taking—for a less-frustrating, more fun-filled, first gaming experience! For 2-4 players. Includes game base, hippos, levers, marbles, stickers and instructions.

231924

Hexbug Nano Habitat Set

Innovation First

Create a customized habitat for your favorite micro-robotic bugs to explore! The track walls are high enough to keep bugs secure, but still easy for children to see. Open or close the gates to lead the Hexbugs down different paths. For a totally tactile sensory experience, allow children to put the creatures on their skin and feel the tickle of the bugs' bristly rubber legs. In addition, these fast, scurrying bugs can help exercise eye muscles as bug-keepers visually track movements. Includes 2 Hexbug Nanos, 10 interlocking pieces, 7 bridges and 3 hex cells. Add more Nano creatures (sold separately) and create a commotion!

328018

The Trash Pack Trashies Collectible Figures, 5-Pack

Moose Toys

Packed in pails, these grubby, rubber mini-figures are the perfect pocket pals for children who need to fiddle in order to focus. Kids can benefit from each Trashie's small size, special texture and shape. Plus, Trashies are quite quiet, so they won't clank and create classroom chaos! This feature is especially beneficial for children who have attention difficulties by helping to keep hands busy—and minds on task. Game options test manual dexterity and eye-hand coordination. Expand social interaction opportunities and hone game-play etiquette by inviting friends to join in the fun.

229986

Air Hogs Heli Blaster

Spin Master

Ready. Set. Rocket! Stomp on the launch pad and watch as the rocket blasts up to 50 feet in the air, then descends back to earth like a helicopter. The four-step play process requires children to load the blaster onto the tower, stomp on the launch pad, visually track the launch and recover the rocket. The stomping action provides proprioceptive feedback, and can help channel energy and aggression as the pad becomes the target. In addition, children help strengthen leg muscles as they add force to the launches and work on developing eye-foot coordination, weight shifting, weight distribution and balancing on one foot. Play alone or add social support by inviting friends and family to witness the blasting action!

The Big ABCs

FAO Schwarz

Learn ABCs the FAO way! This colorful, interactive learning tool includes over 50 embroidered and removable pieces. The lowercase letters have touch-fasteners on the back, making it easier for kids to match up letters to the permanent, uppercase counterparts. Advance letter recognition and expressive language by having children pair up the pictures with the corresponding letters and then tell a story about the picture. And because the letters are already there, little learners don't have to rely on memory and formation to spell simple words! With its contrasting black background, vibrant colors and the familiar dotted-line format, this mat soon will have kids singing, "Now, I know my ABCs!" 34"H x 45"W.

716119

Mickey Mouse Upholstered Chair

Delta

A kid-sized chair with real mouse-appeal! This low-to-the-ground, perfectly sized seat puts children in a physical and emotional comfort zone. The padded high back and sides provide upright support, and provide children with gravitational insecurities the ability to feel their feet flat against the floor. Whether children want a little quiet time to rest and relax, watch a favorite movie, or focus and read, Mickey comes through like a big personal hug! Hardwood frame is covered with polyurethane foam and upholstered in wipe-clean, durable polyester fabric.

King/Knight Reversible Tunic Imaginarium

"Hear ye, hear ye!" Imagination shall reign supreme! This majestic, reversible tunic features one royal red side with a gold emblem fit for a King, and a reverse black-and-silver side perfect for daring Knights. With open sides and adjustable ties at the waist, young lords will feel self-reliant as they successfully slip this tunic over their heads and become immersed in a world of imagination. The sparkly, eye-catching fabric is soft and comfortable, especially for those who are tactilely defensive. A black knight's hood and golden king's crown finish off these enchanting looks for the full regal effect. Creative thinking and social skills get the royal treatment as children participate in pretend play and interact with friends and family.

737144

Doctor Dress Up Imaginarium

"The doctor will see you now!" Realistic white doctor's coat and kid-sized play stethoscope provide the perfect prescription for fun. Hands-on role play offers a great way to encourage your child's creativity and imagination, while helping to develop social skills. If fear of doctors is an issue, have your child act out any apprehension and, through observation and interaction, help your child work through the anxiety. Set includes two-piece scrubs in blue or pink, white coat, cloth mask and hat, and play stethoscope.

737149

Lifestyle Legacy Kitchen Set

Step2

With recipes to imagine, family and friends to serve and tools to organize, this kitchen offers the perfect recipe for creative learning! Accessories like pots, pans, dishes and utensils allow mini-chefs to practice skills such as grasping with their hands, stirring with their wrists and serving with big smiles. Children who are working on supported standing can cruise along the curved counters, while the two counter heights help them reposition their hands to balance themselves. Kitchens provide a familiar theme to introduce new vocabulary, practice manners and encourage social interactions. 46"H x 39"W x 16.75".

My Clubhouse

Step2

Sometimes, kids just need their own space. And this backyard clubhouse offers plenty of safe and fun ways to play! The window sills and tables are just a hand's reach away for added stability and confidence as children navigate the space, negotiate weight shifting and practice foot placement. Doors and frames are built to keep little fingers safe from pinches. Plus super-fun features, including a secret compartment, colorful decal stickers and peephole, will keep little adventurers engaged, while developing the thinking, creative, and motor skills accessed naturally during play. In addition, the picnic table is perfect for focused alone time. Or, help build social skills by sharing snacks, coloring or playing board games with family and friends!

197154

“Sadie is my role model. She has had to work so hard to reach milestones that are so easy for typical kids, and she does it with a smile on her face!”

Marissa, Sadie's mom

Cozy Coupe Shopping Cart

Little Tikes

Add fun to the list as little shoppers prepare to stock up at the grocery store! The cab of the friendly faced, classic coupe is perfect for a favorite doll or teddy to take along for the ride. And as children “shop,” they can use the cart to stabilize themselves as they practice balance, weight shifting and reciprocal leg movements. Shoppers also work on fine-motor skills and practice grasp and release as they add or remove items from the large basket. Thinking skills top the list as kids identify familiar objects and practice concepts such as in/out, push/pull and go/stop as they load/unload the cart. This shopping cart provides a fun way to provide hours of open-ended play!

453172

My First Scooter

Radio Flyer

The perfect scooter for beginners! The wide base offers children plenty of room for foot placement. Plus, two wheels in the front and one in the back help stabilize the scooter for a successful ride. The tapered base creates a clear kick path that lets kids push on the ground to propel forward without hitting the scooter, while the easy-to-use foot brake offers added safety and control. And as children experience success, they will be motivated to continue to move and ride, increasing activity levels, reducing stress and heightening confidence and mood! Comes fully assembled.

757932 Red

757880 Pink

Bubble Mower

Fisher-Price

The classic bubble toy is back and better than ever! The mower features updated styling for improved ground clearance, all-terrain traction tires and a deeper well for the bubble solution so there's less spillage and more bubble action. As little landscapers push, bubbles shoot out of the side, encouraging walking and pretend play. The faster kids push, the more bubbles they'll make. And when the well runs dry, simply push down on the bubble bottle to refuel the action!

Jumpsmart Electronic Trampoline

Diggin' Active

Kids will jump for joy as they bounce along to fun learning games and silly songs! This triangular-shaped trampoline features rubber-coated handlebars for added stability. As they bounce, children receive stimulation and input from their joints that can help regulate and provide inner balance, positively affecting attention and organizational skills. Best of all, every bounce is rewarded with sounds or music! This instant reinforcement helps further cause and effect learning and motivates kids to keep jumping. In addition, five programmed games keep children engaged and active! Sturdy enough for children up to 80 lbs.

013290

Gro2Pro Basketball

Fisher-Price

This portable basketball system will be a slam-dunk favorite for kids of all ages and abilities! The adjustable pole can be positioned at 3', 4', 5' or 6'H. Use the lower height settings for players who need to remain seated or use wheelchairs. As skill level improves, raise the height to increase the challenge. This system is perfect for perfecting shooting skills and introducing concepts of competitive play, turn taking and cooperative teamwork. Eye-hand coordination and gross motor skills also score big! Use indoors or out. Base can be filled with sand or water for greater stability. Ball included. Assembly required.

616491

Pop Up Junior Goal Franklin Sports

And the skills team scores! Use your hands or use your feet. Use play balls, footballs, soccer balls or baseballs to help develop motor planning, gross-motor and visual-tracking skills, as well as improve visual acuity and eye-hand/eye-foot coordination. Lightweight, portable goal pops open, sets up and breaks down in seconds for play—indoors or out. Position the net according to each child's ability to increase chances for success. Caregivers can also create accessible and/or inclusionary activities for children who need to remain seated or who use wheelchairs so that everyone gets in on the fun! 4'3"W x 3'2"H.

053622

Weather Blitz Junior Football

Nerf

It's a touchdown for the skills team! Throwing and catching a football with friends is a fun way to encourage social play, eye-hand coordination and whole body movement. The weather-resistant, textured surface and finger grips help kids grasp and catch the ball using one or two hands. And as they throw the ball, kids positively affect upper-body strength, trunk rotation and arm extension. Players must also use two hands together at midline to catch and hold the ball, rely on their visual acuity to throw to a playmate, use appropriate timed release to throw the ball, and visually track the ball's flight through the air. "Yay, team!"

Dr. Seuss Super Stretchy ABC Game

Wonder Forge

Can you put your hand on the letter E, while placing your foot on the letter K, and also put your ear on the letter Q? In this silly game of physical challenges and alphabet fun, players use their visual, auditory and kinesthetic senses as they keep their whole bodies in motion, while turn taking, learning and having fun! The alphabet mat features high-contrasting, large red letters against a white background with whimsical pictures that correspond to each letter. Opponents issue the challenge by reading the coins aloud. The more coins collected, the better the chances of winning. A fun, physical way to twist, turn and s-t-r-e-t-c-h, while putting bodies and brains to the test!

787933

The Cat in the Hat I Can Do That! Game

I Can Do That! Games

This game brings the classic Dr. Seuss book to life, and is sure to get youngsters up and moving. Children practice pre-reading skills as they learn to follow directions using the word and picture cues printed on each card. Activities are physical, and combine balancing, jumping, sliding and more. Players collect the cards as they perform the activities. After all the cards are used, children can count up their points and determine the winner. The possibilities are endless—and hilarious—and will have players of all abilities celebrating their “I Can Do That” attitude!

930463

Roll & Play

ThinkFun

Looks like a plush toy, acts like a game! And, the concept is simple and easy to follow. Just toss the oversized, cloth-covered foam die and watch which color it lands on. Then, pick a card of that color and do what it asks you to do! Before the game even begins, children are practicing matching and color identification skills. Game cards prompt plenty of parallel, cooperative play opportunities and touch on subjects children naturally want to explore. Best of all, players learn to follow a simple sequence of steps, while gaining exposure to the basics of cooperative play without any competition!

Mr. Bucket

Hasbro

Three balls in and you win. But it's not as simple as it seems! Players try to toss their balls into Mr. Bucket as he whirls and moves around. Just when they think they've got the balls in—watch out because he pops 'em right back out! Players help develop gross motor skills as they bend and squat to retrieve the balls. Eye-hand coordination and fine motor skills also come into play as children use the shovels to pick up and toss the balls in. Two to four players can enjoy the giggles while learning to cooperate. Includes bucket, shovels, hands, balls, arms, labels, nose and instructions.

Angry Birds On Thin Ice & Angry Birds Knock on Wood

Mattel

Angry Birds takes on a new dimension! With all the excitement of the best-selling app, this hands-on building game continues the battle between the birds and egg-stealing pigs, transporting children from an abstract two-dimensional screen into the real world. Fine motor practice is launched as children build structures with the easy-to-grasp pieces, while learning balance and weight distribution as they replicate the structures pictured on the cards. Through trial and error, players must determine the correct pressure to use with the slingshot-style launcher, and then visually track their bird as it attempts to connect with its target! Includes birds, green pigs, structure pieces, launcher and mission cards.

Disney Hedbanz

Spin Master

"Do I have wheels?" "Do I live in water?" "Am I a princess?" Hedbanz is the fun game of "What am I?," where everyone knows, but you! The first player to figure out which Disney character is on his or her headband wins. This reading-optional game can help children learn how to formulate and ask questions. Each card features a simple illustration of a familiar Disney character that provides visual cues for game opponents. The adjustable Mickey Ears headbands can be sized to fit young children to adults, and act as cardholders for a hands-free gaming experience. Includes 6 headbands, 24 Mickey chips, sand timer and 74 cards. For 2-6 players.

Connect 4 Launchers

Hasbro

Finger-flicking fun! This fast-flying checkers game calls for children to bring it on with strategy, skill and finger-strengthening workouts. Players load their launcher, fire their checkers and do their best to land four in a row on either level of the game board. Eye-hand coordination, fine motor precision, physical skills and a touch of luck are the keys to success as players strive to be the first to make their checkers connect! The game includes three different challenges that can be modified according to ability. In addition, launching practice provides isolated finger exercise that can help ready children to use a communication board or touch screen.

651429

“Peter doesn’t let his hearing loss hinder his love for music. There is nothing better than seeing his eyes light up when he hears his favorite song.”

*Peter, Sr.,
Peter’s dad*

Spot It!

Blue Orange Games

Spot it. Match it. And win! Sure to inspire laughs and friendly fun for everyone, this game helps develop concentration, hones visual processing and sharpens cognitive skills. Cards feature eight easy-to-identify illustrations that pop against the solid-white backgrounds. There is always one—and only one—matching symbol between any two cards. But be careful! Some images may appear similar, but actually differ in size or shape. The illustrations can also be used to practice speech and language skills, increase vocabulary and inspire storytelling. In addition, social skills come into play as children learn game etiquette, turn taking and good sportsmanship.

655573

Scramble!

Hilco

Be the first to put the pieces in the proper space! Scramble is a fast-paced game where players work against each other—and the clock. Players are challenged to place all the differently shaped pieces into the corresponding slots before the timer is triggered. And when players time out, the board bounces and shakes all the pieces free! Two players can team up and use their combined manual dexterity, control and manipulation skills to work together. And for more simple gameplay, eliminate the timer and pre-place some of the pieces for greater chances of success. Children also can begin to learn how to win or lose with grace and practice patience as they wait their turn.

718524

Scrabble Flash

Hasbro

An electronic twist on the game classic! Each of the five interactive SmartLink tiles reveals a letter on its display screen. Players must slide, swap and shuffle the tiles to build a word. Success is signaled when all screens light up and beep, providing both auditory and visual reinforcement! Novice players can use fewer tiles as they work on spelling and begin to understand the “parts to whole” relationship of letters. The tiles also can be used to teach letter identification and alphabetical order. Best of all, there’s no need to count up or keep score—the smart screens do it automatically. Scrabble Flash offers fast-paced, word-building fun for players of all levels!

Justin Bieber Singing Doll

Now Beliebers everywhere can rock out to the chart-topping teen dream's hit song, "Boyfriend," with their very own singing Justin Bieber doll! Little fans will help strengthen fine motor skills as they press the small, raised button on the doll's stomach to hear a thirty-second clip of his popular single. In addition, the song's strong rhythm can help children clap or stomp to the steady beat, helping to improve motor function and auditory skills. Children's natural response to music and interest in the singing sensation provide an engaging way to encourage movement and vocalization. It's time for little stars to take center stage with Justin Bieber as their very own doll duet partner!

831375

Fijit Friends Interactive Toy

Mattel

Get the party started... and keep it going with Fijit Friends! These bright Besties talk, listen, dance and move, and make exciting new companions for kids to play and learn with! Fijits come in four different colors and personalities. Their smooth, pliable rubber "skin" makes them perfect for touching and tickling—even for children who are tactilely defensive. With 150 built-in responses and the ability to reply to 30 voice commands, these robot pals can help build basic language and social skills. Whether telling jokes, lighting up or showing off their super cool dance moves, Fijits offer auditory, sensory, and tactile stimulation and, most of all, a good time!

611995

Soothing Spa Set

Orbeez

Give hands and feet a treat! This spa set offers a unique sensory experience that's both fun and relaxing. Start by soaking the small, colorful Orbeez pellets in water until they expand into soft orbs. Add the optional perfume for an even more aromatic, olfactory experience. Then, encourage little ones to move their hands or feet through the mixture to feel how the orbs roll and flow for a soothing, tactilely stimulating experience. Use the soft, bouncy orbs for just one little spa-goer. Or, fill a larger container and invite some friends to enjoy the cool, calming effects together. Includes foot tub, cascading waterfall, removable hand bowls, perfume and 3,500 Orbeez. 735320

Wheelchair & Crutch Set shown with 18" Dana Doll

Journey Girls

"She looks like me!" This play set brings the topic of disabilities into play by presenting opportunities for children to ask questions and learn about people who have disabilities. Realistic-looking wheelchair features front casters for accurate movement, while the crutches will help any 18" Journey Girls doll to stand.

Plus, the doll is easy to manipulate, and offers a combination of fabrics, hard plastics and soft-cloth body parts, realistic hair and facial features, enabling children to explore textures and learn body-part awareness. Best of all, the play experience can be used to nurture imagination, advance symbolic play and enhance expressive language skills as

children interact with the doll and speak for "her" during dramatic play! Journey Girls dolls are available in different ethnicities, each sold separately.

Voice Changing Rockstar Boombox

Barbie

Get ready to let that inner rock star out! Featuring big sound and a sing-a-long microphone, this boombox is sure to have superstars-in-training strutting their stuff! While on the mic, crooning cuties can add effects such as an echo, or make their voices sound super deep, high-pitched like a chipmunk—or even like a robot! These four options can entertain little vocalists for hours, encouraging them to explore the range of their voices, while practicing enunciation, modulation, imitation and fluency. The cool effects can also motivate reluctant talkers to feel more comfortable speaking and singing into the microphone as they control the sound. You also can connect your MP3 player, so kids can perform anything from their own playlist!

688094

61-Key Light Up Keyboard

Casio

This keyboard hits all the right notes, and makes learning a new instrument fun and accessible! Pick any one of the 110 pre-programmed songs and follow the lighted keys to play. Pint-sized pianists can use the full-sized, light-up keys as visual cues to play songs without having to read books or match numbers and colors. Press one button to hear an entire song, or use the three-step lesson plan to learn notes, tempo and positioning. Plus, the piano-style keyboard keeps pace with the player, slowing or quickening the tempo of the song as needed. Try any of the 400 tones to make the keyboard sound like a banjo, saxophone, cello and more! Feel like composing something new? Get creative and make up anything from little ditties to masterful symphonies!

663248

Disco Light Karaoke

Singing Machine

Budding superstars can sing and dance to songs from their favorite CDs and karaoke CD+Gs! The acoustics allow even quieter voices to stand out as the volume is amplified, encouraging all levels of sound exploration. For those who aren't quite ready to go solo—or who just want to share the spotlight—the second microphone can be used to belt out a duet with a partner. Scrolling lyrics help build reading skills, while the optional flashing disco lights are sure to get the party started! Caregivers can also get into the act as they model sounds and help practice articulation, vocalization, vocabulary and spelling!

Xbox 360 4GB Gaming System with Kinect

Microsoft

You're the controller! The Kinect sensor uses full-body tracking that recognizes players and mirrors their every move. Exploring with the on-screen avatar helps provide children with a sense of self-awareness and movement. The sensor does require precise, controlled movements to choose games. However, caregivers can activate the game and then trade places, allowing children who have limited physical control to join in. Kinetic stimulation comes into play by way of weight shifting, jumping, balance, and arm and leg movements. Visual tracking, attention, processing and reacting also play a major role in each game. Partner up with a play buddy and add social skills to the gaming experience! Includes gaming console, Kinect sensor, Kinect Adventures game and wireless controller. Additional games sold separately. *Note: May not be appropriate for individuals who use wheelchairs, those with visual impairments or persons with involuntary movements.*

578469

Bop It!

Milton Bradley

Bop, pull and twist your way to victory! Players listen to the auditory prompts and then respond quickly with manual movements that employ a whole-hand grasp. These various actions offer fun-filled opportunities to reinforce listening skills and the importance of following directions. In addition, the unique shape of this reaction game will have kids using both hands equally, helping boppers to work and gain strength on their weaker side—without even realizing they're giving muscles a workout. And the better players get, the more skill levels they'll unlock. So, get ready to think fast!

784969

Glow Tunes Color Changing Dock

iHome

Attach your own iPhone or iPod touch. Sit back. And enjoy the show as the round base keeps the beat with brilliant colors! Set it for slow- or fast-changing lights, constant color, no color or pulse to the beat of your music. Not only does this provide soothing, rhythmic pulsing, but it also can help children who are hearing or visually impaired to see the beat of the music, and feel the vibration of the sound as it emanates from the speaker. Best of all, the ever-changing light display adds an element of enjoyment for children who have significant physical limitations. Apple® iPhone® and iPod touch® sold separately.

720032

Wii Gaming System with New Super Mario Bros.

Nintendo

Help Mario, Luigi and friends wind their way through the Mushroom Kingdom! Children can build finger placement and finger isolation abilities as they use the buttons on the remote to control the action. Players can also practice swinging their arms to improve range of motion and eye-hand coordination. The active play can also help improve trunk stability, balance and shoulder strength, and can provide children with sensory processing difficulties the proprioceptive and vestibular input they need to stay focused. More importantly, the simultaneous multiplayer action allows up to 3 children of varying abilities to play together! Includes Black gaming console, New Super Mario Bros. game, Mario Music CD, sensor bar, Wii remote and Nunchuk controller. Additional games sold separately.
