A cycling holiday in France and Italy

The French Riviera as you've never seen it between Menton, Monte Carlo, and Nice

Have you ever dreamed of exploring the most fascinating roads of the French Riviera on your racing bike?

If you love challenges, breathtaking views, and want to experience a two-wheeled adventure, then this vacation is tailor-made for you. We take you along the routes that professional cyclists love, between Menton, Monte Carlo, and Nice, on a 100% organized epic journey, where the only thing you'll have to do is cycle (and have fun!).

On the roads of Milan-Sanremo and in the historic villages of the Riviera

Join us for a unique cycling experience, a two-wheeled journey through the iconic roads of Milan-Sanremo, the scenic coastal cycle paths and historic villages that characterise the timeless beauty of the Ligurian Riviera. Designed for cyclists who want to combine sport, nature and culture, this tour will allow you to immerse yourself in the most authentic and fascinating Liguria.

MENTON BASE

The city of lemons and cyclists!

Menton is the perfect starting point. With its mix of Italian and French culture, it's the ideal place to recharge your energy before cycling. From here, you will immediately dive into winding roads, with the sea on one side and the hills on the other.

STAGES

Cote d'Azur Elite, Montecarlo and Nizza

69 km – 1130 d+

Imagine starting from the timeless charm of Menton, crossing the luxurious Principality of Monaco, and then descending towards vibrant Nice. Curvy roads that embrace the coast await you, climbs that will test your legs, but that will reward every effort with spectacular views of the Mediterranean Sea. Oh, and let's not forget the fast, adrenaline-pumping descents that will make you feel like a true champion!

Col de la Madone

79 km – 2280 d+

An iconic climb up one of the main hills of the Tour de France and then take descents that will allow us to admire the landscape crisscrossed by forests typical of the Mediterranean scrub.

Evocative passages between tunnels carved into the rock and canyons typical of the French hinterland will make this an unforgettable stop.

Di qua e di là

63 km – 1400 d+

More villages and hills from the sea to the interior via some of the most iconic and transit roads between the two states.

Hills that will make you savor the authentic taste of the border towns and the valleys crossed by rivers and streams that wind sinuously between the Italian-French valleys.
