► *Your Ag Solutions Provider!*

SOLUTIONS TAILORED TO YOU.

► One partner. Every step.

SOLUTIONS Development

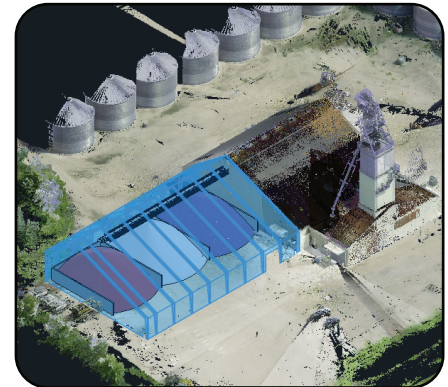

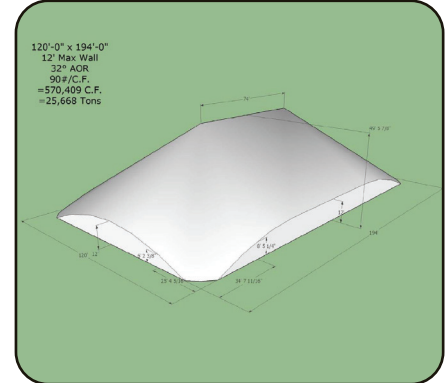

CL Construction partners with you to understand your current operations and your future goals, then collaborates on tailored solutions to help you get there. CL develops site solution options, including building designs/layouts, site layouts, and blending equipment options and then provides budgetary estimates for the options selected.

SOLUTIONS Design

Once you have chosen the option that best meets your future business goals, CL Construction will move forward with final design. CL utilizes a collaborative approach to turn concepts into 3D/2D designs using the latest scanning and design software to visualize the building, equipment, and site to ensure all the design and engineering details are accounted for.

SOLUTIONS Delivery

CL Construction simplifies your project through single-source coordination - managing every aspect including performing concrete work, coordinating and scheduling subcontractors, and procuring and installing equipment. CL's proven craftsmanship and construction management approach ensures your project will be completed with the highest standard of quality, on time, and within budget.

ARMOR BUILDING
Engineered for Fertilizer.
Built for Performance.

- ExxoTec™ Fabric
- EpoxxiShield™ COR Elite - Triple-layer epoxy paint system

The Premium Fabric Building on the Market!
