

WHAT WE NEED TO PREPARE YOUR ESTIMATE

Getting started is easy. Share the information below, and we'll prepare a preliminary layout and estimate based on your space. Approximate measurements are perfectly fine—we'll verify everything later if you move forward.

Cabinet Collection

- **Casa** – Custom Painted Cabinetry
- **Signature** – Custom Hardwood Cabinetry
- **Luxe** – Premium Walnut & White Oak Cabinetry
- **Summit** – Semi-Custom Cabinetry
- **Revive** – Replacement Cabinet Doors & Drawer Fronts

Not sure which collection is right? We can help based on your style, budget, and project goals.

Overall Space

Start with the basics:

- Ceiling height
- Approximate wall lengths
- Walls where cabinetry will be installed
- Vaulted or sloped ceilings (if applicable)

A simple hand sketch of your space is always helpful.

Openings & Fixed Features

Tell us about anything cabinetry needs to work around.

- Windows and approximate sizes
- Doorways and openings
- Beams, soffits, posts, vents, or other fixed elements

If it can't be moved, we should know about it.

Important Measurements

A few extra measurements help us prepare a more accurate estimate.

- Alcove or recessed area depths
- Distance from walls to islands or peninsulas
- Pantry, niche, or other unique space dimensions

Approximate measurements are perfectly fine.

Appliances & Utilities

Let us know what will be part of the project.

- Refrigerator
- Range or cooktop
- Wall oven or microwave
- Dishwasher
- Sink location
- Hood vent or gas line (if applicable)

Photos

Photos help us better understand your space and project goals.

- Straight-on photos of each wall
- Corner views of the room
- Ceiling and floor areas
- Inspiration photos, Pinterest ideas, or examples you love

A NOTE ABOUT YOUR ESTIMATE

Your estimate is a starting point based on the information you provide. If you haven't selected a cabinet collection yet, we'll help recommend the collection that best fits your project and budget.

Approximate measurements are all we need to get started. Final pricing is confirmed after site measurements, selections, and project details are finalized.

Our goal is to provide a realistic estimate so you can make informed decisions before moving forward.
