

ADVANCED SERIES TWIN

Whole House Water Softening System

Water Softening System

Advanced Technology Efficiently Softens
Water and Prevents Scale Buildup

- Give your family the benefit of soft, hardness-free water for a smoother, more enjoyable daily routine.
- Makes cleaning easier and saves you money on soap and detergent by reducing the amounts needed.
- Enjoy spotless dishes and utensils, along with plumbing fixtures that remain free from unsightly scale and buildup.
- Wash your vehicles and recreational equipment with water that's free of hardness to prevent spots and achieve a flawless look.
- Protects and extends the life of your water-using appliances.
- Continuous supply of soft water, no down time for regeneration.

Remove Water Hardness

Eliminate unwanted hardness and minerals from your household water, whether from city sources or private wells, with this water system. It can be used on its own or alongside filters and neutralizers to address a variety of water challenges.

Advanced Series Twin Features:

The Advanced Series Twin smart valve optimizes performance by adapting to your family's water usage, reducing waste and salt consumption. Its internal battery backup preserves settings and time of day, ensuring uninterrupted operation during power outages. Built with premium 10% cross-linked NSF-certified resin and commercial-grade, high-strength components, the Advanced Series Twin delivers superior durability and continuous supply of soft water.

Lifetime Warranty

Limited Lifetime Warranty - on brine tank, resin tank, ion exchange resin, and valve body for a lifetime. All other parts (excluding consumables) are covered for 10 years.

See Terms and Conditions

Premium Grade Resin

Engineered for high-capacity performance, this premium-grade resin delivers exceptional ion exchange efficiency and long-lasting reliability, making it ideal for all water softening applications.
