FE26

Premium Water Filtration

The **FE26** Iron Removal System provides an effective, natural solution to remove foul odors, rusty iron-colored water and metallic tastes from your family's water supply.

This system is designed to be environmentally friendly by eliminating the need for chemicals and replacement filters, making it virtually maintenance-free.

Using compressed air, the incoming water passes through an air pocket where the iron is naturally oxidized. The oxidized particles are then filtered out and backwashed down the drain, delivering clean, iron-free water for your family.

Benefits:

- Clean, Iron Free Water, Naturally
- No Messy Chemicals
- No Replacement Cartridges
- Sediment Filtration Down to 3 Microns
- Removal of Foul Odors Such as Hydrogen Sulfide

1 CuFt

Designed for households of 2 to 4 people, this system offers a lifetime capacity of up to 1,000,000 gallons, with a media life expectancy of approximately 10 years.

2 CuFt

Designed for households of 4 to 6 people, this system offers a lifetime capacity of up to 1,500,000 gallons, with a media life expectancy of approximately 10 years.

***Lifetime Warranty**

Depends on wafer usage and wafer quality conditions. Not intended for microbiologically unsafe or unknown wafer quality. Disinfection may be required.

System Specifications

3/4" - 1.5" Inlet/Outlet sizes also available by request.

Tank Size	Weight	Width	Depth	Height	Inlet/Outlet
10" X 54"	115lbs	10"	10"	61"	1"
12" X 52"	150lbs	12"	12"	59"	1"

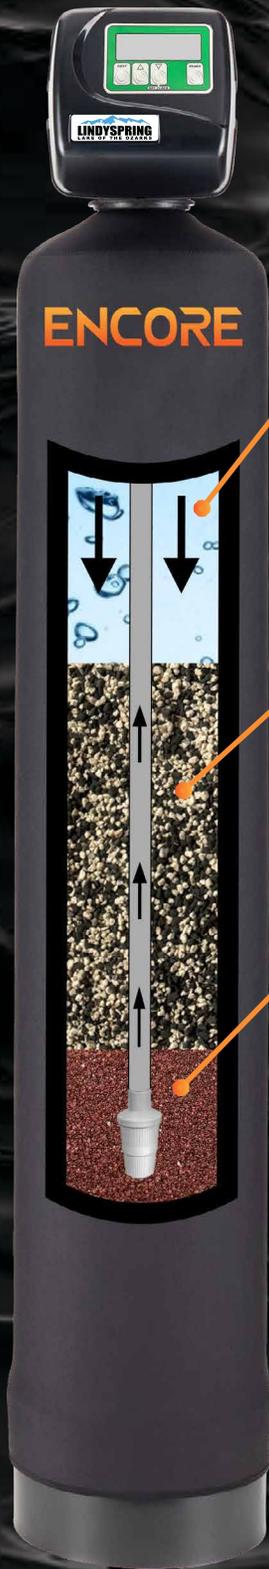

Recommended PSI usage is 80 psi. Intended for residential use only.

**Lifetime warranty excludes medias and consumable parts.*

FE26

Water the way Nature Intended

The FE26 utilizes the Clack metered control valve efficiently reducing waste water by 30% for reliable pure water.

Compressed Air Pocket

As the water passes through the air pocket, iron and sulfur are oxidized and dissolved oxygen is added to the water. The filter media bed then removes iron and sulfur from the water.

Pro Blend Katalox Light / Filter Ag

A blend of light weight media that removes iron, lead, manganese, arsenic, hydrogen sulfide, and heavy metals. Also filters out particles as small as 3 microns and saves on backwash water.

High Density Garnet Media

High Hardness, high density filter media, effectively filters and provides a high quality media bed for this system.

Our complete **Encore** line will give you the cleanest, worry-free, pure water for your entire family. Combine the FE26 with the **Reveal** water softening system and the **TwistPro** reverse osmosis system to get the ultimate water conditioning for your home.
