Whole House Water
Softening System

Water Softening System

A Cost-Effective Solution Designed
To Match Your Needs

- Give your family the benefit of soft, hardness-free water for a smoother, more enjoyable daily routine.
- Makes cleaning easier and saves you money on soap and detergent by reducing the amounts needed.
- Enjoy spotless dishes and utensils, along with plumbing fixtures that remain free from unsightly scale and buildup.
- Wash your vehicles and recreational equipment with water that's free of hardness to prevent spots and achieve a flawless look.
- Protects and extends the life of your water-using appliances.
- Delivers reliably soft water throughout your entire home.

Remove Water Hardness

Eliminate unwanted hardness and minerals from your household water, whether from city sources or private wells, with this water system. It can be used on its own or alongside filters and neutralizers to address a variety of water challenges.

PROFESSIONAL SERIES

Whole House Water Softening System

Professional Series Features:

The Professional Series smart valve optimizes performance by adapting to your family's water usage, reducing waste and salt consumption. Its internal battery backup preserves settings and time of day, ensuring uninterrupted operation during power outages. Built with premium 10% cross-linked NSF-certified resin and commercial-grade, high-strength components, the Professional Series delivers superior durability and long-lasting performance for your home.

Warranty

The Professional Series is backed by a comprehensive manufacturer's defect warranty, ensuring peace of mind and long-lasting reliability. All components are covered against defects in materials and workmanship from the date of manufacturing. Warranty coverage periods vary depending on the system size and individual parts, reflecting the durability and performance of each component. *See Terms and Conditions*

10% Cross-link Resin

This resin features more cross-linking strands than standard 8% resin, providing enhanced strength and durability. As a result, the beads last up to twice as long, particularly when softening chlorinated water.
