

CHURCH ST. LIVERPOOL

PROJECT:
CHURCH STREET, LIVERPOOL

THE PROJECT:

One Church Street, Liverpool – one of the UK's busiest shopping streets – our client required a safe and efficient scaffold solution to support essential works. With such high footfall, presentation and public safety were top priorities.

THE SOLUTION:

Our team delivered a full scaffold structure complete with a bespoke façade wrap, combining a realistic building print with a bold advertising banner. We also installed a secure site hoarding to manage the perimeter and carefully planned set-up zones to maintain safe pedestrian flow and minimise disruption.

THE OUTCOME:

The result is a project that not only provides safe and compliant access but also enhances the city centre streetscape, offers a premium advertising platform in a prime retail location, and ensures public safety with clear hoarding and controlled work areas.

This is a showcase of how we combine safety, design, and commercial value in one solution.
