

replenish  
IV SOLUTIONS

Replenish IV Solutions has a team of experienced weight loss doctors that are here to help! Our program not only includes medications such as Tirzepatide and Semaglutide, but also includes access to a team of world-class doctors, dieticians, therapists, lifestyle coaches, and personal trainers.

Weightloss Medications alter the fundamental processes of the human body, weight regulation, by: reducing appetite and consequently energy intake, increasing energy expenditure, redirecting nutrients from adipose to lean tissue, or interfering with the absorption of calories.

## HOW DOES THE MEDICAL WEIGHTLOSS PROGRAM WORK?

### 1. INITIAL CONSULTATION

- You will have an assessment with our medical provider to discuss your health history, weight loss goals, and underlying health conditions.

### 3. REGULAR MONITORING

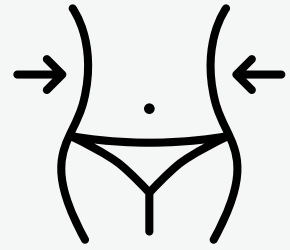

- Progress is regularly monitored through follow-up appointments, where adjustments to the plan are made as needed plus 24/7 nurse hotline access.

### 2. PERSONALIZED PLAN

- Based on the initial consultation, a customized weight loss plan is created which may include medication, diet, exercise and behavior modification.

### 4. SUPPORT & EDUCATION

- The program includes 1 free monthly mental health & nutrition counseling session plus access to personalized online meal and recipe guides, one free in person session with our personal trainer including free online personalized work out plans updated as needed and an online community support group.

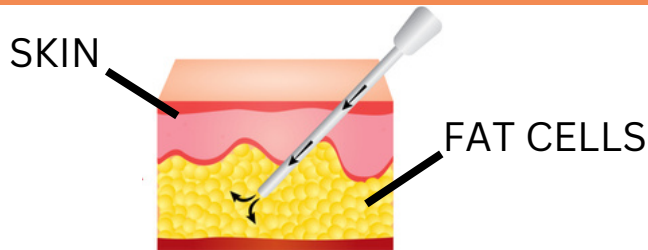

# WEIGHTLOSS INJECTIONS

## SEMAGLUTIDE

Glucagon-like peptide -1 (GLP-1) is a 30- or 31-Amino Acid-long peptide hormone, deriving from the tissue specific, post translational processing of the proglucagon peptide. It is produced and secreted by intestinal enteroendocrine L-cells.

Agonists are a class of medication that have been used effectively since 2005. They introduce extra insulin into the body to promote better sugar metabolism, better eating hormone management and noticeable weightloss.

### DESIRED EFFECTS

- Suppressed appetite and increased satiety.
- Increased feeling of fullness & reduced physical hunger.
- Improved sugar management hormones.
- Decreased blood sugars.
- Decreased sugar production.
- Decreased fat production.

### OVERALL RESULTS

- ✓ WEIGHT MANAGEMENT
- ✓ EATING SUPPRESSION

## TIRZEPATIDE

Tirzepatide is a once a week injectible medication that may help with blood sugar management and promote weight loss when used in combination with lifestyle changes.

This advanced treatment is particularly effective due to its unique blend of vitamins, minerals, and amino acids, which work together to enhance metabolism, suppress appetite, and promote overall wellness. The injection offers a comprehensive approach to weightloss, addressing the problem on multiple fronts. It's an excellent choice for anyone seeking assistance with their weight loss journey.

### HOW DOES IT WORK?

- Enhances the body's natural metabolism, thereby aiding in the weight loss process.
- The unique blend works in harmony to breakdown fats and carbohydrates in the body.
  - This boosts energy levels and helps control appetite, making it easier to maintain a caloric deficit without feeling constantly hungry.
- The nutrients help to support overall wellness, contributing to improved mood and energy levels, which can further support weight loss efforts by making it easier to engage in regular physical activity and make healthier dietary choices.
