DID YOU KNOW ABOUT ...

DPA Title III

(Defense Production Act)

What if the government invested in your company instead of just awarding you a contract?

Under DPA Title III, eligible contractors may receive loans, direct investments, purchase commitments, and other financial support to strengthen domestic production and critical supply chains.

For companies in manufacturing, technology, energy, infrastructure, or national security-related industries, this authority can open doors to funding and growth opportunities that don't follow the traditional RFP path.

If you want to better understand how federal industrial priorities translate into real funding opportunities talk to your APEX Accelerator!

FOCI

(Foreign Ownership, Control, or Influence)

Businesses may choose to partner with or accept Foreign Ownership, Control, or Influence (FOCI) because it can provide significant strategic and financial advantages.

Foreign investment or partnerships often give companies access to new capital, international markets, advanced technologies, and global supply chains that may otherwise be difficult to reach. Is this a good avenue for your business? Talk with your APEX Accelerator today!

Alliance Northwest was a huge success!

We were thrilled to see so many clients from Jefferson and Clallam counties represented—it was great to connect and see such strong participation from our local business community!
