WHY FUTURE FIT

- ✓ To embrace a “new normal”
- ✓ To impact scarcity of quality employees
- ✓ To put structures in place for businesses and schools to access each other
- ✓ To encourage businesses to fill gaps with local talent

WHAT IS FUTURE FIT

- ✓ A four-step program that introduces transformative opportunities for students beginning in the 10th grade
- ✓ Future Fit drives profound long-term engagement with our students by building a workforce talent pipeline for businesses
- ✓ Students are eligible to receive a scholarship towards a certificate, obtain marketable credential; support towards degree attainment

HOW DOES IT WORK

01 STEP

Meet with our Director of Future Fit to learn about your short-term and long-term employment needs and wants

02 STEP

Work with our team to create a mutually beneficial program that will support your business and the student's workforce development

03 STEP

Interview with one of our Future Fit scholars to determine a “good fit”

04 STEP

Train, develop and manage your new Future Fit scholar; and provide them with a meaningful experience that will fill your talent needs

Future Fit is built on an “Invest for Impact” model, which ensures that the support from our stakeholders is utilized in the most strategic and meaningful way, therefore benefitting the primary beneficiaries of the program: youth and employers.
