

A unique barrier film

**Securin Skin Barrier
combines skin protection
with adhesive strength – a
rare combination that
ensures optimal
performance.**

Securin Skin Barrier

Product Description:

Securin Skin Barrier is a skin-friendly, silicone-based, film-forming liquid designed to enhance the adhesion of adhesive products to the skin.

Securin Skin Barrier forms a protective film on the skin and helps maintain skin integrity during the use of adhesive products.

Securin Skin Barrier is applied to the skin before the adhesive product and is easy to use with the included *swap stick*. The blue tint ensures clear visibility of the application area and amount, allowing for precise and consistent use.

Additional Features:

- ✓ Forms a protective film on the skin
- ✓ Helps maintain skin integrity during the use of adhesive products
- ✓ Enhances the bonding of other adhesive products to the skin
- ✓ Silicone-based and skin-friendly
- ✓ Free from latex, oil, fragrance, and alcohol
- ✓ Blue in color, making it clearly visible during application and removal
- ✓ Reduces the risk of leakage or accidental loss of an adhesive dressing
- ✓ Can be easily removed using *Securin Adhesive Remover Wipe* or *Spray*
