Instructions for Use: Medical Adhesive Remover.

Description:
Medical Adhesive Remover is a gentle, alcohol-free spray designed to dissolve and remove adhesive products from the skin. It is particularly suitable for removal of silicone-based adhesives as it effectively dissolves and gently removes the adhesive from the skin.
Medical Adhesive Remover enables painfree removal of adhesive even on areas of skin with hair. The directional spray nozzle enables targeting the spray on a focussed area of skin thus reducing waste and unintended aerosol exposure.

Indications:
Medical Adhesive Remover is indicated to dissolve and remove adhesives when removing adhesive products from the skin.

Contraindications:
Do not use **Medical Adhesive Remover** if there is a known allergy to the contents.
Do not use **Medical Adhesive Remover** on broken skin or open wounds.

Information:
The product is silicone based. The product dries in few seconds and does not affect the adherence of subsequent adhesive products.

Contents:
Siloxane, propellant.
Furine accepts no liability for any damage or loss that may occur if this product is used in violation to Furine's current recommendations.

Caution:
Avoid use on delicate or sensitive areas of skin (in wounds, eyes, mucosa) Avoid direct inhalation.
Extremely flammable aerosol.
Keep out of reach of children. Keep away from heat, sparks, open flames and hot surfaces. No smoking. Do not spray on an open flame or other ignition source.
Contains gas under pressure; may explode if heated. Do not pierce or burn, even after ended use.
Protect from sunlight. Do not expose to temperatures exceeding 50C/122F.

Instructions for use:
Spray Medical Adhesive Remover around the edge of the adhesive while at the same time gently peeling the adhesive from the skin. Wipe the skin with tissue afterwards, if necessary.

Dispose aerosol in accordance with local regulations.
