

ENTERPRISE-LEVEL INFRASTRUCTURE FOR DIGITAL TRANSFORMATION AND WORKFORCE MODERNIZATION

SKILLS-FIRST TRAINING

- Combine structured training with point-of-need task support for real-time maintenance operations
- Automate the administration of any training program
- Record soldier certifications and individual skills
- Knowledge management warehouse with real-time content updates
- Leverage AR/VR, multimedia, and digital tools to deliver immersive, interactive training for enhanced retention

RAPID DEPLOYMENT

- Accessible, remote technical training anytime, anywhere on any device with CertiFLEX™ and Gemini™
- Quickly author and distribute new content to the field
- Built-in AI quickly accesses content across platforms
- Adaptable for any operational environment with cloud and standalone capabilities
- Configurable for full range of aircraft and related systems

OPERATIONAL READINESS

- Leverage customer content for an infinitely scalable, self-sustaining training ecosystem
- Standardize maintenance practices across the enterprise
- Easily facilitates cross-training across critical tasks
- Share institutional knowledge while reinforcing proper maintenance methods
- Communicates with existing customer systems

GEMINI™

In-site operational platform integrating AR/VR, videos, images, and technical documents and offering real-time AI assistance for training, maintenance, and troubleshooting.

SMARTS™

Workforce evaluation system tracking individual skills, capabilities, and credentials. Instantly report on personnel readiness and organizational bench strength.

CERTIFLEX™

Online training delivery platform with individual or collective training modules, CertiFLEX is the only non-service specific learning platform approved to host CUI technical content.

TAILWIND™

Integrated AI companion to enhance technical training for learners and instructors. Leverage technical content to guide learners and boost instructor productivity by generating learner assessments.
