

# Moving & Handling Strap

## Product Description

The 3ET Moving & Handling Strap for moving persons in challenging positions to more favourable locations whilst minimising the risk to those persons performing the repositioning movement. The straps are 1.5m long x 0.2m wide with strong webbing handles at either end, they are stiff enough to pass under, or to slide and work behind the body to be moved and once worked into place allow the persons performing the repositioning movement to adopt good ergonomic working positions so minimising the risk of injury and maximising their efficiency in maintaining dignity and safety.

The Moving & Handling Straps are manufactured using a continuous loop of 38mm webbing sandwiched between two layers of heavy duty PVC, the width of the strap allows the force applied to the handles to spread evenly across the body minimising any further harm or damage.

## Features

- Wipe clean PVC construction.
- Folding compact storage.
- Working load capacity of up to 400kg
- Simple to use with minimal training requirements.
- Reduces the risk of Moving & Handling injury.
- Discreet and professional.

## Specifications

Packed size:	50cm x 22cm x 1.5cm    weight: 0.5kg
Deployed size:	150cm x 22cm x 0.5cm
Working Load Limit (WLL):	400kg
Material Construction:	38mm Polyester webbing, heavy-duty Flame-Retardant PVC.
Country of Origin:	Manufactured in United Kingdom.

Conforming Standard:  **CA 015788 (MHRA)**
