

AMBULANCE CHILD RESTRAINT

REF: 2-PAR-ACR

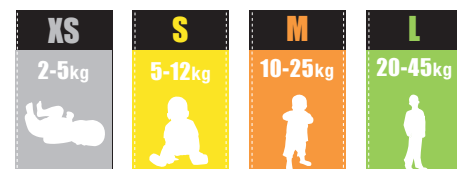

- BS EN 1789 compliant
- Weight range 2kg - 45kg
- Universally compatible with any stretcher Colour
- coding for easy selection of 4 different sizes
- Machine washable
- Quick release chest strap for medical intervention
- Long straps available

The ACR4 (Ambulance Child Restraint) is an innovative, flexible and fully adjustable harnessing system for the safe and effective transport of infants and children in a road ambulance.

ACR4 is colour coded for easy selection in four sizes from 2kg to 45kg, the broadest weight range of any dedicated paediatric harness in the world. Quick release clips dock with the ACR4 harness, holding the infant or child in place to prevent potentially dangerous movement during transportation.

A universal device capable of being fitted and secured to most common ambulance stretcher/cot quickly, the ACR4 can also be machine washed for effective infection control.
