

## Product description

The baby EvacBCOT is designed for the safe evacuation of premature and new born babies from hospital maternity wards and special care baby units in the event of a fire or similar emergency. The EvacBCOT allows the baby to be carried to safety along with its medical Oxygen cylinder if required whilst having the rescuers arms and hands free; to tend to the child, open doors or negotiate stairwells safely. Once evacuated to a safe place the EvacBCOT provides a temporary safe secure enclosure, where the baby can be monitored until being transferred back into the appropriate care equipment for their condition.

## Features

- Wall mounted wipe clean compact storage bag.
- Manufactured from wipe clean anti-bacterial Flame Retardant PVC.
- Single person operation.
- Sized to fit standard incubator baby mattress.
- Ergonomic backpack design carry system easily adjusted to operator size for maximum safety and comfort.
- Ergonomic side carry / stabilising handles.
- Oxygen cylinder pouch sized to accommodate CD, D and E type cylinders.
- Enables carers to be “hands free” to administer urgent care to the baby and negotiate obstacles whilst evacuating to safety
- Flexible strong construction allows for easy handling while maintaining adequate support and protection to the babies.
- Hi Visibility straps and retro-reflective tape
- Provides a safe secure temporary enclosure for the child after the evacuation.
- Has a secure storage pocket for additional equipment or medical notes.
- Product individual serial number
- Supplied with written product user guide and onsite training packages if requested.
