

Hoisting Kit

Product Description

The 3ET EvacPRO-F is not on its own a certified hoisting device, it was designed to be a manual handling aid for moving a Plus Sized individual. Although very strong and robust the EvacPRO-F has not been tested as a hoisting device and is not marked with a Safe Working Load (SWL) for mechanical hoisting. If the EvacPRO-F requires a hoisting capability it must be placed within a certified hoisting system. Available in addition to the standard EvacPRO-F evacuation system is the 3ET EvacPRO-F Hoisting Kit. The Hoisting Kit is a certified hoisting system SWL 400kg and comprises of:

Specifications

- 2 x 2.1m (3 section x 80cm) Hoisting Poles.
- 2 x 5m 3000kg SWL lifting strop.
- 4 x Steel screw gate 1200kg SWL Karabiner.
- 1 x Steel 5000kg SWL lifting ring.
