Emergency Evacuation Equipment & Training

Product description

The EvacPRO-F is a flexible lightweight compact stretcher system for the movement of Plus Sized persons. The recovery of larger individuals from private dwellings, care homes and other locations with restricted access and egress can be challenging for those providing a service where high levels of dignity and safety are expected. The EvacPRO-F system preserves the deceased's dignity while minimising the risk of injury to the service providers performing the movement.

The EvacPRO-F is designed to facilitate the manual movement of a Plus Sized person by maximising the use of sliding techniques where possible and minimising the impact on the personnel performing the movement through the use of good ergonomic design features that allow as many personnel as required to safely perform the manual movement.

The EvacPRO-F is designed to stabilise and securely contain the Plus Sized deceased whilst being moved, but still have a good degree of flexibility to negotiate obstacles along the transfer route. If required extra stability and support can be added by inserting a standard medical long board into the long board pocket or the Hoisting Poles (if available) into the side guide pockets on the upper surface of the EvacPRO-F. This can be performed either with or without the deceased person in the EvacPRO-F, from either the foot or head end via the Velcro openings in the pocket.

Features

- Wipe clean compact storage.
- Dignified appearance, easily transported with 2 x carry handles.
- Durable hard plastic base to move easily over nearly all types of floor surface.
- If worn / damaged the hard plastic base is easily replaced on site.
- Wipe clean Flame-Retardant PVC construction.
- Working Load capacity up to 400KG
- Can accommodate patient circumferences of over 4m
- Has a hoisting capability when used with 3ET EvacPRO-F Hoisting Kit

Features

- Product individual serial number.
- 7 x colour coded securing straps (5 + 2 Diagonal)
- Heavy duty metal seatbelt type buckles
- Colour identified handles and anchor points
- Ergonomic fixed and additional movable ladder handles.
- Pictorial person positioning instructions
- Integrated foot pocket with adjustable person sizing.
- X-Large slide sheet to assist person transfer and EvacPRO-F manoeuvring.
- Multiple operative design, accommodating up to 10 or more service providers.
- Proven system used by several emergency services.
- Supplied with written product user guide and onsite training packages if requested.

Specifications

Packed size:	70cm x 35cm x 35cm weight: 14kg
Deployed size:	280cm x 250cm x 2cm
Safety tested to:	600kg
Working Load Limit (WLL):	400kg
Deceased Capacity:	Height < 2.3m Circumference < 4m
Material Construction:	P300 Plastic base (black 2mm board is replaceable), heavy-duty Flame-Retardant PVC upper, 50mm colour coded safety webbings fitted with metal seatbelt type adjustable buckles.
Country of Origin:	Manufactured in United Kingdom.
Conforming Standard:	 CA 015788 (MHRA)
